In this case he is right.
MURS Designated Frequencies
MURS 1 = 151.8200
MURS 2 = 151.8800
MURS 3 = 151.9400
MURS 4 = 154.5700
MURS 5 = 154.6000

In this case, the PD has no business claiming their territory since the FCC has stated the frequency is open channel.

That's kind of like a PD using CB and demanding the citizens stay off the channel.

Dude, the FCC assigns who can use any frequency. MURS is not amateur radio.
The 2 meter amateur radio band consists of frequency between 144mhz and
148mz.
Just because you have a radio that can transmit outside that band, does not

grant you authority to do so.

Somehow your re-directs do not all end up in alt.test.

Please re-direct your drivel to the groups you read, like alt.test,
alt.dubass, alt.dickless., alt.coward.

Thank you..

5. Crossposting Permitted to rec.radio.amateur.moderated

Newsgroup: rec.radio.amateur.policy
Date: 2011-01-01 07:00:01 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/moderated/crossposting-1-1293865200@panix.com>
Source record: 244326
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

And you posted this off-topic article here because?

"If Barack Obama isn't careful, he will become the Jimmy Carter of the
21st century."

Where is here, Ubiquitous? Having attribution problems?

--
http://www.youtube.com/watch?v=_ipvdBnU8F8
- KRudd at his finest.

"The Labour Party is corrupt beyond redemption!"
- Labour hasbeen Mark Latham in a moment of honest clarity.

"This is the recession we had to have!"
- Paul Keating explaining why he gave Australia another Labour recession.

"Silly old bugger!"
- Well known ACTU pisspot and sometime Labour prime minister Bob Hawke
responding to a pensioner who dared ask for more.

"By 1990, no child will live in poverty"
- Bob Hawke again, desperate to win another election.

"A billion trees ..."
- Borke, pissed as a newt again.

"Well may we say 'God save the Queen' because nothing will save the governor
general!"
- Egotistical shithead and pompous fuckwit E.G. Whitlam whining about his
appointee for Governor General John Kerr.

"SHUT THE FUCK UP YOU DUMB CUNT!"
- FlangesBum on learning the truth about Labour's economic capabilities.

"I don't care what you fuckers think!"
- KRudd the KRude Rat at his finest again.

"We'll just change it all when we get in."
- Garrett the carrott

==> + BPL: ARRL SHOWS IBEC BPL SYSTEMS ARE INTERFERING, VIOLATING FCC
RULES

Late last month, the ARRL filed a complaint with the FCC, documenting
ongoing harmful interference and egregious rules violations by
Broadband over Power Lines (BPL) systems installed by IBEC, Inc. in
Virginia, Pennsylvania and Indiana. In its filing, the ARRL requested
that the FCC "initiate immediately an enforcement proceeding regarding
these BPL systems, and cause them to cease operation until such time as
they are each in full compliance with the Commission's Rules."

Contrary to earlier representations -- both to the ARRL and in
statements in the online BPL database -- IBEC's systems in these
```

locations are not universally notching the amateur bands as is
necessary in order to avoid emissions at levels that are likely to
cause harmful interference to licensed Amateur Radio stations. In fact,
measurements by ARRL staff that were independently confirmed show that
IBEC systems are not even notching the aeronautical bands. The FCC
rules require BPL systems to avoid these bands, but IBEC is operating
at power levels that cause radiation well in excess of the FCC limits.

ng-fcc-rules>.

==> + ON-THE AIR: ARRL AUDIO NEWS ONCE AGAIN AVAILABLE FROM ITUNES

The ARRL Audio News is once again available through iTunes,
beginning today. You can find the URL for the Audio News' RSS feed here
<http://www.arrl.org/arrlletter/audio/aan.rss>. To download and
subscribe to the Audio News at iTunes, log into your iTunes account and
go to the "Advanced" pull-down menu. Click on "Subscribe to Podcast,"
insert http://www.arrl.org/arrlletter/audio/aan.rss in the dialogue box
and click "OK." You are now subscribed! If you had previously
subscribed to the ARRL Audio News via iTunes, you should not have to
re-do these steps; episodes should appear in your podcast folder once
you sync your device. Step-by-step photo instructions are available
here
<http://www.arrl.org/news/em-arrl-audio-news-em-once-again-available-from-itu
nes>.

Of course, the ARRL Audio News is also available on the ARRL Web site
<http://www.arrl.org/arrl-audio-news> and via telephone at
860-594-0384. The ARRL Audio News is compiled, edited and produced in
conjunction with each ARRL Letter (except during the Dayton Hamvention,
Thanksgiving and other times as announced).

==> ON-THE AIR: THE KING OF DIGITAL CONTESTING IS HERE!

Start 2011 with one of the most enjoyable contests on the calendar
-- the ARRL RTTY Roundup, January 8 and 9. The goal is simple: make as
many contacts -- and multipliers -- as possible! While any digital mode
can be used in during the Roundup (including PSK31), radio teletype --
better known as RTTY -- is the undisputed king of this event. You won't
need to shout into a microphone or master high-speed CW to participate.
If you can type -- even slowly -- on a computer keyboard, you're more
than qualified to try the RTTY Roundup. Read more here
<http://www.arrl.org/news/the-king-of-digital-contesting-is-here>.

==> + AMATEUR RADIO IN WASHINGTON: US REP GREG WALDEN, W7EQI, TWEETS
NEWS OF NEW SUBCOMMITTEE CHAIRMANSHIP

When US Representative Greg Walden, W7EQI (R-OR), learned December
16 that he would be chairing the House Subcommittee on Communications,
Technology and the Internet when the 112th Congress convened in
January, he let the world know about it by tweeting the news in Morse

code. "Just the ham radio operator in me having fun," he posted to his official Web page. The subcommittee has jurisdiction over "interstate and foreign telecommunications including, but not limited to all telecommunication and information transmission by broadcast, radio, wire, microwave, satellite or other mode."

ARRL Chief Executive Officer David Sumner, K1ZZ, was pleased to hear the news: "We're delighted that the subcommittee is in the hands of such a well-qualified chairman. Greg was an early cosponsor of HR2160 <http://www.arrl.org/hr2160>, and while he may not always be able to agree with every ARRL position, we know his door will always be open to us."

==> + GET READY FOR THE FEBRUARY ISSUE OF QST!

The February issue of QST is jam-packed with all sorts of things that today's Amateur Radio operator needs. From product reviews to experiments to contesting -- including a look at the upcoming launch of ARISSat-1-- this issue of QST has something for just about everyone.

After years of planning, the next generation of satellites to be launched from the International Space Station is getting ready to be sent off into space. Go behind the scenes -- and discover how you, too, can get in on the fun -- as AMSAT and the Amateur Radio on the International Space Station (ARISS) program team up in "Get Ready for ARISSat-1." And if space is indeed the "final frontier," a Mid-Eastern desert is probably a close second. Join David Collingham, K3LP, and Paul Ewing, N6PSE, as they recount their DXpedition to Kurdistan in Northern Iraq in "YI9PSE Iraq 2010 -- An Extreme Venture."

Lou Burke, W7JI, wanted to add a receiver on to the QRP transmitter project he had built. He wanted the receiver to be housed in the same enclosure and to work with the transmitter in a transceiver-like mode, but still have the ability to stand alone as a separate receiver. In his article "A Compact 40 Meter Receiver," Burke says that there is nothing like the feeling you get from making a QSO with a rig that you built yourself.

ARRL Field and Regulatory Correspondent Chuck Skolaut, K0BOG, takes a look at the Ten-Tec R4020 two band CW QRP transceiver in this month's Product Review. He calls it a "transceiver with a variety of convenience features. It can operate from internal batteries, so add a paddle, headphones and antenna and head for your favorite trail location." QST Contributing Editor Phil Salas, AD5X, checks out the Mini-Circuits PWR-6GHS+ USB power sensor. He says that it is "a reasonably priced, highly accurate, very broad range power meter that is equally useful in a commercial lab or home experimenter's workshop." QST Technical Editor Joel Hallas, W1ZR, reviews the Array Solutions AS-43A digital upgrade kit for the Bird 43 wattmeter. He says this kit "provides a three digit digital readout for your tired old Bird wattmeter. While the accuracy is limited by the wattmeter slugs, a calibration adjustment is described that can improve accuracy."

Of course, there are the usual columns you know and expect in the February QST: Happenings, Hints & Kinks, The Doctor Is IN, How's DX, Vintage Radio and more. Look for your February issue in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <https://www.arrl.org/join>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

Compiled by ARRL News Editor S. Khrystyne Keane, K1SFA

This feature is a concise monthly update of some of the things ARRL is doing on behalf of its members. This installment -- which covers the month of December -- looks at the ARRL confronting the FCC over BPL matters, a possible new secondary MF allocation, reports from the Official Observer Desk and more. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-29>.

==> + FCC NEWS: FCC CITES RETAILER FOR MARKETING CB RADIOS AS AMATEUR RADIOS

In October 2010, an agent from the FCC's Enforcement Office visited Monroe, Michigan-based Doctor Radio's CB Shop to find that the store was selling, among other items, a radio that was described as "an Amateur Radio that could operate on CB frequencies" that was modified to operate above the approved power limits. As such, the FCC issued a Citation to the store on January 4 for marketing unauthorized radio frequency devices in the United States in violation of Section 302(b) of the Communications Act and Section 2.803(a)(1) of the Commission's rules. Read more here <http://www.arrl.org/news/fcc-cites-retailer-for-marketing-amateur-radios-as-cb-radios>.

==> + GENERAL MOTORS TURNS TO HAM TO SOLVE ANTENNA PROBLEM

<http://reviews.cnet.com/8301-13746_7-20026067-48.html> When General Motors -- the world's second largest auto maker -- encountered a problem with the AM/FM antenna on its 2011 Chevrolet Camaro convertible, it was at a loss as to what to do. Spy photographs showed a pre-production version of the car with a long whip-style antenna on its rear fender. After what GM called "an outcry among Camaro enthusiasts," the company decided to rethink the antenna. But how?

On hardtop Camaros, the antenna is integrated into the rear windshield, but given the disappearing nature of this car's roof, that wasn't possible on the convertible. So GM turned to two antenna engineers -- Don Hibbard, W8DBH, and Gregg Kittinger -- who were tasked with doing what some thought was impossible: concealing the AM/FM antenna without sacrificing radio reception, while not putting it inside the Camaro's windows. Read more here <http://www.arrl.org/news/general-motors-turns-to-ham-radio-to-solve-antenna-problem>.

==> YASME FOUNDATION ANNOUNCES 2010 YASME EXCELLENCE AWARD RECIPIENTS

The Yasme Excellence Awards are given to individuals who through
their own service, creativity, effort and dedication, have made a
significant contribution to Amateur Radio. Their contribution may be in
recognition of technical, operating or organizational achievement. The
Yasme Foundation has recognized the following individuals "in order to
inspire them and others on behalf of Amateur Radio now and in the
future." Read more here
<http://www.arrl.org/news/yasme-foundation-announces-2010-yasme-excellence-aw
ard-recipients>.

==> + NEW SECTION MANAGER APPOINTED IN ALABAMA

David Drummond, W4MD, of Northport, Alabama has been appointed Alabama
Section Manager effective January 1, 2011. In December, Jay Isbell,
KA4KUN, -- who had served as Section Manager since January 2008 --
resigned due to health related reasons. ARRL Membership and Volunteer
Programs Manager Dave Patton, NN1N, made the appointment in
consultation with Southeastern Division Director Greg Sarratt, W4OZK.
Drummond has served as Alabama Assistant Section Manager since January
2008. He will complete the current Section Manager term that continues
through December 31, 2011.

==> SOLAR UPDATE

Tad "Shining snow crystals rainbowed by the Sun
<http://classiclit.about.com/library/bl-etexts/alowell/bl-alowell-winter.htm>
"
Cook, K7RA, reports: The average daily sunspot numbers were up nearly
24 points this week to 50, while the average daily solar flux rose more
than 9 points to 89.5. The lagging three month average of daily sunspot
numbers was down 3.5 points from last month's average of the previous
three months. The three month moving average of daily sunspot numbers
--ending on June through December -- was 16.2, 20.4, 23.2, 28.9, 33,
35.6 and 32.1. The latest forecast from NOAA/USAF for the next 10 days
has a solar flux of 88 on January 6-7, 86 on January 8-9, 84 on January
10, 82 on January 11 and 80 on January 12-15. Planetary A index is
predicted at 7 on January 6-7, 10 on January 8-10, 7 on January 11 and
5 on January 12-15. There is a chance of a stiff solar wind and
geomagnetic storms on January 7-8. Yekta Gursel, KJ6DRO, alerted us to
an article in the February 2011 issue of Sky & Telescope titled "The
Perfect Solar Superstorm." You can read most of it here
<http://www.nxtbook.com/nxtbooks/newtrack/st_201102/#/28>; click on
"Preview" if you are not a subscriber. Your local library may also
provide online access to the magazine. The article begins on page 28.
Look for more information on the ARRL Web site on Friday, January 7.
For more information concerning radio propagation, visit the ARRL
Technical Information Service Propagation page
<http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad
Cookism" is brought to you by Amy Lowell's A Winter Ride
<http://classiclit.about.com/library/bl-etexts/alowell/bl-alowell-winter.htm>
.

==> ARRL RECOGNIZES: ERIC NICHOLS, KL7AJ, WINS DECEMBER QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for December is Eric Nichols, KL7AJ, for his article "Gimme an X, Gimme an O. What's that Spell? -- Radio." Congratulations Eric! The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/cover-plaque-poll>. Cast a ballot for your favorite article in the January issue today.

==> SILENT KEY: FORMER ARRL CANADIAN DIRECTOR GEORGE SPENCER, VE3AGS (SK)

A. George Spencer, VE3AGS, passed away December 21, 2010. He was 90. Spencer served as ARRL Canadian Division Vice Director from January 1970-January 1974. In 1974 -- upon the election of Canadian Director Noel Eaton, VE3CJ, as ARRL Vice President -- Spencer moved up to the Director position and served one term. An engineer by training and profession, Spencer lived all across Canada. While on the ARRL Board of Directors, he was VE2MS and then VE4IM; he later became VE6AW before moving to Ontario and obtaining his initials.

==> + SILENT KEY: AMERICA'S OLDEST SCOUTER, WOODY WOODWARD, W7KOP (SK)

Leonard Andrew "Woody" Woodward, W7KOP, of Mapleton, Utah, passed away December 25, 2010. He was 99. Woodward -- who, according to the Boy Scouts of America, was the "longest continuously registered Scouter" -- was involved with scouting for more than 87 years. BSA's Utah National Parks Council Program Director John Gailey called Woodward "an amazing man" and told the ARRL that his friend was still "very much active on the air weeks before his death." At the age of 8 in 1918, Woodward built his own radio. At the time of his death, he was using the Internet to connect Amateur Radio operators around the world. Woodward was known all over the world as an unofficial ambassador of America and Scouting through his radio contacts. Read more here <http://www.arrl.org/news/america-s-oldest-scouter-woody-woodward-w7kop-sk>.

==> THIS WEEK ON THE RADIO

This week:

- January 7 -- NCCC Sprint Ladder
- January 8 -- Midwinter Contest (CW)
- January 8-9 -- ARRL RTTY Roundup <http://www.arrl.org/rtty-roundup>; North American QSO Party (CW); Michigan QRP January (CW); Contest Hunting Lions in the Air Contest; EUCW 160 Meter Contest; WW PMC Contest
- January 9 -- NRAU-Baltic Contest (CW); Midwinter Contest (Phone); NRAU-Baltic Contest (SSB)
- January 12-13 -- CWops Mini-CWT Test

Next week:

- January 14 -- NCCC Sprint Ladder
- January 15 -- LZ Open Contest, Feld Hell Sprint
- January 15-16 -- North American QSO Party (SSB), Hungarian DX
Contest, UK DX Contest (RTTY)
- January 17 -- Run for the Bacon QRP Contest
- January 20 -- NAQCC Straight Key/Bug Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
info. Looking for a Special Event station? Be sure to check out the
ARRL Special Event Stations Web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- January 8, 2011 -- ARRL Delta Division Convention
<http://www.selarc.org/selarchamfest.htm>, Hammond, Louisiana
- January 9, 2011 -- ARRL New York-Long Island Section Convention
<http://www.hamradiouniversity.org/>, Bethpage, New York
- January 15, 2011 -- ARRL Southern Florida Section Convention
<http://fmarc.net/hamfest_2011.htm>, Fort Myers, Florida
- January 28-29, 2011 -- ARRL Mississippi State Convention
<http://www.msham.org/hamfest.php>, Jackson, Mississippi

To find a convention or hamfest near you, click here
<http://www.arrl.org/hamfests>.

Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

42. Amateur Radio Newsline(tm) Report 1743 - January 7 2011

Amateur Radio Newsline(tm) Report 1743 - January 7 2011

Amateur Radio Newsline report number 1743 with a release date of
Friday, January 7, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. Hams in Missouri face a series of killer
tornados while their counterparts in Australia go on alert as massive
rains hit Queensland state. Also, the South African Radio League
prepares to ask that nations telecommunications regulators to expand
160 meters, researchers say that cubersecurity is really the new civil
defense and Russia announces plans to take the Internet into space.
Find out the details on Amateur Radio Newsline(tm) report number 1743
coming your way right now.

RESCUE RADIO: MISSOURI SKYWARN HAMS CALLED OUT AS TWISTERS HIT REGION

Ham radio first responders' associated with SKYWARN were called out as
killer storms swept across Southwest Missouri just before New Years.
David Black, KB4KCH, is in our South-East Bureau with the details:

--

For amateur radio operators in Missouri, the end of 2010 was anything
but quiet. Killer storms roared across southwestern parts of the state
December 30th and 31st. Two of the twisters were rated as EF-3s. 3
people were killed in Missouri, with three more deaths reported in
Arkansas.

Rod Kittleman, K0ADI, is the ARRL's Information Officer in Southwestern
Missouri. He says hams monitored the storms including supercell
thunderstorms as they moved from Arkansas, across the state line,
leaving extensive damage:

--

K0ADI: "We had storm spotters from our SKYWARN group out all the way
from Chhristian County ARES, Green County, Texas County, etc. Pretty
much (observing) as the storms tracked along through Arkansas through
Missouri, we had each of the ARES groups in the individual counties who
where continuing to track the storms and relay the information to the
National Weather Service.

"We had spotters that were out, chasing the storm and watching the stor. A very, very active bunch of people."

--

For at least 14 hours, radio amateurs stayed active, tracking storms and reporting on their progress to National Weather Service forecasters in Springfield. Kittleman says the storms hit with bad timing, which teaches hams a valuable lesson:

--

K0ADI: " You always have to be prepared because you never know whats going to happen. The bad thing about this storm is that it happened on a holiday when a lot of people are not thinking about these kind of storms. They are out doing their holiday activities

"Everybody needs to be prepared for all times in all seasons, but this shows that ham radio operators are always prepared all season long."

--

Despite the large amount of territory affected, Kittleman says Skywarn and ARES groups coordinated efforts closely. That resulted in an active flow of real time information on the storms and the damage they were causing:

--

K0ADI: "I was actually n the air about 7:30 in the morning and tracked one tornado that went from the Missouri -Arkansas border all the way up to the Ft. Leonardwood wild area. That was the one that ended up killing a couple of people up there."

--

The various amateur radio teams are being praised for their efforts to keep the community safe. Weather Service Forecasters say they were impressed at the amount of response and support hams in the state gave when it was so badly needed.

>From the Southeast Bureau in Birmingam, Alabama, I'm David Black, KB4KCH, for The Amateur Radio Newsline.

--

In all, At least 5 tornadoes, 2 of which produced fatalities and numerous severe thunderstorms pounded the Missouri Ozarks for over 14 hours on December 30th into New Years Eve.

(N0UAM, K0ADI, others)

**

RESCUE RADIO: VK HAMS RESPOND TO QUEENSLAND FLOODING

Massive flooding in Australia's Queensland state puts that nations corps of ham radio volunteers on alert. Les Unwin, VK4VIL, is in the city of Rockhampton with the latest:

--

Following widespread rains over the past several weeks, Queensland's Fitzroy River is currently in full flood, with water inundating towns on its movement downstream. The Fitzroy basin, covering some 53,000 square kilometers is Australia's second largest river system.

After completely drowning some towns such as Theodore in its more western tributaries, then devastating the larger town of Emerald of 12,000 people, Rockhampton, population 75000, is now facing what could be its second largest flood in recorded history. The city is already totally isolated with airport, all feeder highways and rail links underwater . Sadly, several lives have been lost as a result of flood related incidents.

Rockhampton and District Amateur Radio Club President, Jack Chomley VK4JRC has a good number of club members on standby and registered with State Emergency Service and the Disaster Management Committee , with suitable equipment available for activation if the situation worsens, for relief of emergency workers or particularly in the case of power failure. Fortunately, amateur radio operators contacted in upstream areas have also not been called upon for assistance at this time.

The River is expected to take several weeks to return to its normal level.

For the Amateur Radio Newsline, I'm Les Unwin, VK4VIL, in Rochhampton.
--

Expect more on this rescue radio effort in upcoming Amateur Radio Newsline reports. (WIA News)

**

ENFORCEMENT: ALLEGED HONEYBEE SHOOTER WAS A HAM

The ham believed to be the so called possible 'honeybee' shooter is dead. Gary Amaya, 48, KC9AWD, was shot with his own gun while apparently trying to rob an Orland Park, Illinois, tanning salon on Saturday, December 11th.

Last October, three men were shot, one fatally, near the Illinois-Indiana border. The shootings appeared entirely random. One victim, a farmer, had a conversation with the shooter about honeybees before he was shot, earning the killer his nickname of the honeybee shooter.

Two months later, Gary Amaya was allegedly robbing an L.A. Tan location at gunpoint when a customer, Jason McDaniel, came through the door. McDaniel disarmed Amaya, and ultimately shot him twice, killing him.

Shortly after Amaya was killed, police released survailence video. The tape shows Amaya, clad in black, having bound the attendant behind the counter. McDaniel enters the store, and is brought behind the counter. At one point, Amaya, having set the gun down, bends over, and McDaniel seizes his opportunity, rushing forward to strike Amaya and grab the gun. The two men then move into a hallway just out of the frame, where apparently Amaya lunges at McDaniel. A shot goes off in the ensuing struggle, Amaya appears dazed but still a threat. Then McDaniel shoots him in the stomach.

According to an unnamed family friend, Amaya showed no earlier signs of violence. But something apparently changed in the man from tiny downstate Rankin, Illinois this past summer after helost his job at a Milford trucking company. By October, when the "honeybee" shootings started, Amaya had cut off ties with even his closest friends. (WB9QZB, Chicago Tribune OnLine, Morris Daily Herald, CNN, other sources)

**

RESTRUCTURING: SARL PREPARING DOCUMENTATION TO INCREASE 160 METRE ALLOCATION

The South African Radio League is preparing documentation to gain access to additional spectrum on the 160 meter band for amateur communication in that nation.

South African radio amateurs are invited to make input by sending their views as to why it is necessary to expand the very narrow allocation currently available. Responders are asked to include items such as propagation studies and of what benefit an expanded 160 meter allocation will be.

South African hams should send the information to zs6akv (at) sarl (dot) org (dot) za by end January. The South African Radio League proposal will be presented at the next SARL and the Independent Communications Authority of South Africa liaison meeting planned for February of 2011. (SARL)

ENFORCEMENT NEEDED: RESEARCHERS CALL CYBERSECURITY THE NEW CIVIL DEFENSE

A pair of University of Cincinnati researchers says the nation's cybersecurity is being threatened because an important element in

establishing it is not being emphasized enough. That of citizen awareness and participation. Amateur Radio Newsline's Bill Pasternak, WA6ITF, has more:

--

In equating today's citizen role in cybersecurity to the Civil Defense efforts developed at the advent of the era of atomic weapons, Political Science faculty members Richard Harknett and James Stever argue that an active role for citizenry participation in security efforts is largely being overlooked.

They make their case in a new paper published in the "Journal of Homeland Security and Emergency Management." Harknett and Stever argue that a three-pronged approach to cybersecurity is necessary. They note that ideas of coordination within government agencies and also between government and business interests surface in almost every discussion on the topic, but engagement with the public about the role they can play in cybersecurity rarely gets mentioned.

The two researchers say that the general population must be engaged as active security providers, not simply beneficiaries of security policy. This is because their practices often create the threats to which government must respond. As an example, they cite the hijacking last July of up to 50,000 computers for use in a botnet denial-of-service attack on Web sites operated by the U.S. and South Korean governments.

For the Amateur Radio Newsline, I'm Bill Pasrternak, WA6ITF, in Los Angeles.

--

Currently, the government is in a period of re-examining policy towards cybersecurity. The New York Times recently published an extensive story examining U.S. deficiencies in policy towards cyber attacks, and a new study of 600 computer and computer-security executives showed high levels of concern that cyber attacks at any time could compromise our nations energy and communication sectors. (University of Cincinnati via Science Daily)

**

ENFORCEMENT: FCC CITES MICHIGAN BUSINESS FOR SELLING UNAUTHORIZED CB SETS

The FCC has issued an Official Citation to to Doctor Radio's CB Shop of Monroe, Michigan. This for marketing unauthorized radio frequency devices in the United States in violation of Section 302(b) of the Communications Act, and Section 2.803(a)(1) of the Commission's rules. The devices are identified as high power CB radios that could operatr outside of bthe 11 meter Class D Citizens Radio B and.

By way of background, on October 20, 2010, an agent from the Enforcement Bureau's Detroit Office visited the Doctor Radio. At that

time he observed that the store offered for sale the Cobra Sound Tracker and the Cobra 150 GTL DX. A store employee explained to the agent that the Cobra Sound Tracker was modified to operate with 170 watts of power. The store employee further explained that the Cobra 150 GTL DX was an amateur radio that could operate on CB frequencies. Under current FCC Rules, both of these radios are illegal to sell in the United States.

The Citation warns Doctor Radio's CB Shop that if, after receipt of the Citation, that it violates the Communications Act or the Rules by engaging in such sales that the Commission may impose monetary forfeitures of up to $16,000 for each such violation or each day of a continuing violation and up to $112,500 for any single act or failure to act. In addition, violations of the Communications Act or the Rules can result in seizure of equipment through forfeiture actions, as well as criminal sanctions, including imprisonment.

Doctor Radio's CB Shop was given thirty days after the January 5th release date of the Citation to reply either through a personal interview at the closest FCC office, or through a written statement. Any written statements must specify what actions have been taken by Doctor Radio to ensure that it does not violate the Rules governing the marketing of radio frequency devices in the future. (FCC)

**

NAMES IN THE NEWS CORRECTION: IT'S A QSO A DAY FOR G6NHU DURING 2011

And a correction to last weeks story about Keith Maton, G6NHU, who has embarked on an ambitious project throughout 2011 to have a QSO every day of the year. Somehow we typo'ed his call the wrong way in the story header. His correct all letters are G6NHU.

And as we noted correctly, there is a blog to follow the progress of this project at www.qso365.co.uk. The blog won't necessarily be updated every day but it will document how the project is going with updates as time permits. (G6NHU)

**

NAMES IN THE NEWS: W4MD APPOINTED AS ALABAMA SM

David Drummond, W4MD, of Northport, Alabama has been appointed Alabama Section Manager effective January 1st. He succeeds Jay Isbell, KA4KUN, who had served as Section Manager since January 2008 but had resigned in December 2010 due to health related reasons. Drummond has served as Alabama Assistant Section Manager since January 2008. He will complete the current Alabama Section Manager term that continues through December 31st of this year. (ARRL)

**

NAMES IN THE NEWS: 2011 NEW ZEALIND DX HALL OF FAME INDUCTEES

John N. Shaw, ZL1BYZ, Bryan Anderson, ZL2AFT, and the late Peter W. Watson. ZL3GQ, have been selected asv the 2011 honorees have beem selected for iunduction into the New Zealand DX Hall of Fame. Each was choen based on his dedication to ham radio and the furthering of the art of DX operation.

The New Zealand DX Hall of Fame was established in 2009 to honor those outstanding ZL DXers and contesters who have excelled in the radio sport aspect hobby over many years. The current panel of judges includes Ken McCormack, ZL1AIH, Duncan McMahon, ZL3JT and Bill Carney, ZL3NB. (ZL2AL)

**

THE SOCIAL SCENE: HAMVENTION AWARDS NOMINATING PERIOD ENDS JANUARY 15th

And a reminder that the deadline for Hamvention award nominations is getting close. The Hamvention now sponsors four annual awards. These are the Technical Excellence, Special Achievement and Radio Amateur of the Year Awards. And as the special Radio Club of the Year was such a big success in 2010, that Hamvention planners have decided to make it a permanent addition to the Hamvention Awards program.

If you know of a radio amateur or a club deserving of recognition please submit your nomination. Further information and nomination forms can be found on-line at www.Hamvention.com in the awards section. To be considered for any award the nominations must be submitted no later than January 15, 2011. Nominations go by mail to Hamvention Awards, Post Office Box 964, Dayton, Ohio, 45401.

Again, the cutoff date to submit nominations is January 15th which is less than a week away. (Hamvention)

**

WITH NEWSLINE: RADIO SCOOTER INTERNATIONAL TO AIR ARNEWSLINET

Some good news for those hams who have been asking if any Internet radio stations retransmit these weekly Amateur Radio Newsline reports. Well Bill Bergadano, KA2EMZ, reports that his station known as Radio Scooter International began carrying Amateur Radio Newsline on January 9th.

According to Bergadano, Amateur Radio Newsline airs at 03:00 U-T-C on Mondays. That translates into 7:30PM Eastern and 4:30PM Pacific Time.

To listen go to www dot radioscooterinternational dot net. Then click the antenna and then the play button on the next page.

Bergadano tells Newsline that Radio Scooter International has been on the air since 2005, and, has been heard in over 80 countries. (KA2EMZ)

**

WITH NEWSLINE: PODCAST ADDRESS CHANGE

And a follow-up to last weeks report that some listeners with the latest iPods cannot get Amateur Radio Newsline to play on their 4th generation devices. We have received several listener responses with possible answers, but Kevin Trotman, N5PRE, who sponsors the Podcast thinks he has the best solution. Kevin has moved the Podcast file to a new server at http://n5pre.squarespace.com/arnewsline. He says that the new server should better serve listener needs. A live link to it in bright green is now at our website at www dot arnewsline dot org. If you are one of those suffering from the problem, please let us know if this fix helps you. Also, keep in mind that this is a direct link and not the same as available though the Apple iTunes on line store. (ARNewsline(tm) and N5PRE)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

SWL CORNER: THREE DX TESTS SET FOR FEBRUARY

If you are an SWL or a ham with a good Medium Wave receiver, listen up. On Saturday February 12th, at precisely oh-seven hundred and oh-eight-hundred U-T-C, radio station KHMO 1070 Kilohertz in Hannibal, Missouri, will conduct a DX test for SWL's worldwide. The test will be with Morse code, sweep tones, and voice announcements for five-minutes at the top of the first hour with its five-kilowatt, three-tower, day pattern, and then five-minutes at the top of the second hour at its one-kilowatt, six-tower, nighttime power.

Also on February 12th, from oh-nine hundred to oh-ten-hundred U-T-C, WLIQ 1530 Kilohertz in Quincy Illinois will conduct a DX test of its own WLIQ will test for twenty minutes using Morse code, sweep tones, voice announcement, special music, sound bites and the like at its fourteen-hundred watts, non-directional, day power. Then WLIQ will test for twenty minutes at two-hundred-ninety watts non-directional, critical hours power. Finally, for the last twenty minutes of the hour, they will test at three watts, non-directional, night power. That's right, we said three watts which is almost miuceo power on the AM broadcast band..

The third, and last test is on Saturday, February 19th. This one will be will be from oh-seven-hundred to oh-eight-hundred U-T-C from WLRB 1510 Kilohertz from Macomb Illinois. The WLRB test for the first thirty-minutes will use Morse code, sweep tones, voice announcement, special music, sound bites at one-kilowatt, non-directional, day power. For the second half of the test, the content will be the same but the

power will be reduced to two-hundred-fifty watts, non-directional for its critical hours power.

If you would like to receive a Q-S-L, you can send a written report, or a cassette or CD to the Chief Engineer of these stations by following the rules and sending reports the following address: Gary Glaenzer, c/o (Put the name of the station whose DX test your are reporting on the next line), 325 East Douglas Avenue, Jacksonville, Illinois 62650.

Tapes or CDs will be accepted along with written reports but must be cued up to the point of where the best reception is. If sending in a report by mail, you must include a return, self addressed, stamped envelope if you expect to get back a QSL or any reply.

The reports are being sent to the engineers home address, not the station. So please be patient, as Mr. Glaenzer is the Chief Engineer for 16 radio stations in Missouri and Illinois. E-QSLs are available. Send them to the engineer at glaenzer (at) frontier dot com with both the station call letters and the words "DX test" in the subject line. (W8HDU)

HAM RADIO IN SPACE: HOW TO WORK SATELLITES WITH YOUR HT

Clint Bradford, K6LCS, of Mira Loma California, has published an updated copy of the "How to Work Ham Satellites With Your HT" tutorial. Its posted on-line at www dot work dash sat dot com. (ANS)

**

ON THE AIR: CELEBRATING FRANZ LISZT

A group of Hungarian radio amateurs from J noshalma will use the special callsign HG200LST between January 1st and December 31st. This activity is to celebrate the 200th anniversary of the birth of composer and virtuoso pianist Franz Liszt QSL this operation via HA5GY. (DX OnLine)

**

HAM DX HELP WANTED: DX'ERS SOUGHT FOR LUXIUARY FILI OPERATION

VK4AN, OZ1IKY and possibly others are planning a major operation as 3D2A to Fiji between March 15th and April 2nd and are currently looking for experienced DXers to join them during this operation. They state that their activities will be from Nadi in a 3 story 2 bedroom luxury air conditioned apartment with roof top antennas including a full-size 160 meter Inverted Vee or delta-loop, Spiderbeam, DX-88 and other antennas. Activity will be on 160 through 6 meters but concentrating on the lower bands. If you would like to join their team, contact Eddie, VK4AN, at vk4an at wia dot org dot au. More details on this upcoming ham radio luxiary adventure are available at pacific-dxers dot com. (OPDX)

**

DX

In DX, word that HA3AUI is shortly heading back to Western Africa. Look for him to be active as 6W2SC from Senegal and J5UAP from Guinea-Bissau between February 1st and March 31st. His activity will be on 160 through 10 meters, mainly on CW and the digital modes. QSL direct via HA3AUI.

VO1AU will be active stroke 9M6 from, East Malaysia between March 2nd and the 15th. His operation will include the Commonwealth and ARRL DX SSB Contests. QSL via VO1MX.

DC9TH is now on the air as 8Q7TH from Baa Atoll in the Maldives. He's reporetedly been heard on 20 meter SSB. If you work him, please QSL to his home callsign.

EI8CC, the former Honorary Secretary of the Irish Radio Transmitting Societyt and new Irish ambassador to Lesotho will soon be on the air from that nation on CW and SSB as 7P8CC. The final items of his station have been shipped so expect to hear him on the air from Lesotho in the not to distant future.

Lastly, ZS6TQ is now active as 9Q0HQ/6 from the Republic of the Congo. His operation is primerally on weekends and during the week after 1800 UTC. Listen out for him on 40through 6 meters using CW, SSB and PSK31. QSL via K3IRV.

(Above from various DX ,news sources)

**

THAT FINAL ITEM: RUSSIA TO TAKE THE INTERNET INTO SPACE

And finally this week, Russian engineers have started drawing up a plans to take the Internet into space. They say that their new Kosmonet project and its implementation will provide an opportunity for Runet users to enter the Internet in a whole new way. Amateur Radio Newsline's Bruce Tennant, K6PZW, has more:

--

The developers of the system say that rapid access to the Internet is only part of the task set before the Kosmonet. They give priority to guaranteeing communications between spacecraft and establishing control over Russian orbited flying objects from any point on the Earth and stable communications with remote regions of Russia.

Vitaly Davydov is the deputy head of the Russian space agency. He says that such a communication system is crucial for the north and in the Polar Regions of Russia because satellites in the geostationary orbit cannot provide access to these regions. He notes that for his nation to build fixed transmitters there or lay optic fiber cables to these regions is either economically inexpedient or technically impossible.

The new project is an upgraded version of the present system known as Gonets which translates into the word Messenger in English. Davydov says that it is crucial for Russia to have the possibility of ensuring communication with any of its satellites at any time and linking them with the mission control centers. In short, days Davydov, Russia is lifting the Internet into orbit.

The developers emphasize that the "Kosmonet" does not depend on a ground infrastructure. Rather, communications will be maintained with the assistance of terminals and basic stations through satellites. Consequently, emergency situations such as earthquakes or other calamities cannot interrupt the proposed systems communications.

For the Amateur Radio Newsline, I'm Bruce Tennent, K6PZW, in Los Angeles.

--

Davydov says that at present, there is no such a system, and his nation hopes to enter into this market first. (Southgate)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Davis, W2JKD, saying 73 and we thank you for listening.

Geez are you guys ten year olds???
fuckin grow up

Kev

List of Solutions Manuals and Test Banks

---

contact me to : mattosbw1@gmail.com
mattosbw1(at)gmail.com

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR : CHINA, INDIA, RUSSIA, PAKISTAN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MALDIVES, BHUTAN & COLOMBIA".

If your wanted solutions manual is not in this list, also can ask me if is available (it is a partial list). Then if you need solutions manual only contact me by email.

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TEST BANKS.

This same "list of titles" of texts with availables solutions manual and/or test banks is for download from :

http://www.megaupload.com/?d=1P9GUXB1

I do not review the forums, just send me an email.

- Mechanics, Mechanical Engineering & Aerospace Engineering:

Solution Manual Classical Mechanics (Douglas Gregory)
Solution Manual Advanced Dynamics (Donald T. Greenwood)
Solution Manual Principles of Dynamics (2nd Ed., Donald T. Greenwood)
Solution Manual Advanced Engineering Dynamics (2nd Ed., Jerry Ginsberg)
Solution Manual Classical Dynamics (Jorge V. José)
Solution Manual Impact Mechanics (W.J. Stronge)
Solution Manual Statistical Mechanics (2nd Ed., R.K. Pathria)
Solution Manual Introduction to Continuum Mechanics (4th Ed., W. Michael Lai, David Rubin & Erhard Krempl)
Solution Manual Analytical Mechanics (7th Ed., Grant R. Fowles, George Cassiday)
Solution Manual Introduction to Mechanical Engineering (Rizza)
Solution Manual Engineering Fundamentals and Problem Solving (4th Ed., Eide, Jenison, Mashaw & Northup)
Solution Manual Engineering Fundamentals and Problem Solving (5th Ed., Eide, Jenison, Northup & Mickelson)
Solution Manual Mechanical Engineering Principles (Bird & Ross)
Solution Manual Dynamics of Mechanical Systems (C.T.F. Ross)

Solution Manual Mechanics of Solids (C.T.F. Ross)
Solution Manual Introduction to Engineering Analysis (1st Ed., Hagen)
Solution Manual Introduction to Engineering Analysis (2nd Ed., Hagen)
Solution Manual Introduction to Engineering Analysis (3rd Ed., Hagen)
Solution Manual Engineering Design (Rudolph J. Eggert)
Solution Manual Creative Design of Products and Systems (Saeed Niku)
Solution Manual Fundamentals of Engineering Design (2nd Ed., Barry Hyman)
Solution Manual Engineering Design (4th Ed., George Dieter & Linda Schmidt)
Solution Manual Engineering Design and Graphics with Autodesk Inventor 2009 (James Bethune)
Solution Manual Engineering Design : A Project-Based Introduction (2nd Ed., Clive Dym & Patrick Little)
Solution Manual Engineering Design : A Project-Based Introduction (3rd Ed., Clive Dym & Patrick Little)
Solution Manual Tools and Tactics of Design (Dominick, Demel, Lawbaugh, Freuler, Kinzel & Fromm)
Solution Manual Engineering Analysis in Applied Mechanics (John Brewer)
Solution Manual Engineering Fluid Mechanics (William Graebel)
Solution Manual Advanced Fluid Mechanics (William Graebel)
Solution manual Essential Computational Fluid Dynamics (Oleg Zikanov)
Solution Manual Computational Fluid Dynamics : A Practical Approach (Jiyuan Tu, Guan Heng Yeoh & Chaoqun Liu)
Solution Manual Mechanics of Fluids (8th Ed., Massey)
Solution Manual Fluid Mechanics (5th Ed., Frank White)
Solution Manual Fluid Mechanics (6th Ed., Frank White)
Solution Manual Fluid Mechanics (7th Ed., Frank White)
Solution Manual Viscous Fluid Flow (3rd Ed., Frank White)
Solution Manual Thermodynamics and Heat Power (6th Ed., Kurt C. Rolle)
Solution Manual Introduction to the Thermodynamics of Materials (4th Ed. David Gaskell)
Solution Manual Engineering Thermodynamics : Work and Heat Transfer (4th Ed., G.F.C. Rogers & Yon Mayhew)
Solution Manual Introduction to Thermodynamics and Heat Transfer (2nd Ed., Yunus Cengel)
Solution Manual Fundamentals of Thermal-Fluid Sciences (1st Ed., Yunus Cengel)
Solution Manual Fundamentals of Thermal-Fluid Sciences (2nd Ed., Yunus Cengel)
Solution Manual Fundamentals of Thermal-Fluid Sciences (3rd Ed., Yunus Cengel & Robert Turner)
Solution Manual Thermodynamics : An Engineering Approach (5th Ed., Yunus Cengel)
Solution Manual Thermodynamics : An Engineering Approach (6th Ed., Yunus Cengel & Michael Boles)
Solution Manual Thermodynamics : An Engineering Approach (7th Ed., Yunus Cengel & Michael Boles)
Solution Manual Essentials of Fluid Mechanics : Fundamentals and

Applications (1st Ed., Yunus Cengel, John Cimbala)
Solution Manual Fluid Mechanics (1st Ed., Yunus Cengel & John Cimbala)
Solution Manual Fluid Mechanics (2nd Ed., Yunus Cengel & John Cimbala)
Solution Manual Heat Tranfer (2nd Ed., Yunus Cengel)
Solution Manual Heat and Mass Transfer : A Practical Approach (3rd Ed., Yunus Cengel)
Solution Manual Heat and Mass Transfer : Fundamentals and Applications (4th Ed., Yunus Cengel & Afshin Ghajar)
Solution Manual Introduction to Fluid Mechanics (6th Ed., Robert Fox, Alan McDonald & Philip Pritchard)
Solution Manual Introduction to Fluid Mechanics (7th Ed., Robert Fox, Philip Pritchard & Alan McDonald)
Solution Manual Fluid Mechanics (5th Ed., Douglas)
Solution Manual Fluid Mechanics (3rd Ed., Kundu & Cohen)
Solution Manual Fluid Mechanics (4th Ed., Kundu & Cohen)
Solution Manual Elementary Fluid Mechanics (7th Ed., Street, Watters & Vennard)
Solution Manual Fluid Mechanics with Engineering Applications (10th Ed., Finnemore & Franzini)
Solution Manual Fundamentals of Fluid Mechanics (4th Ed., Bruce Munson, Donald Young, Theodore Okiishi)
Solution Manual Fundamentals of Fluid Mechanics (5th Ed., Bruce Munson, Donald Young, Theodore Okiishi)
Solution Manual Fundamentals of Fluid Mechanics (6th Ed., Bruce Munson, Donald Young, Theodore Okiishi, Wade Huebsch)
Solution Manual Fundamentals of Fluid Mechanics - SI Units (6th Ed., Bruce Munson, Donald Young, Theodore Okiishi, Wade Huebsch)
Solution Manual A Brief Introduction to Fluid Mechanics (3rd Ed., Donald Young, Bruce Munson, Theodore Okiishi)
Solution Manual A Brief Introduction to Fluid Mechanics (4th Ed., Donald Young, Bruce Munson, Theodore Okiishi, Wade Huebsch)
Solution Manual Engineering Fluid Mechanics (7th Ed., Clayton Crowe, Donald Elger, John Roberson)
Solution Manual Engineering Fluid Mechanics (8th Ed., Clayton Crowe, Donald Elger, John Roberson)
Solution Manual Engineering Fluid Mechanics (9th Ed., Clayton Crowe, Donald Elger, John Roberson, Barbara Williams)
Solution Manual Fluid Mechanics (Potter & Foss)
Solution Manual Mechanics of Fluids (3rd Ed., Potter)
Solution Manual Fluid Power with Applications (7th Ed., Esposito)
Solution Manual Mechanics of Fluids (4th Ed., Shames)
Solution Manual Applied Fluid Mechanics (6th Ed., Mott)
Solution Manual Applied Fluid Mechanics - SI Units (6th Ed., Mott)
Solution Manual Hydraulic Control Systems (Noah Manring)
Solution Manual Fluid Mechanics and Thermodynamics of Turbomachinery (5th Ed., S.L. Dixon)
Solution Manual Fluid Mechanics and Thermodynamics of Turbomachinery (6th Ed., S.L. Dixon & Cesare Hall)

Solution Manual The Design of High-Efficiency Turbomachinery and Gas Turbines (2nd Ed., David Gordon Wilson & Theododios Korakianitis)
Solution Manual Fundamentals of Turbomachinery (William Peng)
Solution Manual Principles of Turbomachinery in Air-Breathing Engines (Baskharone)
Solution Manual Fundamentals of Jet Propulsion with Applications (Ronald D. Flack)
Solution Manual Extended Irreversible Thermodynamics (3rd Ed., D. Jou, J. Casas-Vazquez & G. Lebon)
Solution Manual Thermodynamics : An Integrated Learning System (Schmidt, Ezekoye, Howell & Baker)
Solution Manual Design of Fluid Thermal Systems (2nd Ed., William Janna)
Solution Manual Design and Simulation of Thermal Systems (N.V. Suryanarayana & Oner Arici)
Solution Manual Introduction to Thermal and Fluids Engineering (Kaminski & Jensen)
Solution Manual Heating, Ventilating and Air Conditioning Analysis and Design (6th Ed., McQuiston)
Solution Manual Electricity, Electronics, and Control Systems for HVAC (4th Ed., Thomas Kissell)
Solution Manual Heat and Mass Transfer (Anthony Mills)
Solution Manual Convective Heat and Mass Transfer (4th Ed., Kays & Crawford)
Solution Manual Advanced Engineering Thermodynamics (3rd Ed., Bejan)
Solution Manual Convection Heat Transfer (3rd Ed., Bejan)
Solution Manual Design with Constructal Theory (Adrian Bejan & Sylvie Lorente)
Solution Manual Shape and Structure, from Engineering to Nature (Adrian Bejan)
Solution Manual Thermodynamics : Concepts and Applications (Stephen Turns)
Solution Manual Heat Transfer (10th Ed., Jack Holman)
Solution Manual Principles of Heat Transfer (Kaviany)
Solution Manual Heat Convection (Latif M. Jiji)
Solution Manual Fundamentals of Momentum, Heat and Mass Transfer (5th Ed., Welty)
Solution Manual Analytical Methods for Heat Transfer and Fluid Flow Problems (Bernhard Weigand)
Solution Manual Two-Phase Flow : Theory and Applications (Clement Kleinstreuer)
Solution Manual Convective Heat Transfer (kakac)
Solution Manual An Introduction to Fluid Dynamics : Principles of Analysis and Design (Stanley Middleman)
Solution Manual An Introduction to Mass and Heat Transfer : Principles of Analysis and Design (Stanley Middleman)
Solution Manual Fundamentals of Thermodynamics (5th Ed., Richard Sonntag, Claus Borgnakke & Gordon Van Wylen)
Solution Manual Fundamentals of Thermodynamics (6th Ed., Richard Sonntag, Claus Borgnakke & Gordon Van Wylen)

Solution Manual Fundamentals of Thermodynamics (7th Ed., Claus Borgnakke & Richard Sonntag)
Solution Manual Introduction to Engineering Thermodynamics (1st Ed., Richard Sonntag & Claus Borgnakke)
Solution Manual Introduction to Engineering Thermodynamics (2nd Ed., Richard Sonntag & Claus Borgnakke)
Solution Manual Fundamentals of Engineering Thermodynamics (5th Ed., Michael Moran, Howard Shapiro)
Solution Manual Fundamentals of Engineering Thermodynamics (6th Ed., Michael Moran, Howard Shapiro)
Solution Manual Fundamentals of Engineering Thermodynamics - SI Units (6th Ed., Michael Moran, Howard Shapiro)
Solution Manual Fundamentals of Engineering Thermodynamics (7th Ed., Michael Moran, Howard Shapiro, Daisie Boettner, Margaret Bailey)
Solution Manual Fundamentals of Heat and Mass Transfer (5th Ed., Incropera, DeWitt)
Solution Manual Fundamentals of Heat and Mass Transfer (6th Ed., Incropera, DeWitt)
Solution Manual Introduction to Heat Transfer (4th Ed., Incropera, DeWitt)
Solution Manual Introduction to Heat Transfer (5th Ed., Incropera, DeWitt)
Solution Manual Radiation Detection and Measurement (3rd Ed., Glenn Knoll)
Solution Manual Radiation Detection and Measurement (4th Ed., Glenn Knoll)
Solution Manual Radiative Heat Transfer (2nd Ed., Michael Modest)
Solution Manual Computational Heat Transfer (2nd Ed., Jaluria)
Solution Manual Principles of Combustion (2nd Ed., Kenneth Kuan-yun Kuo)
Solution Manual Combustion (2nd Ed., Irvin Glassman)
Solution Manual Combustion (3rd Ed., Irvin Glassman)
Solution Manual Incompressible Flow (3rd Ed., Panton)
Solution Manual Modern Compressible Flow : With Historical Perspective (3rd Ed., John Anderson)
Solution Manual Non-Newtonian Flow : Fundamentals and Engineering Applications (R.P. Chhabra & J F Richardson)
Solution Manual Computational Techniques for Fluid Dynamics (Srinivas, K., Fletcher, C.A.J.)
Solution Manual Introduction to Computational Fluid Dynamics (A.W. Date)
Solution Manual Robot Modeling and Control (Spong, Hutchinson & Vidyasagar)
Solution Manual Introduction to Robotics: Analysis, Control, Applications (Saeed B. Niku)
Solution Manual Theory of Applied Robotics : Kinematics, Dynamics and Control (Reza N. Jazar)
Solution Manual Control of Robot Manipulators in Joint Space (R. Kelly, V. Santibáñez, A. Loría)
Solution Manual Modelling and Control of Robot Manipulators (2nd Ed.,

Lorenzo Sciavicco, Bruno Siciliano)
Solution Manual Robotics : Modelling, Planning and Control (Bruno Siciliano, Lorenzo Sciavicco, Luigi Villani & Giuseppe Oriolo)
Solution Manual Fundamentals of Robotic Mechanical Systems : Theory, Methods, and Algorithms (3rd Ed., Jorge Angeles)
Solution Manual Kinematic Chains and Machine Components Design (Dan B. Marghitu)
Solution Manual Kinematics, Dynamics, and Design of Machinery (2nd Ed., Waldron & Kinzel)
Solution Manual Kinematics and Dynamics of Machinery (3rd Ed., Charles E. Wilson & J. Peter Sadler)
Solution Manual Kinematics and Dynamics of Machinery - SI Units (3rd Ed., Charles E. Wilson & J. Peter Sadler)
Solution Manual Machines and Mechanisms : Applied Kinematic Analysis (3rd Ed., Myszka)
Solution Manual Mechanism Design : Analysis and Synthesis (4th Ed., Erdman, Sandor & Kota)
Solution Manual Mechanical Design : A Components Approach (2nd Ed., Peter Childs)
Solution Manual Mechanical Design of Machine Elements and Machines : A Failure Prevention Perspective (1st Ed., Collins)
Solution Manual Mechanical Design of Machine Elements and Machines : A Failure Prevention Perspective (2nd Ed., Collins, Busby & Staab)
Solution Manual Fundamentals of Machine Component Design (3rd Ed., Juvinall)
Solution Manual Fundamentals of Machine Component Design (4th Ed., Juvinall)
Solution Manual Design of Machine Elements (8th Ed., Spotts)
Solution Manual Machine Elements in Mechanical Design (4th Ed., Mott)
Solution Manual Machine Elements in Mechanical Design - SI Units (4th Ed., Mott)
Solution Manual Mechanical Design : An Integrated Approach (1st Ed., Ansel Ugural)
Solution Manual Design of Machinery (3rd Ed., Norton)
Solution Manual Design of Machinery (4th Ed., Norton)
Solution Manual Machine Design : An Integrated Approach (3rd Ed., Norton)
Solution Manual Machine Design : An Integrated Approach (4th Ed., Norton)
Solution Manual Mechanical Engineering Design (6th Ed., Shigley)
Solution Manual Mechanical Engineering Design (7th Ed., Shigley, Mischke & Budynas)
Solution Manual Shigley's Mechanical Engineering Design (8th Ed., Budynas & Nisbett)
Solution Manual Shigley's Mechanical Engineering Design (9th Ed., Budynas & Nisbett)
Solution Manual Fundamentals of Machine Elements (1st Ed., Hamrock)
Solution Manual Fundamentals of Machine Elements (2nd Ed., Hamrock)
Solution Manual Mechanics of Materials : A Modern Integration of Mechanics and Materials in Structural Design (Christopher Jenkins &

Sanjeev Khanna)
Solution Manual Mechanics of Materials (3th Ed., Beer)
Solution Manual Mechanics of Materials (5th Ed., Gere & Timoshenko)
Solution Manual Mechanics of Materials (6th Ed., Gere & Timoshenko)
Solution Manual Mechanics of Materials (7th Ed., Gere & Goodno)
Solution Manual Mechanics of Materials (Ansel Ugural)
Solution Manual Mechanics of Materials : An Integrated Learning System (1st Ed., Timothy Philpot)
Solution Manual Mechanics of Materials : An Integrated Learning System (2nd Ed., Timothy Philpot)
Solution Manual Mechanics of Materials (2nd Ed., Roy R. Craig)
Solution Manual Simplified Mechanics and Strength of Materials (6th Ed., James Ambrose)
Solution Manual Engineering Applications of Dynamics (Dean Karnopp & Donald Margolis)
Solution Manual Engineering Mechanics : Statics (Arthur Boresi, Richard Schmidt)
Solution Manual Engineering Mechanics : Dynamics (Arthur Boresi, Richard Schmidt)
Solution Manual Engineering Mechanics : Statics (5th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Statics - SI Version (5th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Statics (6th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Statics - SI Version (6th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Dynamics (5th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Dynamics - SI Version (5th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Dynamics (6th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Engineering Mechanics : Dynamics - SI Version (6th Ed., J. L. Meriam, L. G. Kraige)
Solution Manual Vector Mechanics for Engineers : Statics (7th Ed., Ferdinand Beer)
Solution Manual Vector Mechanics for Engineers : Statics (8th Ed., Ferdinand Beer)
Solution Manual Vector Mechanics for Engineers : Dynamics (7th Ed., Ferdinand Beer)
Solution Manual Vector Mechanics for Engineers : Dynamics (8th Ed., Ferdinand Beer)
Solution Manual Statics : Analysis and Design of Systems in Equilibrium (Sheppard & Tongue)
Solution Manual Statics : Analysis and Design of Systems in Equilibrium - Update Edition (Sheppard & Tongue)
Solution Manual Dynamics : Analysis and Design of Systems in Motion (Sheppard & Tongue)
Solution Manual Dynamics : Analysis and Design of Systems in Motion

(2nd Ed., Sheppard & Tongue)
Solution Manual Statics and Mechanics of Materials : An Integrated Approach (2nd Ed., Riley, Sturges & Morris)
Solution Manual Mechanics of Materials (6th Ed., Riley, Sturges & Morris)
Solution Manual Basic Engineering Plasticity : An Introduction with Engineering and Manufacturing Applications (David Rees)
Solution Manual Theory of Plasticity (3rd Ed. Jagabanduhu Chakrabarty)
Solution Manual Deformation and Fracture Mechanics of Engineering Materials (4th Ed., Richard Hertzberg)
Solution Manual Deformable Bodies and Their Material Behavior (Haslach & Armstrong)
Solution Manual Intermediate Mechanics of Materials (1st Ed., Barber)
Solution Manual Elasticity (2nd Ed., J.R. Barber)
Solution Manual Elasticity : Theory, Applications, and Numerics (1st Ed., Martin Sadd)
Solution Manual Elasticity : Theory, Applications, and Numerics (2nd Ed., Martin Sadd)
Solution Manual Elasticity in Engineering Mechanics (2nd Ed., Boresi)
Solution Manual Advanced Mechanics of Materials (6th Ed., Boresi)
Solution Manual Advanced Mechanics of Materials (2nd Ed., Cook & Young)
Solution Manual Metal Fatigue in Engineering (2nd Ed., Stephens, Fatemi & Fuchs)
Solution Manual Applied Mechanics for Engineering Technology (8th Ed., Keith M. Walker)
Solution Manual Applied Statics and Strength of Materials (5th Ed. Limbrunner & Spiegel)
Solution Manual Statics and Strength of Materials (Robert Mott)
Solution Manual Applied Strength of Materials (4th Ed., Mott)
Solution Manual Applied Strength of Materials (5th Ed., Mott)
Solution Manual Intermediate Dynamics for Engineers (Marcelo R.M & Crespo da Silva)
Solution Manual Engineering Mechanics : Statics (Michael Plesha, Gary Gray & Francesco Costanzo)
Solution Manual Engineering Mechanics : Dynamics (Michael Plesha, Gary Gray & Francesco Costanzo)
Solution Manual Engineering Mechanics : Statics (4th Ed., Anthony Bedford & Wallace Fowler)
Solution Manual Engineering Mechanics : Statics (5th Ed., Anthony Bedford & Wallace Fowler)
Solution Manual Engineering Mechanics : Statics - SI Units (5th Ed., Anthony Bedford, Wallace Fowler & Yusof Ahmad)
Solution Manual Engineering Mechanics : Dynamics (4th Ed., Anthony Bedford & Wallace Fowler)
Solution Manual Engineering Mechanics : Dynamics (5th Ed., Anthony Bedford & Wallace Fowler)
Solution Manual Engineering Mechanics : Dynamics - SI Units (5th Ed., Anthony Bedford, Wallace Fowler & Yusof Ahmad)
Solution Manual Elastic And Inelastic Stress Analysis (Irving Shames)

Solution Manual Thermal Stresses (2nd Ed., Noda, Hetnarski & Tanigawa)
Solution Manual Strength of Materials - A New Unified Theory for the 21st Century (Surya Patnaik & Dale Hopkins)
Solution Manual Statics and Strengths of Materials (6th Ed., Morrow & Kokernak)
Solution Manual Engineering Mechanics : Statics (11th Ed., Hibbeler)
Solution Manual Engineering Mechanics : Statics (12th Ed., Hibbeler)
Solution Manual Engineering Mechanics : Statics - SI Units (12th Ed., Hibbeler)
Solution Manual Engineering Mechanics : Dynamics (11th Ed., Hibbeler)
Solution Manual Engineering Mechanics : Dynamics (12th Ed., Hibbeler)
Solution Manual Engineering Mechanics : Dynamics - SI Units (12th Ed., Hibbeler)
Solution Manual Mechanics of Materials (4th Ed., Hibbeler)
Solution Manual Mechanics of Materials (6th Ed., Hibbeler)
Solution Manual Mechanics of Materials (7th Ed., Hibbeler)
Solution Manual Mechanics of Materials - SI Units (7th Ed., Hibbeler)
Solution Manual Mechanics of Materials (8th Ed., Hibbeler)
Solution Manual Statics and Mechanics of Materials (Beer, Johnston, DeWolf & Mazurek)
Solution Manual Statics and Mechanics of Materials (Bedford, Liechti & Fowler)
Solution Manual Statics and Mechanics of Materials (2nd Ed., Hibbeler)
Solution Manual Statics and Mechanics of Materials - SI Units (2nd Ed., Hibbeler)
Solution Manual Statics and Mechanics of Materials (3rd Ed., Hibbeler)
Solution Manual Energy Principles and Variational Methods in Applied Mechanics (2nd Ed., Reddy)
Solution Manual The Physics of Vibrations and Waves (6th Ed., Pain)
Solution Manual Engineering Vibrations (3rd Ed., Inman)
Solution Manual Mechanical Vibrations - SI Units (4th Ed., Singiresu S. Rao)
Solution Manual Mechanical Vibrations (5th Ed., Singiresu S. Rao)
Solution Manual Theory of Vibration : An Introduction (2nd Ed., A.A. Shabana)
Solution Manual Vibration of Discrete and Continuous Systems (2nd Ed., Ahmed Shabana)
Solution Manual Introduction to Finite Element Vibration Analysis (Maurice Petyt)
Solution Manual Vibrations and Stability : Advanced Theory, Analysis, and Tools (2nd Ed., Jon J. Thomsen)
Solution Manual Dynamics and Vibration : An Introduction (Magd Abdel Wahab)
Solution Manual Mechanical Vibration (William J. Palm, III)
Solution Manual Random Vibrations : Analysis of Structural and Mechanical Systems (Loren Lutes & Shahram Sarkani)
Solution Manual Mechanical and Structural Vibrations : Theory and Applications (by Jerry H. Ginsberg)
Solution Manual Fundamentals of Structural Integrity : Damage Tolerant Design and Nondestructive Evaluation (Alten F. Grandt)

Solution Manual A First Course in the Finite Element Method (4th Ed., Daryl L. Logan)
Solution Manual Finite Element Analysis Theory and Application with ANSYS (3rd Ed., Moaveni)
Solution Manual An Introduction to the Finite Element Method (3rd Ed., J. N. Reddy)
Solution Manual Fundamentals of Finite Element Analysis (1st Ed., David V. Hutton)
Solution Manual The Finite Element Method in Engineering (4th Ed., Rao)
Solution Manual The Finite Element Method and Applications in Engineering Using ANSYS (Madenci & Guven)
Solution Manual Introduction to Finite Element Analysis and Design (Nam-Ho Kim, Bhavani V. Sankar)
Solution Manual Introduction to the Finite Element Method : Theory, Programming and Applications (Erik G. Thompson)
Solution Manual The Finite Element Method : Its Basis and Fundamentals (6th Ed., Zienkiewicz, R. L. Taylor & J.Z. Zhu)
Solution Manual Fundamental Finite Element Analysis and Applications : with Mathematica and Matlab Computations (Asghar Bhatti)
Solution Manual Advanced Topics in Finite Element Analysis of Structures : With Mathematica and MATLAB Computations (Asghar Bhatti)
Solution Manual Modeling and Analysis of Dynamic Systems (3rd Ed., Close)
Solution Manual Modeling and Simulation of Dynamic Systems (Robert Woods, Jr. & Kent Lawrence)
Solution Manual System Dynamics (1st Ed., William J Palm III)
Solution Manual System Dynamics (2nd Ed., William J Palm III)
Solution Manual System Dynamics and Response (S. Graham Kelly)
Solution Manual System Dynamics for Engineering Students : Concepts and Applications (Nicolae Lobontiu)
Solution Manual Dynamic Modeling and Control of Engineering Systems (2nd Ed., J. Lowen Shearer, Bohdan Kulakowski, John Gardner)
Solution Manual System Dynamics : Modeling and Simulation of Mechatronic Systems (4th Ed., Karnopp, Margolis & Rosenberg)
Solution Manual Concepts and Applications of Finite Element Analysis (4th Ed., Cook, Malkus, Plesha & Witt)
Solution Manual Finite Element Modeling for Stress Analysis (Robert Cook)
Solution Manual Fracture Mechanics : Fundamentals and Applications (2nd Ed., T.L. Anderson)
Solution Manual Mechanical Behavior of Materials (3rd Ed., Dowling)
Solution Manual Mechanical Behavior of Materials (W.F. Hosford)
Solution Manual Mechanical Behavior of Materials (Keith Bowman)
Solution Manual Theory and Design for Mechanical Measurements (4th Ed., Figliola & Beasley)
Solution Manual Theory and Design for Mechanical Measurements (5th Ed., Figliola & Beasley)
Solution Manual Mechanical Measurements (6th Ed., Beckwith, Marangoni & Lienhard)

Solution Manual Measurement and Data Analysis for Engineering and Science (Patrick Dunn)
Solution Manual Design and Analysis of Lean Production Systems (Askin & Goldberg)
Solution Manual Work Systems : The Methods, Measurement & Management of Work (Mikell P. Groover)
Solution Manual Automation, Production Systems, and Computer-Integrated Manufacturing (2nd Ed., Groover)
Solution Manual Automation, Production Systems, and Computer-Integrated Manufacturing (3rd Ed., Groover)
Solution Manual Fundamentals of Modern Manufacturing : Materials, Processes, and Systems (3rd Ed., Mikell Groover)
Solution Manual Fundamentals of Modern Manufacturing : Materials, Processes, and Systems (4th Ed., Mikell Groover)
Solution Manual Materials and Processes in Manufacturing (9th Ed., E. Paul DeGarmo, J. T. Black, Ronald A. Kohser)
Solution Manual DeGarmo's Materials and Processes in Manufacturing (10th Ed., E. Paul DeGarmo, J. T. Black, Ronald A. Kohser)
Solution Manual Principles of Metal Manufacturing Processes (Beddoes & Bibby)
Solution Manual Design for Manufacturing : A Structured Approach (Corrado Poli)
Solution Manual Fundamentals of Manufacturing (2nd Ed., Philip D. Rufe)
Solution Manual Engineering Materials Science (Milton Ohring)
Solution Manual Engineering Materials : Properties and Selection (8th Ed., Budinski)
Solution Manual Engineering Materials : Properties and Selection (9th Ed., Budinski)
Solution Manual Materials Science for Engineering Students (Traugott Fischer)
Solution Manual Essentials of Modern Materials Science and Engineering (James Newell)
Solution Manual Science and Design of Engineering Materials (2nd Ed., Schaffer, Saxena, et al)
Solution Manual Structure and Properties of Engineering Materiales (5th Ed., Daniel Henkel & Alan Pense)
Solution Manual Materials Selection in Mechanical Design (3rd Ed., Michael Ashby)
Solution Manual Materials Selection in Mechanical Design (4th Ed., Michael Ashby)
Solution Manual Materials : Engineering, Science, Processing and Design (1st Ed., Michael Ashby, Hugh Shercliff & David Cebon)
Solution Manual Materials : Engineering, Science, Processing and Design (2nd Ed., Michael Ashby, Hugh Shercliff & David Cebon)
Solution Manual Engineering Materials Vol. 1 : An Introduction to Properties, Applications and Design (3rd Ed., Michael Ashby & David Jones)
Solution Manual Engineering Materials Vol. 2 : An Introduction to Microstructures, Processing and Design (3rd Ed., Michael Ashby & David

Jones)
Solution Manual Materials Science and Engineering : An Introduction (6th Ed., William Callister)
Solution Manual Materials Science and Engineering : An Introduction (7th Ed., William Callister)
Solution Manual Materials Science and Engineering : An Introduction (8th Ed., William Callister)
Solution Manual Fundamentals of Materials Science and Engineering : Integrated Approach (2nd Ed., William Callister)
Solution Manual Fundamentals of Materials Science and Engineering : Integrated Approach (3rd Ed., William Callister)
Solution Manual Foundations of Materials Science and Engineering (3rd Ed, Smith)
Solution Manual Foundations of Materials Science and Engineering (4th Ed, Smith & Hashemi)
Solution Manual Foundations of Materials Science and Engineering (5th Ed, Smith & Hashemi)
Solution Manual Introduction to Materials Science for Engineers (6th Ed., Shackelford)
Solution Manual Introduction to Materials Science for Engineers (7th Ed., Shackelford)
Solution Manual Introduction to Materials Science for Engineers - International Edition (7th Ed., Shackelford)
Solution Manual Manufacturing Facilities Design and Material Handling (3rd Ed., Meyers & Stephens)
Solution Manual Manufacturing Facilities Design and Material Handling (4th Ed., Stephens & Meyers)
Solution Manual Manufacturing Processes for Engineering Materials (5th Ed. Kalpakjian & Smith)
Solution Manual Manufacturing Processes for Engineering Materials - SI Units (5th Ed. Kalpakjian, Smith & Chih-Wah Kok)
Solution Manual Manufacturing, Engineering & Technology (5th Ed. Kalpakjian & Smith)
Solution Manual Manufacturing, Engineering & Technology (6th Ed. Kalpakjian & Smith)
Solution Manual Manufacturing, Engineering & Technology - SI Units (6th Ed. Kalpakjian & Smith)
Solution Manual Principles of Corrosion Engineering and Corrosion Control (Zaki Ahmad)
Solution Manual Steels : Microstructure and Properties (3rd Ed. Bhadeshia & Honeycombe)
Solution Manual Analysis and Performance of Fiber Composites (3rd Ed., Bhagwan Agarwal, Lawrence Broutman & K. Chandrashekhara)
Solution Manual Nanoengineering of Structural, Functional and Smart Materials (Mark Schulz, Ajit Kelkar, Mannur Sundaresan)
Solution Manual Applied Manufacturing Process Planning : With Emphasis on Metal Forming and Machining (Nelson, Schneider)
Solution Manual Mastering CAD/CAM (1st Ed., Ibrahim Zeid)
Solution Manual Principles of CAD/CAM/CAE (Kunwoo Lee)
Solution Manual Computer Numerical Control : Operation and Programming

(3rd Ed., Stenerson & Curran)
Solution Manual Introduction to Computer Numerical Control (4th Ed., Valentino & Goldenberg)
Solution Manual Linear State-Space Control Systems (Robert L. Williams, II & Douglas A. Lawrence)
Solution Manual Gas Turbine Theory (6th Ed., H.I.H. Saravanamuttoo, G.F.C. Rogers, H. Cohen & Paul Straznicky)
Solution Manual Rocket Propulsion Elements (7th Ed., George P. Sutton & Oscar Biblarz)
Solution Manual Rocket Propulsion Elements (8th Ed., George P. Sutton & Oscar Biblarz)
Solution Manual Orbital Mechanics for Engineering Students (1st Ed., Howard Curtis)
Solution Manual Orbital Mechanics for Engineering Students (2nd Ed., Howard Curtis)
Solution Manual Atmospheric and Space Flight Dynamics : Modeling and Simulation with MATLAB and Simulink (Ashish Tewari)
Solution Manual Flight Dynamics Principles (2nd Ed., by Cook)
Solution Manual Mechanics of Flight (1st Ed., Warren F. Phillips)
Solution Manual Mechanics of Flight (2nd Ed., Warren F. Phillips)
Solution Manual Fundamentals of Airplane Flight Mechanics (David G. Hull)
Solution Manual Dynamics of Flight : Stability and Control (3rd Ed., Bernard Etkin & Lloyd Duff Reid)
Solution Manual Aircraft Rescue and Firefighting (5th Ed., IFSTA)
Solution Manual Aircraft Propulsion (Saeed Farokhi)
Solution Manual Aircraft Performance (Maido Saarlas)
Solution Manual Flight Performance of Fixed and Rotary Wing Aircraft (Antonio Filippone)
Solution Manual Fundamentals Of Aircraft Structural Analysis (Howard Curtis)
Solution Manual Aircraft Control and Simulation (2nd Ed., Brian Stevens & Frank Lewis)
Solution Manual Aircraft Structures for Engineering Students (3rd Ed., T.H.G. Megson)
Solution Manual Aircraft Structures for Engineering Students (4th Ed., T.H.G. Megson)
Solution Manual Introduction to Aircraft Structural Analysis (T.H.G. Megson)
Solution Manual Mechanics of Aircraft Structures (2nd Ed, C. T. Sun)
Solution Manual Principles of Helicopter Aerodynamics (1st Ed., Leishman)
Solution Manual Fundamentals of Aerodynamics (2nd Ed., Anderson)
Solution Manual Fundamentals of Aerodynamics (3th Ed., Anderson)
Solution Manual Fundamentals of Aerodynamics (4th Ed., Anderson)
Solution Manual Fundamentals of Aerodynamics (5th Ed., Anderson)
Solution Manual Aerodynamics for Engineers (5th Ed., John Bertin & Russell Cummings)
Solution Manual Introduction to Flight (5th Ed., Anderson)
Solution Manual Introduction to Flight (6th Ed., Anderson)

Solution Manual Mechatronics : Principles and Applications (Godfrey Onwubolu)
Solution Manual Mechatronics (Sabri Cetinkunt)
Solution Manual Introduction to Mechatronics and Measurement Systems (2nd Ed., David Alciatore & Michael Histand)
Solution Manual Introduction to Mechatronics and Measurement Systems (3rd Ed., David Alciatore & Michael Histand)
Solution Manual Introduction to Engineering Experimentation (2nd Ed., Wheeler & Ganji)
Solution Manual Introduction to Engineering Experimentation (3rd Ed., Wheeler & Ganji)
Solution Manual Gas Dynamics (3rd Ed., John & Keith)
Solution Manual Fundamentals of Gas Dynamics (2nd Ed, Robert D. Zucker)
Solution Manual Theory of Ground Vehicles (3rd Ed., J. Y. Wong)
Solution Manual Theory of Ground Vehicles (4th Ed., J. Y. Wong)
Solution Manual Vehicle Dynamics : Theory and Application (Reza Jazar)
Solution Manual Internal Combustion Engines : Applied Thermosciences (2nd Ed., Ferguson & Kirkpatrick)
Solution Manual Advanced Engine Performance Diagnosis (4th Ed., James Halderman)
Solution Manual Automotive Engines (8th Ed., Crouse)
Solution Manual Automotive Heating & Air Conditioning (5th Ed., Tom Birch)
Solution Manual Diagnosis and Troubleshooting of Automotive Electrical, Electronic, and Computer Systems (5th Ed., James Halderman)
Solution Manual Automotive Brake Systems Package (4th Ed., Rehkopf)
Solution Manual Automotive Brake Systems (4th Ed., Halderman)
Solution Manual Automotive Engine Performance (2nd Ed., Halderman)
Solution Manual Automotive Engines : Theory and Servicing (6th Ed., James Halderman)
Solution Manual Automotive Fuel and Emissions Control Systems (2nd Ed., James Halderman & James Linder)
Solution Manual Automotive Science and Mathematics (Allan Bonnick)
Solution Manual Automotive Mathematics (Jason Rouvel)
Solution Manual Automotive Service Management (Andrew Rezin)
Solution Manual Automotive Technology : Principles, Diagnosis, and Service (3rd Ed., Halderman)
Solution Manual Automotive Steering, Suspension, and Alignment (4th Ed., Halderman)
Solution Manual Automatic Transmissions & Transaxles (4th Ed., Tom Birch & Chuck Rockwood)
Solution Manual Hybrid and Alternative Fuel Vehicles (Halderman & Martin)
Solution Manual Manual Drivetrains and Axles (5th Ed., Birch & Rockwood)
Solution Manual Blueprint Reading for the Machine Trades (6th Ed., Schultz & Smith)
Solution Manual Modern Welding Technology (6th Ed., Cary & Helzer)

Solution Manual Tissue Engineering (Bernhard O. Palsson & Sangeeta N. Bhatia)
Solution Manual Tissue Engineering (Clemens van Blitterswijk, et al.)
Solution Manual Tissue Mechanics (Cowin, Doty)
Solution Manual Technology and Society (3rd Ed., Hjorth, Eichler, Khan & Morello)
Solution Manual BTEC First Engineering Curriculum Support Pack (Mike Tooley)
Solution Manual BTEC First Engineering (Mike Tooley)
Solution Manual Exploring Engineering : An Introduction to Engineering and Design (1st Ed., Philip Kosky, George Wise, Robert Balmer & William Keat)
Solution Manual Exploring Engineering : An Introduction to Engineering and Design (2nd Ed., Philip Kosky, Robert Balmer, William Keat & George Wise)
Solution Manual Engineering Science (5th Ed., W. Bolton)
Solution Manual Principles of Energy Conversion (2nd Ed., Archie W. Culp)
Solution Manual Fundamentals of Renewable Energy Processes (1st Ed., Aldo da Rosa)
Solution Manual Fundamentals of Renewable Energy Processes (2nd Ed., Aldo da Rosa)
Solution Manual Alternative Energy Systems (B. K. Hodge)
Solution Manual Solar Energy Engineering : Processes and Systems (Soteris Kalogirou)
Solution Manual Solar Engineering of Thermal Processes (2nd Ed., John Duffie & William Beckman)
Solution Manual Solar Engineering of Thermal Processes (3rd Ed., John Duffie & William Beckman)
Solution Manual Energy Technology and Directions for the Future (Fanchi)
Solution Manual Power Generation Technologies (Paul Breeze)
Solution Manual Concepts in Engineering (Holtzapple & Reece)
Solution Manual Concepts in Engineering (2nd Ed., Holtzapple & Reece)
Solution Manual Foundations of Engineering (2nd Ed, Holtzapple & Dan Reece)
Solution Manual Industrial Mechanics and Maintenance (3rd Ed., Larry Chastain)
Solution Manual Mechanical and Electrical Equipment for Buildings (10th Ed., Stein, Reynolds, Grondzik, Kwok)
Solution Manual Mechanical and Electrical Equipment for Buildings (11th Ed., Grondzik, Kwok, Stein & Reynolds)
Solution Manual Mechanical & Electrical Systems in Buildings (4th Ed., Richard Janis & William Tao)
Solution Manual Engineering Drawing And Design (7th Ed., Jensen, Helsel & Short)
Solution Manual Autodesk Inventor (James M. Leake)
Solution Manual Engineering Design Graphics : Sketching, Modeling, and Visualization (1st Ed., James Leake & Jacob Borgerson)
Solution Manual Orthopaedic Biomechanics : Mechanics and Design in

Musculoskeletal Systems (Donald Bartel, Dwight Davy & Tony Keaveny)
Solution Manual Science for Engineering (3rd Ed., John Bird)

48. 4050 Solutions manual and Test Banks to Electrical, Electronics and Computer Engineering Books

Newsgroup: rec.radio.amateur.policy
Date: 2011-01-08 07:18:24 UTC
From: BERGH <mattosbw1@gmail.com>
Message-ID: <9d177807-1d37-4fb1-b24a-bec29cb54dbd@l7g2000vbv.googlegroups.com>
Source record: 244369

List of Solutions Manuals and Test Banks

---

contact me to : mattosbw1@gmail.com
mattosbw1(at)gmail.com

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR : CHINA, INDIA, RUSSIA, PAKISTAN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MALDIVES, BHUTAN & COLOMBIA".

If your wanted solutions manual is not in this list, also can ask me if is available (it is a partial list). Then if you need solutions manual only contact me by email.

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TEST BANKS.

This same "list of titles" of texts with availables solutions manual and/or test banks is for download from :

http://www.megaupload.com/?d=1P9GUXB1

I do not review the forums, just send me an email.

- Electrical, Electronics & Computer Engineering :

Solution Manual Design for Electrical and Computer Engineers (J. Eric Salt & Robert Rothery)
Solution Manual Electrical Engineering : Principles and Applications (3rd Ed., Hambley)
Solution Manual Electrical Engineering : Principles and Applications (4th Ed., Hambley)
Solution Manual Electrical Engineering : Principles and Applications (5th Ed., Hambley)
Solution Manual Electronics (2nd Ed., Hambley)
Solution Manual Electronics and Communications for Scientists and Engineers (Martin Plonus)
Solution Manual Cryptography & Network Security (Behrouz A Forouzan)
Solution Manual Data Communications and Networking (3rd Ed., Behrouz A. Forouzan)
Solution Manual Data Communications and Networking (4th Ed., Behrouz A. Forouzan)
Solution Manual TCP/IP Protocol Suite (2nd Ed., Behrouz Forouzan)
Solution Manual TCP/IP Protocol Suite (3rd Ed., Behrouz Forouzan)
Solution Manual TCP/IP Protocol Suite (4th Ed., Behrouz Forouzan)

Solution Manual Local Area Networks (Behrouz A Forouzan)
Solution Manual Analog Integrated Circuits for Communication : Principles, Simulation and Design (2nd Ed., Donald Pederson & Kartikeya Mayaram)
Solution Manual Satellite Communications (2nd Ed, Pratt, Bostian, Allnutt)
Solution Manual Business Data Communications (Behrouz A Forouzan)
Solution Manual Logic and Computer Design Fundamentals (4th Ed., Mano & Kime)
Solution Manual Linear Robust Control (Michael Green, David J. N. Limebeer)
Solution Manual Adaptive Control (2nd Ed., Karl Johan Astrom, Bjorn Wittenmark)
Solution Manual Digital Control Engineering : Analysis and Design (M. Sami Fadali & Antonio Visioli)
Solution Manual Computer-Controlled Systems : Theory and Design (3rd Ed., Karl Johan Astrom & Bjorn Wittenmark)
Solution Manual Electric Circuits (7th Ed., Nilsson & Riedel)
Solution Manual Electric Circuits (8th Ed., Nilsson & Riedel)
Solution Manual Electric Circuits (9th Ed., Nilsson & Riedel)
Solution Manual Introductory Circuits for Electrical and Computer Engineering (James Nilsson, Susan Riedel)
Solution Manual Electromagnetic Noise and Quantum Optical Measurements (Hermann A. Haus)
Solution Manual Electromagnetics (Branislav M. Notaros)
Solution Manual Electromagnetics for Engineers (Fawwaz T. Ulaby)
Solution Manual Fundamentals of Applied Electromagnetics (5th Ed., Fawwaz T. Ulaby)
Solution Manual Fundamentals of Applied Electromagnetics (6th Ed., Ulaby, Michielssen & Ravaioli)
Solution Manual Applied Electromagnetics : Early Transmission Lines Approach (Stuart Wentworth)
Solution Manual Fundamentals of Electromagnetics with Engineering Applications (Stuart Wentworth)
Solution Manual Electromagnetics for Engineers : With Applications to Digital Systems and Electromagnetic Interference (Clayton Paul)
Solution Manual MEMS & Microsystems : Design and Manufacture (1st Ed., Tai-Ran Hsu)
Solution Manual MEMS & Microsystems : Design, Manufacture, and Nanoscale Engineering (2nd Ed., Tai-Ran Hsu)
Solution Manual Probability and Statistics for Engineering and the Sciences (7th Ed., Jay L. DeVore)
Solution Manual Probability and Stochastic Processes : A Friendly Introduction for Electrical and Computer Engineers (2nd Ed., Roy Yates & David Goodman)
Solution Manual Process Systems Analysis and Control (3rd Ed. Donald Coughanowr, Steven LeBlanc)
Solution Manual Fuel Cell Engines (Matthew M. Mench)
Solution Manual Fuel Cell Fundamentals (1st Ed., Ryan O'Hayre, et. al)
Solution Manual Fuel Cell Fundamentals (2nd Ed., Ryan O'Hayre, Whitney

Colella, Suk-Won Cha, Fritz Prinz)
Solution Manual Control Systems Engineering (4th Ed., Norman Nise)
Solution Manual Control Systems Engineering (5th Ed., Norman Nise)
Solution Manual Control Systems Engineering (6th Ed., Norman Nise)
Solution Manual Automatic Control Systems (8th Ed., Benjamin C. Kuo, Farid Golnaraghi)
Solution Manual Automatic Control Systems (9th Ed., Farid Golnaraghi, Benjamin C. Kuo)
Solution Manual Basic Electricity for Industry : Circuits and Machines - Canadian Edition (Doug Edgar)
Solution Manual Basic Engineering Circuit Analysis (8th Ed., Irwin & Nelms)
Solution Manual Basic Engineering Circuit Analysis (9th Ed., Irwin & Nelms)
Solution Manual Basic Engineering Circuit Analysis (10th Ed., Irwin & Nelms)
Solution Manual A Brief Introduction to Circuit Analysis (J. David Irwin)
Solution Manual Semiconductor Devices : Basic Principles (Jasprit Singh)
Solution Manual Semiconductor Device Fundamentals (Robert F. Pierret)
Solution Manual Device Electronics for Integrated Circuits (3rd Ed., Richard S. Muller, Theodore I. Kamins)
Solution Manual Fundamentals of Semiconductor Devices (Anderson)
Solution Manual Scientific Computing (2nd Ed., Michael T. Heath)
Solution Manual Scientific Computing with Case Studies (Dianne P. O'Leary)
Solution Manual Pattern Recognition and Machine Learning (Christopher M. Bishop)
Solution Manual Modern Semiconductor Devices for Integrated Circuits (Chenming C. Hu)
Solution Manual Analysis and Design of Analog Integrated Circuits (4th Ed., Paul Gray, et al.)
Solution Manual Analysis and Design of Analog Integrated Circuits (5th Ed., Paul Gray)
Solution Manual Analysis and Design of Digital Integrated Circuits (3rd Ed., Hodges)
Solution Manual Introduction to Electric Circuits (6th Ed., Dorf & Svoboda)
Solution Manual Introduction to Electric Circuits (7th Ed., Dorf & Svoboda)
Solution Manual Introduction to Electric Circuits (8th Ed., Dorf & Svoboda)
Solution Manual Modulation, Detection and Coding (Tommy Öberg)
Solution Manual Principles of Communications: Systems, Modulation, and Noise (5th Ed., R.E. Ziemer & W.H. Tranter)
Solution Manual Principles of Communications (6th Ed., R.E. Ziemer & W.H. Tranter)
Solution Manual The Analysis and Design of Linear Circuits (4th Ed, Thomas & Rosa)

Solution Manual The Analysis and Design of Linear Circuits : Laplace Early (4th Ed, Thomas & Rosa)
Solution Manual The Analysis and Design of Linear Circuits (5th Ed, Thomas)
Solution Manual The Analysis and Design of Linear Circuits (6th Ed, Thomas, Rosa & Toussaint)
Solution Manual Dynamic Modeling and Control of Engineering Systems (2nd Ed., J. Lowen Shearer, Bohdan Kulakowski, John Gardner)
Solution Manual Modern Control Systems (11th Ed., Dorf & Bishop)
Solution Manual Modern Control Systems (12th Ed., Dorf & Bishop)
Solution Manual System Dynamics (1st Ed., William Palm III)
Solution Manual System Dynamics (2nd Ed., William Palm III)
Solution Manual System Dynamics and Response (S. Graham Kelly)
Solution Manual System Dynamics for Engineering Students : Concepts and Applications (Nicolae Lobontiu)
Solution Manual Optimal Control (2nd Ed., Frank Lewis & Vassilis Syrmos)
Solution Manual Optimal Control Theory : An Introduction (Donald E. Kirk)
Solution Manual Power Electronic Circuits (Issa Batarseh)
Solution Manual Power Electronics : Circuits, Devices and Applications (3rd Ed., Muhammad H. Rashid)
Solution Manual Power Electronics : Converters, Applications, and Design (3rd Ed., Ned Mohan, Tore Undeland & William Robbins)
Solution Manual Intuitive Probability and Random Processes using MATLAB (Steven Kay)
Solution Manual Signals and Systems using MATLAB (Luis Chaparro)
Solution Manual Analog Signals and Systems (Erhan Kudeki & David C. Munson, Jr.)
Solution Manual Continuous and Discrete Time Signals and Systems (Mrinal Mandal, Amir Asif)
Solution Manual Digital Signal and Image Processing (Tamal Bose)
Solution Manual Digital Image Processing (2nd Ed., Rafael Gonzalez, Richard Woods)
Solution Manual A Wavelet Tour of Signal Processing : The Sparse Way (3rd Ed., Stephane Mallat)
Solution Manual Discrete-Time Signal Processing (2nd Ed., Alan Oppenheim, Ronald Schafer, John Buck)
Solution Manual Discrete-Time Signal Processing (3rd Ed., Alan Oppenheim & Ronald Schafer)
Solution Manual Signal Processing First (James H. McClellan, Ronald W. Schafer, Mark A. Yoder)
Solution Manual Statistical Digital Signal Processing and Modeling (Monson Hayes)
Solution Manual Digital Signal Processing (Thomas J. Cavicchi)
Solution Manual Digital Signal Processing System Design : LabVIEW-Based Hybrid Programming (2nd Ed., Kehtarnavaz)
Solution Manual Digital Signal Processing (2nd Ed., Mitra)
Solution Manual Digital Signal Processing (3rd Ed., Mitra)
Solution Manual Digital Signal Processing (4th Ed., Mitra)

Solution Manual Digital Signal Processing (4th Ed., John G. Proakis, Dimitris K Manolakis)
Solution Manual Digital Signal Processing (Charles Schuler & Mahesh Chugani)
Solution Manual Digital Signal Processing : Fundamentals and Applications (Li Tan)
Solution Manual Digital Signal Processing : An Experimental Approach (Shlomo Engelberg)
Solution Manual Digital Signal Processing : System Analysis and Design (Paulo S. R. Diniz)
Solution Manual Digital Signal Processing : A Modern Introduction (Ashok Ambardar)
Solution Manual Engineering Optimization : Theory and Practice (4th Ed., Singiresu S. Rao)
Solution Manual Applied Optimization with MATLAB Programming (1st Ed., P. Venkataraman)
Solution Manual Applied Optimization with MATLAB Programming (2nd Ed., P. Venkataraman)
Solution Manual Introduction to Applied Optimization (2nd Ed., Urmila Diwekar)
Solution Manual Logic Synthesis and Verification Algorithms (Gary Hachtel & Fabio Somenzi)
Solution Manual Adaptive Filtering : Algorithms and Practical Implementation (3rd Ed., Paulo S. R. Diniz)
Solution Manual Introduction to Scientific Computation and Programming (Daniel T. kaplan)
Solution Manual Principles of Signal Detection and Parameter Estimation (Bernard C. Levy)
Solution Manual Electric Machines Analysis and Design Applying MatLab (Cathey)
Solution Manual Fundamentals of Electrical Engineering (Giorgio Rizzoni)
Solution Manual Principles and Applications of Electrical Engineering (4th Ed, Rizzoni)
Solution Manual Principles and Applications of Electrical Engineering (5th Ed, Rizzoni)
Solution Manual Fundamentals of Electric Circuits (2nd Ed., Alexander & Sadiku)
Solution Manual Fundamentals of Electric Circuits (3rd Ed., Alexander & Sadiku)
Solution Manual Fundamentals of Electric Circuits (4th Ed., Alexander & Sadiku)
Solution Manual MSP430 Microcontroller Basics (John Davies)
Solution Manual Programming Massively Parallel Processors : A Hands-on Approach (David Kirk & Wen-mei Hwu)
Solution Manual Embedded Systems and Software Validation (Abhik Roychoudhury)
Solution Manual Embedded Systems Design with Platform FPGAs : Principles and Practices (Ronald Sass, Andrew Schmidt)
Solution Manual Embedded DSP Processor Design : Application Specific

Instruction Set Processors (Dake Liu)
Solution Manual Embedded Microcontrollers and Processor Design (Charles Greg Osborn)
Solution Manual Embedded System Design : A Unified Hardware/Software Introduction (Vahid & Givargis)
Solution Manual Embedded Microcomputer Systems : Real Time Interfacing (2nd Ed., Jonathan W. Valvano)
Solution Manual Matlab : A Practical Introduction to Programming and Problem Solving (Stormy Attaway)
Solution Manual Principles of Computer System Design : An Introduction (Jerome Saltzer & M. Frans Kaashoek)
Solution Manual The Illustrated Network : How TCP/IP Works in a Modern Network (Walter Goralski)
Solution Manual Electronic Design Automation : Synthesis, Verification, and Test (Laung-Terng Wang, Yao-Wen Chang & Kwang-Ting Cheng)
Solution Manual Digital Design (Frank Vahid)
Solution Manual Digital Design with RTL Design, Verilog and VHDL (2nd Ed., Frank Vahid)
Solution Manual Digital Logic Design Principles (Balabanian & Carlson)
Solution Manual Fundamentals of Logic Design (5th Ed., Charles H. Roth)
Solution Manual Real-Time Systems and Software (Alan Shaw)
Solution Manual Introduction to VLSI Circuits and Systems (John P. Uyemura)
Solution Manual Chip Design for Submicron VLSI : CMOS Layout & Simulation (John Uyemura)
Solution Manual Classical Electrodynamics (2nd Ed., John David Jackson)
Solution Manual Objects, Abstraction, Data Structures and Design : Using C++ (Elliot B. Koffman & Paul A. T. Wolfgang)
Solution Manual Objects, Abstraction, Data Structures and Design Using Java Version 5.0 (Elliot B. Koffman & Paul A. T. Wolfgang)
Solution Manual Computer Architecture and Organization : An Integrated Approach (Murdocca & Heuring)
Solution Manual Wiley Pathways Networking Basics (1st Ed., Ciccarelli, Faulkner, FitzGerald, Dennis & Miller)
Solution Manual Software Engineering : Principles and Practice (3rd Ed., Hans van Vliet)
Solution Manual Software Design : From Programming to Architecture (Eric Braude)
Solution Manual Software Engineering : An Object-Oriented Perspective (Eric Braude)
Solution Manual Software Engineering : Modern Approaches (2nd Ed., Eric Braude & Michael Bernstein)
Solution Manual Neural and Adaptive Systems : Fundamentals through Simulations (José Principe, Neil Euliano & W. Curt Lefebvre)
Solution Manual Fundamentals of Electronic Circuit Design (David J. Comer & Donald T. Comer)
Solution Manual Microelectronic Circuit Design (2nd Ed., Jaeger &

Blalock)
Solution Manual Microelectronic Circuit Design (3rd Ed., Jaeger & Blalock)
Solution Manual Microelectronic Circuit Design (4th Ed., Jaeger & Blalock)
Solution Manual Introduction to Microelectronic Fabrication : Volume 5 of Modular Series on Solid State Devices (2nd Ed., Richard Jaeger)
Solution Manual Microelectronic Circuits (5th Ed., Adel S. Sedra, K. C. Smith)
Solution Manual VHDL for Engineers (Kenneth Short)
Solution Manual Fundamentals of Digital Logic with VHDL Design (1st Ed., Brown & Vranesic)
Solution Manual Fundamentals of Digital Logic with VHDL Design (2nd Ed., Brown & Vranesic)
Solution Manual Fundamentals of Digital Logic with VHDL Design (3rd Ed., Brown & Vranesic)
Solution Manual CMOS Analog Circuit Design (2nd Ed., Phillip E. Allen, Douglas R. Holberg)
Solution Manual Design of Analog CMOS Integrated Circuits (Behzad Razavi)
Solution Manual Design of Integrated Circuits for Optical Communications (Behzad Razavi)
Solution Manual Fundamentals of Microelectronics, Preliminary Edition (Behzad Razavi)
Solution Manual Fundamentals of Microelectronics (1st Ed., Behzad Razavi)
Solution Manual Design with Operational Amplifiers and Analog Integrated Circuits (3rd Ed., Sergio Franco)
Solution Manual Your UNIX : The Ultimate Guide (1st Ed., Sumitabha Das)
Solution Manual Your UNIX : The Ultimate Guide (2nd Ed., Sumitabha Das)
Solution Manual Microwave Engineering (Annapurna Das)
Solution Manual Microwave Engineering (3rd Ed., David M. Pozar)
Solution Manual Microwave and RF Design of Wireless Systems (David M. Pozar)
Solution Manual Introduction to Wireless Systems (P. M. Shankar)
Solution Manual Microwave Transistor Amplifiers : Analysis and Design (2nd Ed., Guillermo Gonzalez)
Solution Manual Control Systems (Madan Gopal)
Solution Manual A First Lab in Circuits and Electronics (Yannis Tsividis)
Solution Manual Power System Analysis : Analysis and Design (John Grainger)
Solution Manual Power Systems Analysis (2nd Ed., Hadi Saadat)
Solution Manual Power Systems Analysis and Design (4th Ed., J.Duncan Glover and Mulukutla S. Sarma)
Solution Manual An Introduction to Digital and Analog Communications (2nd Ed., Simon Haykin & Michael Moher)
Solution Manual Communication Systems (4th Ed., Simon Haykin)

Solution Manual Communication Systems (5th Ed., Simon Haykin)
Solution Manual Communication Systems (4th Ed., A. Bruce Carlson, Paul B. Crilly, Janet Rutledge)
Solution Manual Communication Systems (5th Ed., A. Bruce Carlson, Paul B. Crilly)
Solution Manual Signals and Systems (2nd Ed., Simon Haykin & Barry Van Veen)
Solution Manual Introduction to Computing Systems : From bits & gates to C & beyond (1st Ed., Patt and Patel)
Solution Manual Introduction to Computing Systems : From bits & gates to C & beyond (2nd Ed., Patt and Patel)
Solution Manual Elements of the Theory of Computation (2nd Ed., Lewis & Papadimitriou)
Solution Manual Introduction to Languages and the Theory of Computation (3rd Ed., John Martin)
Solution Manual Introduction to Languages and the Theory of Computation (4th Ed., John Martin)
Solution Manual Mechanical & Electrical Systems in Buildings (4th Ed., Richard Janis & William Tao)
Solution Manual Silicon VLSI Technology : Fundamentals, Practice, and Modeling (Plummer, Deal & Griffin)
Solution Manual Dynamic Electromagnetics (Paul Diament)
Solution Manual Engineering Electromagnetics (2nd Ed., Nathan Ida)
Solution Manual Engineering Electromagnetics (Kenneth Demarest)
Solution Manual Field and Wave Electromagnetics (1st Ed., David Cheng)
Solution Manual Fundamentals of Engineering Electromagnetics (David Cheng)
Solution Manual Information Modeling and Relational Databases (2nd Ed., Terry Halpin & Tony Morgan)
Solution Manual Probability, Statistics, and Random Processes For Electrical Engineering (3rd Ed., Alberto Leon-Garcia)
Solution Manual Detection and Estimation Theory (Thomas Schonhoff & Arthur Giordano)
Solution Manual The Intel Microprocessors (8th Ed., Barry B. Brey)
Solution Manual Wireless Networking (Kumar, Manjunath & Kuri)
Solution Manual Wireless Communications : Principles and Practice (2nd Ed., Theodore S. Rappaport)
Solution Manual Digital Electronics and Design with VHDL (Volnei A. Pedroni)
Solution Manual System-on-Chip Test Architectures : Nanometer Design for Testability (Wang, Stroud & Touba)
Solution Manual Digital Design (Verilog) : An Embedded Systems Approach Using Verilog (Peter Ashenden)
Solution Manual Digital Design (VHDL) : An Embedded Systems Approach Using VHDL (Peter Ashenden)
Solution Manual Computer Organization and Design : The Hardware/ Software Interface (3rd Ed., Patterson & Hennessy)
Solution Manual Computer Organization and Design : The Hardware/ Software Interface (4th Ed., Patterson & Hennessy)
Solution Manual Fundamentals of Computer Organization and Design

(Sivarama P. Dandamudi)
Solution Manual Wireless Communications & Networking (Vijay Garg)
Solution Manual Network Flows : Theory, Algorithms, and Applications (Ravindra K. Ahuja, Thomas L. Magnanti, James B. Orlin)
Solution Manual Network Analysis, Architecture, and Design (3rd Ed., James McCabe)
Solution Manual Computer Networks : A Systems Approach (4th Ed., Peterson & Davie)
Solution Manual Computer Networks ISE : A Systems Approach (4th Ed., Peterson & Davie)
Solution Manual Digital Design and Computer Architecture (David Harris & Sarah Harris)
Solution Manual Fault-Tolerant Systems (Israel Koren & C. Krishna)
Solution Manual Computer Architecture : Pipelined and Parallel Processor Design (Michael J. Flynn)
Solution Manual Computer Architecture : A Quantitative Approach (4th Ed., Hennessy & Patterson)
Solution Manual High-Performance Embedded Computing : Architectures, Applications, and Methodologies (Wayne Wolf)
Solution Manual Pattern Recognition (3rd Ed., Theodoridis & Koutroumbas)
Solution Manual Pattern Recognition (4th Ed., Theodoridis & Koutroumbas)
Solution Manual Data Mining : Concepts and Techniques (2nd Ed., Han & Kamber)
Solution Manual Commonsense Reasoning (Erik Mueller)
Solution Manual Introduction to Data Compression (3rd Ed., Khalid Sayood)
Solution Manual Programming Language Pragmatics (2nd Ed., Michael Scott)
Solution Manual Programming Language Pragmatics (3rd Ed., Michael Scott)
Solution Manual Computer Graphics for Java Programmers (2nd Ed., Leen Ammeraal & Kang Zhang)
Solution Manual Database Modeling and Design : Logical Design (4th Ed., Teorey, Lightstone & Nadeau)
Solution Manual Computers As Components : Principles of Embedded Computing System Design (1st Ed., Wayne Wolf)
Solution Manual Computers As Components : Principles of Embedded Computing System Design (2nd Ed., Wayne Wolf)
Solution Manual Virtual Machines : Versatile Platforms for Systems and Processes (Jim Smith & Ravi Nair)
Solution Manual Comprehensive Functional Verification : The Complete Industry Cycle (Wile, Goss & Roesner)
Solution Manual User Interface Design and Evaluation (Stone, Jarrett, Woodroffe & Minocha)
Solution Manual Network Algorithmics : An Interdisciplinary Approach to Designing Fast Networked Devices (George Varghese)
Solution Manual Data Modeling Essentials (3rd Ed., Simsion & Witt)
Solution Manual A Student Guide to Object-Oriented Development (Carol

Britton & Jill Doake)
Solution Manual Routing, Flow, and Capacity Design in Communication and Computer Networks (Pioro & Medhi)
Solution Manual Knowledge Representation and Reasoning (Brachman & Levesque)
Solution Manual Communication Networking : An Analytical Approach (Anurag Kumar, D. Manjunath & Joy Kuri)
Solution Manual Principles and Practices of Interconnection Networks (Dally & Towles)
Solution Manual Game Physics (David Eberly)
Solution Manual Engineering a Compiler (Keith Cooper & Linda Torczon)
Solution Manual Constraint Processing (Rina Dechter)
Solution Manual Design Methods for Reactive Systems : Yourdon, Statemate, and the UML (R. J. Wieringa)
Solution Manual Temporal Data & the Relational Model (C.J. Date, Darwen & Lorentzos)
Solution Manual Java Made Simple (2nd Ed., P. K. McBride)
Solution Manual The Firmware Handbook (Jack Ganssle)
Solution Manual Optical Networks : A Practical Perspective (2nd Ed., Ramaswami & Sivarajan)
Solution Manual Optical Networks : A Practical Perspective (3rd Ed., Ramaswami, Sivarajan & Sasaki)
Solution Manual Usability Engineering : Scenario-Based Development of Human-Computer Interaction (Rosson & Carroll)
Solution Manual The Designer's Guide to VHDL (2nd Ed., Peter Ashenden)
Solution Manual Transactional Information Systems : Theory, Algorithms, and the Practice of Concurrency Control and Recovery (Weikum & Vossen)
Solution Manual Parallel Computer Architecture : A Hardware/Software Approach (Culler, Singh & Gupta)
Solution Manual Advanced Compiler Design and Implementation (Steven Muchnick)
Solution Manual Parallel Programming with MPI (Peter Pacheco)
Solution Manual Distributed Algorithms (Nancy Lynch)
Solution Manual Electrical and Electronic : Principles and Technology (3rd Ed., John Bird)
Solution Manual Electrical and Electronic : Principles and Technology (4th Ed., John Bird)
Solution Manual Electrical Circuit Theory and Technology (3rd Ed., John Bird)
Solution Manual Electrical Circuit Theory and Technology (4th Ed., John Bird)
Solution Manual Electronic Circuits : Fundamentals & Applications (3rd Ed., Mike Tooley)
Solution Manual A Practical Guide to SysML : The Systems Modeling Language (Friedenthal, Moore & Steiner)
Solution Manual Multidimensional Signal, Image, and Video Processing and Coding (John Woods)
Solution Manual Bioelectrical Signal Processing in Cardiac and Neurological Applications (Leif Sörnmo & Pablo Laguna)

Solution Manual Foundations of Analog and Digital Electronic Circuits (Anant Agarwal & Jeffrey Lang)
Solution Manual Introduction to Linear Circuit Analysis and Modelling : From DC to RF (Luis Moura & Izzat Darwazeh)
Solution Manual Embedded Systems Architecture : A Comprehensive Guide for Engineers and Programmers (Tammy Noergaard)
Solution Manual Bioimpedance and Bioelectricity Basics (2nd Ed., Grimnes & Martinsen)
Solution Manual Simulation with Arena (5th Ed., Kelton, Sadowski & Swets)
Solution Manual Simulation Modeling and Analysis with ARENA (Tayfur Altiok & Benjamin Melamed)
Solution Manual The Visual Story : Creating the Visual Structure of Film, TV and Digital Media (2nd Ed., Bruce Block)
Solution Manual The Shut Up and Shoot Documentary Guide : A Down & Dirty DV Production (Anthony Artis)
Solution Manual Portable Video : ENG & EFP (5th Ed., Medoff & Fink)
Solution Manual Voice and Vision : A Creative Approach to Narrative Film and DV Production (Mick Hurbis-Cherrier)
Solution Manual Writing for Multimedia and the Web : A Practical Guide to Content Development for Interactive Media (3rd Ed., Timothy Garrand)
Solution Manual Developing and Maintaining a Design-Tech Portfolio : A Guide for Theatre, Film & TV (Rafael Jaen)
Solution Manual Producing for TV and Video : A Real-World Approach (Cathrine Kellison)
Solution Manual Producing for TV and New Media : A Real-World Approach for Producers (2nd Ed., Cathrine Kellison)
Solution Manual Placing Shadows : Lighting Techniques for Video Production (3rd Ed., Gloman & Tom LeTourneau)
Solution Manual Film Directing Fundamentals : See Your Film Before Shooting (3rd Ed., Nicholas Proferes)
Solution Manual Introduction to Media Production : The Path to Digital Media Production (3rd Ed., Musburger & Kindem)
Solution Manual Introduction to Media Production : The Path to Digital Media Production (4th Ed., Kindem & Musburger)
Solution Manual Directing the Documentary (5th Ed., Michael Rabiger)
Solution Manual Video Production Handbook (4th Ed., Gerald Millerson & Jim Owens)
Solution Manual Making Media : Foundations of Sound and Image Production (Jan Roberts-Breslin)
Solution Manual Prepare to Board! Creating Story and Characters for Animation Features and Shorts (Nancy Beiman)
Solution Manual Light and Lens : Photography in the Digital Age (Robert Hirsch)
Solution Manual The Radio Station : Broadcast, Satellite & Internet (7th Ed., Michael Keith)
Solution Manual Developing Story Ideas (2nd Ed., Michael Rabiger)
Solution Manual Radio Production Worktext : Studio and Equipment (5th Ed., Reese, Gross & Gross)

Solution Manual Broadcast News Writing, Reporting, and Producing (4th Ed., Ted White)
Solution Manual Problem Solving and Programming Concepts (7th Ed., Sprankle)
Solution Manual Problem Solving and Programming Concepts (8th Ed., Sprankle & Hubbard)
Solution Manual A Balanced Introduction to Computer Science (2nd Ed., David Reed)
Solution Manual Introduction to Computing and Programming with Java : A Multimedia Approach (Guzdial & Ericson)
Solution Manual Starting Out with Programming Logic and Design (Tony Gaddis)
Solution Manual Starting Out with Programming Logic and Design (2nd Ed., Tony Gaddis)
Solution Manual Tools For Structured and Object-Oriented Design (7th Ed., Bohl & Rynn)
Solution Manual Programming with Alice and Java (Lewis & DePasquale)
Solution Manual e-Business and e-Commerce How to Program (Harvey M. Deitel, Paul J. Deitel, Tem R. Nieto)
Solution Manual XML How to Program (Harvey M. Deitel, Paul J. Deitel, Tem R. Nieto, Ted Lin, Praveen Sadhu)
Solution Manual Python How to Program (Harvey M. Deitel, Paul J. Deitel, Jonathan P. Liperi Ben Wiedermann)
Solution Manual Perl How to Program (Harvey M. Deitel, Paul J. Deitel, Tem R. Nieto, D. C. McPhie)
Solution Manual C How to Program (4th Ed., Harvey & Paul Deitel)
Solution Manual C How to Program (5th Ed., Harvey & Paul Deitel)
Solution Manual C++ How to Program (6th Ed., Harvey & Paul Deitel)
Solution Manual Visual Basic.NET How to Program (2nd Ed., Harvey M. Deitel, Paul J. Deitel, Tem R. Nieto)
Solution Manual Visual C++ 2008 How to Program (2nd Ed., Harvey & Paul Deitel)
Solution Manual Internet & World Wide Web : How to Program (4th Ed., Harvey & Paul Deitel)
Solution Manual Web Technologies : A Computer Science Perspective (Jeffrey C. Jackson)
Solution Manual Mastering the Internet, XHTML and JavaScript (2nd Ed., Ibrahim Zeid)
Solution Manual Weaving a Website : Programming in HTML, Java Script, Perl and Java (Susan Anderson-Freed)
Solution Manual Simply C++ : An Application-Driven Tutorial Approach (Harvey & Paul Deitel)
Solution Manual Visual C# 2005 How to Program (2nd Ed., Harvey & Paul Deitel)
Solution Manual Visual C# 2008 How to Program (3rd Ed., Harvey & Paul Deitel)
Solution Manual Simply C# : An Application-Driven Tutorial Approach (Harvey & Paul Deitel, Hoey & Yaeger)
Solution Manual Java : An Introduction to Problem Solving and Programming (4th Ed., Walter Savitch)

Solution Manual Java : An Introduction to Problem Solving and Programming (5th Ed., Savitch & Carrano)
Solution Manual Introduction to Computing and Programming with Java : A Multimedia Approach (Guzdial & Ericson)
Solution Manual Java How to Program (7th Ed., Harvey & Paul Deitel)
Solution Manual Java For Students (5th Ed., Bell & Parr)
Solution Manual Java, Java, Java, Object-Oriented Problem Solving (3rd Ed., Morelli & Walde)
Solution Manual Java : An Eventful Approach (Bruce, Danyluk & Murtagh)
Solution Manual Introduction to Java Programming with JBuilder (3rd Ed., Y. Daniel Liang)
Solution Manual Starting Out with Visual Basic 2008 (4th Ed., Gaddis & Irvine)
Solution Manual Starting Out with Visual Basic 2010 (5th Ed., Gaddis & Irvine)
Solution Manual Starting Out with Python (Tony Gaddis)
Solution Manual Object-Oriented Programming in Python (Goldwasser & Letscher)
Solution Manual Introduction to MathCAD 11 (Ronald W. Larsen)
Solution Manual Introduction to MathCAD 13 (2nd Ed., Ronald W. Larsen)
Solution Manual MatLAB Programming (David Kuncicky)
Solution Manual Introduction to Maple 8 (David Schwartz)
Solution Manual Introduction to FORTRAN 90 (2nd Ed., Larry R. Nyhoff & Sanford Leestma)
Solution Manual Fortran 95/2003 Scientists and Engineers (3rd Ed., Stephen J. Chapman)
Solution Manual Introduction to Java (Stephen J. Chapman)
Solution Manual Java Software Solutions for AP Computer Science A (2nd Ed., Lewis, Loftus & Cocking)
Solution Manual Business Data Networks and Telecommunications (6th Ed., Raymond R. Panko)
Solution Manual Business Data Networks and Telecommunications (7th Ed., Raymond R. Panko)
Solution Manual Business Data Communications (Allen Dooley)
Solution Manual Object-Oriented Programming in C++ (4th Ed., Robert Lafore)
Solution Manual C++ : Classes and Data Structures (Jeffrey Childs)
Solution Manual Data Structures Outside-In with Java (Sesh Venugopal)
Solution Manual Data Structures and Abstractions with Java (2nd Ed., Frank M. Carrano)
Solution Manual Data Structures and Algorithms in Java (Peter Drake)
Solution Manual Practical Introduction to Data Structures and Algorithm Analysis : C++ Edition (2nd Ed., Clifford A. Shaffer)
Solution Manual Computer Vision : A Modern Approach (David Forsyth & Jean Ponce)
Solution Manual Computer Graphics Using Java 2D and 3D (Hong Zhang & Y. Daniel Liang)
Solution Manual Computer Graphics Using OpenGL (3rd Ed., Francis Hill Jr. & Stephen Kelley)
Solution Manual Computer Graphics with OpenGL (3rd Ed., Donald Hearn &

M. Pauline Baker)
Solution Manual User-Centered Web Site Development : A Human-Computer Interaction Approach (McCracken & Wolfe)
Solution Manual Fundamentals of Game Design (Ernest Adams & Andrew Rollings)
Solution Manual Introduction to The Game Industry (Moore & Sward)
Solution Manual Fundamentals of Math and Physics for Game Programmers (Wendy Stahler)
Solution Manual Usability Engineering : Process, Products & Examples (Laura Leventhal & Julie Barnes)
Solution Manual Web Usability : A User-Centered Design Approach (Jonathan Lazar)
Solution Manual Structured Computer Organization (5th Ed., Andrew S. Tanenbaum)
Solution Manual Assembly Language for Intel-Based Computers (5th Ed., Kip Irvine)
Solution Manual Assembly Language for x86 Processors (6th Ed., Kip R. Irvine)
Solution Manual Fundamentals of Multimedia (Ze-Nian Li & Mark Drew)
Solution Manual Digital Media Primer (Yue-Ling Wong)
Solution Manual Essentials for Design Macromedia Director MX 2004 Comprehensive (Tara Gray)
Solution Manual Modern Systems Analysis and Design (4th Ed., Jeffrey Hoffer, Joey George, & Joseph Valacich)
Solution Manual Modern Systems Analysis and Design (5th Ed., Jeffrey Hoffer, Joey George, & Joseph Valacich)
Solution Manual Modern Database Management (8th Ed., Hoffer, Prescott & Topi)
Solution Manual Modern Database Management (9th Ed., Hoffer, Prescott & Topi)
Solution Manual Database Systems Using Oracle (2nd Ed., Nilesh Shah)
Solution Manual An Advanced Course in Database Systems : Beyond Relational Databases (Dietrich & Urban)
Solution Manual Data and Text Mining : A Business Applications Approach (Thomas Miller)
Solution Manual Network Management : Concepts and Practice, A Hands-On Approach (J. Richard Burke)
Solution Manual Computer and Communication Networks (Nader F. Mir)
Solution Manual High Performance TCP/IP Networking (Mahbub Hassan & Raj Jain)
Solution Manual Computer Security : Principles and Practice (William Stallings & Lawrie Brown)
Solution Manual Computer Forensics : Principles and Practices (Volonino, Anzaldua & Godwin)
Solution Manual Disaster Recovery : Principles and Practices (April Wells, Charlyne Walker & Timothy Walker)
Solution Manual Firewalls and VPNs : Principles and Practices (Richard Tibbs & Edward Oakes)
Solution Manual Network Defense and Countermeasures : Principles and Practices (Chuck Easttom)

Solution Manual Corporate Computer and Network Security (1st Ed., Raymond Panko)
Solution Manual Corporate Computer and Network Security (2nd Ed., Raymond Panko)
Solution Manual IP Telephony Using CallManager Express Lab Portfolio (Cheryl Schmidt & Ernie Friend)
Solution Manual High-Speed Networks and Internets : Performance and Quality of Service (2nd Ed., William Stallings)
Solution Manual Object-Oriented Modeling and Design with UML (2nd Ed., Michael Blaha & James Rumbaugh)
Solution Manual Operating Systems : Internals and Design Principles (5th Ed., William Stallings)
Solution Manual Operating Systems : Internals and Design Principles (6th Ed., William Stallings)
Solution Manual Distributed Systems : Principles and Paradigms (2nd Ed., Tanenbaum & Van Steen)
Solution Manual Modern Operating Systems (3rd Ed., Andrew Tanenbaum)
Solution Manual Operating Systems Design and Implementation (3rd Ed., Andrew Tanenbaum & Albert Woodhull)
Solution Manual UNIX Unbounded : A Beginning Approach (5th Ed., Amir Afzal)
Solution Manual Introduction to Operating Systems and Networks (Ruth Watson)
Solution Manual Operating Systems (3rd Ed., Harvey Deitel, Paul Deitel & David Choffnes)
Solution Manual Operating Systems Principles (Lubomir Bic & Alan Shaw)
Solution Manual A Practical Guide to Linux : Commands, Editors, and Shell Programming (Mark Sobell)
Solution Manual A Practical Guide to Red Hat Linux : Fedora Core and Red Hat Enterprise Linux (2nd Ed., Mark Sobell)
Solution Manual A Practical Guide to Red Hat Linux : Fedora Core and Red Hat Enterprise Linux (3rd Ed., Mark Sobell)
Solution Manual A Practical Guide to Fedora and Red Hat Enterprise Linux: College Edition (Mark Sobell)
Solution Manual A Practical Guide to Ubuntu Linux (Mark Sobell)
Solution Manual Automata, Computability and Complexity : Theory and Applications (Elaine Rich)
Solution Manual Modern Digital Electronics (R.P. Jain)
Solution Manual Linear Systems and Signals (B.P. Lathi)
Solution Manual Modern Digital and Analog Communications Systems (3rd Ed., B. P. Lathi)
Solution Manual Introduction to Digital Systems (Milo D. Ercegovac, Lang & Moreno)
Solution Manual Embedded Systems : Architechture, Programming and Design (Raj Kamal)
Solution Manual Modern Power System Analysis (D. P. Kothari & I. J. Nagrath)
Solution Manual Basic Electrical Engineering (2nd Ed., D.P. Kothari, I.J. Nagrath)
Solution Manual Electric Machines (3rd Ed., D.P. Kothari, I.J.

Nagrath)
Solution Manual Circuits and Networks (A. Sudhakar & S. Palli Shyammohan)
Solution Manual Electrical and Electronic Technology (9th Ed., Edward Hughes, John Hiley, Keith Brown & Ian McKenzie-Smith)
Solution Manual Electrical and Electronic Technology (10th Ed., Edward Hughes, John Hiley, Keith Brown & Ian McKenzie-Smith)
Solution Manual Electric Motors and Drives : Fundamentals, Types and Applications (3rd Ed., Austin Hughes)
Solution Manual Modern Processor Design : Fundamentals of Superscalar Processors (John P. Shen)
Solution Manual Computer Networks : Principles, Technologies and Protocols for Network Design (N. Olifer & V. Olifer)
Solution Manual Computer Networking : Internet Protocols in Action (Jeanna Matthews)
Solution Manual Computer Organization (5th Ed., Hamacher et al.)
Solution Manual CMOS Digital Integrated Circuits : Analysis and Design (3rd Ed., Sung-Mo Kang & Yusuf Leblebici)
Solution Manual Introduction to Logic Design (1st Ed., Alan B Marcovitz)
Solution Manual Introduction to Logic Design (2nd Ed., Alan B Marcovitz)
Solution Manual Introduction to Logic Design (3rd Ed., Alan B Marcovitz)
Solution Manual Introduction to Logic and Computer Design (Alan B Marcovitz)
Solution Manual Digital Principles and Design (Donald D. Givone)
Solution Manual Programmable Logic Controllers (3rd Ed., Frank Petruzella)
Solution Manual Antenna Theory and Design (2nd Ed., Stutzman & Thiele)
Solution Manual Antennas for All Applications (3rd Ed., John Kraus & Ronald Marhefka)
Solution Manual Principles of Neurocomputing for Science and Engineering (Fredric M. Ham & Ivica Kostanic)
Solution Manual Introduction to Algorithms (2nd Ed., Cormen, et al.)
Solution Manual Algorithms (Dasgupta, et al.)
Solution Manual Applied Operating Systems Concepts (Silberschatz, Galvin & Gagne)
Solution Manual Operating System Concepts (6th Ed., Silberschatz, Galvin & Gagne)
Solution Manual Operating System Concepts (7th Ed., Silberschatz, Galvin & Gagne)
Solution Manual Operating System Concepts (8th Ed., Silberschatz, Galvin & Gagne)
Solution Manual Operating Systems Concepts with Java (6th Ed., Silberschatz, Galvin & Gagne)
Solution Manual Operating System Concepts with Java (7th Ed., Silberschatz, Galvin & Gagne)
Solution Manual Operating System Concepts with Java (8th Ed., Silberschatz, Galvin & Gagne)

Solution Manual C++ Program Design (3rd Ed., Cohoon & Davidson)
Solution Manual Java : Program Design 5.0 (Cohoon & Davidson)
Solution Manual Programming in C++ : Lessons and Applications (Timothy B. D'Orazio)
Solution Manual Applied C : An Introduction and More (Alice Fischer)
Solution Manual Programming Languages : Principles and Paradigms (1st Ed., Allen Tucker & Robert Noonan)
Solution Manual Programming Languages : Principles and Paradigms (2nd Ed., Allen Tucker & Robert Noonan)
Solution Manual Introduction to Parallel Computing (2nd Ed., Grama, Karypis, Kumar & Gupta)
Solution Manual Parallel Programming in C with MPI and Open MP (Michael J Quinn)
Solution Manual Data Communications and Network Security (Houston H. Carr & Charles Snyder)
Solution Manual Data Communications and Networks (David Miller)
Solution Manual Management Information Systems (3rd Ed., Post & Anderson)
Solution Manual Management Information Systems (4th Ed., Post & Anderson)
Solution Manual Database Management Systems (3rd Ed. Post)
Solution Manual Management Information Systems (9th Ed., James A. O'Brien, George Marakas)
Solution Manual Introduction to Systems Analysis and Design (Whitten & Bentley)
Solution Manual Systems Analysis & Design : An Active Approach (2nd Ed., Marakas)
Solution Manual An Introduction to Object-Oriented Programming with Java (4th Ed., C. Thomas Wu - Otani)
Solution Manual An Introduction to Object-Oriented Programming with Java (5th Ed., C. Thomas Wu - Otani)
Solution Manual A Comprehensive Introduction to Object-Oriented Programming With Java (C. Thomas Wu)
Solution Manual Data Structures and the Java Collections Framework (1st Ed., William Collins)
Solution Manual Data Structures and the Java Collections Framework (2nd Ed., William Collins)
Solution Manual Data Structures and the Standard Template Library (William Collins)
Solution Manual Database System Concepts (4th Ed., Silberschatz)
Solution Manual Database System Concepts (5th Ed., Silberschatz)
Solution Manual Database System Concepts (6th Ed., Silberschatz, Korth & Sudarshan)
Solution Manual Database Management Systems (3rd Ed., Ramakrishnan & Gehrke)
Solution Manual Fundamentals of Network Security (Eric Maiwald)
Solution Manual Computing Concepts (1st Ed., Haag, et al.)
Solution Manual Computing Concepts (2nd Ed., Haag et al.)
Solution Manual Microsoft Office 2003 (Haag et al.)
Solution Manual Advanced Programming Using Visual Basic .NET (2nd Ed.,

Julia Case Bradley & Anita Millspaugh)
Solution Manual Advanced Programming Using Visual Basic 2005 (3rd Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Programming with Java (Julia Case Bradley & Anita Millspaugh)
Solution Manual Programming in C#.Net (1st Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Programming in Visual C# 2005 (2nd Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Learning Programming Using Visual Basic.Net (Bill Burrows & Joe Lanford)
Solution Manual Programming in Visual Basic.NET : Visual Basic.NET 2005 (6th Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Programming in Visual Basic .Net : 2003 Update Edition (5th Ed., Julia Case Bradley & Anita Millspaugh)
Solution Manual Survey of Operating Systems (2nd Ed., Jane Holcombe & Charles Holcombe)
Solution Manual Principles of Voice and Data Communications (Regis J. Bates & Marcus Bates)
Solution Manual Mike Meyers' Network+ Guide To Managing and Troubleshooting Networks (Michael Meyers)
Solution Manual Introduction to Windows Server 2003 (Eric Ecklund)
Solution Manual Programming The Web : An Introduction (Barrie Sosinsky & Valda Hilley)
Solution Manual Programming The Web Using XML (Ellen Pearlman & Eileen Mullin)
Solution Manual Internet Marketing : Building Advantage in a Networked Economy (2nd Ed., Rafi Mohammed et al.)
Solution Manual Internet Technologies at Work (Fred T. Hofstetter)
Solution Manual Internet Literacy (4th Ed., Fred T. Hofstetter)
Solution Manual Software Engineering : A Practitioner's Approach (5th Ed., Roger Pressman)
Solution Manual Software Engineering : A Practitioner's Approach (6th Ed., Roger Pressman)
Solution Manual Software Engineering : A Practitioner's Approach (7th Ed., Roger Pressman)
Solution Manual Web Engineering : A Practioner's Approach (1st Ed., Roger S. Pressman & David Lowe)
Solution Manual Object-Oriented Software Engineering (Stephen Schach)
Solution Manual Object-Oriented and Classical Software Engineering (5th Ed., Steve Schach)
Solution Manual Object-Oriented and Classical Software Engineering (6th Ed., Steve Schach)
Solution Manual Object-Oriented and Classical Software Engineering (7th Ed., Steve Schach)
Solution Manual Object-Oriented and Classical Software Engineering (8th Ed., Steve Schach)
Solution Manual Introduction to Object-Oriented Analysis and Design (Steve Schach)
Solution Manual Communication Networks (2nd Ed., Alberto Leon-Garcia &

Indra Widjaja)
Solution Manual Fundamentals of Digital Logic with Verilog Design (1st Ed., Stephen Brown & Zvonko Vranesic)
Solution Manual Fundamentals of Digital Logic with Verilog Design (2nd Ed., Stephen Brown & Zvonko Vranesic)
Solution Manual Continuous and Discrete Control Systems (John Dorsey)
Solution Manual Engineering Circuit Analysis (6th Ed., William Hayt, Jack Kemmerly & Steven Durbin)
Solution Manual Engineering Circuit Analysis (7th Ed., William Hayt, Jack Kemmerly & Steven Durbin)
Solution Manual Engineering Electromagnetics (7th Ed., William Hayt & John Buck)
Solution Manual Principles of Electronic Materials and Devices (2nd Ed., Safa O. Kasap)
Solution Manual Principles of Electronic Materials and Devices (3rd Ed., Safa O. Kasap)
Solution Manual Programming in Haskell (Graham Hutton)
Solution Manual Probability and Random Processes With Applications to Signal Processing and Communications (Miller & Childers)
Solution Manual Logic in Computer Science : Modelling and Reasoning about Systems (2nd Ed., Michael Huth & Mark Ryan)
Solution Manual Introduction to Distributed Algorithms (2nd., Gerard Tel)
Solution Manual Information Theory, Inference and Learning Algorithms (David J. C. MacKay)
Solution Manual Digital Systems Engineering (William Dally & John Poulton)
Solution Manual Concepts in Programming Languages (by John Mitchell)
Solution Manual Simulation Modeling and Analysis (3rd Ed., Averill Law & David Kealton)
Solution Manual Simulation Modeling and Analysis with Expertfit Software (4th Ed., Averill Law)
Solution Manual System Modeling and Analysis : Foundations of System Performance Evaluation (Hisashi Kobayashi & Brian Mark)
Solution Manual Wireless Communications (Andrea Goldsmith)
Solution Manual Testing of Digital Systems (N. K. Jha & S. Gupta)
Solution Manual Space-Time Coding (Hamid Jafarkhani)
Solution Manual Space-Time Block Coding for Wireless Communications (Erik Larsson & Petre Stoica)
Solution Manual Smart Electronic Materials : Fundamentals and Applications (Jasprit Singh)
Solution Manual Radio-Frequency Electronics : Circuits and Applications (Jon Hagen)
Solution Manual Photonic Devices (Jia-ming Liu)
Solution Manual Networking Wireless Sensors (Bhaskar Krishnamachari)
Solution Manual Mobile Wireless Communications (Mischa Schwartz)
Solution Manual Introduction to Color Imaging Science (Hsien-Che Lee)
Solution Manual Fundamentals of Wireless Communication (David Tse & Pramod Viswanath)
Solution Manual Fundamentals of Modern VLSI Devices (Yuan Taur & Tak

H. Ning)
Solution Manual Electronic and Optoelectronic Properties of Semiconductor Structures (Jasprit Singh)
Solution Manual An Introduction to Statistical Signal Processing (Robert M. Gray)
Solution Manual An Introduction to Radio Frequency Engineering (Christopher Coleman)
Solution Manual Algebraic Codes for Data Transmission (Richard Blahut)
Solution Manual Fundamentals of Solid State Electronics (C.T. Sah)
Solution Manual Fundamentals of Solid State Engineering (2nd Ed., Manijeh Razeghi)
Solution Manual Robot Modeling and Control (Spong, Hutchinson & Vidyasagar)
Solution Manual Theory of Applied Robotics : Kinematics, Dynamics and Control (Reza N. Jazar)
Solution Manual Control of Robot Manipulators in Joint Space (R. Kelly, V. Santibáñez, A. Loría)
Solution Manual Modelling and Control of Robot Manipulators (2nd Ed., Lorenzo Sciavicco, Bruno Siciliano)
Solution Manual Robotics : Modelling, Planning and Control (Bruno Siciliano, Lorenzo Sciavicco, Luigi Villani & Giuseppe Oriolo)
Solution Manual Fundamentals of Semiconductor Fabrication (Gary S. May, Simon M. Sze)
Solution Manual Semiconductor Devices : Physics and Technology (2nd Ed, Simon M. Sze)
Solution Manual Physics of Semiconductor Devices (3rd Ed., Simon M. Sze, Kwok K. Ng)
Solution Manual Electric Machinery (6th Ed., Fitzgerald)
Solution Manual Electric Machinery Fundamentals (4th Ed., Chapman)
Solution Manual Electric Machinery and Power System Fundamentals (Chapman)
Solution Manual Local Area Networks (2nd Ed., Keiser)
Solution Manual Signals and Systems : Analysis of Signals Through Linear Systems (1st Ed., M.J. Roberts)
Solution Manual Fundamentals of Signals and Systems (M.J. Roberts)
Solution Manual Introduction to Signals and Systems (Lindner)
Solution Manual Semiconductor Physics and Devices (3rd Ed., Donald Neamen)
Solution Manual An Introduction to Semiconductor Devices (Donald Neamen)
Solution Manual Microelectronic Circuit Analysis and Design (3rd Ed., Donald Neamen)
Solution Manual Electronic Circuit Analysis and Design (2nd Ed., Donald Neamen)
Solution Manual Design for Electrical and Computer Engineers (1st Ed., Ralph Ford & Chris Coulston)
Solution Manual Fundamentals of Modeling and Analyzing Engineering Systems (Cha, Rosenberg, Dym)
Solution Manual Linear Systems (Panos J. Antsaklis & Anthony N. Michel)

Solution Manual A Linear Systems Primer (Panos J. Antsaklis & Anthony N. Michel)
Solution Manual Principles of Linear Systems (Philip E. Sarachik)
Solution Manual Linear Systems Control : Deterministic and Stochastic Methods (Elbert Hendricks, Ole Jannerup & Paul Haase Sørensen)
Solution Manual Power Systems Harmonics : Fundamentals, Analysis and Filter Design (George J. Wakileh)
Solution Manual Principles of Adaptive Filters and Self-learning Systems (Anthony Zaknich)
Solution Manual Algebraic Methods for Nonlinear Control Systems (2nd Ed., Conte, Moog & Perdon)
Solution Manual Discrete-Time Control Systems (2nd Ed., K. Ogata)
Solution Manual Modern Control Engineering - Problems B (3rd Ed., K. Ogata)
Solution Manual Modern Control Engineering (4th Ed., K. Ogata)
Solution Manual Modern Control Engineering (5th Ed., K. Ogata)
Solution Manual Modern Control Engineering - International Version (5th Ed., K. Ogata)
Solution Manual LabVIEW 8 Student Edition (Bishop)
Solution Manual LabVIEW 2009 Student Edition (Bishop)
Solution Manual Learning with LabVIEW 2009 (Bishop)
Solution Manual Introduction to Feedback Control (Li Qiu & Kemin Zhou)
Solution Manual Modeling and Simulation of Dynamic Systems (Robert Woods, Jr. & Kent Lawrence)
Solution Manual Feedback Control of Dynamic Systems (4th Ed., Gene Franklin, J.D. Powell, Abbas Emami-Naeini)
Solution Manual Feedback Control of Dynamic Systems (5th Ed., Gene Franklin, J.D. Powell, Abbas Emami-Naeini)
Solution Manual Feedback Control of Dynamic Systems (6th Ed., Gene Franklin, J.D. Powell, Abbas Emami-Naeini)
Solution Manual Feedback Control of Dynamic Systems - International Version (6th Ed., Gene Franklin, J.D. Powell, Abbas Emami-Naeini)
Solution Manual Predictive Control with Constraints (Jan Maciejowski)
Solution Manual Computer Numerical Control : Operation and Programming (3rd Ed., Stenerson & Curran)
Solution Manual Engineering Problem Solving with C (3rd Ed., Etter)
Solution Manual Engineering Problem Solving with C++ (2nd Ed., Etter)
Solution Manual Process Control Instrumentation Technology (8th Ed., Johnson)
Solution Manual Electrical Power and Controls (2nd Ed., Skvarenina & DeWitt)
Solution Manual Electronics and Computer Math (8th Ed., Deem & Zannini)
Solution Manual Circuits, Signals, and Systems for Bioengineers : A MATLAB-Based Introduction (John Semmlow)
Solution Manual VLSI Test Principles and Architectures : Design for Testability (Laung-Terng Wang, Cheng-Wen Wu & Xiaoqing Wen)
Solution Manual Mechatronics : Principles and Applications (Godfrey Onwubolu)
Solution Manual Machine Vision : Theory, Algorithms, Practicalities

(3rd Ed., E. R. Davies)
Solution Manual Essential Java for Scientists and Engineers (Brian D. Hahn & Katherine M. Malan)
Solution Manual Guide to Microsoft Excel 2002 for Scientists and Engineers (3rd Ed., Bernard V. Liengme)
Solution Manual 10-Key Touch Key : Developing Speed and Accuracy (Burton)
Solution Manual Introduction to C++ Programming, Brief Version (Y. Daniel Liang)
Solution Manual Introduction to C++ Programming, Comprehensive (Y. Daniel Liang)
Solution Manual C++ for Business Programmers (2nd Ed., John C. Molluzzo)
Solution Manual Introduction to Java Programming - Brief Version (7th Ed., Liang)
Solution Manual Introduction to Java Programming - Brief Version (8th Ed., Liang)
Solution Manual Introduction to Java Programming - Brief Version - International Edition (8th Ed., Liang)
Solution Manual Introduction to Java Programming - Comprehensive Version (6th Ed., Liang)
Solution Manual Introduction to Java Programming - Comprehensive Version (7th Ed., Liang)
Solution Manual Introduction to Java Programming - Comprehensive Version (8th Ed., Liang)
Solution Manual Introduction to Java Programming - Comprehensive Version - International Edition (8th Ed., Liang)
Solution Manual Introduction to Java Programming : Fundamentals First (6th Ed., Y. Daniel Liang)
Solution Manual Objects First With Java : A Practical Introduction Using BlueJ (3rd Ed., Barnes & Kolling)
Solution Manual Simply Java Programming : An Application-Driven™ Tutorial Approach (Deitel)
Solution Manual Java : An Introduction to Computing (Joel Adams, Larry R. Nyhoff & Jeffrey Nyhoff)
Solution Manual Advanced Java™ 2 Platform How to Program (Deitel & Santry)
Solution Manual SQL for SQL Server (Bijoy Bordoloi & Douglas B. Bock)
Solution Manual SQL Clearly Explained (3rd Ed., Jan Harrington)
Solution Manual An Introduction to Programming Using Visual Basic 2005 (6th Ed., Schneider)
Solution Manual An Introduction to Programming Using Visual Basic 2008 (7th Ed., Schneider)
Solution Manual An Introduction to Programming Using Visual Basic 2010 (8th Ed., Schneider)
Solution Manual Simply Visual Basic .NET (Harvey M. Deitel, Paul J. Deitel, Tem R. Nieto)
Solution Manual Simply Visual Basic 2005 (2nd Ed., Harvey & Paul Deitel & Associates)
Solution Manual Simply Visual Basic 2008 (3rd Ed., Harvey & Paul

Deitel & Associates)
Solution Manual Visual Basic 2005 How to Program (3rd Ed., Deitel & Associates)
Solution Manual Visual Basic 2008 How to Program (4th Ed., Deitel & Associates)
Solution Manual An Introduction to Programming with Visual Basic 6.0 (4th Ed., Schneider)
Solution Manual Visual Basic.Net Programming (2nd Ed., Jeffrey Tsay)
Solution Manual Simply Visual Basic .NET (Harvey & Paul Deitel & Nieto)
Solution Manual Mechatronics (Sabri Cetinkunt)
Solution Manual PC Systems, Installation and Maintenance (2nd Ed., R.P. Beales)
Solution Manual Introduction to Linear Programming (Leonid N. Vaserstein)
Solution Manual Electric Circuits Fundamentals (8th Ed., Thomas Floyd)
Solution Manual Introductory Circuit Analysis (11th Ed., Robert L. Boylestad)
Solution Manual Introductory Circuit Analysis (12th Ed., Robert L. Boylestad)
Solution Manual Principles of Electric Circuits : Conventional Current Version (8th Ed., Thomas Floyd)
Solution Manual Principles of Electric Circuits : Conventional Current Version (9th Ed., Thomas Floyd)
Solution Manual Principles of Electric Circuits : Electron Flow Version (8th Ed., Thomas L. Floyd)
Solution Manual Principles of Electric Circuits : Electron Flow Version (9th Ed., Thomas L. Floyd)
Solution Manual Contemporary Electric Circuits : Insights and Analysis (2nd ed., Strangeway, Petersen, Gassert & Lokken)
Solution Manual Introductory Electronic Devices and Circuits : Electron Flow Version (7th Ed., Paynter)
Solution Manual Introductory Electronic Devices and Circuits : Conventional Flow Version (7th Ed., Paynter)
Solution Manual Electronics Technology Fundamentals : Conventional Flow (2nd Ed., Robert T. Paynter & Toby Boydell)
Solution Manual Electronics Technology Fundamentals : Conventional Flow (3rd Ed., Robert T. Paynter & Toby Boydell)
Solution Manual Electronics Technology Fundamentals : Electron Flow (2nd Ed., Robert T. Paynter, Toby Boydell)
Solution Manual Electronics Technology Fundamentals : Electron Flow (3rd Ed., Robert T. Paynter, Toby Boydell)
Solution Manual Introductory DC/AC Circuits (6th Ed., Nigel P. Cook)
Solution Manual Introductory DC/AC Electronics (6th Ed., Nigel P. Cook)
Solution Manual Electronic Devices : Conventional Current Version (7th Ed., Floyd)
Solution Manual Electronic Devices : Conventional Current Version (8th Ed., Floyd)
Solution Manual Electronic Devices : Electron Flow Version (7th,

Floyd)
Solution Manual Electronic Devices : Electron Flow Version (8th, Floyd)
Solution Manual Electronics Fundamentals : Circuits, Devices and Applications (7th Ed., Thomas L. Floyd)
Solution Manual Electronics Fundamentals : Circuits, Devices and Applications (8th Ed., Floyd & Buchla)
Solution Manual Electronic Devices and Circuit Theory (9th Ed., Boylestad, Nashelsky)
Solution Manual Electronic Devices and Circuit Theory (10th Ed., Boylestad, Nashelsky)
Solution Manual The Science of Electronics : DC/AC (David M. Buchla, Thomas L. Floyd)
Solution Manual The Science of Electronics : Digital (Floyd & Buchla)
Solution Manual The Science of Electronics: Analog Devices (Floyd & Buchla)
Solution Manual Digital Electronics : A Practical Approach (7th Ed., Kleitz)
Solution Manual Digital Electronics : A Practical Approach (8th Ed., Kleitz)
Solution Manual Digital Systems : Principles and Applications (10th Ed., Tocci, Widmer & Moss)
Solution Manual Digital Electronics with VHDL - Quartus II Version (Kleitz)
Solution Manual Digital Fundamentals (9th Ed., Floyd)
Solution Manual Digital Fundamentals (10th Ed., Floyd)
Solution Manual Digital Fundamentals with PLD Programming (Thomas L. Floyd)
Solution Manual The 8051 Microcontroller (4th Ed., MacKenzie & Chung-Wei Phan)
Solution Manual The 8051 Microcontroller and Embedded Systems (2nd Ed., Muhammad Ali Mazidi, Janice Mazidi & Rolin McKinlay)
Solution Manual INTEL Microprocessors 8086/8088, 80186/80188, 80286, 80386, 80486, Pentium, Prentium ProProcessor, Pentium II, III, 4, (7th Ed., Barry B. Brey)
Solution Manual Microcontroller Technology : The 68HC11 (5th Ed., Peter Spasov)
Solution Manual PIC Microcontroller (Muhammad Ali Mazidi, Rolin McKinlay & Danny Causey)
Solution Manual HCS12 Microcontrollers and Embedded Systems : Using Assembly and C with CodeWarrior (Muhammad Ali Mazidi, Danny Causey & Janice Mazidi)
Solution Manual The x86 PC : Assembly Language, Design, and Interfacing (5th Ed., Muhammad Ali Mazidi, Janice Mazidi & Danny Causey)
Solution Manual The AVR Microcontroller and Embedded Systems : Using Assembly and C (Muhammad Ali Mazidi, Sarmad Naimi & and Sepehr Naimi)
Solution Manual Industrial Electronics (James A. Rehg, Glenn J. Sartori)
Solution Manual Programmable Controllers Using the Allen-Bradley

SlC-500 Family (2nd Ed., Dave Geller)
Solution Manual Programmable Logic Controllers (James A. Rehg, Glenn J. Sartori)
Solution Manual Fundamentals of Programmable Logic Controllers, Sensors, and Communications (3rd Ed., Jon Stenerson)
Solution Manual An Introduction to Programming with Visual Basic 6.0, Update Edition (4th Ed., Schneider)
Solution Manual C++ Programming Today (1st Ed., Barbara Johnston)
Solution Manual C++ Programming Today (2nd Ed., Barbara Johnston)
Solution Manual Introduction to Data Communications and Networking (Wayne Tomasi)
Solution Manual Introduction to Telecommunications (2nd Ed., Martha Rosengrant)
Solution Manual Network Security Essentials : Applications and Standards (3rd Ed., William Stallings)
Solution Manual Network Security Essentials : Applications and Standards (4th Ed., William Stallings)
Solution Manual Information Security: Principles and Practices (Mark Merkow, James Breithaupt)
Solution Manual Principles and Practice of Information Security (Linda Volonino, Stephen R. Robinson)
Solution Manual Principles of Electronic Communication Systems (3rd Ed., Louis E. Frenzel)
Solution Manual Modern Electronic Communication (8th Ed., Jeff Beasley, Gary M. Miller)
Solution Manual Modern Electronic Communication (9th Ed., Jeff Beasley, Gary M. Miller)
Solution Manual Electronic Communications for Technicians (2nd ed., Tom Wheeler)
Solution Manual Concepts In Systems and Signals (2nd Ed., John D. Sherrick)
Solution Manual Understanding Fiber Optics (5th Ed., Jeff Hecht)
Solution Manual Understanding UNIX/LINUX Programming : A Guide to Theory and Practice (Bruce Molay)
Solution Manual Applying PIC18 Microcontrollers : Architecture, Programming, and Interfacing using C and Assembly (Barry Brey)
Solution Manual Electrical Power and Controls (2nd Ed., Timothy L. Skvarenina, William E. DeWitt)
Solution Manual Process Control Instrumentation Technology (8th Ed., Curtis Johnson)
Solution Manual Electrical Machines, Drives and Power Systems (6th Ed., Theodore Wildi)
Solution Manual Introduction to Vacuum Technology (David M. Hata)
Solution Manual Electronic Project Design and Fabrication (6th Ed., Ronald A. Reis)
Solution Manual Technology and Society (3rd Ed., Linda Hjorth, Barbara A. Eichler, Ahmed S. Khan, John Morello)
Solution Manual Solid State Electronic Devices (6th Ed., Ben Streetman, Sanjay Banerjee)
Solution Manual Approaching Quantum Computing (Dan C. Marinescu &

Gabriela M. Marinescu)
Solution Manual Foundations of MEMS (Chang Liu)
Solution Manual Basic Electromagnetics with Applications (Nannapaneni Narayana Rao)
Solution Manual Elements of Engineering Electromagnetics (6th Ed., Nannapaneni Narayana Rao)
Solution Manual Fundamentals of Electromagnetics for Electrical and Computer Engineering (Nannapaneni Narayana Rao)
Solution Manual Digital Design (4th Ed., M. Morris Mano & Michael D. Ciletti)
Solution Manual Digital Design : Principles and Practices Package (4th Ed., John F. Wakerly)
Solution Manual VHDL: A Starter's Guide (2nd Ed., Sudhakar Yalamanchili)
Solution Manual Computer Organization and Architecture : Designing for Performance (7th Ed., William Stallings)
Solution Manual Computer Organization and Architecture : Designing for Performance (8th Ed., William Stallings)
Solution Manual Parallel Programming : Techniques and Applications Using Networked Workstations and Parallel Computers (2nd Ed., Barry Wilkinson & Michael Allen)
Solution Manual Fundamentals of Parallel Processing (Harry F. Jordan & Gita Alaghband)
Solution Manual Digital and Analog Communication Systems (7th Ed., Leon W. Couch)
Solution Manual Digital Communications (4th Ed., John Proakis)
Solution Manual Digital Communications (5th Ed., John Proakis)
Solution Manual Principles of Digital Communication and Coding (Andrew J. Viterbi, Jim K. Omura)
Solution Manual Modern Wireless Communications (Simon Haykin, Michael Moher)
Solution Manual Communication Systems Engineering (2nd Ed., John G. Proakis & Masoud Salehi)
Solution Manual ISDN and Broadband ISDN with Frame Relay and ATM (4th Ed., William Stallings)
Solution Manual Data and Computer Communications (8th Ed., William Stallings)
Solution Manual Cryptography and Network Security (4th Ed., William Stallings)
Solution Manual Cryptography and Network Security : Principles and Practice (5th Ed., William Stallings)
Solution Manual Computer Networking with Internet Protocols (William Stallings)
Solution Manual Local and Metropolitan Area Networks (6th Ed., William Stallings)
Solution Manual Probabilistic Systems and Random Signals (Abraham Haddad)
Solution Manual Error Control Coding (2nd Ed., Shu Lin & Daniel J. Costello)
Solution Manual Wireless Communications & Networks (2nd ed., William

Stallings)
Solution Manual Wireless Communications and Networking (Jon W. Mark, Weihua Zhuang)
Solution Manual Detection and Estimation Theory (Thomas Schonhoff & Arthur Giordano)
Solution Manual Signals, Systems, and Transforms (3rd Ed., Charles Phillips, John Parr & Eve Riskin)
Solution Manual Signals, Systems, and Transforms (4th Ed., Charles Phillips, John Parr & Eve Riskin)
Solution Manual Signals, Systems, and Transforms - International Version (4th Ed., Charles Phillips, John Parr & Eve Riskin)
Solution Manual Fundamentals of Signals and Systems Using the Web and Matlab (3rd Ed., Edward Kamen & Bonnie Heck)
Solution Manual Adaptive Filter Theory (4th Ed., Simon Haykin)
Solution Manual Neural Networks and Learning Machines (3rd Ed., Simon Haykin)
Solution Manual Spectral Analysis of Signals (Petre Stoica & Randolph L. Moses)
Solution Manual Fluency with Information Technology : Skills, Concepts, and Capabilities (2nd Ed., Snyder)
Solution Manual Fluency with Information Technology : Skills, Concepts, and Capabilities (3rd Ed., Snyder)
Solution Manual Fluency with Information Technology, Brief Edition (Lawrence Snyder)
Solution Manual Excel 2003 Volume II: Advanced Concepts in Excel (5th Ed., Karen Jolly)
Solution Manual Focus on Excel 2003 (Julie Hayward Spooner)
Solution Manual Comprehensive Excel 2002 for Office XP (4th Ed., Karen Jolly)
Solution Manual Ethics for the Information Age (2nd Ed., Michael Quinn)
Solution Manual Ethics for the Information Age (3rd Ed., Michael Quinn)
Solution Manual Computer Science : An Overview (8th Ed., J. Glenn Brookshear)
Solution Manual Computer Science : An Overview (9th Ed., J. Glenn Brookshear)
Solution Manual Computer Science : An Overview (10th Ed., J. Glenn Brookshear)
Solution Manual Excel 2003 Volume 1 : Core Concepts in Excel (5th Ed., Karen J. Jolly)
Solution Manual Concise Prelude to Programming : Concepts and Design (2nd Ed., Stewart Venit)
Solution Manual Concise Prelude to Programming (3rd Ed., Stewart Venit & Elizabeth Drake)
Solution Manual Extended Prelude to Programming : Concepts and Design (2nd Ed., Stewart Venit)
Solution Manual Extended Prelude to Programming (3rd Ed., Stewart Venit & Elizabeth Drake)
Solution Manual Logic and Design of Computer Programs (Jim Messinger)

Solution Manual Absolute C++ (2nd Ed., Walter Savitch)
Solution Manual Absolute C++ (3rd Ed., Walter Savitch)
Solution Manual Absolute C++ (4th Ed., Walter Savitch)
Solution Manual Problem Solving with C++ : The Object of Programming (5th Ed., Walter Savitch)
Solution Manual Problem Solving with C++ (6th Ed., Walter Savitch)
Solution Manual Problem Solving with C++ (7th Ed., Walter Savitch)
Solution Manual Problem Solving, Abstraction, and Design using C++ (4th Ed., Frank Friedman & Elliot Koffman)
Solution Manual Problem Solving, Abstraction & Design Using C++ (5th Ed., Frank Friedman & Elliot Koffman)
Solution Manual Starting Out with C++ : From Control Structures through Objects (5th Ed., Tony Gaddis)
Solution Manual Starting Out with C++ : From Control Structures through Objects (6th Ed., Tony Gaddis)
Solution Manual Starting Out with C++ : From Control Structures through Objects - Brief Version (6th Ed., Tony Gaddis)
Solution Manual Starting out with C++ Brief Version Updated (4th Ed., Gaddis & Krupnow)
Solution Manual Starting out with C++ Brief Version (5th Ed., Gaddis & Krupnow)
Solution Manual Starting Out with C++ : Brief Version Update, Visual C++ .NET (4th Ed., Gaddis & Krupnow)
Solution Manual Starting Out with C++ : Early Objects (5th Ed., Gaddis, Walters & Muganda)
Solution Manual Starting Out with C++ : Early Objects (6th Ed., Gaddis, Walters & Muganda)
Solution Manual Starting Out with C++ : Early Objects (7th Ed., Gaddis, Walters & Muganda)
Solution Manual C++ By Dissection (Ira Pohl)
Solution Manual Essential C++ for Engineers and Scientists (2nd Ed., Jeri Hanly)
Solution Manual C++ Coach : Essentials for Introductory Programming (Jeff Salvage)
Solution Manual C++ Primer (4th Ed., Stanley Lippman, Josée Lajoie & Barbara Moo)
Solution Manual Engineering Computation with MATLAB (1st Ed., David Smith)
Solution Manual Engineering Computation with MATLAB (2nd Ed., David Smith)
Solution Manual Absolute Java (1st Ed., Walter Savitch)
Solution Manual Absolute Java (2nd Ed., Walter Savitch)
Solution Manual Absolute Java (3rd Ed., Walter Savitch)
Solution Manual Absolute Java (4th Ed., Walter Savitch)
Solution Manual The Art and Science of Java (Eric Roberts)
Solution Manual Building Java Programs : A Back to Basics Approach (Stuart Reges & Martin Stepp)
Solution Manual Introduction to Programming in Java : An Interdisciplinary Approach (Robert Sedgewick & Kevin Wayne)
Solution Manual Java Foundations: Introduction to Program Design and

Data Structures (John Lewis, Peter DePasquale & Joe Chase)
Solution Manual Starting Out with Java : Early Objects (3rd Ed., Gaddis)
Solution Manual Starting Out with Java : From Control Structures through Objects (3rd Ed., Gaddis)
Solution Manual Starting Out with Java : From Control Structures through Objects (4th Ed., Gaddis)
Solution Manual Java Software Solutions (Java 5.0 version) : Foundations of Program Design (4th Ed., Lewis & Loftus)
Solution Manual Java Software Solutions : Foundations of Program Design (5th Ed., Lewis & Loftus)
Solution Manual Java Software Solutions : Foundations of Program Design (6th Ed., Lewis & Loftus)
Solution Manual Starting Out with Java : From Control Structures through Data Structures (Gaddis & Muganda)
Solution Manual Object of Java, The: Introduction to Programming Using Software Engineering Principles (2nd Ed, David Riley)
Solution Manual Object-Oriented Programming in Java : A Graphical Approach, Preliminary Edition (Kathryn E. Sanders & Andy van Dam)
Solution Manual Starting Out with Java 5 : Control Structures to Objects (Tony Gaddis)
Solution Manual Starting Out with Java 5 : Early Objects (Tony Gaddis)
Solution Manual Introduction to Programming Using Java : An Object-Oriented Approach (2nd Ed., David Arnow, Scott Dexter & Gerald Weiss)
Solution Manual Computing with Java (2nd Ed., Art Gittleman)
Solution Manual Problem Solving with Java, Update (2nd Ed., Elliot B. Koffman & Ursula Wolz)
Solution Manual Starting Out with Alice : A Visual Introduction to Programming (Tony Gaddis)
Solution Manual Problem Solving and Program Design in C (4th Ed., Jeri Hanly & Elliot Koffman)
Solution Manual Problem Solving and Program Design in C (5th Ed., Jeri Hanly & Elliot Koffman)
Solution Manual Problem Solving and Program Design in C (6th Ed., Jeri Hanly & Elliot Koffman)
Solution Manual Starting Out with Visual Basic 2005 (3rd Ed., Tony Gaddis & Kip Irvine)
Solution Manual Starting Out with Visual Basic 6 (Tony Gaddis, Kip Irvine & Bruce Denton)
Solution Manual Starting Out with Visual Basic.Net (2nd Ed., Tony Gaddis, Kip Irvine & Bruce Denton)
Solution Manual Computer Programming Fundamentals with Applications in Visual Basic® 6.0 (Mitchell Kerman & Ronald Brown)
Solution Manual Advanced VB.NET Alternate with VB.Net CD's (3rd Ed., Kip Irvine & Tony Gaddis)
Solution Manual Advanced Visual Basic 2005 (4th Ed., Kip Irvine & Tony Gaddis)
Solution Manual C# Software Solutions : Foundations of Program Design (John Lewis)
Solution Manual Problem Solving, Abstraction and Design Using C++,

Visual C++.NET Edition (Frank Friedman & Elliot Koffman)
Solution Manual Ada 95 : Problem Solving and Program Design (3rd Ed., Michael Feldman & Elliot Koffman)
Solution Manual Programming and Problem Solving with Delphi (Mitchell Kerman)
Solution Manual C Program Design for Engineers (2nd Ed., Jeri Hanly & Elliot Koffman)
Solution Manual Data Abstraction & Problem Solving with C++ (5th ed., Frank Carrano)
Solution Manual Data Structures and Algorithm Analysis in C++ (2nd Ed., Mark Allen Weiss)
Solution Manual Data Structures and Algorithm Analysis in C++ (3rd Ed., Mark Allen Weiss)
Solution Manual Data Abstraction and Problem Solving with C++ : Walls and Mirrors (4th Ed., Frank Carrano)
Solution Manual Data Structures and Problem Solving Using C++ (2nd Ed., Mark Allen Weiss)
Solution Manual Data Structures and Algorithm Analysis in Java (2nd Ed., Mark Allen Weiss)
Solution Manual Data Structures in Java : From Abstract Data Types to the Java Collections Framework (Simon Gray)
Solution Manual Data Abstraction and Problem Solving with Java (2nd Ed., Frank Carrano & Janet Prichard)
Solution Manual Data Structures and Other Objects Using Java (3rd Ed., Michael Main)
Solution Manual Data Structures and Problem Solving Using Java (3rd Ed., Mark Allen Weiss)
Solution Manual Data Structures and Problem Solving Using Java (4th Ed., Mark Allen Weiss)
Solution Manual Java Software Structures : Designing and Using Data Structures (2nd Ed., John Lewis, Joseph Chase)
Solution Manual The Object of Data Abstraction and Structures (using Java) (David Riley)
Solution Manual Classic Data Structures in Java (Timothy Budd)
Solution Manual Data Structures in Java (Thomas A. Standish)
Solution Manual Data Structures, Algorithms and Software Principles in C (Thomas A. Standish)
Solution Manual Introduction to the Design and Analysis of Algorithms (1st Ed., Anany Levitin)
Solution Manual Introduction to the Design and Analysis of Algorithms (2nd Ed., Anany Levitin)
Solution Manual Algorithm Design (Jon Kleinberg & Éva Tardos)
Solution Manual Data Structures and Algorithm Analysis in C (2nd Ed., Mark Allen Weiss)
Solution Manual Computer Algorithms : Introduction to Design and Analysis (3rd Ed., Sara Baase & Allen Van Gelder)
Solution Manual Artificial Intelligence : Structures and Strategies for Complex Problem Solving (6th Ed., George Luger)
Solution Manual Artificial Intelligence : A Modern Approach (2nd Ed., Stuart Russell & Peter Norvig)

Solution Manual The Complete A+ Guide to PC Repair (3rd Ed., Cheryl Schmidt)
Solution Manual The Complete A+ Guide to PC Repair (4th Ed., Cheryl Schmidt)
Solution Manual Complete Computer Repair Textbook (4th Ed., Cheryl Schmidt)
Solution Manual Computer Systems Organization and Architecture (John D. Carpinelli)
Solution Manual CMOS VLSI Design: A Circuits and Systems Perspective (3rd Ed., Neil Weste & David Harris)
Solution Manual Interactive Computer Graphics : A Top-Down Approach Using OpenGL (4th Ed., Edward Angel)
Solution Manual Interactive Computer Graphics : A Top-Down Approach Using OpenGL (5th Ed., Edward Angel)
Solution Manual File Structures : An Object-Oriented Approach with C++ (3rd Ed., Michael J. Folk, Bill Zoellick & Greg Riccardi)
Solution Manual Oracle 10g Programming : A Primer (Rajshekhar Sunderraman)
Solution Manual Databases, Types and the Relational Model (3rd Ed., C. J. Date & Hugh Darwen)
Solution Manual Fundamentals of Database Systems (5th Ed., Ramez Elmasri & Shamkant Navathe)
Solution Manual Database Systems : An Application-Oriented Approach, Introductory Version (2nd Ed., Michael Kifer, Arthur Bernstein & Philip M. Lewis)
Solution Manual Database Systems : An Application Oriented Approach, Complete Version (2nd Ed., Michael Kifer, Arthur Bernstein & Philip M. Lewis)
Solution Manual DataBase Systems : A Practical Approach to Design, Implementation and Management (4th Ed., Thomas M. Connolly & Carolyn E. Begg)
Solution Manual DataBase Systems : A Practical Approach to Design, Implementation and Management (5th Ed., Thomas M. Connolly & Carolyn E. Begg)
Solution Manual Database Systems : The Complete Book (2nd Ed., Hector Garcia-Molina, Jeffrey D. Ullman, Jennifer Widom)
Solution Manual A First Course in Database Systems (3rd Ed., Jeffrey D. Ullman, Jennifer Widom)
Solution Manual Fundamentals of Database Systems/Oracle 9i Programming (4th Ed., Ramez Elmasri, Shamkant B. Navathe & Rajshekhar Sunderraman)
Solution Manual An Introduction to Database Systems (8th Ed., C.J. Date)
Solution Manual Oracle 9i Programming : A Primer (Rajshekhar Sunderraman)
Solution Manual Elements of Information Theory (1st Ed., Thomas M. Cover & Joy A. Thomas)
Solution Manual Principles of Database Systems with Internet and Java Applications (Greg Riccardi)
Solution Manual Introduction to Data Mining (Pang-Ning Tan, Michael Steinbach & Vipin Kumar)

Solution Manual Data Mining: A Tutorial Based Primer (Richard Roiger & Michael Geatz)
Solution Manual Learning SQL : A Step-by-Step Guide Using Access (Sikha Bagui, Richard Earp)
Solution Manual Learning SQL : A Step-By-Step Guide Using Oracle (Richard Earp, Sikha Bagui)
Solution Manual Access 2007 Guidebook (6th Ed., Maggie Trigg & Phyllis Dobson)
Solution Manual Access 2003 Guidebook for Office XP (5th Ed., Maggie Trigg & Phyllis Dobson)
Solution Manual Implementing Databases in Oracle 9i (John Day & Craig Van Slyke)
Solution Manual Web 101: Making the Net Work for You (2nd Ed., Wendy Lehnert)
Solution Manual Web 101 (3rd Ed., Wendy G. Lehnert & Richard L. Kopec)
Solution Manual Web Developer Foundations : Using XHTML (2nd Ed., Terry Felke-Morris)
Solution Manual Web Development & Design Foundations With XHTML (3rd Ed., Terry Felke-Morris)
Solution Manual Web Development and Design Foundations with XHTML (4th Ed., Terry Felke-Morris)
Solution Manual Internet Effectively : A Beginner's Guide to the World Wide Web (Tyrone Adams & Sharon Scollard)
Solution Manual Light on the Web : Essentials to Making the 'Net Work for You (Wendy G. Lehnert)
Solution Manual Programming the World Wide Web (3rd Ed., Robert W. Sebesta)
Solution Manual Programming the World Wide Web (4th Ed., Robert W. Sebesta)
Solution Manual Programming the World Wide Web (5th Ed., Robert W. Sebesta)
Solution Manual Programming the World Wide Web (6th Ed., Robert W. Sebesta)
Solution Manual XML: Language Mechanics and Applications (Dwight Peltzer)
Solution Manual Practical Perl with CGI Applications (Elizabeth Chang)
Solution Manual Developing Web Applications with Active Server Pages (Thom Luce)
Solution Manual Structure and Interpretation of Signals and Systems (Edward A. Lee & Pravin Varaiya)
Solution Manual Languages and Machines : An Introduction to the Theory of Computer Science (2nd Ed., Thomas Sudkamp)
Solution Manual Languages and Machines : An Introduction to the Theory of Computer Science (3rd Ed., Thomas Sudkamp)
Solution Manual How to Break Software Security (James A. Whittaker & Herbert H. Thompson)
Solution Manual Software Quality Assurance : From Theory to Implementation (Daniel Galin)
Solution Manual Object Oriented Software Development Using Java (2nd Ed., Xiaoping Jia)

Solution Manual Introduction to the Team Software Process (Watts S. Humphrey)
Solution Manual Software Project Management : A Real-World Guide to Success (Joel Henry)
Solution Manual Software Engineering (7th Ed., Ian Sommerville)
Solution Manual Software Engineering (8th Ed., Ian Sommerville)
Solution Manual Software Engineering (9th Ed., Ian Sommerville)
Solution Manual Software Engineering (3rd Ed., Shari Lawrence Pfleeger & Joanne Atlee)
Solution Manual Software Engineering : Theory and Practice (4th Ed., Shari Lawrence Pfleeger & Joanne Atlee)
Solution Manual Object-Oriented Programming featuring Graphical Applications in Java (Michael Laszlo)
Solution Manual Project-Based Software Engineering : An Object-Oriented Approach (Evelyn Stiller & Cathie LeBlanc)
Solution Manual Engineering of Software, The: A Technical Guide for the Individual (Dick Hamlet & Joe Maybee)
Solution Manual Concepts of Programming Languages (7th Ed., Robert W. Sebesta)
Solution Manual Concepts of Programming Languages (8th Ed., Robert W. Sebesta)
Solution Manual Concepts of Programming Languages (9th Ed., Robert W. Sebesta)
Solution Manual Advanced Java : Internet Applications (2nd Ed., Art Gittleman)
Solution Manual Objects to Components with Java 2 Platform (Art Gittleman)
Solution Manual C for Java Programmers (Tomasz Muldner)
Solution Manual Pointers on C (Kenneth Reek)
Solution Manual C++ Programming with Design Patterns Revealed (Tomasz Muldner)
Solution Manual The C++ Programming Language (3rd Ed., Bjarne Stroustrup)
Solution Manual Operating Systems : A Systematic View (6th Ed., William S. Davis & T.M. Rajkumar)
Solution Manual Unix: The Textbook (2nd Ed., Syed Mansoor Sarwar, Robert Koretsky & Syed Aqeel Sarwar)
Solution Manual Operating Systems (3rd Ed., Gary Nutt)
Solution Manual LINUX & UNIX Programming Tools : A Primer for Software Developers (Syed Mansoor Sarwar & Khaled H. Al-Saqabi)
Solution Manual Addison-Wesley's Interactive Linux Tutorial and Reference (Edutrends, Inc.)
Solution Manual Linux : The Textbook (Syed Mansoor Sarwar, Robert Koretsky & Syed Aqeel Sarwar)
Solution Manual Kernel Projects for Linux (Gary Nutt)
Solution Manual OSP : An Environment for Operating System Projects (Michael Kifer & Scott A. Smolka)
Solution Manual Distributed Computing : Principles and Applications (M.L. Liu)
Solution Manual Distributed Operating Systems and Algorithm Analysis

(Randy Chow & Theodore Johnson)
Solution Manual Mastering Networks : An Internet Lab Manual (Jorg Liebeherr & Magda El Zarki)
Solution Manual Computer Networking Complete Package (3rd Ed., James Kurose & Keith Ross)
Solution Manual Computer Networking : A Top-Down Approach Featuring the Internet (3rd Ed., James Kurose & Keith Ross)
Solution Manual Computer Networking : A Top-Down Approach (4th Ed., James Kurose & Keith Ross)
Solution Manual Computer Networking : A Top-Down Approach (5th Ed., James Kurose & Keith Ross)
Solution Manual Producing Great Sound for Film and Video (3rd Ed., Jay Rose)
Solution Manual Network Management : Principles and Practice (Mani Subramanian)
Solution Manual Computer Security : Art and Science (Matt Bishop)
Solution Manual Introduction to Computer Security (Matt Bishop)
Solution Manual Creating Powerful Brands (4th Ed., Leslie de Chernatony, Malcolm McDonald, Elaine Wallace)
Solution Manual How to Break Software Security (James A. Whittaker & Herbert H. Thompson)
Solution Manual Parallel Programming in C with MPI and Open MP (Michael Quinn)
Solution Manual Modern Recording Techniques (6th Ed., Miles Huber & Runstein)
Solution Manual Creating Powerful Radio : Getting, Keeping and Growing Audiences News, Talk, Information & Personality Broadcast, HD, Satellite & Internet (Valerie Geller)
Solution Manual Electronic Media Law and Regulation (5th Ed., Kenneth Creech)
Solution Manual Electronic Media Management, Revised (5th Ed., Pringle & Starr)
Solution Manual Convergent Journalism an Introduction: Writing and Producing Across Media (Quinn & Filak)
Solution Manual Flash Journalism : How to Create Multimedia News Packages (Mindy McAdams)

49. 4050 Solutions manual and Test banks to Math, Statistics and Probability Books

Newsgroup: rec.radio.amateur.policy
Date: 2011-01-08 07:19:09 UTC
From: BERGH <mattosbw1@gmail.com>
Message-ID: <4c587cb7-ff17-4aa4-9fef-56cf3b7f6cea@y31g2000vbt.googlegroups.com>
Source record: 244370

List of Solutions Manuals and Test Banks

----

contact me to : mattosbw1@gmail.com
mattosbw1(at)gmail.com

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR : CHINA, INDIA, RUSSIA, PAKISTAN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MALDIVES, BHUTAN & COLOMBIA".

If your wanted solutions manual is not in this list, also can ask me if is available (it is a partial list). Then if you need solutions manual only contact me by email.

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TEST BANKS.

This same "list of titles" of texts with availables solutions manual and/or test banks is for download from :

http://www.megaupload.com/?d=1P9GUXB1

I do not review the forums, just send me an email.

- Math, Statistics & Probability :

Solution manual Advanced Engineering Mathematics (8th Ed., Erwin Kreyszig)
Solution manual Advanced Engineering Mathematics (9th Ed., Erwin Kreyszig)
Solution manual Advanced Engineering Mathematics (10th Ed., Erwin Kreyszig)
Solution manual Advanced Engineering Mathematics (2nd Ed, Michael Greenberg)
Solution manual Advanced Engineering Mathematics (6th Ed., Peter O'Neil)
Solution manual Advanced Modern Engineering Mathematics (3rd Ed., Glyn James)
Solution manual Modern Engineering Mathematics (4th Ed., Glyn James)
Solution manual Differential Equations and Dynamical Systems (3rd Ed., Lawrence Perko)
Solution manual Introductory Differential Equations with Boundary Value Problems (3rd Ed., Martha Abell & James Braselton)
Solution manual A Modern Introduction to Differential Equations (2nd Ed., Henry J. Ricardo)
Solution manual Elementary Differential Equations (7th Ed., Boyce)

Solution manual Elementary Differential Equations (8th Ed., Boyce & Diprima)
Solution manual Elementary Differential Equations (9th Ed., Boyce & Diprima)
Solution manual Elementary Differential Equations and Boundary Value Problems (7th Ed., Boyce & Diprima)
Solution manual Elementary Differential Equations and Boundary Value Problems (8th Ed., Boyce & Diprima)
Solution manual Elementary Differential Equations and Boundary Value Problems (9th Ed., Boyce & Diprima)
Solution manual Differential Equations : An Introduction to Modern Methods and Applications (James Brannan & William Boyce)
Solution manual Differential Equations with Boundary Value Problems : An Introduction to Modern Methods and Applications (James Brannan & William Boyce)
Solution manual Advanced Calculus : A Transition to Analysis (Thomas Dence & Joseph Dence)
Solution manual Calculus : Early Transcendentals Combined (8th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Early Transcendentals Combined (9th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Multivariable (8th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Multivariable (9th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Early Transcendentals Single Variable (8th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Early Transcendentals Single Variable (9th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Late Transcendentals Combined (8th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Late Transcendentals Combined (9th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Late Transcendentals Single Variable (8th Ed., Anton, Bivens & Davis)
Solution manual Calculus : Late Transcendentals Single Variable (9th Ed., Anton, Bivens & Davis)
Solution manual Introduction to the Finite Element Method : Theory, Programming and Applications (Erik G. Thompson)
Solution manual A Physicist's Guide to Mathematica (2nd Ed., Patrick Tam)
Solution manual Mathematics for Engineers : A Modern Interactive Approach (3rd., Anthony Croft & Robert Davison)
Solution manual Measurement and Data Analysis for Engineering and Science (Patrick F Dunn)
Solution manual Elementary Linear Algebra (4th Ed., Stephen Andrilli & David Hecker)
Solution manual Elementary Linear Algebra Edition Abridged (9th Ed., Anton & Rorres)
Solution manual Elementary Linear Algebra (9th Ed., Anton)

Solution manual Elementary Linear Algebra with Applications (9th Ed., Anton & Rorres)
Solution manual Boundary Value Problems and Partial Differential Equations (6th Ed., David Powers)
Solution manual Introductory Statistics : Using Technology (5th Ed., Prem S. Mann)
Solution manual Introductory Statistics (6th Ed., Prem S. Mann)
Solution manual Introductory Statistics (7th Ed., Prem S. Mann)
Solution manual Basic Real Analysis (Houshang H. Sohrab)
Solution manual Modern Algebra : An Introduction (6th Ed., John Durbin)
Solution manual The Art and Craft of Problem Solving (2nd Ed., Paul Zeitz)
Solution manual Numerical Linear Algebra (Grégoire Allaire, Sidi Mahmoud Kaber, K. Trabelsi)
Solution manual Introductory Statistics for the Behavioral Sciences (6th Ed., Welkowitz, Cohen & Ewen)
Solution manual Statistics : Principles and Methods (5th Ed., Richard Johnson)
Solution manual Statistics : Principles and Methods (6th Ed., Richard Johnson)
Solution manual Statistical Bioinformatics : with R (Sunil K. Mathur)
Solution manual Parameter Estimation and Inverse Problems (Richard Aster, Brian Borchers & Clifford Thurber)
Solution manual Codes : An Introduction to Information Communication and Cryptography (Norman L. Biggs)
Solution manual Geometry and Its Applications (2nd Ed., Walter A. Meyer)
Solution manual Elementary Differential Geometry (2nd Ed., A.N. Pressley)
Solution manual Fractal Geometry : Mathematical Foundations and Applications (2nd Ed., Kenneth Falconer)
Solution manual Analytical and Computational Methods of Advanced Engineering Mathematics (Grant B. Gustafson & Calvin H. Wilcox)
Solution manual How to Read and Do Proofs : An Introduction to Mathematical Thought Processes (4th Ed., Daniel Solow)
Solution manual How to Read and Do Proofs : An Introduction to Mathematical Thought Processes (5th Ed., Daniel Solow)
Solution manual Intuitive Probability and Random Processes using MATLAB (Steven Kay)
Solution manual Modeling Random Processes for Engineers and Managers (James Solberg)
Solution manual Probability, Statistics, and Random Processes For Electrical Engineering (3rd Ed., Alberto Leon-Garcia)
Solution manual Probability Concepts in Engineering : Emphasis on Applications to Civil and Environmental Engineering (2nd Ed., Ang & Tang)
Solution manual Applied Statistics for Engineers and Physical Scientists (3rd Ed., Johannes Ledolter & Robert Hogg)
Solution manual Applied Statistics and Probability for Engineers (3rd

Ed., Montgomery & Runger)
Solution manual Applied Statistics and Probability for Engineers (4th Ed., Montgomery & Runger)
Solution manual Applied Statistics and Probability for Engineers (5th Ed., Montgomery & Runger)
Solution manual Engineering Statistics (3rd Ed., Montgomery, Runger & Hubele)
Solution manual Engineering Statistics (4th Ed., Montgomery, Runger & Hubele)
Solution manual Introduction to Statistical Quality Control (5th Ed., Montgomery)
Solution manual Introduction to Statistical Quality Control (6th Ed., Montgomery)
Solution manual Calculus : One Variables (10th Ed., Salas, Hille, Etgen)
Solution manual Calculus : One and Several Variables (8th Ed., Salas, Hille, Etgen)
Solution manual Calculus : One and Several Variables (10th Ed., Salas, Hille, Etgen)
Solution manual Squaring the Circle : Geometry in Art and Architecture (Paul Calter)
Solution manual Technical Mathematics (5th Ed., Paul Calter & Michael Calter)
Solution manual Technical Mathematics with Calculus (5th Ed., Paul Calter & Michael Calter)
Solution manual Technical Mathematics with Calculus, Canadian Edition (Paul Calter & Michael Calter)
Solution manual Techniques of Problem Solving (Luis Fernández, Haedeh Gooransarab)
Solution manual Probability and Statistics in Engineering (4th Ed., Hines, Montgomery, Goldsman & Borror)
Solution manual A First Course in Design and Analysis of Experiments (Gary W. Oehlert)
Solution manual Design and Analysis of Experiments (6th Ed., Douglas Montgomery)
Solution manual Design and Analysis of Experiments (7th Ed., Douglas Montgomery)
Solution manual Introduction to Engineering Experimentation (2nd Ed., Wheeler & Ganji)
Solution manual Introduction to Engineering Experimentation (3rd Ed., Wheeler & Ganji)
Solution manual Introduction to the Design & Analysis of Experiments (Canavos & Koutrouvelis)
Solution manual Modern Methods For Quality Control and Improvement (2nd Ed., Wadsworth, Stephens, Godfrey)
Solution manual Essential Statistics for Economics, Business and Management (Teresa Bradley)
Solution manual Statistics and Econometrics : Methods and Applications (Ashenfelter, Levine & Zimmerman)
Solution manual Applied Combinatorics (5th Ed., Alan Tucker)

Solution manual Vector Calculus (Miroslav Lovric)
Solution manual Applied Multivariate Techniques (Subhash Sharma)
Solution manual Mathematical Modeling (3rd Ed., Mark Meerschaert)
Solution manual Discrete Mathematics : Mathematical Reasoning and Proof with Puzzles, Patterns, and Games (Douglas Ensley, J. Winston Crawley)
Solution manual Probability, Random Variables and Random Signal Principles (4th Ed., Peyton Z., Jr. Peebles)
Solution manual Introduction to C++, Excel MATLAB & Basic Engineering Numerical Methods V1.1 (Harvey Stenger & Charles Smith)
Solution manual Numerical Methods for Engineers and Scientists : An Introduction with Applications Using MATLAB (1st Ed., Amos Gilat & Vish Subramaniam)
Solution manual Numerical Methods for Engineers and Scientists : An Introduction with Applications Using MATLAB (2nd Ed., Amos Gilat & Vish Subramaniam)
Solution manual MATLAB : An Introduction with Applications (2nd Ed., Amos Gilat)
Solution manual MATLAB : An Introduction with Applications (3rd Ed., Amos Gilat)
Solution manual MATLAB : An Introduction with Applications (4th Ed., Amos Gilat)
Solution manual Matlab : A Practical Introduction to Programming and Problem Solving (Stormy Attaway)
Solution manual Data, Statistics, and Decision Models with Excel (Harnett & Horrell)
Solution manual Understanding Analysis (Stephen Abbott)
Solution manual Time Series Analysis With Applications in R (2nd Ed., Jonathan D. Cryer & Kung-Sik Chan)
Solution manual Time Series Analysis and Its Applications : With R Examples (2nd Ed., Robert Shumway & David Stoffer)
Solution manual Doing Statistics for Business with Excel : Data, Inference, and Decision Making (2nd Ed. Pelosi & Sandifer)
Solution manual Engineering with Excel (3rd Ed., Ronald W. Larsen)
Solution manual Spreadsheet Tools for Engineers Using Excel 2007 (Byron Gottfried)
Solution manual Spreadsheet Tools for Engineers using Excel (2nd Ed. Byron Gottfried)
Solution manual Spreadsheet Tools for Engineers using Excel (3rd Ed. Byron Gottfried)
Solution manual Introduction to Matlab 7 (Etter, Kuncicky & Moore)
Solution manual Introduction to Matlab 6 for Engineers (1st Ed., William Palm III)
Solution manual Introduction to Matlab 7 for Engineers (2nd Ed., William Palm III)
Solution manual Introduction to Matlab for Engineers (3rd Ed., William Palm III)
Solution manual A Concise Introduction to MATLAB (William J Palm III)
Solution manual Numerical Methods for Engineers (4th Ed. Steven Chapra, Raymond Canale)

Solution manual Numerical Methods for Engineers (5th Ed. Steven Chapra, Raymond Canale)
Solution manual Numerical Methods for Engineers (6th Ed. Steven Chapra, Raymond Canale)
Solution manual Applied Numerical Methods with MATLAB for Engineers and Scientists (1st Ed., Steven Chapra)
Solution manual Applied Numerical Methods with MATLAB for Engineers and Scientists (2nd Ed., Steven Chapra)
Solution manual MATLAB for Engineers (1st Ed., Holly Moore)
Solution manual MATLAB for Engineers (2nd Ed., Holly Moore)
Solution manual Statistics for Engineers and Scientists (1st Ed., William Navidi)
Solution manual Statistics for Engineers and Scientists (2nd Ed., William Navidi)
Solution manual Statistics for Engineers and Scientists (3rd Ed., William Navidi)
Solution manual Principles of Statistics for Engineers and Scientists (William Navidi)
Solution manual Probability (Jim Pitman)
Solution manual Basic Probability Theory (Robert B. Ash)
Solution manual An Introduction to Stochastic Modeling (3rd Ed., Samuel Karlin)
Solution manual Stochastic Calculus for Finance (Steven E. Shreve)
Solution manual Markov Processes for Stochastic Modeling (Oliver Ibe)
Solution manual Mathematical Statistics with Applications (K.M. Ramachandran & Chris Tsokos)
Solution manual Probability : A Graduate Course (Allan Gut)
Solution manual Linear Algebra Done Right (2nd Ed., Sheldon Axler)
Solution manual Precalculus : A Prelude to Calculus (Sheldon Axler)
Solution manual Statistics for Business (Derek Waller)
Solution manual An Introduction to the Mathematics of Financial Derivatives (2nd Ed., Salih Neftci)
Solution manual Elementary Number Theory with Applications (2nd Ed., Thomas Koshy)
Solution manual Introduction to Probability Models (9th Ed., Sheldon Ross)
Solution manual Introduction to Probability Models (10th Ed., Sheldon Ross)
Solution manual Introductory Statistics (2nd Ed., Sheldon Ross)
Solution manual Introductory Statistics (3rd Ed., Sheldon Ross)
Solution manual Introduction to Probability and Statistics for Engineers and Scientists (4th Ed., Sheldon Ross)
Solution manual Basic Mathematics through Applications (4th Ed. by Akst, Bragg)
Solution manual Developmental Mathematics (6th Ed., Bittinger & Beecher)
Solution manual Developmental Mathematics (7th Ed., Bittinger & Beecher)
Solution manual Developmental Mathematics : Basic Mathematics and Algebra (1st Ed., Lial, Hornsby, McGinnis, Salzman & Hestwood)

Solution manual Developmental Mathematics : Basic Mathematics and Algebra (2nd Ed., Lial, Hornsby, McGinnis, Salzman & Hestwood)
Solution manual Essential Mathematics (2nd Ed., Margaret Lial & Stanley Salzman)
Solution manual Essential Mathematics (3rd Ed., Margaret Lial & Stanley Salzman)
Solution manual Prealgebra & Introductory Algebra (2nd Ed. by Elayn El Martin-Gay)
Solution manual Prealgebra (5th Ed., Bittinger, Ellenbogen & Johnson)
Solution manual Prealgebra (5th Ed., Elayn El Martin-Gay)
Solution manual Prealgebra : An Integrated Approach (Lial & Hestwood)
Solution manual Integrated Arithmetic and Basic Algebra (4th Ed., Jordan & Palow)
Solution manual Introductory Algebra through Applications (1st Ed., Akst & Bragg)
Solution manual Introductory Algebra through Applications (2nd Ed., Akst & Bragg)
Solution manual Beginning Algebra (10th Ed., Lial, Hornsby & McGinnis)
Solution manual Elementary Algebra Early Graphing for College Students (3rd Ed., Allen R. Angel)
Solution manual Intermediate Algebra with Applications & Visualization (3rd Ed., Rockswold & Krieger)
Solution manual Intermediate Algebra (10th Ed., Lial, Hornsby & McGinnis)
Solution manual Beginning and Intermediate Algebra (4th Ed., Lial, Hornsby & McGinnis)
Solution manual Elementary and Intermediate Algebra : Graphs & Models (3rd Ed., Bittinger, Ellenbogen & Johnson)
Solution manual Algebra for College Students (4th Ed., Mark Dugopolski)
Solution manual Algebra for College Students (5th Ed., Mark Dugopolski)
Solution manual Algebra For College Students (6th Ed., Robert F Blitzer)
Solution manual Algebra for College Students (3rd Ed., Allen R. Angel)
Solution manual Algebra for College Students (6th Ed., Lial, Hornsby & McGinnis)
Solution manual Statistics, Data Analysis, and Decision Modeling (3rd Ed., James Evans)
Solution manual Statistics, Data Analysis, and Decision Modeling (4th Ed., James Evans)
Solution manual College Geometry : A Discovery Approach (2nd Ed., David Kay)
Solution manual College Geometry : Using The Geometer's Sketchpad - Preliminary Edition (Barbara Reynolds & William Fenton)
Solution manual College Geometry : A Problem Solving Approach with Applications (2nd Ed., Musser, Trimpe & Maurer)
Solution manual A Survey of Mathematics with Applications (8th Ed., Angel, Abbott & Runde)
Solution manual A Survey of Mathematics with Applications: Expanded

Edition (8th Ed., Angel, Abbott & Runde)
Solution manual Mathematical Ideas (11th Ed., Miller, Heeren & Hornsby)
Solution manual Mathematical Ideas: Expanded Edition (11th Ed., Miller, Heeren & Hornsby)
Solution manual Mathematical Thinking : Problem-Solving and Proofs (2nd Ed., John P. D'Angelo & Douglas B. West)
Solution manual Thinking Mathematically (4th Ed., Robert F. Blitzer)
Solution manual Introduction to Mathematical Thinking: Algebra and Number Systems (Will J. Gilbert & Scott A. Vanstone)
Solution manual Mathematical Reasoning : Writing and Proof (1st Ed., Ted A. Sundstrom)
Solution manual Mathematical Reasoning : Writing and Proof (2nd Ed., Ted A. Sundstrom)
Solution manual Mathematical Reasoning for Elementary Teachers (4th Ed., Calvin T. Long & Duane W. DeTemple)
Solution manual Mathematical Reasoning for Elementary Teachers (5th Ed., Long, DeTemple & Millman)
Solution manual Mathematics for Elementary School Teachers (4th Ed., O'Daffer, Charles, Cooney, Dossey & Schielack)
Solution manual Mathematics for Elementary Teachers (2nd Ed., Sybilla Beckmann)
Solution manual Finite Mathematics and Calculus with Applications (7th Ed., Lial, Greenwell & Ritchey)
Solution manual Finite Mathematics and Calculus with Applications (8th Ed., Lial, Greenwell & Ritchey)
Solution manual Additional Calculus Topics (11th Ed., Barnett, Ziegler & Byleen)
Solution manual College Mathematics for Business, Economics, Life Sciences & Social Sciences (11th Ed., Barnett, Ziegler & Byleen)
Solution manual Introductory Mathematical Analysis for Business, Economics and the Life and Social Sciences (12th Ed., Haeussler, Paul & Wood)
Solution manual Finite Mathematics for Business, Economics, Life Sciences and Social Sciences (11th Ed., Barnett, Ziegler, Byleen)
Solution manual Finite Mathematics (9th Ed., Lial, Greenwell & Ritchey)
Solution manual Calculus and Its Applications (9th Ed., Bittinger & Ellenbogen)
Solution manual Calculus for Business, Economics, Life Sciences & Social Sciences (11th Ed., Barnett, Ziegler & Byleen)
Solution manual Calculus with Applications (9th Ed., Lial, Greenwell & Ritchey)
Solution manual Calculus with Applications : Brief Version (9th Ed., Lial, Greenwell & Ritchey)
Solution manual Concepts of Calculus with Applications (Martha Goshaw)
Solution manual University Calculus : Elements with Early Transcendentals (Hass, Weir & Thomas, Jr.)
Solution manual Thomas' Calculus, Early Transcendentals: Media Upgrade (11th Ed., Thomas Jr., Weir, Hass & Giordano)

Solution manual Thomas' Calculus: Media Upgrade (11th Ed., Thomas Jr., Weir, Hass & Giordano)
Solution manual University Calculus : Alternate Edition (Hass, Weir & Thomas, Jr.)
Solution manual Differential Equations Computing and Modeling (4th Ed., Edwards & Penney)
Solution manual Differential Equations and Boundary Value Problems : Computing and Modeling (4th Ed., Edwards & Penney)
Solution manual Elementary Differential Equations with Boundary Value Problems (6th Ed., Edwards & Penney)
Solution manual Elementary Differential Equations (6th Ed., Edwards & Penney)
Solution manual Fundamentals of Differential Equations (7th Ed., Nagle, Saff & Snider)
Solution manual Fundamentals of Differential Equations with Boundary Value Problems (5th Ed., Nagle, Saff & Snider)
Solution manual Differential Equations and Linear Algebra (3rd Ed., Goode & Annin)
Solution manual Discrete Mathematical Structures (6th Ed., Kolman, Busby & Ross)
Solution manual College Algebra Enhanced with Graphing Utilities (5th Ed., Sullivan & Sullivan III)
Solution manual College Algebra (10th Ed., Lial, Hornsby & Schneider)
Solution manual College Algebra : Graphs and Models (4th Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual College Algebra Essentials (8th Ed., Michael Sullivan)
Solution manual College Algebra (3rd Ed., Judith A. Beecher, Judith A. Penna & Marvin L. Bittinger)
Solution manual College Algebra (8th Ed., Michael Sullivan)
Solution manual Algebra and Trigonometry for College Readiness (Margaret L. Lial & John Hornsby)
Solution manual Algebra and Trigonometry Enhanced with Graphing Utilities (5th Ed., Sullivan & Sullivan III)
Solution manual Algebra and Trigonometry : Graphs & Models (4th Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual Trigonometry : A Unit Circle Approach (8th Ed., Michael Sullivan)
Solution manual Precalculus (3rd Ed., Lial, Hornsby & Schneider)
Solution manual Precalculus (4th Ed., Lial, Hornsby & Schneider)
Solution manual Precalculus : Enhanced with Graphing Utilities (5th Ed., Sullivan & Sullivan III)
Solution manual Precalculus : Functions and Graphs (3rd Ed. Mark Dugopolski)
Solution manual Precalculus : Graphs & Models and Graphing (4th Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual Discrete and Combinatorial Mathematics (5th ed., Ralph P. Grimaldi)
Solution manual Discrete Mathematics (Sherwood Washburn, Thomas Marlowe & Charles T. Ryan)
Solution manual Discrete Mathematics (5th ed., John Dossey, Albert

Otto, Lawrence Spence & Charles Vanden Eynden)
Solution manual Mathematics for New Technologies (Don Hutchison & Mark Yannotta)
Solution manual Fundamental Finite Element Analysis and Applications: with Mathematica and Matlab Computations (Asghar Bhatti)
Solution manual Advanced Topics in Finite Element Analysis of Structures: With Mathematica and MATLAB Computations (Asghar Bhatti)
Solution manual The Finite Element Method in Engineering (4th Ed., by Rao)
Solution manual An Introduction to the Finite Element Method (3rd Ed., J. N. Reddy)
Solution manual Fundamentals of Finite Element Analysis (1st Ed., David V. Hutton)
Solution manual Simulation Modeling and Analysis (3rd Ed., Averill Law & David Kelton)
Solution manual Simulation Modeling and Analysis (4th Ed., Averill Law)
Solution manual The Finite Element Method : Its Basis and Fundamentals (6th Ed., Zienkiewicz, R. L. Taylor & J.Z. Zhu)
Solution manual Algebra : Form and Function (William McCallum, Eric Connally & Deborah Hughes-Hallett)
Solution manual Algebra : Form and Function, Preliminary Edition (William McCallum, Eric Connally & Deborah Hughes-Hallett)
Solution manual Applied Calculus (2nd Ed., Deborah Hughes-Hallett, et al.)
Solution manual Applied Calculus (3rd Ed., Deborah Hughes-Hallett, et al.)
Solution manual Applied Calculus (4th Ed., Deborah Hughes-Hallett, et al.)
Solution manual Calculus : Multivariable (3rd Ed., William G. McCallum, Deborah Hughes-Hallett, et al.)
Solution manual Calculus : Multivariable (4th Ed., William G. McCallum, Deborah Hughes-Hallett, et al.)
Solution manual Calculus : Multivariable (5th Ed., William G. McCallum, Deborah Hughes-Hallett, et al.)
Solution manual Calculus : Single Variable (3rd Ed., Deborah Hughes-Hallett, Andrew M. Gleason, et al.)
Solution manual Calculus : Single Variable (4th Ed., Deborah Hughes-Hallett, Andrew M. Gleason, et al.)
Solution manual Calculus : Single Variable (5th Ed., Deborah Hughes-Hallett, Andrew M. Gleason, et al.)
Solution manual Calculus : Single and Multivariable (3rd Ed., Deborah Hughes-Hallett, Andrew M. Gleason, et al.)
Solution manual Calculus : Single and Multivariable (4th Ed., Deborah Hughes-Hallett, Andrew M. Gleason, et al.)
Solution manual Calculus : Single and Multivariable (5th Ed., Deborah Hughes-Hallett)
Solution manual Functions Modeling Change : A Preparation for Calculus - Texas Edition (2nd Ed., Eric Connally, Deborah Hughes-Hallett & Andrew M. Gleason)

Solution manual Functions Modeling Change : A Preparation for Calculus (2nd Ed., Eric Connally, Deborah Hughes-Hallett, et al.)
Solution manual Functions Modeling Change : A Preparation for Calculus (3rd Ed., Eric Connally)
Solution manual Differential Equations (A. King, J. Billingham, S. Otto)
Solution manual Regression Methods in Biostatistics : Linear, Logistic, Survival, and Repeated Measures Models (Eric Vittinghoff, David Glidden, Stephen Shiboski, Charles McCulloch)
Solution manual A Modern Introduction to Probability and Statistics : Understanding Why and How (F.M. Dekking, C. Kraaikamp, H.P. Lopuhaä, L.E. Meester)
Solution manual Statistical Methods for the Analysis of Repeated Measurements (Charles S. Davis)
Solution manual Bayesian Core : A Practical Approach to Computational Bayesian Statistics (Jean-Michel Marin, Christian Robert)
Solution manual The Bayesian Choice : From Decision-Theoretic Foundations to Computational Implementation (2nd Ed., Christian Robert)
Solution manual Essentials of Stochastic Processes (Rick Durrett)
Solution manual Methods of Multivariate Statistics (Muni Srivastava)
Solution manual Regression Analysis : Theory, Methods, and Applications (Ashish Sen & Muni Srivastava)
Solution manual Applied Probability and Statistics (Mario Lefebvre)
Solution manual Basic Probability Theory with Applications (Mario Lefebvre)
Solution manual Foundations of Hyperbolic Manifolds (2nd Ed., John Ratcliffe)
Solution manual Fourier and Laplace Transforms (R. J. Beerends , H. G. ter Morsche)
Solution manual Infinite-Dimensional Dynamical Systems (James C. Robinson)
Solution manual Mathematical Methods for Physics and Engineering, (3rd Ed., Riley, Hobson & Bence)
Solution manual Numerical Methods in Engineering with MATLAB (Jaan Kiusalaas)
Solution manual Numerical Methods in Engineering with Python (Jaan Kiusalaas)
Solution manual An Introduction to Numerical Analysis (Endre Suli and David Mayers)
Solution manual Fundamentals of Engineering Numerical Analysis (Parviz Moin)
Solution manual Statistical Design (George Casella)
Solution manual Statistical Inference (2nd Ed., George Casella, Roger L. Berger)
Solution manual Monte Carlo Statistical Methods (2nd Ed., Christian P. Robert, George Casella)
Solution manual Introducing Monte Carlo Methods with R (Christian Robert & George Casella)
Solution manual Introduction to Mathematical Structures and Proofs

(Larry J. Gerstein)
Solution manual Analyzing Categorical Data (Jeffrey S. Simonoff)
Solution manual Fundamentals of Complex Analysis with Applications to Engineering, Science, and Mathematics (3rd Ed., E. Saff & Arthur Snider)
Solution manual Probability & Statistics for Engineers & Scientists (8th Ed., Walpole, Myers, Ye)
Solution manual Statistics for Engineering and the Sciences (5th Ed., Mendenhall & Sincich)
Solution manual A Second Course in Statistics : Regression Analysis (6th Ed., Mendenhall & Sincich)
Solution manual Miller & Freund's Probability and Statistics for Engineers (7th Ed., Johnson, Miller, Freund)
Solution manual Miller & Freund's Probability and Statistics for Engineers (8th Ed., Johnson, Miller, Freund)
Solution manual Numerical Methods Using Matlab (4th Ed., Mathews & Fink)
Solution manual Applied Numerical Analysis Using MATLAB (2nd Ed., Laurene v. Fausett)
Solution manual Applied Numerical Analysis (7th Ed., Curtis F. Gerald, Patrick O. Wheatley)
Solution manual Friendly Introduction to Numerical Analysis (Bradie)
Solution manual Elementary Linear Algebra (2nd Ed., Spence, Insel & Friedberg)
Solution manual Elementary Linear Algebra with Applications (9th Ed., Kolman & Hill)
Solution manual Introductory Linear Algebra : An Applied First Course (8th Ed., Kolman & Hill)
Solution manual Linear Algebra with Applications (6th Ed., S. Leon)
Solution manual Linear Algebra with Applications (7th Ed., S. Leon)
Solution manual Linear Algebra for Engineers and Scientists Using Matlab (Hardy)
Solution manual Linear Algebra with Applications (3rd Ed., Bretscher)
Solution manual Linear Algebra with Applications (4th Ed., Bretscher)
Solution manual Modern Matrix Algebra (Hill & Kolman)
Solution manual Matrix Methods : Applied Linear Algebra (3rd Ed., Richard Bronson & Gabriel B. Costa)
Solution manual A Transition to Abstract Mathematics : Learning Mathematical Thinking and Writing (2nd Ed., Randall Maddox)
Solution manual Partial Differential Equations and Boundary Value Problems with Fourier Series (2nd ed., Asmar)
Solution manual Applied Partial Differential Equations (4th Ed., Haberman)
Solution manual Technical Calculus (5th Ed., Dale Ewen, Joan S. Gary & James E. Trefzger)
Solution manual Technical Mathematics (2th Ed., Dale Ewen, Joan S. Gary & James E. Trefzger)
Solution manual Technical Mathematics with Calculus (2th Ed., Dale Ewen, Joan S. Gary & James E. Trefzger)
Solution manual Introductory Mathematics (4th Ed., Cook)

Solution manual Mathematics for the Technical Trades (Cook)
Solution manual College Mathematics (7th Ed., Cleaves & Hobbs)
Solution manual Fundamentals of Statistics (2nd Ed., Michael III Sullivan)
Solution manual Fundamentals of Statistics (3rd Ed., Michael III Sullivan)
Solution manual Statistics : Informed Decisions Using Data (2nd Ed., Michael III Sullivan)
Solution manual Modern Elementary Statistics (12th Ed., John E. Freund, Benjamin M. Perles)
Solution manual Statistics : The Art and Science of Learning From Data (Agresti & Franklin)
Solution manual Statistics : The Art and Science of Learning From Data (2nd Ed., Agresti & Franklin)
Solution manual Elementary Statistics : Picturing the World (3rd Ed., Larson & Farber)
Solution manual Elementary Statistics : Picturing the World (4th Ed., Larson & Farber)
Solution manual A First Course in Statistics (9th Ed., McClave & Sincich)
Solution manual A First Course in Statistics (10th Ed., McClave & Sincich)
Solution manual Statistics (10th Ed., McClave & Terry Sincich)
Solution manual Statistics (11th Ed., McClave & Terry Sincich & William Mendenhall)
Solution manual Interactive Statistics (3rd Ed., Martha Aliaga & Brenda Gunderson)
Solution manual Statistics for the Life Sciences (3rd Ed., Samuels & Witmer)
Solution manual Applied Statistics and the SAS Programming Language (5th Ed., Cody & Smith)
Solution manual Biostatistics for the Health Sciences (R. Clifford Blair & Richard Taylor)
Solution manual Biostatistics : How It Works (Steve Selvin)
Solution manual Business Statistics : First Course (4th Ed., Levine, Krehbiel & Berenson)
Solution manual Business Statistics : First Course (5th Ed., Levine, Krehbiel & Berenson)
Solution manual Course in Business Statistics (4th Ed., Groebner, Shannon, Fry & Smith)
Solution manual Business Statistics : A Decision Making Approach (6th Ed., Groebner, Shannon, Fry & Smith)
Solution manual Business Statistics : A Decision-Making Approach (7th Ed., Groebner, Shannon, Fry & Smith)
Solution manual Business Statistics : A Decision-Making Approach (8th Ed., Groebner, Shannon, Fry & Smith)
Solution manual Statistics for Business & Economics (10th Ed., McClave, Benson & Sincich)
Solution manual Statistics for Managers Using Excel (5th Ed., Levine)
Solution manual Statistics for Managers Using Microsoft Excel (4th

Ed., Levine, Stephan, Krehbiel & Berenson)
Solution manual Statistics for Business and Economics (5th Ed., Newbold, Carlson & Thorne)
Solution manual Statistics for Business and Economics (6th Ed., Newbold, Carlson & Thorne)
Solution manual Statistics for Business and Economics (7th Ed., Newbold, Carlson & Thorne)
Solution manual Basic Business Statistics : Concepts and Applications (10th Ed., Berenson, Krehbiel & Levine)
Solution manual Basic Business Statistics (11th Ed., Berenson, Levine & Krehbiel)
Solution manual John E. Freund's Mathematical Statistics with Applications (7th Ed., Miller)
Solution manual Probability and Statistical Inference (7th Ed., Hogg & Tanis)
Solution manual Probability and Statistical Inference (8th Ed., Hogg & Tanis)
Solution manual Introduction to Mathematical Statistics (6th Ed., Hogg, Craig & McKean)
Solution manual Introduction to Mathematical Statistics and Its Applications (4th Ed., Larsen & Marx)
Solution manual A Brief Course in Mathematical Statistics (Hogg & Tanis)
Solution manual Fundamentals of Probability, with Stochastic Processes (3rd Ed., Saeed Ghahramani)
Solution manual A First Course in Probability (7th Ed., Sheldon Ross)
Solution manual A First Course in Probability (8th Ed., Sheldon Ross)
Solution manual Applied Multivariate Statistical Analysis (6th Ed., Johnson & Wichern)
Solution manual Multivariate Data Analysis (6th Ed., Hair, Black, Babin, Anderson & Tatham)
Solution manual Multivariate Data Analysis (7th Ed., Hair, Black, Babin, Anderson)
Solution manual Essential MATLAB for Engineers and Scientists (3rd Ed., Brian Hahn & Dan Valentine)
Solution manual Essential MATLAB for Engineers and Scientists (4th Ed., Brian Hahn & Dan Valentine)
Solution manual Introduction to Applied Statistical Signal Analysis : Guide to Biomedical and Electrical Engineering Applications (3rd Ed. Richard Shiavi)
Solution manual Construction Mathematics (Surinder Virdi & Roy Baker)
Solution manual Numerical Methods in Biomedical Engineering (Stanley Dunn, Alkis Constantinides & Prabhas Moghe)
Solution manual Probability and Statistics with Integrated Software Routines (Ronald Deep)
Solution manual Finite Element Analysis with Error Estimators : An Introduction to the FEM and Adaptive Error Analysis for Engineering Students (J. Akin)
Solution manual Basic Engineering Mathematics (4th Ed., John Bird)
Solution manual Engineering Mathematics (4th Ed., John Bird)

Solution manual Engineering Mathematics (5th Ed., John Bird)
Solution manual Higher Engineering Mathematics (5th Ed., John Bird)
Solution manual Construction Mathematics (Virdi & Baker)
Solution manual Mathematics for Electrical Engineering and Computing (Mary Attenborough)
Solution manual Probability and Random Processes : With Applications to Signal Processing and Communications (Miller & Childers)
Solution manual Introductory Statistics for Engineering Experimentation (Peter Nelson, Karen Copeland & Marie Coffin)
Solution manual Understanding Engineering Mathematics (Bill Cox)
Solution manual Statistics And Probability For Engineering Applications With Microsoft Excel (Decoursey)
Solution manual Business Math Using Calculators : With 10-Key Computer Assisted Instruction (Burton)
Solution manual Mathematics for Economics and Business (5th Ed., Ian Jacques)
Solution manual Business Math, Brief (7th Ed., Cleaves & Hobbs)
Solution manual Math for Merchandising: A Step-by-Step Approach (3rd Ed., Moore)
Solution manual Mathematics for Business (7th Ed., Salzman , Miller & Clendenen)
Solution manual Mathematics for Business (8th Ed., Salzman , Miller & Clendenen)
Solution manual Basic College Mathematics with Early Integers (K. Elayn Martin-Gay)
Solution manual Developmental Mathematics (K. Elayn Martin-Gay)
Solution manual An Introduction to Analysis (3rd Ed., William Wade)
Solution manual An Introduction to Analysis (4th Ed., William Wade)
Solution manual A Friendly Introduction to Analysis (2nd Ed., Witold A.J. Kosmala)
Solution manual Advanced Calculus (Gerald Folland)
Solution manual Analysis : With an Introduction to Proof (4th Ed., Steven R. Lay)
Solution manual Essentials of Basic College Mathematics (John Jr Tobey, Jr., Jeffrey Slater)
Solution manual Basic College Mathematics (5th Ed., John Tobey & Jeffrey Slater)
Solution manual Prealgebra (3rd Ed., Jamie Blair, John Tobey & Jeffrey Slater)
Solution manual Elementary Algebra Early Graphing for College Students (3rd Ed., Allen Angel)
Solution manual Elementary Algebra (Michael Sullivan III, Katherine R. Struve & Janet Mazzarella)
Solution manual Elementary Algebra for College Students (7th Ed., Allen R. Angel)
Solution manual Experiencing Introductory and Intermediate Algebra Through Functions and Graphs (3rd Ed., JoAnne Thomasson & Robert Pesut)
Solution manual Introductory Algebra (3rd Ed., K. Elayn Martin-Gay)
Solution manual Beginning Algebra (6th Ed., John Jr Tobey & Jeffrey

Slater)
Solution manual Beginning Algebra : Early Graphing (Jamie Blair, John Tobey & Jeffrey Slater)
Solution manual Beginning and Intermediate Algebra (2nd Ed., Jamie Blair, John Tobey & Jeffrey Slater)
Solution manual Introductory Algebra (4th Ed., Robert Blitzer)
Solution manual Introductory and Intermediate Algebra (2nd Ed., Robert Blitzer)
Solution manual Intermediate Algebra for College Students (7th Ed., Allen Angel)
Solution manual Intermediate Algebra (Michael Sullivan III & Katherine Struve)
Solution manual Intermediate Algebra (3rd Ed., K. Elayn Martin-Gay)
Solution manual Essentials of Intermediate Algebra for College Students (Robert Blitzer)
Solution manual Intermediate Algebra (4th Ed., Robert Blitzer)
Solution manual Intermediate Algebra for College Students (5th Ed., Robert Blitzer)
Solution manual Algebra A Combined Approach (3rd Ed., K. Elayn Martin-Gay)
Solution manual Elementary & Intermediate Algebra (Michael Sullivan III, Katherine R. Struve & Janet Mazzarella)
Solution manual Essentials of Introductory and Intermediate Algebra for College Students (Robert F. Blitzer)
Solution manual Algebra for College Students (3rd Ed., Allen R. Angel)
Solution manual Algebra for College Students (5th Ed., Robert F Blitzer)
Solution manual College Algebra (8th Ed., Michael Sullivan)
Solution manual College Algebra Essentials (8th Ed., Michael Sullivan)
Solution manual College Algebra (4th Ed., Robert Blitzer)
Solution manual College Algebra Essentials (2nd Ed., Robert F. Blitzer)
Solution manual College Algebra : An Early Functions Approach (Robert F. Blitzer)
Solution manual College Algebra : Concepts Through Functions (1st Ed., Michael Sullivan III & Michael Sullivan)
Solution manual College Algebra : Concepts Through Functions (2nd Ed., Michael Sullivan III & Michael Sullivan)
Solution manual College Algebra Enhanced with Graphing Utilities (4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Essentials of College Algebra : Enhanced with Graphing Utilities (4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Algebra and Trigonometry (8th Ed., Michael Sullivan)
Solution manual Algebra and Trigonometry (3rd Ed., Robert F. Blitzer)
Solution manual Algebra and Trigonometry: An Early Functions Approach (Robert Blitzer)
Solution manual Algebra & Trigonometry (7th Ed., Michael Sullivan)
Solution manual Algebra and Trigonometry Enhanced With Graphing Utilities (4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Trigonometry (7th Ed., Michael Sullivan)

Solution manual Trigonometry (8th Ed., Michael Sullivan)
Solution manual Trigonometry Enhanced with Graphing Utilities (4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus (8th Ed., Michael Sullivan)
Solution manual Precalculus (3rd Ed., Robert Blitzer)
Solution manual Precalculus (4th Ed., Robert Blitzer)
Solution manual Precalculus (1st Ed., J. S. Ratti & Marcus S. McWaters)
Solution manual Precalculus : A Right Triangle Approach (2nd Ed., J. S. Ratti & Marcus S. McWaters)
Solution manual Precalculus Essentials (2nd Ed., Robert Blitzer)
Solution manual Precalculus Essentials (3rd Ed., Robert Blitzer)
Solution manual Precalculus : Concepts Through Functions, A Unit Circle Approach to Trigonometry (1st Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus : Concepts Through Functions, A Unit Circle Approach to Trigonometry (2nd Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus : Concepts Through Functions, A Right Triangle Approach to Trigonometry (1st Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus : Concepts Through Functions, A Right Triangle Approach to Trigonometry (2nd Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus Enhanced with Graphing Utilities (4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus Enhanced with Graphing Utilities (5th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Precalculus Essentials : Enhanced with Graphing Utilities (4th Ed., Michael Sullivan III & Michael Sullivan)
Solution manual Excursions in Modern Mathematics (5th Ed., Peter Tannenbaum)
Solution manual Excursions In Modern Mathematics with Mini-Excursions (6th Ed., Peter Tannenbaum)
Solution manual Quantitive Reasoning & the Environment (Greg Langkamp & Joseph Hull)
Solution manual Fundamentals of Mathematics (10th Ed., William M Setek & Michael A Gallo)
Solution manual Learning Math in Elementary and Middle School & IMAP Package (4th Ed., Cathcart, Pothier, Vance & Bezuk)
Solution manual Understanding the Math You Teach: Content and Methods for Prekindergarten Through Grade 4 (Anita C. Burris)
Solution manual Algebra Connections (Ira J. Papick & UMO University of Missouri)
Solution manual Calculus Connections (Asma Harcharras, Dorina Mitrea)
Solution manual Data Analysis and Probability Connections: Mathematics for Middle School Teachers (Debra A. Perkowski & Michael Perkowski)
Solution manual Geometry Connections (John K. Beem)
Solution manual Elementary Math Modeling Updated (2nd Ed., Mary Ellen Davis & C. Henry Edwards)

Solution manual Additional Calculus Topics (11th Ed., Raymond Barnett, Michael Ziegler & Karl Byleen)
Solution manual Finite Math and Its Application (9th Ed., Larry J Goldstein, David I Schneider & Martha J. Siegel)
Solution manual Finite Mathematics and Its Application (10th Ed., Larry J Goldstein, David I Schneider & Martha J. Siegel)
Solution manual Introductory Mathematical Analysis for Business, Economics and the Life and social Sciences (11th Ed., Haeussler, Paul & R.J. Wood)
Solution manual Introductory Mathematical Analysis for Business, Economics and the Life and Social Sciences (12th Ed., Haeussler, Paul & R.J. Wood)
Solution manual Additional Calculus Topics (9th Ed., Raymond Barnett, Michael Ziegler & Karl Byleen)
Solution manual College Mathematics for Business, Economics, Life Sciences and Social Sciences (10th Ed., Raymond Barnett, Michael Ziegler & Karl Byleen)
Solution manual Brief Calculus and Its Applications (11th Ed., Larry Goldstein, David Schneider, David Lay & Nakhle Asmar)
Solution manual Brief Calculus and Its Applications (12th Ed., Larry Goldstein, David Schneider, David Lay & Nakhle Asmar)
Solution manual Calculus and its Applications (10th Ed., Larry Goldstein, David Schneider, David Lay)
Solution manual Calculus and its Applications (11th Ed., Larry Goldstein, David Schneider, David Lay & Nakhle Asmar)
Solution manual Calculus and its Applications (12th Ed., Larry Goldstein, David Schneider, David Lay & Nakhle Asmar)
Solution manual Calculus for Business, Economics, Life Sciences and Social Sciences (10th Ed., Raymond Barnett, Michael Ziegler & Karl Byleen)
Solution manual Calculus, Early Transcendentals (6th Ed., C. Henry Edwards & David Penney)
Solution manual Calculus, Early Transcendentals (7th Ed., C. Henry Edwards & David Penney)
Solution manual Calculus (9th Ed., Dale Varberg, Edwin Purcell & Steve Rigdon)
Solution manual Calculus Early Transcendentals (Dale Varberg, Edwin Purcell & Steve Rigdon)
Solution manual Calculus (3rd Ed., Monty Strauss, Gerald Bradley & Karl Smith)
Solution manual Calculus (6th Ed., Henry Edwards & David E. Penney)
Solution manual Single Variable Calculus (3rd Ed., Monty Strauss, Gerald Bradley & Karl Smith)
Solution manual Vector Calculus (3rd Ed., Susan Colley)
Solution manual Applied Linear Algebra (Peter Olver & Cheri Shakiban)
Solution manual Differential Equations and Linear Algebra (2nd Ed., Jerry Farlow, James E. Hall, Jean Marie McDill & Beverly West)
Solution manual Differential Equations and Linear Algebra (2nd Ed., C. Henry Edwards & David Penney)
Solution manual Differential Equations and Linear Algebra (3rd Ed., C.

Henry Edwards & David Penney)
Solution manual Differential Equations (2nd Ed., John Polking, Al Boggess & David Arnold)
Solution manual Differential Equations with Boundary Value Problems (2nd ed., John Polking, Al Boggess & David Arnold)
Solution manual Discrete Mathematics with Graph Theory (3rd Ed., Edgar Goodaire & Michael Parmenter)
Solution manual Essential Discrete Mathematics (Todd Feil & Joan Krone)
Solution manual Statistical Methods for the Social Sciences (4th Ed., Agresti & Finlay)
Solution manual A Brief Course in Mathematical Statistics (Tanis & Hogg)
Solution manual Business Mathematics, 10th Ed. (Miller, Salzman & Clendenen)
Solution manual Elementary Statistics (6th Ed., Weiss)
Solution manual Elementary Statistics (7th Ed., Weiss)
Solution manual Elementary Statistics Using the Graphing Calculator: For the TI-83/84 Plus (Mario Triola)
Solution manual Elementary Statistics Using the TI-83/84 Plus Calculator (2nd Ed., Mario Triola)
Solution manual Elementary Statistics Using the TI-83/84 Plus Calculator (3rd Ed., Mario Triola)
Solution manual Elementary Statistics Update (9th Ed., Mario Triola)
Solution manual Elementary Statistics (10th Ed., Mario Triola)
Solution manual Elementary Statistics (11th Ed., Mario Triola)
Solution manual Essentials of Statistics (2nd Ed., Mario Triola)
Solution manual Essentials of Statistics (3rd Ed., Mario Triola)
Solution manual Essentials of Statistics (4th Ed., Mario Triola)
Solution manual Introductory Statistics (7th Ed., Neil Weiss)
Solution manual Introductory Statistics (8th Ed., Neil Weiss)
Solution manual Intro Stats (2nd Ed., De Veaux, Velleman & Bock)
Solution manual Intro Stats (3rd Ed., De Veaux, Velleman & Bock)
Solution manual Stats: Data and Models, (De Veaux, Velleman & Bock)
Solution manual Stats: Data and Models, (2nd Ed., De Veaux, Velleman & Bock)
Solution manual Elementary Statistics Using Excel (2nd Ed., Mario Triola)
Solution manual Elementary Statistics Using Excel (3rd Ed., Mario Triola)
Solution manual Elementary Statistics Using Excel (4th Ed., Mario Triola)
Solution manual Stats : Modeling the World (2nd Ed., Bock, Velleman & De Veaux)
Solution manual Stats : Modeling the World (3rd Ed., Bock, Velleman & De Veaux)
Solution manual Statistical Reasoning for Everyday Life (2nd Ed., Bennett, Briggs & Triola)
Solution manual Statistical Reasoning for Everyday Life (3rd Ed., Bennett, Briggs & Triola)

Solution manual Business Statistics (Triola & Franklin)
Solution manual Business Statistics (Sharpe, De Veaux & Velleman)
Solution manual Business Statistics : A First Course (Sharpe, De Veaux & Velleman)
Solution manual Biostatistics for the Biological and Health Sciences with Statdisk (Marc Triola & Mario Triola)
Solution manual Biostatistics : A Guide to Design, Analysis and Discovery (2nd Ed., Ronald Forthofer, Eun Lee, Mike Hernandez)
Solution manual A Course in Probability (Neil A. Weiss)
Solution manual Probability and Statistics (3rd Ed., DeGroot & Schervish)
Solution manual Statistics for Science and Engineering (John Kinney)
Solution manual Mathematical Proofs : A Transition to Advanced Mathematics (1st Ed., Chartrand, Polimeni & Zhang)
Solution manual Mathematical Proofs : A Transition to Advanced Mathematics (2nd Ed., Chartrand, Polimeni & Zhang)
Solution manual Elementary Number Theory (5th Ed., Kenneth H. Rosen)
Solution manual History of Mathematics : Brief Version (Victor J. Katz)
Solution manual Geometry : An Investigative Approach (2nd Ed., Phares G. O'Daffer & Stanley Clemens)
Solution manual A First Course in Abstract Algebra (7th Ed., John Fraleigh)
Solution manual Complex Variables with Applications (3rd Ed., David Wunsch)
Solution manual Numerical Analysis with CD-ROM (Timothy Sauer)
Solution manual Numerical Analysis and Scientific Computation (Jeffery Leader)
Solution manual Linear Algebra and Differential Equations (Gary Peterson & James Sochacki)
Solution manual Elementary Differential Equations (2nd Ed., Werner Kohler & Lee Johnson)
Solution manual Elementary Differential Equations with Boundary Value Problems (2nd Ed., Werner Kohler & Lee Johnson)
Solution manual Fundamentals of Differential Equations (6th Ed., Kent B. Nagle, Late, Edward B. Saff & Arthur David Snider)
Solution manual Fundamentals of Differential Equations and Boundary Value Problems (4th Ed., Kent B. Nagle, Late, Edward B. Saff & Arthur David Snider)
Solution manual Linear Algebra and Its Applications with CD-ROM, Update (3rd Ed., David C. Lay)
Solution manual Introduction to Linear Algebra (5th ed., Lee W. Johnson, R. Dean Riess & Jimmy T. Arnold)
Solution manual Calculus for the Life Sciences (Marvin L. Bittinger, Neal Brand & John Quintanilla)
Solution manual Calculus with Applications for the Life Sciences (Raymond N. Greenwell, Nathan P. Ritchey & Margaret L. Lial)
Solution manual Calculus : An Integrated Approach to Functions and Their Rates of Change, Preliminary Edition (Robin J. Gottlieb)
Solution manual Calculus (9th Ed., George B. Thomas, Jr. & Ross L.

Finney)
Solution manual Thomas' Calculus, Alternate Edition (9th Ed., George B. Thomas, Jr. & Ross L. Finney)
Solution manual Calculus : A Complete Course (2nd Ed., Ross L. Finney, Franklin D. Demana, Bert K. Waits & Daniel Kennedy)
Solution manual Calculus (Elgin H. Johnston & Jerry Mathews)
Solution manual Thomas' Calculus, Updated (10th Ed., George B. Thomas, Jr., Ross L. Finney, Maurice D. Weir & Frank R. Giordano)
Solution manual Thomas' Calculus (11th Ed., George B. Thomas, Jr., Maurice D. Weir, Joel D. Hass & Frank R. Giordano)
Solution manual Thomas' Calculus Early Transcendentals (11th Ed., George B. Thomas, Jr., Maurice D. Weir, Joel D. Hass & Frank R. Giordano)
Solution manual University Calculus (Joel D. Hass, Maurice D. Weir & George B. Thomas, Jr.)
Solution manual University Calculus : Alternate Edition (Joel D. Hass, Maurice D. Weir & George B. Thomas, Jr.)
Solution manual Thomas' Calculus, Media Upgrade (11th Ed., George B. Thomas, Jr., Maurice D. Weir & Frank R. Giordano)
Solution manual Thomas' Calculus, Early Transcendentals, Media Upgrade (11th Ed., George B. Thomas, Jr., Maurice D. Weir, Joel D. Hass & Frank R. Giordano)
Solution manual Calculus with Applications (8th Ed., Margaret L. Lial, Raymond N. Greenwell & Nathan P. Ritchey)
Solution manual Calculus with Applications, Brief Version (8th Ed., Margaret L. Lial, Raymond N. Greenwell & Nathan P. Ritchey)
Solution manual Finite Mathematics with Applications (9th Ed., Margaret L. Lial, Thomas W. Hungerford & John Holcomb)
Solution manual Finite Mathematics with Applications (10th Ed., Margaret L. Lial, Thomas W. Hungerford & John Holcomb)
Solution manual Finite Mathematics (8th Ed., Margaret L. Lial, Raymond N. Greenwell & Nathan P. Ritchey)
Solution manual Mathematics with Applications (9th Ed., Margaret L. Lial, Thomas W. Hungerford & John Holcomb)
Solution manual Mathematics with Applications (10th Ed., Margaret L. Lial, Thomas W. Hungerford & John Holcomb)
Solution manual Mathematical Ideas (10th Ed., Miller, Heeren & Hornsby)
Solution manual Mathematical Ideas (11th Ed., Miller, Heeren & Hornsby)
Solution manual Mathematical Ideas Expanded Edition (10th Ed., Miller, Heeren & Hornsby)
Solution manual Mathematical Ideas Expanded Edition (11th Ed., Miller, Heeren & Hornsby)
Solution manual Using and Understanding Mathematics: A Quantitative Reasoning Approach (3rd Ed., Bennett & Briggs)
Solution manual Using and Understanding Mathematics: A Quantitative Reasoning Approach (4th Ed., Bennett & Briggs)
Solution manual A Problem Solving Approach to Mathematics (9th Ed., Billstein, Libeskind & Lott)

Solution manual A Survey of Mathematics with Applications (7th Ed., Angel, Abbott & Runde)
Solution manual A Survey of Mathematics with Applications: Expanded Edition (7th Ed., Angel, Abbott & Runde)
Solution manual Mathematics All Around (3rd Ed., Tom Pirnot)
Solution manual Mathematics for Elementary School Teachers (3rd Ed., Phares O'Daffer, Randall Charles, Thomas Cooney, John Dossey & Jane Schielack)
Solution manual Mathematics for Elementary School Teachers (4th Ed., Phares O'Daffer, Randall Charles, Thomas Cooney, John Dossey & Jane Schielack)
Solution manual Mathematics for Elementary Teachers with Activities (Sybilla Beckmann)
Solution manual Mathematics for Elementary Teachers plus Activities Manual (2nd Ed., Sybilla Beckmann)
Solution manual A Problem Solving Approach to Mathematics for Elementary School Teachers (8th Ed., Billstein, Libeskind & Lott)
Solution manual A Problem Solving Approach to Mathematics for Elementary School Teachers (9th Ed., Billstein, Libeskind & Lott)
Solution manual A Problem Solving Approach to Mathematics for Elementary School Teachers (10th Ed., Billstein, Libeskind & Lott)
Solution manual Essentials of Using and Understanding Mathematics : A Quantitative Reasoning Approach (Jeffrey Bennett & William Briggs)
Solution manual Technical Calculus with Analytic Geometry (4th Ed., Allyn Washington)
Solution manual Basic Technical Mathematics (8th Ed., Allyn Washington)
Solution manual Basic Technical Mathematics (9th Ed., Allyn Washington)
Solution manual Basic Technical Mathematics with Calculus (8th Ed., Allyn Washington)
Solution manual Basic Technical Mathematics with Calculus (9th Ed., Allyn Washington)
Solution manual Basic Technical Mathematics with Calculus Metric Version (8th Ed., Allyn Washington)
Solution manual Introduction to Technical Mathematics (5th Ed., Washington, Triola & Reda)
Solution manual A Graphical Approach to Precalculus (4th Ed., Hornsby, Lial & Rockswold)
Solution manual A Graphical Approach to Precalculus with Limits (3rd Ed., Hornsby, Lial & Rockswold)
Solution manual A Graphical Approach to Precalculus with Limits : A Unit Circle Approach (4th Ed., Hornsby, Lial & Rockswold)
Solution manual A Graphical Approach to Precalculus with Limits : A Unit Circle Approach (5th Ed., Hornsby, Lial & Rockswold)
Solution manual Precalculus : Functions and Graphs (5th Ed., Demana, Waits, Foley & Kennedy)
Solution manual Precalculus : Graphical, Numerical, Algebraic (7th Ed., Demana, Waits, Foley & Kennedy)
Solution manual Precalculus : Graphs and Models Graphing Calculator

Manual Package (3rd Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual Precalculus : Graphs and Models Graphing Calculator Manual Package (4th Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual Functioning in the Real World : A Precalculus Experience (2nd Ed., Gordon, F. Gordon, Tucker & Siegel)
Solution manual Precalculus with Modeling and Visualization (3rd Ed., Gary K. Rockswold)
Solution manual Precalculus with Modeling and Visualization (4th Ed., Gary K. Rockswold)
Solution manual Precalculus (2nd Ed., Beecher, Penna & Bittinger)
Solution manual Precalculus (3rd Ed., Beecher, Penna & Bittinger)
Solution manual Precalculus (3rd Ed., Mark Dugopolski)
Solution manual Precalculus (4th Ed., Mark Dugopolski)
Solution manual Precalculus : Functions and Graphs (2nd Ed., Mark Dugopolski)
Solution manual Precalculus : Functions and Graphs (3rd Ed., Mark Dugopolski)
Solution manual Fundamentals of Precalculus (Mark Dugopolski)
Solution manual Trigonometry (1st Ed., Mark Dugopolski)
Solution manual Trigonometry (2nd Ed., Mark Dugopolski)
Solution manual Trigonometry (3rd Ed., Mark Dugopolski)
Solution manual Trigonometry (8th Ed., Lial, Hornsby & Schneider)
Solution manual Trigonometry (9th Ed., Lial, Hornsby & Schneider)
Solution manual Trigonometry : A Circular Function Approach (Marie Aratari)
Solution manual A Graphical Approach to Algebra and Trigonometry (4th Ed., Hornsby, Lial & Rockswold)
Solution manual A Graphical Approach to Algebra and Trigonometry (5th Ed., Hornsby, Lial & Rockswold)
Solution manual Algebra and Trigonometry : Graphs and Models Graphing Calculator Manual Package (3rd Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual Algebra and Trigonometry (2nd Ed., Beecher, Penna & Bittinger)
Solution manual Algebra and Trigonometry (3rd Ed., Beecher, Penna & Bittinger)
Solution manual College Algebra and Trigonometry (1st Ed., J. S. Ratti & Marcus S. McWaters)
Solution manual College Algebra and Trigonometry (2nd Ed., J. S. Ratti & Marcus S. McWaters)
Solution manual College Algebra and Trigonometry (3rd Ed., Mark Dugopolski)
Solution manual College Algebra and Trigonometry (4th Ed., Mark Dugopolski)
Solution manual College Algebra and Trigonometry : A Unit Circle Approach (5th Ed., Mark Dugopolski)
Solution manual Algebra and Trigonometry with Modeling and Visualization (3rd Ed., Gary Rockswold)
Solution manual Algebra and Trigonometry with Modeling and Visualization (4th Ed., Gary Rockswold)

Solution manual College Algebra and Trigonometry (3rd Ed., Lial, Hornsby & Schneider)
Solution manual College Algebra and Trigonometry (4th Ed., Lial, Hornsby & Schneider)
Solution manual A Graphical Approach to College Algebra (4th Ed., John Hornsby, Margaret Lial & Gary Rockswold)
Solution manual A Graphical Approach to College Algebra (5th Ed., John Hornsby, Margaret Lial & Gary Rockswold)
Solution manual College Algebra : Graphs and Models Graphing Calculator Manual Package (3rd Ed., Bittinger, Beecher, Ellenbogen & Penna)
Solution manual College Algebra (J. S. Ratti & Marcus S. McWaters)
Solution manual College Algebra with Modeling and Visualization (3rd Ed., Gary Rockswold)
Solution manual College Algebra with Modeling and Visualization (4th Ed., Gary Rockswold)
Solution manual Essentials of College Algebra with Modeling and Visualization (3rd Ed., Gary Rockswold)
Solution manual Essentials of College Algebra (Lial, Hornsby & Schneider)
Solution manual Essentials of College Algebra, Alternate Edition (Lial, Hornsby & Schneider)
Solution manual Essentials of College Algebra (10th Ed., Lial, Hornsby & Schneider)
Solution manual College Algebra (3rd Ed., Mark Dugopolski)
Solution manual College Algebra (4th Ed., Mark Dugopolski)
Solution manual College Algebra (5th Ed., Mark Dugopolski)
Solution manual College Algebra in Context with Applications for the Managerial, Life, and Social Sciences (1st Ed., Ronald Harshbarger & Lisa Yocco)
Solution manual College Algebra in Context with Applications for the Managerial, Life, and Social Sciences (2nd Ed., Ronald Harshbarger & Lisa Yocco)
Solution manual College Algebra (2nd Ed., Judith Beecher, Judith Penna & Marvin Bittinger)
Solution manual College Algebra (9th Ed., Margaret Lial, John Hornsby & David Schneider)
Solution manual Essentials of Geometry for College Students (2nd Ed., Margaret Lial, Barbara Brown, Arnold Steffenson & L. Murphy Johnson)
Solution manual Algebra for College Students (5th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Introductory and Intermediate Algebra (2nd Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Introductory and Intermediate Algebra (3rd Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Introductory and Intermediate Algebra (4th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Beginning and Intermediate Algebra (3rd Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Beginning and Intermediate Algebra (4th Ed., Margaret

Lial, John Hornsby & Terry McGinnis)
Solution manual Elementary and Intermediate Algebra (1st Ed., Tom Carson, Ellyn Gillespie & Bill Jordan)
Solution manual Elementary and Intermediate Algebra (2nd Ed., Tom Carson, Ellyn Gillespie & Bill Jordan)
Solution manual Introductory and Intermediate Algebra : A Combined Approach (2nd Ed., Marvin Bittinger & Judith Beecher)
Solution manual Introductory and Intermediate Algebra (3rd Ed., Marvin Bittinger & Judith Beecher)
Solution manual Introductory and Intermediate Algebra through Applications (2nd Ed., Geoffrey Akst & Sadie Bragg)
Solution manual Elementary and Intermediate Algebra (1st Ed., George Woodbury)
Solution manual Elementary and Intermediate Algebra (2nd Ed., George Woodbury)
Solution manual Elementary and Intermediate Algebra (2nd Ed., Mark Dugopolski)
Solution manual Elementary and Intermediate Algebra (3rd Ed., Mark Dugopolski)
Solution manual Elementary and Intermediate Algebra : Concepts and Applications (4th Ed., Marvin Bittinger, David Ellenbogen & Barbara Johnson)
Solution manual Beginning and Intermediate Algebra with Applications and Visualization (Gary Rockswold & Terry Krieger)
Solution manual Elementary and Intermediate Algebra : Graphs & Models (2nd Ed., Marvin Bittinger, David Ellenbogen & Barbara Johnson)
Solution manual Foundations of Mathematics (Marvin Bittinger & Judith Penna)
Solution manual Intermediate Algebra (9th Ed., Marvin Bittinger)
Solution manual Intermediate Algebra (10th Ed., Marvin Bittinger)
Solution manual Intermediate Algebra : Graphs & Models (2nd Ed., Marvin Bittinger, David Ellenbogen & Barbara Johnson)
Solution manual Intermediate Algebra : Graphs & Models (3rd Ed., Marvin Bittinger, David Ellenbogen & Barbara Johnson)
Solution manual Intermediate Algebra (8th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Intermediate Algebra (9th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Intermediate Algebra with Applications and Visualization (2nd Ed., Gary Rockswold & Terry Krieger)
Solution manual Intermediate Algebra (Tom Carson, Ellyn Gillespie & Bill Jordan)
Solution manual Intermediate Algebra (2nd Ed., Tom Carson, Ellyn Gillespie & Bill Jordan)
Solution manual Intermediate Algebra: Concepts and Applications (7th Ed., Marvin Bittinger & David Ellenbogen)
Solution manual Beginning Algebra (10th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Prealgebra and Introductory Algebra (Marvin Bittinger & David Ellenbogen)

Solution manual Prealgebra and Introductory Algebra (2nd Ed., Marvin Bittinger & David Ellenbogen)
Solution manual Elementary Algebra (2nd Ed., Tom Carson, Ellyn Gillespie & Bill Jordan)
Solution manual Introductory Algebra (9th Ed., Marvin Bittinger)
Solution manual Introductory Algebra (10th Ed., Marvin Bittinger)
Solution manual Prealgebra and Introductory Algebra (2nd Ed., Margaret Lial, John Hornsby, Terry McGinnis & Diana Hestwood)
Solution manual Prealgebra and Introductory Algebra (3rd Ed., Margaret Lial, Diana Hestwood, John Hornsby & Terry McGinnis)
Solution manual Elementary Algebra with Early Systems of Equations (Tom Carson & Ellyn Gillespie)
Solution manual Elementary Algebra : Concepts and Applications (6th Ed., Marvin Bittinger & David Ellenbogen)
Solution manual Elementary Algebra : Concepts and Applications (7th Ed., Marvin Bittinger & David Ellenbogen)
Solution manual Introductory Algebra (Richelle Blair)
Solution manual Introductory Algebra (8th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Introductory Algebra (9th Ed., Margaret Lial, John Hornsby & Terry McGinnis)
Solution manual Beginning Algebra with Applications and Visualization (Gary Rockswold & Terry Krieger)
Solution manual Integrated Arithmetic and Basic Algebra (3rd Ed., Bill Jordan & William Palow)
Solution manual Introductory Algebra through Applications (Geoffrey Akst & Sadie Bragg)
Solution manual Prealgebra (3rd Ed., Margaret Lial & Diana Hestwood)
Solution manual Prealgebra (4th Ed., Margaret Lial & Diana Hestwood)
Solution manual Prealgebra (4th Ed., Marvin Bittinger & David Ellenbogen)
Solution manual Prealgebra (5th Ed., Marvin Bittinger, David Ellenbogen & Barbara Johnson)
Solution manual Prealgebra (2nd Ed., Tom Carson)
Solution manual Basic Mathematics (9th Ed., Marvin Bittinger)
Solution manual Basic Mathematics (10th Ed., Marvin Bittinger)
Solution manual Basic Mathematics Preliminary Edition (Robert Prior)
Solution manual Basic Mathematics with Early Integers (Marvin Bittinger & Judith Penna)
Solution manual Basic College Mathematics (7th Ed., Margaret Lial, Stanley Salzman & Diana Hestwood)
Solution manual Basic College Mathematics (8th Ed., Margaret Lial, Stanley Salzman & Diana Hestwood)
Solution manual Basic Mathematics through Applications (3rd Ed., Geoffrey Akst & Sadie Bragg)
Solution manual Fundamental Mathematics through Applications (3rd Ed., Geoffrey Akst & Sadie Bragg)
Solution manual Wave Motion (J. Billingham & A. C. King)
Solution manual Solving ODEs with MATLAB (L. F. Shampine, I. Gladwell & S. Thompson)

Solution manual Numerical Solution of Partial Differential Equations: An Introduction (2nd Ed., K. W. Morton & D. F. Mayers)
Solution manual Measure Theory and Filtering : Introduction and Applications (Lakhdar Aggoun & Robert J. Elliott)
Solution manual Mathematical Models in Biology : An Introduction (Elizabeth S. Allman & John A. Rhodes)
Solution manual Insurance Risk and Ruin (David C. M. Dickson)
Solution manual Data Analysis and Graphics Using R : An Example-based Approach (2nd Ed., John Maindonald & John Braun)
Solution manual Applied Optimization with MATLAB Programming (1st Ed., P. Venkataraman)
Solution manual Applied Optimization with MATLAB Programming (2nd Ed., P. Venkataraman)
Solution manual Convex Optimization (Stephen Boyd & Lieven Vandenberghe)
Solution manual Concrete Abstract Algebra : From Numbers to Gröbner Bases (Niels Lauritzen)
Solution manual A Concrete Approach to Abstract Algebra : From the Integers to the Insolvability of the Quintic (Jeffrey Bergen)
Solution manual Calculus : Concepts and Methods (Ken Binmore & Joan Davies)
Solution manual An Introduction to Partial Differential Equations (Yehuda Pinchover & Jacob Rubinstein)
Solution manual An Introduction to Ordinary Differential Equations (James C. Robinson)
Solution manual An Introduction to Mathematical Physiology and Biology (2nd Ed., J. Mazumdar)
Solution manual An Introduction to Financial Option Valuation : Mathematics, Stochastics and Computation (Desmond Higham)
Solution manual An Interactive Introduction to Mathematical Analysis (Jonathan Lewin)
Solution manual An Introduction to Mathematical Finance: Options and Other Topics (1st Ed., Sheldon M. Ross)

List of Solutions Manuals and Test Banks

----

contact me to : mattosbw1@gmail.com
mattosbw1(at)gmail.com

NOTE : "THIS SERVICE IS NOT AVAILABLE FOR : CHINA, INDIA, RUSSIA, PAKISTAN, IRAQ, IRAN, PHILIPPINES, NORTH KOREA, NEPAL, BANGLADESH, SRI LANKA, MALDIVES, BHUTAN & COLOMBIA".

If your wanted solutions manual is not in this list, also can ask me if is available (it is a partial list). Then if you need solutions manual only contact me by email.

"ARE NOT AVAILABLES BOOKS IN DIGITAL FORMAT", ONLY SOLUTIONS MANUALS AND TEST BANKS.

This same "list of titles" of texts with availables solutions manual and/or test banks is for download from :

http://www.megaupload.com/?d=1P9GUXB1

I do not review the forums, just send me an email.

- Physics & Astronomy :

Solution manual Introduction to Solid State Physics (8th Ed., Charles Kittel)
Solution manual Quantum Physics (3rd Ed., Stephen Gasiorowicz)
Solution manual Fundamentals of Nuclear Reactor Physics (Elmer Lewis)
Solution manual Nuclear Energy : An Introduction to the Concepts, Systems, and Applications of Nuclear Processes (6th Ed., Raymond L. Murray)
Solution manual Fundamentals of Electromagnetics with Engineering Applications (Stuart M. Wentworth)
Solution manual Physics (7th Ed. by Paul E. Tippens)
Solution manual Physics (6th Ed., Cutnell & Johnson)
Solution manual Physics (7th Ed., Cutnell & Johnson)
Solution manual Physics (8th Ed., Cutnell & Johnson)
Solution manual Essentials of Physics (Cutnell & Johnson)
Solution manual Understanding Physics (1st Ed., Cummings, Laws, Redish & Cooney)
Solution manual Introductory Physics : Building Understanding (Jerold Touger)
Solution manual Physics Matters : An Introduction to Conceptual Physics (James Trefil & Robert Hazen)

Solution manual How Things Work : The Physics of Everyday Life (3rd Ed., Louis Bloomfield)
Solution manual An Introduction to Modern Astrophysics (2nd Ed., Bradley W. Carroll & Dale A. Ostlie)
Solution manual Foundations of Astrophysics (Barbara Ryden & Bradley Peterson)
Solution manual Physics (5th Ed., Halliday, Resnick, Krane)
Solution manual Fundamentals of Physics (6th Ed., David Halliday, Robert Resnick & Jearl Walker)
Solution manual Fundamentals of Physics (7th Ed., David Halliday, Robert Resnick & Jearl Walker)
Solution manual Fundamentals of Physics (8th Ed., David Halliday, Robert Resnick & Jearl Walker)
Solution manual Fundamentals of Physics (9th Ed., David Halliday, Robert Resnick & Jearl Walker)
Solution manual The Physics of Everyday Phenomena : A Conceptual Introduction to Physics (3rd Ed., Thomas Griffith)
Solution manual The Physics of Everyday Phenomena : A Conceptual Introduction to Physics (4th Ed., Thomas Griffith)
Solution manual The Physics of Everyday Phenomena : A Conceptual Introduction to Physics (5th Ed., Thomas Griffith)
Solution manual Physics of Everyday Phenomena : A Conceptual Introduction to Physics (6th Ed., W. Thomas Griffith & Juliet W. Brosing)
Solution manual Integrated Science (2nd Ed., Tillery et al.)
Solution manual Integrated Science (3rd Ed., Tillery et al.)
Solution manual Integrated Science (4th Ed., Tillery et al.)
Solution manual Physical Science (5th Ed., Tillery)
Solution manual Physical Science (6th Ed., Tillery)
Solution manual Physical Science (7th Ed., Tillery)
Solution manual Physical Science (8th Ed., Tillery)
Solution manual The Physical Universe (11th Ed., Konrad Krauskopf & Arthur Beiser)
Solution manual The Physical Universe (12th Ed., Konrad Krauskopf & Arthur Beiser)
Solution manual Physics of the Life Sciences (Jay Newman)
Solution manual Physics in Biology and Medicine (3rd Ed., Paul Davidovits)
Solution manual Optics (1st Ed., Ajoy Ghatak)
Solution manual Optics (4th Ed., Eugene Hecht)
Solution manual Nonlinear Optics (3rd Ed., Robert Boyd)
Solution manual Introduction to Optics (3rd Ed., Frank L Pedrotti, Leno M Pedrotti & Leno S Pedrotti)
Solution manual Principles of Physical Optics (Charles Bennett)
Solution manual Optics : Principles and Applications (Kailash Sharma)
Solution manual Continuum Electromechanics (James R. Melcher)
Solution manual Electromagnetic Noise and Quantum Optical Measurements (Hermann A. Haus)
Solution manual Matter and Interactions I : Modern Mechanics (2nd Ed., Ruth W. Chabay & Bruce A. Sherwood)

Solution manual Matter and Interactions : Volume 1 : Modern Mechanics (3rd Ed., Ruth W. Chabay & Bruce A. Sherwood)
Solution manual Matter and Interactions II : Electric and Magnetic Interactions (2nd Ed., Ruth W. Chabay & Bruce A. Sherwood)
Solution manual Matter and Interactions : Volume 2 : Electric and Magnetic Interactions (3rd Ed., Ruth W. Chabay & Bruce A. Sherwood)
Solution manual Thermal Stresses (2nd Ed., Noda, Hetnarski & Tanigawa)
Solution manual Introduction to Statistical Physics (Kerson Huang)
Solution manual Extended Irreversible Thermodynamics (3rd Ed., D. Jou, J. Casas-Vazquez & G. Lebon)
Solution manual An Introduction to Thermodynamics and Statistical Mechanics (2nd Ed, Keith Stowe)
Solution manual Equilibrium and Non-Equilibrium Statistical Thermodynamics (Michel Le Bellac, Fabrice Mortessagne & G. George Batrouni)
Solution manual Elements of Statistical Mechanics: With an Introduction to Quantum Field Theory and Numerical Simulation (Ivo Sachs & Siddhartha Sen)
Solution manual Quantum Transport (2nd Ed., Supriyo Datta)
Solution manual Ocean Waves and Oscillating Systems (Johannes Falnes)
Solution manual Statistical Mechanics (2nd Ed., R.K. Pathria)
Solution manual Quantum Mechanics (Gennaro Auletta, Mauro Fortunato & Giorgio Parisi)
Solution manual Applied Quantum Mechanics (1st Ed., A. F. J. Levi)
Solution manual Applied Quantum Mechanics (2nd Ed., A. F. J. Levi)
Solution manual Fundamentals of Quantum Mechanics (C.L. Tang)
Solution manual Astronomy : A Physical Perspective (2nd Ed., Marc L. Kutner)
Solution manual Classical Mechanics (Douglas Gregory)
Solution manual Electromagnetic Field Theory Fundamentals (2nd Ed., Singh Guru & Hiziroglu)
Solution manual Special Relativity : From Einstein to Strings (P.M. Schwarz & J.H. Schwarz)
Solution manual Gravity : An Introduction to Einstein's General Relativity (James Hartle)
Solution manual A Short Course in General Relativity (3rd Ed., James Foster & J. David Nightingale)
Solution manual Statistical Thermodynamics (Normand Laurendeau)
Solution manual Statistical Thermodynamics and Microscale Thermophysics (Van P. Carey)
Solution manual Thermal Physics (Ralph Baierlein)
Solution manual Topics in Atomic Physics (Charles E. Burkhardt, Jacob J. Leventhal)
Solution manual Foundations of Quantum Physics (Charles E. Burkhardt, Jacob J. Leventhal)
Solution manual Applied Physics (8th Ed., Dale Ewen, Ronald Nelson, Neill Schurter & Erik Gundersen)
Solution manual Applied Physics (9th Ed., Dale Ewen, Neill Schurter & Erik Gundersen)
Solution manual Analytical Mechanics (7th Ed., Grant R. Fowles, George

Cassiday)
Solution manual Orbital Mechanics for Engineering Students (1st Ed., Howard Curtis)
Solution manual Orbital Mechanics for Engineering Students (2nd Ed., Howard Curtis)
Solution manual Diagnostic Ultrasound Imaging : Inside Out (Thomas Szabo)
Solution manual Astronomy : A Beginner's Guide to the Universe (5th Ed., Eric Chaisson & Steve McMillan)
Solution manual The Cosmic Perspective (5th Ed., Jeffrey O. Bennett, Megan Donahue, Nicholas Schneider & Mark Voit)
Solution manual The Cosmic Perspective Media Update (4th Ed., Jeffrey O. Bennett, Megan Donahue, Nicholas Schneider & Mark Voit)
Solution manual The Essential Cosmic Perspective Media Update (4th Ed., Jeffrey O. Bennett, Megan Donahue, Nicholas Schneider & Mark Voit)
Solution manual The Essential Cosmic Perspective Media Update (3rd Ed., Jeffrey O. Bennett, Megan Donahue, Nicholas Schneider & Mark Voit)
Solution manual The Essential Cosmic Perspective (3rd Ed., Jeffrey O. Bennett, Megan Donahue, Nicholas Schneider & Mark Voit)
Solution manual Astronomy Today (5th Ed., Eric Chaisson & Steve McMillan)
Solution manual Astronomy Today (6th Ed., Eric Chaisson & Steve McMillan)
Solution manual Conceptual Physical Science (3rd Ed., Paul G. Hewitt, John A. Suchocki & Leslie Hewitt)
Solution manual Conceptual Physical Science (4th Ed., Paul G. Hewitt, John A. Suchocki & Leslie Hewitt)
Solution manual Conceptual Integrated Science (Paul G. Hewitt, Suzanne Lyons, John A. Suchocki & Jennifer Yeh)
Solution manual Physics : Concepts & Connections (4th Ed., Art Hobson)
Solution manual Physics : Concepts & Connections (5th Ed., Art Hobson)
Solution manual Conceptual Physics (10th Ed., Paul Hewitt)
Solution manual Conceptual Physics (11th Ed., Paul Hewitt)
Solution manual Conceptual Physics Fundamentals (Paul G. Hewitt)
Solution manual College Physics (6th Ed., Jerry Wilson, Anthony Buffa & Bo Lou)
Solution manual College Physics (7th Ed., Jerry Wilson, Anthony Buffa & Bo Lou)
Solution manual College Physics (8th Ed., Young & Geller)
Solution manual Modern Physics (2nd Ed., Randy Harris)
Solution manual Modern Physics for Scientists and Engineers (John Morrison)
Solution manual Solid State Physics : Essential Concepts (David Snoke)
Solution manual Physics with Mastering Physics (3rd Ed., James Walker)
Solution manual Physics with Mastering Physics (4th Ed., James Walker)
Solution manual Active Learning Guide (Alan Van Heuvelen & Eugenia Etkina)
Solution manual E&M TIPERs : Electricity & Magnetism Tasks (C. J.

Hieggelke, D. P. Maloney, T. L. O'Kuma & Steve Kanim)
Solution manual Physics : Principles with Applications (6th Ed., Douglas C. Giancoli)
Solution manual Physlet® Physics : Interactive Illustrations, Explorations and Problems for Introductory Physics (Wolfgang Christian & Mario Belloni)
Solution manual University Physics with Modern Physics with Mastering Physics (11th Ed., Hugh Young & Roger Freedman)
Solution manual University Physics with Modern Physics with Mastering Physics (12th Ed., Hugh Young & Roger Freedman)
Solution manual Physics for Scientists and Engineers (3rd Ed., Douglas C. Giancoli)
Solution manual Physics for Scientists and Engineers with Modern Physics (3rd Ed., Douglas Giancoli)
Solution manual Physics for Scientists and Engineers with Modern Physics (4th Ed., Douglas Giancoli)
Solution manual Physlet® Quantum Physics : An Interactive Introduction (Mario Belloni, Wolfgang Christian & Anne Cox)
Solution manual Introduction to Electrodynamics (3rd Ed., David J. Griffiths)
Solution manual Introduction to Quantum Mechanics (2nd Ed., David Griffiths)
Solution manual Quantum Mechanics : An Accessible Introduction (Robert Scherrer)
Solution manual Modern Quantum Mechanics (J. J. Sakurai)
Solution manual The Physics of Sound (3rd Ed., Richard Berg & David Stork)
Solution manual Electromagnetism : Principles and Applications (1st Ed., Paul Lorrain, Dale R. Corson)
Solution manual Classical Electromagnetism (Jerrold Franklin)
Solution manual Classical Electrodynamics (2nd Ed., John David Jackson)
Solution manual Nanoengineering of Structural, Functional and Smart Materials (Mark Schulz, Ajit Kelkar, Mannur Sundaresan)
Solution manual Introduction to Color Imaging Science (Hsien-Che Lee)
Solution manual An Introduction to Astrobiology (Iain Gilmour & Mark Sephton)
Solution manual An Introduction to Galaxies and Cosmology (Mark HJones & Robert Lambourne)
Solution manual An Introduction to the Solar System (Neil McBride & Iain Gilmour)
Solution manual Quantum Physics (Michel Le Bellac)
Solution manual Laser Fundamentals (2nd Ed., William T. Silfvast)
Solution manual Laser Electronics (3rd Ed., Joseph T. Verdeyen)
Solution manual Introductory Quantum Optics (Christopher Gerry & Peter Knight)
Solution manual Introduction to Plasma Physics: With Space and Laboratory Applications (D. A. Gurnett & A. Bhattacharjee)
Solution manual A Short Introduction to Quantum Information and Quantum Computation (Michel Le Bellac)

Solution manual A Quantum Approach to Condensed Matter Physics (Philip L. Taylor & Olle Heinonen)
Solution manual A First Course in String Theory (Barton Zwiebach)
Solution manual A First Course in Computational Physics and Object-Oriented Programming with C++ (David Yevick)
Solution manual A Course in Modern Mathematical Physics : Groups, Hilbert Space and Differential Geometry (Peter Szekeres)
Solution manual Ultrasonic Nondestructive Evaluation Systems: Models and Measurements (Lester W. Schmerr & Sung-Jin Song)
Solution manual Explorations : Stars Galaxies and Planets (1st Ed. Updated, Thomas Arny)
Solution manual Explorations : An Introduction to Astronomy (2nd Ed., Thomas Arny)
Solution manual Explorations : An Introduction to Astronomy (3rd Ed. Updated, Thomas Arny)
Solution manual Explorations : An Introduction to Astronomy (4th Ed. Updated, Thomas Arny)
Solution manual Explorations : An Introduction to Astronomy (5th Ed. Updated, Thomas Arny)
Solution manual Astronomy : Journey to the Cosmic Frontier (3rd Ed., John D. Fix)
Solution manual Astronomy : Journey to the Cosmic Frontier (4th Ed., John D. Fix)
Solution manual Astronomy : Journey to the Cosmic Frontier (5th Ed., John D. Fix)
Solution manual Pathways to Astronomy with Starry Night Pro (Steven Schneider & Thomas T Arny)
Solution manual From Molecules to Networks (2nd Ed., John Byrne & James Roberts)
Solution manual Biotechnology (David Clark & Nanette Pazdernik)
Solution manual Light and Video Microscopy (Randy Wayne)

51. Roger loses another girl friend...

Newsgroup: rec.radio.amateur.policy
Date: 2011-01-08 08:26:56 UTC
From: mark <anon@anon.com>
Message-ID: <4c5slh.3nm.17.1@news.alt.net>
Source record: 244372

This gal laughed in Roger's face last night.
He tried to buy her a drink and she turned him down.
She didn't actually say "no", but her actions speak louder than words.

Roger went home alone....again.

?Thank you for pointing out that MURS is open to all.

Back when I was in college, the local police used 27 MHz CB. Open to all.
And one of the idiot students made a rude remark to one of the cops.

He was given a choice - resign and leave the school or face charges. He
dropped out.

MURS is not amateur. Nearest amateur is 2 meter (144-148 MHz). 70 CM is
the 440 MHz band. And in certain areas, it is highly regulated. Near
Arecibo is one for instance.

160 meters used to be highly regulated in some areas (including Rochester,
NY), due to LORAN.

Things change.

73 from Rochester, NY
Jim

Not according to tjhe FCC which is FEDERAL law. There is a police department (located near a an interstate freeway) which uses the MURS channel 154.570 MHZ for it's daily police business.

Although MURS isn't as heavily used as CB or frs, there are some users.

When travellers down the freeway using MURS radios (and perfectly legal FCC-certified radios), they listen hear no one talking and transmit when they need to, the the police department using the MURS frequencies gets all P.O'ed and replies by raadio, tells them to stop illegally transmitting on the police channel and to get off the police channels, and if they don't they will arrrest and jail them and confiscate their radios because their radios are illegal since they are able to transmit on the police channel

and that if they don't have the proper paper license (isssued by that police department) to allow them to transmit on that radio frequency, the y WILL be jailed, after being arrested and fined for illegal possesion of a radio capable of transmitting on police frequencies which their state law specifically says is aagainst the lawe to have.

Acording to you and the police, I and everyon e else need a license to transmit on the police frequency of 154.570 MHZ or we're not allowed to transmit at all.

According to the FCC (which is FEDERAL law), NO ONE needs a license to transmit their because every citizen of the U.S. is already licensed by rule to transmit there.

According to you and the police, I and everyone else am not allowed to have our MURS radios because it is illegal to ghave such a radio sincer it can transmit on the police channel of 154.570 MHZ being used by the police.

According to the FCC (which is FEDERAL law, the radios are NOT illegal and are in fact perfectly LEGAL for EVERY citizen of the U.S. to have and transmit on.

And no MURS frequencies will be assigned exclusively to one group or one person or one agency. The channels MUST be SHARED. That is FEDERAL law.

So once again, the police have absolutely no right arressting, fining, or jailing me or anyone else, or confiscating mine or anyone else's perfectly-legal FCC-approved radios just because the radios can transmit on their police frequency ("police channel" of 154.570 MHZ

Furthermore, from everything I read, the FCC has never ever assigned 154.570 MHZ to any police or public safety groups.

The frequency was a business channel used by commercial businesses before it was a MURS frequency.

Also, there were many cars made which came directly from the factory with radios which could tune into the audio portion of the tv broadcast stations and had the normal scan button to search them (which also searched for am and fm radio broadcast stations if you had it set for the am or fm band instead of the tv band.

Ever since the tv stations have been removed from that band by the FCC last year (2009), those factory-installed car radios now tune into the 700 MHZ police channels instead of the 700 MHZ tv channels because there aren't any tv stations on those channels anymore.

So now when the geberal public pushes the scan button to search for their tv station audio, it only stops on police and public safety channels and acts just like a scanner.

The cops will arrest you for having such a radio installed in your car even though it was factory-installed in all those model cars by the manufacturer before they were first sold by the manufacturer because it violates their state laws of "you shall not equip, install, nor have equipped or installed in your car any scanner which now or hereafter recieves police frequencies now allocated or allocated in the futture by the FCC or it's sucessor in your vehicle.

Even though it was installed in your car BEFORE the new rules (new law) went into effect.

Which makes it an ex-post-facto law and a violation of the U.S. Constitution.

So any cop or city arresting, fining, or jailing you for that is holding you on an illegal ex-post-facto law.

?That 156 MHz frequency is *not* an amateur frequency.
Understand that there are no sanity tests required to get a license.
The guy is lucky that is all he got for a penalty.

BTW, that article is from 2003 .... uh ...???

Hello everyone,

In order to improve their ability to 'receiving CW,
and recently 'born ITANET, by IK0XCB I1DMP and, with the collaboration
Informatics IK2SOE.

The first telegraph ITALIAN Net at various speeds', and
beginners and advanced.

EVERY SUNDAY NIGHT ON 3565 KHZ, from 20.00 GMT.

Will be drawn on the charts of sending their written
in defendant receiving a total of 100 groups at the speed 'of 12 wpm
. Will follow 'a second message having the same structure as the first but
speed 'of 20 wpm.

The third message will be 'broadcast clear and in Italian. This
e 'for the reception in mind without writing.

RADIO FOR THE LAUNCH OF THE TEST PROGRAM AND PREPARE TO FACILITATE THE
RECEPTION WILL START 'TO 19,45 GMT

I invite all those interested in improving their
capacity 'reception in cw to participate.

I am attaching the website where you can find more information:

http://www.ik2soe.org/NET/show_w.php?what=LAST

(Click on the guide), there will be weekly,
monthly and yearly, with a award, all free of course.!

Where do you come up with this shit?
This township law you refer says I can't drive my 1955 Chevy because the
township consider it to be junk? Even though the state has issued a proper
license state and is well maintained?

Have you ever considered challenging these HOA's assholes in court?
As well as the township?

Did you not state once this was in Arizona?
I looked up the law on Arizona HOAs and that law clearly states, the HOAs
do not have any legal authority concerning vehicles on a dedicated street.
Dedicated, has a wide meaning. The only way an HOA could have total control
of a street is to declare it "private".

What you need to do is take action. Get off your lazy armchair ass and get
involved with the HOA. My brother did and how he's even on the board.

FYI, if there is a federal law on the subject, the federal law takes
precedence over any other jurisdiction law. So no, the township can not
restrict a ham radio operators license in any manner.

<snip>

"radioguy" is a troll. I thought you would be able to recognize that.

He purposely bends HOA rules and zoning laws to see who will take the bait.

He is a troll.

yeah I know. I'm just having fun with his stupid ass.
How many times in the past six months has he posted the same shit over and
over and not once replied to anything I've said.

I wish the Gov't would pay me to sit on my ass all day and think of
dumb shit to type in to my computer and post to see what folks with
a life will type in to reply to his Gov't financed drivel.

Tip Of The Day:
Never reply to any newsgripe post that starts with "X-No-Archive: Yes".
It's a sure sign of a troll that doesn't want to archived so you can't
prove it's them in a few years. Of course, they better keep copies of it
so they can repost it years later and save having to rethink about it.

A lot of this stuff looks like a guy named Randy in other places. Very
similar types of writing...

==> + ARRL IN ACTION: NEW AMATEUR RADIO BILL INTRODUCED IN CONGRESS

The Amateur Radio Emergency Communications Enhancement Act, which
died at the end of the 111th Congress, has been reintroduced in the
112th Congress as HR 81
<http://www.thomas.gov/cgi-bin/query/D?c112:2:./temp/%7Ec1129bpLP1::>.
The sponsor is Representative Sheila Jackson Lee (D-TX-18). The new
bill -- which was introduced on January 5 -- has been referred to the
House Committee on Energy and Commerce. "We are hopeful that this early
start will lead to success in the new Congress," commented ARRL Chief
Executive Officer David Sumner, K1ZZ.
```

Rep Jackson Lee first introduced the bill -- HR 2160
<http://www.arrl.org/hr2160> -- in the 111th Congress in April 2009
<http://www.arrl.org/news/houston-representative-introduces-amateur-radio-bil
l-in-congress>.
It gained an additional 41 cosponsors but did not progress out of the
committee of jurisdiction. A similar bill introduced in the Senate -- S
1755
<http://www.arrl.org/news/senate-introduces-companion-bill-to-hr-2160>
-- made it all the way through that body in December 2009, but likewise
was not taken up by the House. The objective of the bill -- which is
supported by the ARRL -- is for the Secretary of Homeland Security to
study the uses and capabilities of Amateur Radio communications in
emergencies and disaster relief and to identify and make
recommendations regarding impediments to Amateur Radio communications,
such as the effects of private land use regulations on residential
antenna installations.

==> + FCC NEWS: FCC SENDS LICENSE RENEWAL FOR K1MAN TO ADMINISTRATIVE
LAW JUDGE

The FCC has issued a Hearing Designation Order
<http://www.fcc.gov/Daily_Releases/Daily_Business/2011/db0112/DA-11-58A1.pdf>
to determine, among other things, if the Amateur Radio license of Glenn
A. Baxter, K1MAN, of Belgrade Lakes, Maine, should be renewed.
According to the Order, "Baxter has apparently willfully and repeatedly
engaged in unlawful Commission-related activities, including causing
interference to ongoing communications of other amateur stations,
transmitting communications in which he had a pecuniary interest,
failing to file requested information pursuant to an Enforcement Bureau
(Bureau) directive, engaging in broadcasting without communicating with
any particular station and failing to exercise control of his station."

Baxter, whose amateur license expired in 2005, filed a timely renewal
on July 22, 2005; his license expired on October 17. Because of the
timely renewal, Baxter's license remained in effect past the expiration
date. The FCC said it "believe[s] that Baxter's apparent continuing
course of misconduct raises a substantial and material question of fact
as to whether he possesses the requisite character qualifications to be
and remain a Commission licensee."

==> + PUBLIC SERVICE: MIDWESTERN HAMS SPOT, TRACK TORNADOS AS 2011
BEGINS

In the final hours of 2010, tornados swept across Missouri, Illinois
and Arkansas, leaving at least seven people dead. Hams in Missouri --
one of the hardest hit areas -- activated nets and provided real-time
weather observations to the National Weather Service. According to a
timeline of events in the St Louis Post-Dispatch, hams in the towns of
Pacific, Ballwin and Sunset Hills in Missouri, as well as a ham in
O'Fallon, Illinois, were among the many who spotted and reported
twisters and severe weather to their local NWS offices.

Steve Runnels, KD4OPZ -- the Warning Coordination Meteorologist at the NWS office in Springfield, Missouri -- said that he was impressed by "the amount of Amateur Radio support we received during the overnight and into the early morning hours. This proves that the Amateur Radio community is always ready. It also shows the strength of their commitment to the communities they live in and the National Weather Service's mission to protect life and property." Read more here <http://www.arrl.org/news/midwestern-hams-spot-track-tornados-as-2011-begins> .

==> + ON THE AIR: AIM HIGH IN THE ARRL JANUARY VHF SWEEPSTAKES

VHF operators will be on the bands in force the weekend of January 22-24 as the ARRL January VHF Sweepstakes hits the airwaves. This contest gives the VHFer in all of us a chance to do some contesting during the winter months. According to ARRL Contest Branch Manager Sean Kutzko, KX9X, January may not seem like the ideal time to hold a VHF+ contest, but sometimes he said, the propagation gods like to surprise and confound. "There have been plenty of QSOs made via sporadic-E in the colder months this winter, including a surprise opening from the Midwest and Western US to Australia and New Zealand just this week! QSOs on other forms of enhancement exist as well, thanks to tropospheric ducting and auroral propagation. Because of the advent of WSJT software, making QSOs via meteor scatter in the wee hours of the morning on 6 and 2 meters has never been easier. There are plenty of opportunities to make long-haul QSOs on the VHF+ bands in January." Read more here <http://www.arrl.org/news/aim-high-in-the-arrl-january-vhf-sweepstakes>.

==> ON-THE AIR: ARRL OUTGOING QSL SERVICE ANNOUNCES NEW RATE STRUCTURE

Effective January 17, 2011, a new pricing structure will go into effect for the ARRL Outgoing QSL Service. With the new rate structure, amateurs will no longer need to count outgoing cards and then guess as to what to pay based upon a half-pound rate; a simple weighing of the cards is all that is necessary to determine what amount to send to the Bureau. This new structure also accommodates a small rate increase in response to recent postage, shipping and handling costs. Read more here <http://www.arrl.org/news/arrl-outgoing-qsl-service-announces-new-rate-structure>.

==> + AMATEUR RADIO IN THE CLASSROOM: ARRL EXECUTIVE COMMITTEE APPROVES GRANTS FOR FIVE SCHOOLS

In December 2010, the ARRL Executive Committee reviewed grant applications for the ARRL's Education & Technology Program (ETP), awarding equipment valued at nearly $5000 to five schools. More than 525 schools across the country have received support from the ETP in the form of grants for equipment, curriculum and resources, as well as teacher in-service training through the Teachers Institute on Wireless Technology. Applications for equipment and resource grants are accepted twice each year; application deadlines are May 1 and November 1. Applications for 2011 summer sessions of the Teachers Institute are

currently being accepted. Read more here
<http://www.arrl.org/news/arrl-executive-committee-approves-grant-funding-for
-five-schools>.

==> + ARRL BOARD OF DIRECTORS TO MEET NEXT WEEK

The ARRL Board of Directors will hold its 2011 Annual Meeting on
January 21-22 in Windsor, Connecticut. Directors, Vice Directors and
ARRL Board Officers will be in attendance, including two new Vice
Directors who will be at their first Board meeting: Southeastern
Division Vice Director Andrea Hartlage, KG4IUM, and West Gulf Division
Vice Director John Robert Stratton, N5AUS. The Board will also welcome
IARU Secretary Rod Stafford, W6ROD, and Radio Amateurs of Canada
President Geoff Bawden, VE4BAW. The meeting will be preceded on
Thursday, January 20 with meetings of the Board's Administration and
Finance Committee and the Programs and Services Committee. At its
January 2010 meeting, the ARRL Board of Directors decided to make the
agendas of Board and Executive Committee meetings available on the ARRL
website. The agenda for the 2011 Annual Meeting is available here
<http://www.arrl.org/attachments/view/News/56557>. Per the Articles of
Association <http://www.arrl.org/arrl-articles-of-association> the ARRL
Board of Directors meets twice a year, in January and July.

==> + ARRL FOUNDATION SCHOLARSHIP APPLICATIONS AND TRANSCRIPTS DUE
FEBRUARY 1

Students planning to apply for the more than 60 scholarships
administered by the ARRL Foundation should be aware that the deadline
is fast approaching. All materials -- including transcripts -- are due
February 1. Beginning this year, applicants must submit all material
electronically. No paper forms will be accepted. Read more here
<http://www.arrl.org/news/arrl-foundation-scholarship-applications-and-transc
ripts-due-february-1>.

==> SOLAR UPDATE

Tad "I'm melting in the Sun
<http://www.youtube.com/watch?v=8t7QQ_DrIpA>" Cook, K7RA, reports: The
average daily sunspot numbers declined 12 points to 38 during the week
of January 6-12. The average daily solar flux declined by nearly 6
points to 83.8. The latest forecast shows solar flux at 80 on January
13-15, 78 on January 16-19 and back to 80 on January 20-35, then rising
to nearly 90 by the end of the month. The same forecast has planetary A
index for January 13-22 at 5, 8, 7, 5, 5, 5, 5, 7, 7 and 5. Geophysical
Institute Prague sees unsettled geomagnetic conditions on January
14-15, quiet to unsettled January 16, unsettled January 17-18, quiet to
unsettled January 19 and quiet on January 20. The STEREO mission's
coverage of the entire Sun <http://stereo.gsfc.nasa.gov/> is nearly
complete, with continuous images showing more than 99.2 percent of our
nearest star. By Sunday evening in North America, the project will have
passed 99.34 percent coverage. The black band of unseen area is now
just a tiny sliver, and magnetically active areas over the entire Sun

may now be observed live from any place with an Internet connection at any time of the day or night. Look for more information on the ARRL website on Friday, January 14. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by INXS <http://en.wikipedia.org/wiki/Inxs>' Melting in the Sun <http://www.youtube.com/watch?v=8t7QQ_DrIpA>.

==> + AMATEUR RADIO FUN: BE A STAR! ENTER THE ARRL VIDEO CONTEST

If you've ever wanted a way to show the world how exciting Amateur Radio can be, here's your chance: The ARRL is sponsoring its first-ever video contest <http://www.arrl.org/video-contest>! We are looking for ARRL members to shoot and submit videos that showcase how fun and electrifying our hobby is; extra points will be awarded for a video showing someone, young or old, licensed or not, making their first contact. Videos will be judged on overall quality and composition, and prizes will be awarded. The video author/producer must be an ARRL member; however, the people who appear in your video can be non-members. This contest is intended for amateur videographers. If you are a professional, please do not apply. Check out all the details -- including the fine print -- on the ARRL Video Contest Rules and Guidelines web page <http://www.arrl.org/video-contest>.

==> AMATEUR RADIO FUN: NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL WEBSITE

Four new poll questions have just been published on the QuickStats page <http://www.arrl.org/quickstats> on the ARRL website. Let your voice be heard!

Questions in this month's QuickStats poll include:

- Do you use a computer to send or receive CW?
- Do you subscribe to any publications that you read online?
- Do you have a separate room in your home that's dedicated strictly to your ham station?
- When operating SSB, do you use a speech processor?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure to bookmark it in your browser. Results from this QuickStats poll will be published in the April 2011 issue of QST on the QuickStats page, located in the rear advertising section of the magazine. Along with monthly poll results, QST QuickStats offers colorful charts and graphs that highlight interesting Amateur Radio statistics.

==> SILENT KEY: FORMER WESTERN MASSACHUSETTS SECTION MANAGER BILL VOEDISCH, W1UD (SK)

William Voedisch, W1UD, of Leominster, Massachusetts, became a Silent Key on January 1. He was 78. Voedisch was an avid CW operator who especially enjoyed operating in the CW National Traffic System nets. In recent years, he was the Manager of the NTS First Region CW net and

almost nightly represented the First Region in the Eastern Area Net. He
was also active in the Transcontinental Corps, relaying messages to
other regional nets around the country. Read more here
<http://www.arrl.org/news/former-western-massachusetts-section-manager-bill-v
oedisch-w1ud-sk>.

==> THIS WEEK ON THE RADIO

This week:

- January 14 -- NCCC Sprint Ladder
- January 15 -- LZ Open Contest, Feld Hell Sprint
- January 15-16 -- North American QSO Party (SSB), Hungarian DX
Contest, UK DX Contest (RTTY)
- January 17 -- Run for the Bacon QRP Contest
- January 20 -- NAQCC Straight Key/Bug Sprint

Next week:

- January 21 -- NCCC Sprint Ladder
- January 22-23 -- BARTG RTTY Sprint
- January 22-24 -- ARRL January VHF Sweepstakes
<http://www.arrl.org/january-vhf-sweepstakes>
- January 26 -- SKCC Sprint
- January 27 -- NAQCC Straight Key/Bug Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
info. Looking for a Special Event station? Be sure to check out the
ARRL Special Event Stations Web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- January 15, 2011 -- ARRL Southern Florida Section Convention
<http://fmarc.net/hamfest_2011.htm>, Fort Myers, Florida
- January 28-29, 2011 -- ARRL Mississippi State Convention
<http://www.msham.org/hamfest.php>, Jackson, Mississippi

To find a convention or hamfest near you, click here
<http://www.arrl.org/hamfests>.

Amateur Radio Newsline(tm) Report 1744 - January 14 2011

Amateur Radio Newsline report number 1744 with a release date of
Friday, January 14, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. The Amateur Radio Emergency Communications
Enhancement Act gets another chance in Congress, the long awaited
Spratley Island DX0DX is put on indefinite hold, repeaters in Italy are
accused of interfering with ham radio space operations and the story of
a 10 year old who discovers a supernova exploding star in a galaxy far,
far away. Find out the details on Amateur Radio Newsline(tm) report
number 1744 coming your way right now.

RADIO POLITICS: AMATEUR RADIO EMERGENCY COMMUNICATIONS ENHANCEMENT ACT
REINTRODUCED BEFORE CONGRESS

New life for a ham radio emergency communications measure. This as the
Amateur Radio Emergency Communications Enhancement Act is re-introduced
before Congress. Norm Seeley, KI7UP, reports:

--

The Amateur Radio Emergency Communications Enhancement Act, which died
at the end of the 111th Congress, has been reintroduced in the 112th
Congress as HR 81. According to an ARRL credited posting on Facebook,
the sponsor is Representative Sheila Jackson Lee of Texas.

The objective of the bill which is supported by the ARRL is for the
Secretary of Homeland Security to study the uses and capabilities of
Amateur Radio communications in emergencies and disaster relief. Also
it would identify and make recommendations regarding impediments to
amateur radio communications, such as the effects of private land use
regulations on residential antenna installations.

Representative Jackson Lee first introduced the bill as HR 2160 in the
111th Congress in April 2009. It gained an additional 41 co-sponsors
but did not progress out of the committee of jurisdiction. A similar
bill introduced in the Senate as S 1755 as made it all the way through
that body in December 2009, but likewise was not taken up by the House.
Now, in 2011, a lot of hams are hoping that this latest version will
make it though both houses of Congress and become the law of the land.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, In Scottsdale, Arizona.

--

The new bill which was introduced by Jackson Lee on January 5th has been referred to the House Committee on Energy and Commerce. (ARRL)

**

DX ADVISORY: DX0DX OPERATION ON INDEFINITE HOLD

Some disappointing news for DX'ers. The long awaited DX0DX operation from the Spratley Islands appears to be on indefinite hold and nobody can say exactly when it will take place.

According to a posting on DX World dot net by Team Leader Chris Dimitrijevic, VK3FY, the decision to abort the attempt at this time was brought about by what he termed as circumstances beyond the control of the DX0DX Team.

VK3FY said that the situation leading to the decision to postpone the operation began when the expedition's transport by ship was damaged back in October of 2010. They then opted to fly in, as there were no ships deemed to be safe to make the voyage to Pag-Asa available.

VK3FY says that they had landing permission and booked an aircraft with security cleared pilots. However, there was conflicting agreements and the aircraft could not get approval of its flight plan. As time was running out for this window of opportunity, and before more operators became stuck in Palawan in the hope of making the last leg of the voyage, the decision was made to postpone the operation.

The authorities overseeing access to the islands has been advised of the postponement. Also, all of the equipment that was to be used for the operation will be exported out of Philippines to comply with current Philippine Customs Law.

VK3FY ends by noting that his team has a license as well as the authority to land via ship. He says that when a ship becomes available, it is his intention to activate this entity sometime in 2011.

More on this story is on line at dx-world.net. We will have more DX news later on in this weeks Amateur Radio Newsline report. (DX-World)
**

RESTRUCTURING: RSGB ANALYZING FUTURE OF HAM RADIO IN THE UK SURVEY

It looks like there could be some long nights ahead for officials of the Radio Society of Great Britains leadership. This as it wades through the myriad of responses to its recently concluded survey of UK hams on the future of the service and the society itself. GB2RS News Reader Jeremy Boot, G4NJH is here with the details:

--

The RSGB Questionnaire on the status of amateur radio within the United Kingdom closed on 31 December 2010. Over 3,000 responses were completed, well in excess of expectations, so the Society is very grateful for those who gave their time to have a go at the Questionnaire.

It was particularly good to get feedback from several hundred lapsed members as well as a sizeable number of people who had never joined the Society.

The analysis task has now started. Whilst there are some statistics that can be established quickly and easily some of the data, particularly the textual comments will take many hours to gather, categorize and collate.

I'm Jeremy Boot, G4NJH and you are listening to the Amateur Radio Newsline.

--

The timetable for the analysis is to complete the analysis by the summer. This, so that the key findings can be used in long term planning by the RSGB. (GB2RS)

**

HAM RADIO IN SPACE: ITALIAN REPEATERS ALLEGED TO BE INTERFERING WITH HAMSATS

According to a report in the Southgate News, both F-M and D-Star repeaters in Italy are showing up in the Amateur Satellite segment 145.8 from 146.0 MHz. These machines are said to be government approved by Italy's Communications Regulatory Authority and are causing considerable interference to amateur radio satellites and the International Space Station contacts

Some of the Italian repeaters identified in the article as operating in the 2 meter Amateur Satellite allocation are said to include F-M machine IRE0CK on 145.85 MHz plus D-Star systems IR3UEF on 145.8 Mhz and IR0CD on 145.975 Mhz.

The Southgate story says that it would appear that Italy's telecommunications regulator permits repeaters anywhere within the 2 meter band on a provisional basis for 60 days. Authorization may become permanent if no complaints are received. The article calls on hams worldwide to make sure that the Italian telecommunications regulatory body is made aware of any problems.

This is not the first time that there have been interlopers into the ham satellite spectrum. Over the years there have been numerous reports of terrestrial business communications using these frequencies and eventually disappearing. Most of these reports came out of third world developing nations. The situation in Italy will be quite different if its proven that the repeaters alleged to be interfering with ham radio space operations have government approval to do so.

The Complete story of this repeater versus ham radio satellite interference is on-line at tinyurl.com/497bag7. The website for Italy's Italy Communications Regulatory Authority in the Italian language is www2 dot agcom dot it. And we will have more ham radio space related news later on in this weeks Amateur radio Newsline report. (Southgate)

**

ENFORCEMENT: FCC DESIGNATES K1MAN LICENSE RENEWAL FOR HEARING

The FCC has designated the Amateur Service station license of Glenn A. Baxter, K1MAN, for a hearing to determine if it should be renewed. In its January 10th Hearing Designation Order, the Commission stated that the proceeding will be held before a Commission Administrative Law Judge to determine whether a pending application filed by Baxter for renewal of his license for Amateur Radio Station K1MAN should be granted.

The Hearing Designation Order continues with the FCC stating that the record before it indicates that Baxter has apparently willfully and repeatedly engaged in unlawful Commission-related activities. These include causing interference to ongoing communications of other amateur stations, transmitting communications in which he had a pecuniary interest, failing to file requested information pursuant to an FCC Enforcement Bureau directive, engaging in broadcasting without communicating with any particular station, and failing to exercise control of his station.

The Order continues by stating that based on the information before it, the FCC believes that Baxter's apparent continuing course of misconduct raises a substantial and material question of fact as to whether he possesses the requisite character qualifications to be and remain a Commission licensee. Accordingly, it has designated his pending renewal application for a hearing.

Baxter had filed an application to renew the license for station K1MAN on July 22, 2005, but this application had been set aside by the FCC pending further action. His license expired on October 17, 2005, but under Administrative Law he has been permitted to continue to operate his station until the matter of his license renewal has been fully adjudicated.

The Hearing Designation Order was issued on Monday, January 10th and released on Wednesday, January 12th. In it, Baxter was given 20 days in which to respond and state whether or not he will attend a hearing on his license renewal at a time and place to be determined in a subsequent order. Those of you interested can read the entire K1MAN license renewal Hearing Designation Order at tinyurl.com/45vve38 (FCC)

COMMUNICATIONS POLITICS: FCC RELEASES FIRST LAB REPORT ON WIRELESS TRENDS

The Federal Communications Commission has released the first in a series of reports by the Office of Engineering & Technology Laboratory which looked at trends in cutting-edge wireless devices.

The report shows that the number of wireless transmitters authorized by the FCC in 2010 was nearly 12,000. This is an increase of almost four times the amount from a decade ago. Its also a 700% increase since 2008 in the number of devices with three or more transmitters. That's up from 7% of total devices in 2008 to more than 50% today.

The report also notes that new devices are becoming more useful and technologically advanced. It found that the number of new increasingly sophisticated devices entering the marketplace with multiple transmitters, enabling access to 4G networks, Bluetooth, Wi-Fi and other types of connections, will continue to present more options for consumers.

The complete text of the report is available at the FCC website. Its in cyberspace as a Word document at tinyurl.com/45d67p4 or directly at http://www.fcc.gov/oet/info/documents/reports/wirelessdevice s.doc (FCC)

**

RESCUE RADIO: FLORIDA COMPANY PLANS NEW NETWORK USING TV ATSC THAT INCLUDES EMERGENCY ALERTS

A new way to alert the public to emergencies while entertaining them is being introduced to the airwaves, and it uses the current digital television spectrum. Jim Davis, W2JKD, has the details.

--

Ludwig Enterprises Inc., headquartered in Pompano Beach, Florida, is building a network of affiliates for what it's calling a nationwide world radio network with emergency warning ability. The company says it has developed and patented a portable handheld radio that receives signals from the digital television ATSC format and features 50 channels of digital radio programming.

Ludwig says that its main programming will consist of 40 channels of ethnic talk radio such as Filipino, Pakistani, Hebrew, Chinese, Greek and Russian. The remaining 10 channels are English-language channels that include old-time radio shows, news, audio books, educational and religious programs and classical music. It says it is targeting U.S. multicultural, youth and over 55 markets with its content in particular.

But what sets this concept apart from others is it will also be able to provide an emergency alert system as well. According to Ludwig, its radio receives can receive local, regional and national emergency broadcast warnings. Specific national emergency and weather broadcasts can be customized to those localized areas, according to the company.

According to Ludwig Radio, its plan calls for agreements with broadcasters to lease transmit capacity. It says that with minor modifications to the existing transmitter site and no changes in FCC licensing this broadcasting network could allow the company to broadcast non-competing formats over existing broadcast spectrum.

I'm Jim Davis, W2JKD

--

More about the new receiver and the company behind it is on line at www.ludwigent.com. (RW)

**

COMMUNICATIONS POLITICS: W7EQI VOWS TO OVERTURN NET NEUTRALITY ACTION

Representative Greg Walden, W7EQI, the incoming chair of the House Communications Subcommittee, says that the FCC has overstepped its bounds in regard to Net Neutrality. His opinion came in a Tuesday, December 28th in a conference call with reporters about the FCC's 3-2 party line vote to expand and codify network neutrality guidelines.

According to news reports, Walden was joined by Energy & Commerce Committee Chair Fred Upton, Communications Subcommittee Vice Chairman Lee Terry and committee/subcommittee member Marsha Blackburn in pledging to get all the commissioners to Capitol Hill to explain the move. At the same time it was revealed that the legislators would work

to overturn the controversial FCC decision by any legislative means necessary.

Confirming Upton's promise in an interview with Multichannel News, the three legislators vowed a series of hearings on the process, the legal underpinnings and the policy, the last which they characterized as a job-killing, investment killing, congress-bypassing, regulatory overreach. They also said they would look into at least three ways to block implementation of the order, which would be legislation, defunding the FCC appropriation, or a special congressional resolution that would nullify the rules. (Published news reports)

**

NAMES IN THE NEWS: DAVID HUNT APPOINTED FCC INSPECTOR GENERAL

Some names in the news. First up is David Hunt was officially named Federal Communications Commission Inspector General on Monday, January 10th. This after holding the position on an interim basis since June of 2009.

Before entering law school, Hunt ran his own computer firm building software and hardware systems for the healthcare industry. He received a B.A. from George Washington University and a J.D. from Georgetown University.

Hunt joined the FCC in 1996 and served as Senior Attorney in the Enforcement Bureau from 1999 through 2006. Hunt then transferred to the Inspector General's office in 2006 as Assistant Inspector General for Investigations. During his tenure in that position, he received the FCC's prestigious Gold Award. (FCC)

**

NAMES IN THE NEWS: YASME FOUNDATION NAMES EXCELLENCE AWARD WINNERS

The YASME Foundation which has named seven hams from around the globe to be the recipients of its Yasme Excellence Awards. This years list of winners include Ramon Santoyo, XE1KK; Makoto Mori, JE3HHT; Bruce Horn, WA7BNM; Rick Meuthing, KN6KB; Mikael Styrefors, SM2O; Alex Shovkoplyas, VE3NEA and Pepe Ardid, EA5KB.

The Yasme Excellence Awards are presented to individuals who through their own service, creativity, effort and dedication, have made a significant contribution to Amateur Radio. Their contribution may be in recognition of technical, operating or organizational achievement.

The Yasme Excellence Award program is sponsored by the YASME Foundation of Castro Valley California. This is a not-for-profit corporation organized to conduct scientific and educational projects related to Amateur Radio, including DX'ing and the introduction and promotion of Amateur Radio in underdeveloped countries. (Yasme Foundation Release)

NAMES IN THE NEWS: N6R TO CELEBRATE FORMER PRESIDENT REAGAN'S 100th BIRTHDAY

To celebrate what would have been former President Ronald Reagan's 100th Birthday, the Ventura County Amateur Radio Society will activate Special Events Station "N6R" from Thousand Oaks, California. This, from Saturday, February 5th through Monday, February 7th.

According to Peter Heins, N6ZE, who is the clubs Public Information Officer, operation is planned continuously from 0800 through 1800 PST on Sunday, February 06, 2011 and intermittently at other times on Saturday through Monday. Operation will use CW and SSB on 80 through 10 meters for world-wide c contacts as well as FM on both simplex and repeaters for local area contacts.

Requests for schedules may be sent to n6rn6r at aol dot com. QSL with a self addressed stamped envelope to N6ZE at his Callbook or QRZ.com address. Sorry but no electronic QSL's will be accepted for this operation. More is on-line at www dot qrz dot com stroke db stroke n6r.

And for those not aware, the special N6R callsign has been used for many years in a multi-club Field Day operation from the grounds of the Ronald Reagan Presidential Library and Museum which is located in Simi Valley, California. (N6ZE)

EMERGING TECHNOLOGY: MISSISSIPPI JAILS TO EXPAND INMATE CELLPHONE BLOCKING

Mississippi corrections officials say a new inmate phone-block system has worked so well at the Parchman penitentiary they will expand it to other state prisons.

Corrections Commissioner Christopher Epps told The Clarion-Ledger newspaper that the use of the technology has blocked more than 600,000 unauthorized texts and cell-phone calls originating inside Parchman since August.

Last fall, the state Department of Corrections announced it had signed a contract with its telecommunications provider for a program designed to immobilize illegal cell phones used by inmates at the Parchman prison. Epps said the system stops cell transmissions in defined areas from being completed but does permit specifically authorized and 911 emergency calls.

Since 2007, officials said, more than 8,700 cell phones have been confiscated at Mississippi jails and prisons. Epps said those cell phones have been used to plan escapes or to bring contraband into the prisons. He adds that the system will be installed at Central Mississippi Correctional Facility and the South Mississippi Correctional Institution by May. (Clarion-Ledger)

**

EMERGING TECHNOLOGY: ESPN TO LAUNCH ALL 3D TV NETWORK

ESPN will launch the broadcast industry's first 3-D television network. Called ESPN 3-D, the new network will showcase a minimum of 85 live sporting events during its first year, beginning with the FIFA World Cup match on June 11th that will pit South Africa vs. Mexico. Other events to be produced in 3-D include the Summer X Games, college basketball and college football. Additional events will be announced at a later date.

Sean Bratches is ESPN's executive vice president of sales and marketing. He describes the new venture to be a meaningful step to drive adoption of 3-D television sets and at the same time afford opportunities for its affiliates to create value through new product offerings.

According to its press release, ESPN has been testing its 3-D technology for more than two years. Last fall the network produced the USC vs. Ohio State college football game in 3-D. It was shown in select theaters as well as to 6,000 fans at the Galen Center on USC's

campus. (ESPN, B&C)

HAM RADIO IN SPACE: TURKEY TO LAUNCH VOICE HAMSAT IN 2012

Turkey plans to send its first ham radio communications satellite into orbit in September of 2012. This according to a December 28th report published by the semi-official Anatolia news agency.

The report says that the satellite is to be called 3USAT. Also that it is being developed at the Department of Space Engineering of the Istanbul Technical University. The project will be launched by Turkey's satellite communications operator Turksat.

Alim Rustem Aslan heads up the team manufacturing the satellite. He says that it will provide wireless voice transmission over an amateur band between two groups of people at two distant locations, but he did not specify which bands or what modes the new bird will operate on. (W7HTL, Xinhua via COMTEX)

**

HAM RADIO IN SPACE: PROGRAMMER NEEDED FOR SOUTH AFRICAN CUBESAT PROJECT

The planned South African CubeSat project is in need of a volunteer with expertise in the area of programming PIC or 8051 microprocessors. According to Hannes Coetzee, ZS6BZP, this person will be a critical member of the CubeSat team and will be responsible for the development of the onboard controller software. Anyone interested in volunteering for this mission or any other aspect of the satellites development should send a resume by e-mail to saamsat at intekom dot co dot za. (SA AMSAT)

**

HAM HAPPENINGS: COMMEMORATING THE FIRST MOONBOUNCE EXPERIMENT

The Nashua Telegraph newspaper reports on the anniversary of the first Moonbounce transmissions that took place on January 10, 1946. That's when the U.S. Army Signal Corps performed an experiment dubbed Project Diana to see if a radio signals could be sent into space and then received back by on Earth bouncing them off the Moon.

The transmissions took place at Camp Evens, Wall Township New Jersey using an antenna that resembled a pair of bed springs. This experiment has been commemorated on a web page sponsored by the Ocean-Monmouth Amateur Radio Club. You can find it in cyberspace at www.omarc.org/diana1.htm. (OMARC, Southgate)

**

HAM HAPPENINGS: INTERNATIONAL MARCONI DAY DATE CHANGE FOR 2011

A date change for this years International Marconi Day. As the event would have fallen on Easter weekend the organizers have changed the date to Saturday April 30th for this year only. Look for details on International Marconi Day 2011 to be posted on-line at www.gb4imd.uk in the near future. (Southgate)

**

QSL CORNER: ARRL TO INSTITUTE NEW OUTGOING QSL SERVICE RATE STRUCTURE

Effective January 17th, a new pricing arrangement will go into effect for the ARRL Outgoing QSL Service. With the new rate structure, amateurs will no longer need to count outgoing cards and then guess as to what to pay based upon a half-pound rate. Instead a simple weighing of the cards is all that is necessary to determine what amount to send to the Bureau. This new structure also accommodates a small rate increase in response to recent postage, shipping and handling costs. More is on-line at tinyurl.com/4gprmnb (ARRL)

**

DX

In DX, SP2FUD will be on the air portable 3B8/SP2FUD from Mauritius Island between February 8th and the 17th. He will then move on and operate portable 3B9 from Rodrigues Island between February 18th through the 22nd. Activity from both places will be on the HF bands using SSB and RTTY. QSL via his home call sign.

DL9HCU is once again in the Pacific and will be active as 3D2HC from Fiji. He likes 20 meters CW so listen out for him on 14 dot 002 or 14 dot 025 MHz between 0500 to 0800 U-T-C. Also, watch oyut for him on 14.183 MHz after 05:00 UTC as he will sometimes check into the ANZA Net. QSL via DL9HCU, either direct or vuia the bureau

UT5EO will be active as 4L0A from Obcha during the CQ 160-Meter CW Contest slated for January 28th to the 30th. This, as a Single-Operator High Power entry. If you work him please QSL electronically via Logbook of the World.

SM6LRR will be active from Sri Lanka between January 22nd and February 5th as 4S7LRG. His operation will be holiday with a focus on 160, 80 and 40 meters. QSL via his home SM6LRR callsign.

Lastly, N3ME and W3UR will be active from Barbados as 8P9ME and 8P9UR, respectively, between January 26th and February 14th. Their operation will be on all HF bands using CW, SSB, PSK and RTTY. QSL via their home callsigns, direct, by the Bureau or electronically using Logbook of the World.

(Above from various DX News sources)

THAT FINAL ITEM: 10 YEAR OLD DISCOVERS SUPERNOVA

And finally this week, the story of a 10 year old Canadian girl who is being credited as the youngest person ever to discover supernova. Bill Pasternak, WA6ITF, is in the newsroom with her story:

--

Kathryn Aurora Gray, of Fredericton, New Brunswick, Canada, made her discovery this past New Year's Eve. This, after noticing what was later determined to be a magnitude 17 supernova, or exploding star.

The supernova took place in the distant galaxy known as UGC 3378 which is about 240 million light years away from Earth. The Royal Astronomical Society of Canada says that at age 10, Kathryn is definitely the youngest person ever to make such a discovery. A finding which has since been verified by amateur astronomers in Illinois and Arizona. It also has been reported to and confirmed by the International Astronomical Union.

Kathryn's father, Paul Gray, helped her make the discovery by taking the steps to rule out asteroids and checking the list of current known supernovas. Paul Gray is also an amateur astronomer. He says that his daughter expressed an interest in the field last year after learning that a 14 year-old had once discovered a supernova.

Paul Gray gave Kathryn a test run last November using some old files. When she did it on her own on New Years Eve she made her discovery after going through only the fourth of 52 images that had been e-mailed to her father by amateur astronomer Dave Lane of Stillwater Lake, Nova Scotia.

Talk about a little girl with a big future in the world of scientific and astronomy. We say congratulations.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in Los Angeles.

--

The last known supernova in our galaxy occurred several hundred years ago. The new one discovered by Kathryn has been named 2010LT. (Science OnLine)

Why does it require two doctors to work on Roger's teeth?

Oh, I get it.
It takes a Proctologist to remove Roger's head from his arse.
Then it takes a Dentist all day to fill the cavities in his head.

No need for the Proctologist afterward...Roger is quite adept at putting his head back from whence it came.

I wonder about retrofitting these to existing cars - in particular,
where does the screen fit? (how big is it?) There's existing stuff
in the way, like stick shifts, heater/AC controls (you really HAVE
to adjust those if your windows start fogging up) and space for the
driver to see forwards.

> And since this is FEDERAL law,it trumps any and all of your little
> stupid idiotic laws you states passed against having such safety
> devices in your vehicles.

Do you have a cite for an actual state court (I'm not interested
in Canada for the moment), or state police officers, outlawing these
cameras and viewscreen? No, I'm not talking about someone who got
caught watching football or porn on one. I mean one that was there
obviously for the purpose of safety and no other, and nobody disputes
this fact.

> the U.S., they have to commit the crime of installing safety back-up

It's quite obvious to me that the viewscreen that acts like a
rear-view mirror, only it sees parts normally blocked by parts of
the car, *IS* being used for the navigation of the car (around
pedestrians, not over them).

Why would these cameras need to transmit? (except incidentally
that coax leaks signal). Why would the viewscreen need a tuner?

Since you only use this device when you are backing up, I would program the
screen to emerge from the dash in front of the window whenever you put the
car in reverse, and remain retracted at all other times. If it blocked your
front window, who would care?

Its not like them using CB. It IS them using CB and demanding the
citizens stay off the channel.

not only does the murs site state it is cb, so does the fcc on the fcc
website.

the fcc says it is a citizens band frequency

for all citizens no licensce req\uired

and that those frequencies will NOT be assigned to any one individual
or group.

> Kentucky law, e.g., says that a scanning radio can be confiscated IF that
> radio transmits on public service channels. The exception being, a licensed
> amateur radio operator.

definitely. the fcc preemtion sure didnt do that ham any good even
though his radio could not tx or rx on police frequencies and he had
legal help from the arrl and the cops could not reproduce what the
arresting cops claimed even from the same spot. and all the charges
from it except one stuck after it went to court.

the court dropped the "using a radio which can recieve police
transmissions" charge, however the kentucky court ruled that since
police use a walkie talkie that anyone carrying a walkie-talkie IS
illegally impersonating a polce officer and anyonne showing an ares
card is also illegally impersonating a police officer.

and ruled that the fcc has asolutely no authority over local laws
regarding impersonating a police office and that the fcc is oit of
their urisdiction and overstepping their jurisdiction y trying to
preemt local laws regarding whether a person is impersonating a cop or
not.

so that charge and another charge and the fine for for them stayed

even though he was operating completely legally according to fcc
rules. and was not dressed as a police officer.

te kentucky court claimed it is illegally since simply having a two
way radio is "illegally impersonating a police officer" since cops
carry two way radios (even though he was not dressed as a cop and did
not impersonate a cop, and did not transmit on any cop frequencies.
his radio was incapale of it and incapale o eing modifie to do so, and
he was only talking to other hams on it on ham frequencies.

so what good did the fcc preemtion do him? absoluteely nothing.

he got a raw deal. except for one, all the charges from him simply
legally talking to other hams on his ham radio stayed since the FCC
does not have any urisdiction over local laws aout imprtsonating
police officers.

so according to you, a police department can just decide to use the 27
mhz c channel 14 for all their communications and when some traveller
comes along , hears nothing and calls out eaker reaker 14 to his
friend, the police can claim ge interference and arrest him forr
interfereing with them since it is "unintentional interference"
ecause your state law says so even though the FCC says it is open to
ALL citizens of the U.S. and will NOT be assigned to any one
individual o one group?

where does your state get off superceding FEDERAL laws???

your police department wold sure have a field day setting up their
regular police operations on 27 mhz CB channel 19 ans arresting all
the truckers and other highway travelles who decide to transmit on
their "exclusive police frequency"' of CB channel 19 even though the
police werent talking at the time since it is "interfering with them"
to do so since they decided to use CB channel 19 as their main police
channel 24/7.

well, if they can afford it, someone is going to get sued if the FCC
yanks their license for simply possessing a radio which the FCC itself
said is perfectly legal for anyone to have.

when they did not make any illegal transmissions on any frequency at
all

when the cops confiscate it simply because it is capable of
transmitting on the police fequency which is either a ham radio
frequency in most of the nation or a CB frequeency in the entire
nation.

Only for dickheads who stick the monitor to the middle of their windscreen in front of their face thus blocking their vision forward, which would be the direction they most travel in

In Australia is has been law for many many years that you can't put anything on your windscreen that blocks your forward vision, yet Navigation units and reverse cams are all the rage, because you can place them down at dash level and they don't block your vision instead of the middle of the screen so you can show off to others that you have such things and making you look like a complete Dick.......... Much like 'ol Radioguy does every time he makes a posting

Where do you come up with all this CRAP????

There is NO provision in CFR 47 Part 95 SubPart D for ANY local Police
Fire or other Public Safety Outfit to commandeer any authorized
Frequency for their specific use. Therefor your premise is BOGUS from
the get-go.. Any local LEO who tries to enforce, such a contingency,
will find him/her self in a serious confrontation with the local FCC
Office when it becomes know, and the local US Attorney soon there after.
I have known local Podunk Sheriffs, to be locked up in their own jails,
by a US Marshal, for tangling with FCC field Agents, about such
violations of CFR 47.

Sonny, you need to go back and reread CFR 47 Part 95 AGAIN.
the frequency above in NOT a CB (Citizens Band Radio Service) Frequency,
PERIOD. It is a MURS (Multi-Use Radio Service) Frequency, and th two are
totally different Radio Services in CFR 47 Part 95.... Lordy Your an
IDIOT....

"PBK" means nothing.

You should be ashamed of yourself for hijacking an on topic thread
but, hypocrite that you are, you won't get it, ya 'tard.

Oh my God.

There are now two of them.

And they're arguing with each other.

==> + FCC NEWS: ARRL FILES PETITION FOR PARTIAL RECONSIDERATION WITH
FCC REGARDING VANITY, CLUB CALL SIGNS
```

In October 2010, the FCC released a Report and Order, detailing rules changes to the vanity call sign system and call signs for Amateur Radio clubs. These new rules are scheduled to go into effect on February 14. The ARRL found that most changes made by the R&O are "reasonable codifications and clarifications of existing policies." But several amended Sections of Part 97 -- including ¬¬ 97.5 and 97.19 -- are unclear. As such, the ARRL filed a Petition for Partial Reconsideration, urging the FCC to reconsider and modify these portions "in order to reflect the intent of the Report and Order."

In the R&O, the FCC took into consideration some of the ARRL's comments, but not all. The ARRL found it "disappointing" that the

Commission refused to consider in this proceeding "a series of reasonable proposals aimed at increasing the available pools of Group A call signs." The ARRL, in its comments, asked the FCC to consider several changes that could be made "that would increase the number of desirable call signs available for assignment, both sequentially and in the vanity call sign program, and which would provide greater flexibility in the temporary assignment of special-event call signs in the Amateur Service." Read more here <http://www.arrl.org/news/arrl-files-petition-for-partial-reconsideration-with-fcc-regarding-vanity-club-call-signs>.

==> + BPL: IEEE EMC SOCIETY STANDARDS DEVELOPMENT COMMITTEE WITHDRAWS AS COSPONSOR OF IEEE BPL EMC STANDARD

Citing concerns about parts of its technical content, the IEEE EMC Society Standards Development Committee (SDCom) has voted to withdraw as the cosponsor of IEEE Standard for Power Line Communication Equipment -- Electromagnetic Compatibility (EMC) Requirements -- Testing and Measurement Methods (IEEE Standard 1775-2010). According to ARRL Laboratory Manager and BPL guru Ed Hare, W1RFI, this decision came about soon after the IEEE Standards Board approved publication of the standard over the technical concerns of the SDCom. Hare is an SDCom member and is a member of the IEEE Working Group that developed the standard. Read more here <http://www.arrl.org/news/ieee-emc-society-standards-development-committee-withdraws-as-cosponsor-of-ieee-bpl-emc-standard>.

==> + ON THE AIR: LOGBOOK OF THE WORLD NOW SUPPORTS VUCC

ARRL's Logbook of the World (LoTW) -- an online system for amateurs to confirm two-way contacts that can be used for various ARRL awards -- has been upgraded to support awards based on Maidenhead grid squares, such as VUCC and the Fred Fish Memorial Award. To take advantage of the new features, you need to log in to your LoTW account. VUCC is an open-ended award in that hams can work on throughout their lifetime, just like DXCC. But, like the Worked All States award, the VUCC rules require all the contacts to be made from a defined area. For VHF and UHF QSOs on 1296 MHz and below, this distance must be within 200 km. For SHF awards, contacts must be made from a single location, defined as within a 300 meter diameter circle. As such, the VUCC support in LoTW allows you to make the rule -- or rules -- necessary to find the QSLs in LoTW that satisfy the VUCC rules. Don't have an LoTW account? It's easy to sign up. Read more here <http://www.arrl.org/news/logbook-of-the-world-now-supports-vucc>.

==> AMATEUR RADIO IN SPACE: NASA SEEKS AMATEUR RADIO OPERATORS' AID TO LISTEN FOR NANOSATELLITE'S BEACON SIGNAL

On Wednesday, January 19 at 1630 UTC, engineers at Marshall Space Flight Center in Huntsville, Alabama confirmed that the NanoSail-D nanosatellite ejected from Fast Affordable Scientific and Technology Satellite (FASTSAT). According to NASA, the ejection event occurred

spontaneously; the ejection of NanoSail-D also has been confirmed by ground-based satellite tracking assets. NASA is asking radio amateurs to listen on 437.270 MHz for the signal and verify NanoSail-D is operating. Hams should send information to the NanoSail-D dashboard. As of Thursday, January 20, the NanoSail-D dashboard website is reporting that beacon data has been received, but NASA still wants amateurs to track and report the signals. Read more here <http://www.arrl.org/news/nasa-seeks-amateur-radio-operators-aid-to-listen-for-nanosatellite-s-beacon-signal>.

==> + ARRL BOARD OF DIRECTORS TO MEET THIS WEEKEND

The ARRL Board of Directors will hold its 2011 Annual Meeting on January 21-22 in Windsor, Connecticut. Directors, Vice Directors and ARRL Board Officers will be in attendance. The meeting will be preceded on Thursday, January 20 with meetings of the Board's Administration and Finance Committee and Programs and Services Committee.

The Administration and Finance Committee is chaired by Northwestern Division Director Jim Fenstermaker, K9JF. This committee reviews and makes recommendations for all administrative and financial matters of the League. Some of these duties include recommending the annual budget to the Board, making recommendations in regard to staff management and monitoring investment of ARRL funds. "The Administration and Finance Committee is involved in overseeing the 'business side' of Amateur Radio from the standpoint of the ARRL," Fenstermaker explained. "We are committed to ensuring that members' needs are being served while being fiscally prudent. This requires an understanding of the financial structure of the ARRL while, at the same time, working with the administration to implement cost effective and relevant programs. We are in a sound financial position and work to continue this status. Thanks to our headquarters staff for focusing on the trade-offs needed to foster this stability."

The Programs and Services Committee (PSC), headed by Atlantic Division Director Bill Edgar, N3LLR, studies, advises and makes recommendations for all programs and services provided by the League, including operating activities and the Field Organization. "In January, the Committee recommends to the Board who will receive various ARRL awards, such as the International Humanitarian Award and the George Hart Distinguished Public Service Award," Edgar said. "This year, we split the committee into two sub-committees. These two sub-committees are the Radiosport sub-committee and the Field Services sub-committee. The Radiosport sub-committee reviews the ARRL's contesting and awards programs, while the Field Organization sub-committee reviews the ARRL Field Organization, such as public service, education and other similar programs.

Edgar said that the PSC also oversees four advisory committees: the Contest Advisory Committee (CAC <http://www.arrl.org/arrl-staff-vuac-cac>), the DX Advisory Committee (DXAC <http://www.arrl.org/dx-advisory-committee>), the Emergency

Communications Advisory Committee (ECAC
<http://www.arrl.org/files/file/ECAC%20Roster%20for%20Web%282%29.doc>)
and the VHF UHF Advisory Committee (VUAC
<http://www.arrl.org/arrl-staff-vuac-cac>). Each Division Director
appoints a representative from their Division to participate on each
advisory committee. To serve on an advisory committee, the
representative must well-versed and respected in their particular area
of expertise."

The agenda for the 2011 Annual Meeting is available here
<http://www.arrl.org/attachments/view/News/56557>. Per the Articles of
Association <http://www.arrl.org/arrl-articles-of-association> the ARRL
Board of Directors meets twice a year, in January and July.

==> + FOCUS ON YOUTH: ARRL SEEKS NEW YOUTH EDITOR

The ARRL has a proud tradition of promoting youth involvement in
Amateur Radio. One of the ways we involve young people in our hobby is
through our Youth Editor. This person is responsible for writing a
monthly column for the ARRL website about youth and youth activities
within the Amateur Radio Service. We are looking for a new Youth
Editor. Do you know of someone who would be a good fit for this
position? Maybe they hold leadership positions either in their Section
or in their local club. The candidate must be an ARRL member and must
keep their membership current throughout their tenure in the position.
He or she will be required to write a monthly column of at least 1000
words and provide a minimum of three pictures (with captions) for each.
For this, they will receive a small stipend for each column. Read more
here <http://www.arrl.org/news/arrl-seeks-new-youth-editor>.

==> + ARRL FOUNDATION SCHOLARSHIP APPLICATIONS AND TRANSCRIPTS DUE
FEBRUARY 1

Students planning to apply for the more than 60 scholarships
administered by the ARRL Foundation should be aware that the deadline
is fast approaching. All materials -- including transcripts -- are due
February 1. Beginning this year, applicants must submit all material
electronically. No paper forms will be accepted. Read more here
<http://www.arrl.org/news/arrl-foundation-scholarship-applications-and-transc
ripts-due-february-1>.

==> SOLAR UPDATE

Tad "Like a comet pulled from orbit as it passes a Sun
<http://www.youtube.com/watch?v=H5WNeBZ4rBU>" Cook, K7RA, reports: The
average daily sunspot numbers dropped from 50 to 38 on January 6-12 and
now 21.3 on January 13-19. The average weekly solar flux over the same
three periods dropped from 89.5 to 83.8 to 80.4 over this past week.
The latest solar flux prediction shows a value of 82 for January 20-26
and 88 on January 27-30, followed by 87, 85, 85 and 84 on January
31-February 3. Geomagnetic predictions have the planetary A index at 5
over the next couple of weeks, except for a value of 7 on January 22

and February 2-4. Look for more information -- including updated indices, an article on a 3D model of the ionosphere and information on an online propagation prediction program using VOACAP for generating coverage maps and point-to-point MUF data -- on the ARRL website on Friday, January 21. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Stephen Schwartz's For Good <http://www.youtube.com/watch?v=H5WNeBZ4rBU> from the musical Wicked <http://en.wikipedia.org/wiki/Wicked_%28musical%29>.

==> THIS WEEK ON THE RADIO

This week:

- January 21 -- NCCC Sprint Ladder
- January 22-23 -- BARTG RTTY Sprint
- January 22-24 -- ARRL January VHF Sweepstakes <http://www.arrl.org/january-vhf-sweepstakes>
- January 26 -- SKCC Sprint
- January 27 -- NAQCC Straight Key/Bug Sprint

Next week:

- January 28-30 -- CQ 160 Meter Contest (CW)
- January 29-30 -- REF Contest (CW); BA DX Contest (SSB); SPAR Winter Field Day
- January 30-31 -- Classic Exchange (CW)

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- January 28-29 -- ARRL Mississippi State Convention <http://www.msham.org/hamfest.php>, Jackson, Mississippi
- February 5 -- ARRL South Carolina Section Convention <http://www.arrl.org/hamfests/south-carolina-section-convention-1>, North Charleston, South Carolina; ARRL Virginia State Convention <http://www.arrl.org/hamfests/virginia-state-convention-frostfest-2011>, Richmond, Virginia
- February 11-13 -- ARRL Southeastern Division Convention <http://www.arrl.org/hamfests/southeastern-division-convention-orlando-hamcation>, Orlando, Florida
- February 18-19 -- ARRL Arizona State Convention <http://www.arrl.org/hamfests/arizona-state-convention-yuma-hamfest-emergency-preparedness-show>,

Yuma, Arizona
- February 26 -- ARRL Vermont State Convention
<http://www.arrl.org/hamfests/vermont-state-convention-ham-con-1>,
Colchester, Vermont

To find a convention or hamfest near you, click here
<http://www.arrl.org/hamfests>.

Amateur Radio Newsline(tm) Report 1745 - January 212011 Amateur Radio
Newsline report number 1745 with a release date of Friday, January 21,
2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. A writer for Worldradio Online says Morse
code use is on the rise, NASA ask hams to help monitor for NanoSai-D,
one of the Italian 2 meter repeaters interfering with ham radio space
communications goes QRT, Logbook of the World now available to hams who
use the world above 50 MHz and a ham radio legend is about to turn 100.
Find out who on Amateur Radio Newsline T report number 1745 coming your
way right now. (Billboard Cart Here)

RADIO SURVEY: WORLDRADIO COLUMNIST SAYS MORSE USE

UP

The use of Morse code is up. So says a writer for Worldradio Online
Magazine. Amateur Radio Newsline's David Black, KB4KCH, is in our
South-East bureau with the details:

--

In the current no-code era of amateur radio, you
might think no one's using code. But that's not
what an analysis by WorldRadio Online columnist
Randall Noon, KC0CCR, suggests.

The FCC dropped the Morse code testing
requirement back in 2007. Since then, Noon's
research indicates that levels of on-air ham
activity and Morse code usage have increased.

Noon writes about his analysis in February's
issue of WorldRadio Online. He looked at a
combination of FCC licensing statistics and
published results of ARRL Field Day activity from
2005 to 2009. He used Field Day data on the
assumption that Field Day participants are at
least minimally active ham radio operators.

Noon compared statistics for Field Day activity
with the total number of licensees. Noon
determined that both the raw number and the
percentage of licensed hams operating in Field

Day had increased since 2007. In addition, he finds that the number of Morse code contacts in Field Day have increased as well, hitting an all-time peak in 2009. That, he says, is significant, quote "because it is assumed that hams will use the same modes on Field Day that they do when operating at other times."

Since the FCC stopped requiring code tests, Noon concludes it appears that CW has gained in usage--that's because newer hams licensed since 2007 appear to be more actively engaged in the hobby, as the higher levels of Field Day participation suggest.

Noon is no stranger to Morse Code. He's also the magazine's FISTS columnist. FISTS is an organization that promotes the use of Morse code among hams, worldwide.

>From the South-East bureau in Birmingham, Alabama, I'm David Black, KB4KCH, reporting for the Amateur Radio Newsline.

--

Noon's complete analysis appears in the February 2011 issue of WorldRadio Online, which was to be posted on or about January 20 at www.worldradiomagazine.com. The magazine is available to readers on line, at no charge. (WorldRadio)

HAM RADIO IN SPACE: NASA ASKS HAMS TO VERIFY SIGNAL FROM NANOSAIL-D

The National Aeronautics and Space Administration is asking ham radio operators world-wide to help confirm that the NanoSail-D nanosatellite is working.

On Wednesday, January 19th at 11:30 a.m. EST, engineers at Marshall Space Flight Center confirmed that the NanoSail-D nanosatellite had ejected from Fast Affordable Scientific and Technology Satellite. The ejection event occurred spontaneously and was identified when engineers at the center analyzed onboard telemetry. The ejection of NanoSailD has also been confirmed by ground-based satellite tracking.

Amateur radio operators are asked to listen for the signal to verify NanoSail-D is operating. Its beacon signal can be found at 437.270 MHz. This information should be sent to the NanoSail-D dashboard at http://nanosaild.engr.scu.edu/dashboard.htm.

You can read the full NASA press release at http://www.nasa.gov/centers/marshall/news/news/releases/2011 /11-009.html

More on this in future Amateur Radio Newsline reports. (NASA)

**

HAM RADIO IN SPACE: INTERFERING ITALIAN D-STAR REPEATER ON 145.8 MHz SHUTS DOWN

According to a report attributed to the ISS Fan Club website, one of three Italy-based amateur repeaters reported on last week as allegedly operating in the satellite subband of 2 meters has gone off the air. This as the managers of DStar repeater IR3UEF have apparently shut it down of their own accord.

A report on the ISS Fan Club website says that the IR3UEF repeater operated by the Italian Amateur Radio Association and interfering with the ISS downlink on 145.8 MHz is now gone. Also, the Veneto Regional President of the Italian Amateur Radio Association, IZ3CLG, wrote the ISS support group to inform it that he shutdown of the VHF port of the IR3UEF repeater. He also noted that the repeater was only used for local D-Star tests. Also, that was properly authorized to do so by the government. IZ3CLG said that the decision to shut it down was taken solely in the name of cooperation and ham radio spirit.

As most hams are aware, 145.8 MHz is used by the Amateur Radio station on the International Space Station as a primary space to Earth communications channel, especially for educational school contacts. (ISS Fan Club)

**

INTRUDER WATCH: OVER THE HORIZON RADAR ON 7 AND 10 MHZ

The latest issue of the free IARU Monitoring System newsletter reports on Russian radar in 7 MHz. The newsletter says that the Over the Horizon Radar from Russia was active between 7000 and 7200 kHz with burst transmissions on 5 different frequencies on December 30th of 2010. The pulse rate was, as always 66.66 pulses per second. Meantime another Over the Horizon Radar that is based in Cyprus has been destroying communications on the 10 MHz band every afternoon. (IARUMS Region 1)

**

QSLING: ARRL LoTW NOW AVAILABLE TO VHF AND UHF OPERATORS

The ARRL has announced that its very popular Logbook of the World has been upgraded to support awards based on Maidenhead grid squares, such as VUCC and the Fred Fish Memorial Award.

Logbook of the World ins an online system for hams to use to confirm two-way contacts. It can also be utilized that can be used for various ARRL awards. Until now it has been limited to confirming contacts on the high frequency bands. Now members of the ham community who enjoy operation on 50 MHz and above can utilize its services as well.

To take advantage of the new features, you need to log in to your Logbook of the World has account or create one if you are not already as user of the service. After that, just follow the outlined procedures found on the Logbook of the World pages. More information on how to do this is at the ARRL website. Use www.tinyurl.com/5vw4nkd to take you directly there. (ARRL)

**

WASHINGTON HAPPENINGS: PRESIDENT CALLS FOR AGENCY STREAMLINING

The CGC Communicator reports that President Obama has signed an Executive Order instructing government agencies to modify, streamline, expand or repeal regulations that cause unnecessary burdens. As a result, a number of FCC Rules might be eliminated or improved. At this time which ones cannot even be speculated on. More on this latest development out of

Washington is on line at
tinyurl.com/WhiteHouseExecutiveOrder. (CGC)

**

RESCUE RADIO: FCC NOI SEEKS TO UPDATE 911
SERVICE

The FCC is looking at ways of improving 911
emergency response services. This, by allowing
input from text messaging, e-mail, video and
photos from both mobile and landline devices in
addition to traditional voice responses.

According to a Commission release, the agency
considers this an important step to
revolutionize America's 911 services for
consumers and first responders. To accomplish
this goal, it has issued a Notice of Inquiry
titled PS Docket No. 10-255. It seeks public
comment on how Next Generation 911 can enable
the public to obtain emergency assistance by
means of advanced communications technologies
beyond traditional voice devices in use today.
The entire be downloaded and read at

ENFORCEMENT: ICOM ASKS HELP IN STOPPING
COUNTERFEIT IC-V8 HT'S

Icom is out to stop whoever is supplying
counterfeit copies of its popular IC-V8 2 meter
hand-held radio. Amateur Radio Newsline's Norm
Seeley, KI7UP, has the details:

--

Fake transceivers, battery packs and chargers
began being reported in 2010. Icom says that
the difference between a real model IC-V8

handheld and the knock-off phony radios are so small that a blind user might not know they are using a fake radio.

For example, the number 2 key on the real IC-V8 is for the "P Beep" function. On the fake radio number 2 is "VOX". Also, on the back of the real Icom product the serial number tag is black while it is white on the fake radio.

Even accessories are being cloned. The F21 Battery Pack looks like an Icom but there are two differences. The fake does not have the ICOM logo, and carries the Part Number BP208 instead of BP209N as found on the real Icom battery. Lastly, the optional factory remote microphone is designated by Icom as the HM-133 while the counterfeit is HM-133V.
Icom says that a real HM-133V is for other radios in their product line.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

Icom asks that if you find a product that you may suspect is counterfeit, please report it to the company's support center. You can contact Icom at 2380 116th Avenue NE, Bellevue, Washington, 98004 in the United States. Or by phone to area code 425-454-8155.

More about the products mentioned in this story is on-line at the following URL's: IC-V8 Handheld Radio

RADIO LAW: FCC SEEKING MEMBERS FOR CONSUMER ADVISORY COMMITTEE

The Federal Communications Commission is seeking applications for membership on its Consumer Advisory Committee which is now beginning its sixth 2-year term. Since its establishment in November 2000, the Committee has made many

valuable recommendations to the regulatory agency regarding consumer issues within the jurisdiction of the FCC. In addition, the Committee has helped to facilitate the participation of all consumers in proceedings before the Commission. This includes groups like people with disabilities and underserved populations such as Native Americans and persons living in rural areas

Applicants should be recognized authorities in their fields, including, but not limited to, organizations focusing upon consumer advocacy, disabilities, underserved populations, telecommunications infra-structure and equipment, telecommunications services including wireless and broadcast/cable services. Individuals who do not represent an organization, institution, or entity, but who possess expertise valuable to the Committee's work, are also welcome to apply. Such applicants should be aware, however, that government ethics rules may require financial and other disclosures.

Committee members, all of whom are volunteers, must be willing to commit to a two-year term of service, should be willing and able to attend 3 one-day meetings a year in Washington, D.C., and are also expected to participate in deliberations of at least one working group or subcommittee. Working groups meet via email or teleconference, and all meetings are accessible to people with disabilities.

The application deadline is February 11th. Full details on the Committee and how to apply for membership can be found on-line in Adobe file PDF format at tinyurl.com/4vx38d5. (FCC)

**

RADIO LAW: CALIFORNIA ANNOUNCES NEW WIRELESS DRIVING FINES

The cost of getting caught using a non hands free cellphone or texting while driving in California has gone up. As of the first of the year a first offense of driving while using a wireless phone not hands free will cost you $148 while each subsequent violation will tap your wallet at $256. Driving while wearing headphones

or earplugs that cover both ears is now a $178 offense as is placing anything that is considered as unlawful material on vehicle windows. Last, but most important, a first offense while driving while using a wireless device to send, read or write text will cost you $148 as a first offense, and while not stated in the article detailing the new level of fines, it appears as if it will be up to the court to determine the penalty for subsequent infractions of the states driving while texting rules. And less we forget, these amounts are base fees that do not include court costs and other fees that can add hundreds of dollars to the final amount you pay the court. (Published news reports)

**

NEW WAVE COMMMS: LISTENER DRIVEN RADIO ADDS NEW FEATURES

Listener Driven Radio, an interactive audio software platform for broadcasters, is adding of several new features. The company's SMS text messaging capabilities now make it possible for listeners to sign up for a text message to their mobile device when their favorite songs play. Listeners can also receive alerts via e-mail, AOL Instant Messenger, Yahoo Messenger, MSN Messenger, Jabber and Google Talk.

For those not aware, Listener Driven Radio is a new model for radio, shifting stations from broadcasts to what it calls crowdcasts. That's where listeners vote, and a stations programming is affected in real-time. More is online at www.ldrradio.com (Radio OnLine)

**

PUBLIC SERVICE: HAMS NEEDED FOR BOSTON MARATHON COMMUNICATIONS

Ham radio volunteer registration for the 2011 Boston Marathon is now open. The Marathon will be held on Monday April 18th with radio operators are needed to provide safety communications
and to assist the Red Cross. Assignments are available in Hopkinton, along the route, and in downtown Boston. To volunteer, go to marc.mmra.org and follow the instructions found

at the website. (K1IW)

**

THE SOCIAL SCENE: A LOUISIANA FAIS DO DO TO HAM RADIO

Turning to the ham radio social scene we begin with this event in Cajun country. Heres Don Wilbanks, AE5DW, with the details:

--

The Acadiana Amateur Radio Association will hold its 51st Annual Hamfest in Rayne, Louisiana. Among the features of this very Southern event will be the annual Crawfish Boil with the popular Fais-Do-Do and other dancing. For those of you who have never heard the term a Fais-Do-Do is a name for a Cajun dance party that originated just prior to World War 2. Basically, heres your little Cajun French lesson for the day.

Do-Do is basically sleep. You tell your kids to go nightnight or Do-Do and Fais is a negative in Cajun French, so Fais-Do-Do literally means that you don't sleep and dance all night.

The Hamfest will be open to the general public and ham community at 5:00 p.m. until 8:00 p.m on Friday, March 11th and again from 8:00 a.m. until 2:00 p.m. on Saturday, March 12th. All times given are Central Standard in the United States. For more information on this year's event please take your web browser to www dot w5ddl dot org stroke hamfest and keep an eye open for the latest updates.

Oh, you have a good time!!

Reporting from Cajun country, I'm Don Wilbanks,

AE5DW, for the Amateur Radio Newsline,

--

And now you see why we gave this one to Don.

(NA5Q)

**

HAM HAPPENINGS: 2011 DAYTON DX DINNER - MAY 20

Meantime, a couple hundred miles to the North, the SouthWest Ohio DX Association will again sponsor the DX Dinner to be held in conjunction with the 2011 Dayton Hamvention. The dinner will be held on Friday, May 20th, at the Dayton Marriott, which is located at 1414 S. Patterson Blvd. in downtown Dayton. As in the past, there will be some major door prizes along with the naming of the DXpedition of the Year. Reservation information, program details and a list of the prizes will be available soon at www.swodxa.org. (SWODXA)

**

NAMES IN THE NEWS: G4FSU NAMED IARU TECHNICAL CONSULTANT

Some names in the news. International Amateur Radio Union President Tim Ellam, VE6SH has appointed Ian Greenshields, G4FSU, as an IARU Technical Consultant. In this role, Greenshields can be called upon to represent the IARU at various regulatory meetings such as ITU meetings and to promote IARU objectives at those meetings. Greenshields joins Peter Chadwick, G3RZP, in this role, allowing an IARU presence where there are parallel meetings. (IARU)

**

NAMES IN THE NEWS: VA3DM NAMED RAC SPECIAL ADVISOR

Doug Mein, VA3DM, has been appointed as a Special Advisor to the Radio Amateurs of Canada Field Organization. Mein has an extensive background and is retired from Transport Canada after 33 years of service. During the September 11th 2001 terrorist attacks on the United States, Mein was Director of Transport Canada's Air Navigation Services and Airspace Branch in Ottawa. In this position, he played a key role in coordinating department operations and taking decisive action on behalf of the Canadian Government. In addition, he was the chief architect behind the creation of NAV Canada. (RAC)

**

NAMES IN THE NEWS: DJ9KR PUBLISHES 40 METER BROADCAST INTRUDER LIST

And Ulrich Bihlmayer, DJ9KR, of Tuebingen, Germany, has published a list of broadcast stations still operating in the 7.0 to 7.2MHz amateur service radio band. The list can be downloaded from in Adobe PDF format at tinyurl.com/4c8ootr. The latest version was published on January 11th. Using it as a handy reference you should be able to determine what station might be interfering with a QSO and where that station is located. (IARU)

**

HAM TECHNOLOGY: GLOBAL TUNES REACHES 55 RECEIVERS WORLD WIDE

You can now access 55 receivers world wide on the Global Tuners dot com website. Receivers on-line operate a variety of modes including the AM and FM broadcast bands, the shortwave spectrum, HF and UHF bands in various modes.

Countries currently on-line include the USA, Australia , Finland, France, Germany , Greece , Italy , Hong Kong , the Netherlands, the Slovak Republic, Sweden and the United Kingdom to mention only a few. So far there are 33,777 registered members and you will have to sign up for an account if you wish to control a receiver.

For more information take your web browser to www.globaltuners.com and global tuners is spelled as one word. (Global Tuners)

HAM RADIO IN SPACE: ARISSat-1 UPDATE

The ARISSat-1 amateur radio experimental satellite is now in Kazikstan. The NASA Phase 3

Safety Review for ARISSat was scheduled for last Thursday January 20th with the Russian Progress 41P launch carrying ARISSat-1 scheduled for liftoff late this month. Release of the ARISSat-1 satellite is scheduled for the end of February from the International Space Station.

Meantime, the Russian Soyuz manufacturer RSC Energia is also calling the ARISSat-1 satellite KEDR. This is in honor of Cosmonaut Yuri Gagarin's callsign and also in celebration during the 50th anniversary of the first manned space flight that took place on April 12th, 1961.

R-S-C Energia has information and photographs about the satellite at its news site. Sergey Samburov, RV3DR is shown in the photos with the satellite. The URL to see them is tinyurl.com/46altbf (WA4SXM)

HAM RADIO IN SPACE: RUSSIA TO RESUME SPACE TOURIST FLIGHTS IN 2013

Listen out for space tourists to once again operating onorbit from the International Space Station sometime in or after 2013. This after Russia announces that it will start selling multimillion-dollar tourist tickets to the International Space Station after a four-year hiatus.

Virginia-based Space Adventures has had no seats to sell for the zero-gravity voyage since billionaire Cirque du Soleil founder Guy Laliberte flew to the orbiting outpost back in October 2009. But according to recent news reports, beginning in 2013 it will again offer three 10 day trips per year to the space station aboard Russian Soyuz spacecraft. This, thanks to a deal between itself, the Russian space agency Roskosmos and Soyuz manufacturer R-S-C Energia.

Russia has again found room for paying private customers aboard the cramped three-seat Soyuz due to plans to increase annual production of the single-use craft from four to five in 2013. The Soyuz is carried to orbit by Russian rockets that are launched from the Bikenour Cosmodrome in Kazikstan. (Space Now)

WORLDBEAT: NEW LOOK FOR THE UK REPEATER WEBSITE

If you are planning a trip to Great Britain and will be taking a VHF or UHF radio with you, listen up. The United Kingdom repeater website been given a new look for the New Year, making it easier to find information. There are improved search facilities with separate database and document searching. The document search gives a more effective search of previous committee minutes and other reference material, while the database search allows for searching various repeater data fields for example keeper callsign, frequency, channel and mode. The site lists all United Kingdom FM, D-Star and ATV repeaters. Also, a new RSS news feed and Twitter posting are now available. See www.ukrepeater.net for more. (Southgate)

DX

In DX, word that OM5AM is active as D2AM from Luanda, Angola through March 17th. Operation is mainly 20 meters SSB with some RTTY. QSL via his home callsign, direct or by the Bureau.

BX5AA will be active from Taiwan during the CQ World Wide WPX SSB Contest on March 26th and 27th. If you work him QSL via BX5AA.

VK4FEAT is now active from the Solomon Islands as H44DX.
His length of stay on the island was not provided but his operation so far has been on 40, 20 and 10 meter SSB. QSL via VK4FEAT and not

via OH2BN as listed on QRZ dot com. And yes, that callsign to QSL to is VK4FEAT.

RD3AF to be active as EF8M from the Canary Islands during the CQ 160-Meter CW Contest rom January 28th to the 30th. This as a Single-Operator, all band high power entry. QSL via UA3DX.

And look for C31CT will be active from Andorra during the CQWW 160m SSB Contest from February 25th to the 27th as a single operator entry. QSL this one via EA3QS.

Lastly, UR9IDX is once again active as 8Q7VR from Naifaru Island in the Maldives. The length of his stay not known at this time but so far he's been heard on 80 and 12 meters CW. QSL via UR9IDX only direct.

(Above from various DX news sources)

THAT FINAL ITEM: QCWA ASKS HAM COMMUNITY TO HELP CELEBRATE THE 100TH BIRTHDAY OF WORLDRADIO FOUNDER W0GFQ

And finally this week, the founder of World Radio Labs, Leo I. Meyerson, W0GFQ, is about to celebrate his 100th birthday. And in his honor QCWA Chapter 154 in Palm Springs, California is holding a special celebration of this event. Bill Pasternak, WA6ITF, is in the Newsroom with more:

--

For those that are new to the hobby or simply do not remember Leo Meyerson, W0GFQ, owned and operated World Radio Laboratories in Council Bluffs, Iowa from the 1940's through the 1970's. During that period of time he also founded Globe Electronics and later on Galexy Electronics. Both companies manufactured gear used by ham radio operators around the world.

The Globe logo first appeared on the 1948 model Globe Champion transmitter. These early units produced 150 watts input on phone or CW with coverage from 160 to 10 meters.

Perhaps his most successful product was the Globe Scout 680 transmitter series that operated

on 80 through 6 meters. These gave many a new General or Technician his or her first taste of A-M phone operation at an affordable entry level price. For his many contributions to ham radio Leo Meyerson, W0GFQ, was named 1997 Radio Amateur of the Year by the Dayton Amateur Radio Association.

Now, to commemorate Leo Meyerson's personal centenary, the Quarter Century Wireless Association is requesting that hams world wide take a QSL card, write 'Happy 100th Birthday Leo' on it and send it to him. His direct mail address is Leo Meyerson, W0GFQ, 19 Park Lane, Rancho Mirage, California, 92270. We plan to send ours, right away.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

Bob Roske, N0UF, is the National President of the Quarter Century Wireless Association. He says that he hopes that
Leo gets hundreds or maybe even thousands of birthday cards. This, to help make this a very special day for a ham that has devoted so much of his life to our hobby. (QCWA)

<Sonny, you need to go back and reread CFR 47 Part 95 AGAIN.
<the frequency above in NOT a CB (Citizens Band Radio Service)
Frequency,
<PERIOD. It is a MURS (Multi-Use Radio Service) Frequency, and th two
are
<totally different Radio Services in CFR 47 Part 95.... Lordy Your an
<IDIOT

"4. Is MURS "VHF CB"?

Yes. MURS is the only "VHF Citizens Band" in the United States
available for general two-way voice and data communications.

MURS is one of five Citizens Band Radio Services. (See 95.401.) The
others are the (original) Citizens Band Radio Service at 27 MHz, the
Low Power Radio Service (LPRS) at 216-217 MHz, the Medical Implant
Communications Service (MICS), the Family Radio Service (FRS) at 460
MHz, and the Wireless Medical Telemetry Service (WMTS).

The General Mobile Radio Service (GMRS) at 460 MHz is sometimes (if
incorrectly) described as "the old UHF CB." That description has no
legal or historical basis in fact. GMRS is the former Class A of the
Citizens Radio Service, but was never "Citizens Band" as such.

LPRS, though legally a form of CB, allows only certain limited uses
including theft tracking, auditory and health care assistance devices
and control stations in automated maritime radio networks. No two-way
voice communications are permitted in LPRS.

MICS and WMTS, though also legally a form of CB, allow only certain
limited medical telemetry transmissions, usually in a hospital or
health-care setting.

The FCC is currently considering an additional CB service. "Personal
Locator Beacons" (PLBs) would be alerting devices that persons would
be able to use in remote areas to summon assistance in emergencies.

MURS, CB, GMRS, FRS, WMTS and LPRS are all members of the Personal Radio Services as designated by the FCC. The Personal Radio Services should not be confused with the Personal Communications Services (PCS) in the 900 and 1900 MHz bands."

I wonder if Todd went into a seizure when the police Chief questioned
him...maybe you can explain to us what that is like, Roger.

153. Local cops arrested me for using my radio

Newsgroup: rec.radio.amateur.policy
Date: 2011-01-24 09:48:51 UTC
From: radioguy <spammer@anon>
Message-ID: <4dg7g6.kuf.17.1@news.alt.net>
Source record: 244474
Cross-posted to: rec.radio.amateur.policy,rec.radio.cb

Last week I was walking my three-legged dog through my neighborhood and was walking slowly so that my dog could take his time.
I had a hand held walkie talkie with me that I was using to keep in contact with my wife.
One of the HOA women saw me using the small walkie-talkie and determined that I was in violation of my HOA deed restrictions.
So she called the police.
The police showed up and made me stand against their squad car while they searched me...then they confiscated my MURS walkie-talkie.
I told the officers (there were two squad cars there, with two officers in each) that the radio is perfectly legal.
Well, that almost got me free, until the president of the HOA showed up and swore out a warrant for my arrest.
She told the police that using two way radios in my neighborhood was a direct violation of our deed restrictions.
I had to give my radio to the cops and was cuffed. They called the animal shelter to come get my dog, too.
I was taken to jail and had to stay there for four hours. I got to make one phone call to have my daughter, who lives 60 miles away, come post my bond.
Then I had to go to the shelter to get my dog. That cost me $120 for several fees, including one that they charged me for spaying my dog while she was in their custody. And they gave her a rabies shot, too. They told me that the HOA would not allow me to take my dog home if she was not spayed and licensed.
The police told me the next day that they would not return my radio since the HOA did not allow it. They said that they would give the radio to a family member, provided that the family member would sign an affidavit that they would not return the radio to me. Then the police told me that to get the radio handed to a family member that they would have to pay a sixty dollar fee for the paperwork.
And get this! The police said that they would release my MURS radio only after a local Judge signed a Release Order.

And all of this because of a cheap Walmart radio that would not transmit more than a few blocks at best.
And now I have a police record because of this.

I'll probably lose my job because of this. And I might even lose my house, too. I'm already two payments behind, and this arrest and job loss could be the straw that breaks my financial back. So who is going to pay for my kids' education if I can't? And my wife is a mental wreck because of this. She is still shocked at seeing me placed against the trunk of a police car, being handcuffed and being treated like a common criminal.

And I hear that the HOA is now wanting to ban the use of cell phones when we are outside. Even in our own yards.

161. Legislative Update (was Re: LB719 Hearing (was Re: Flashing Light Bill Amendment Introduced (Nebraska)))

Newsgroup: rec.radio.amateur.policy
Date: 2011-01-24 21:51:23 UTC
From: ARRL Members Only Web site <memberlist@www.arrl.org>
Message-ID: <20110124205811.A3B9720891@bmail.arrl.org>
Source record: 244482
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.policy,rec.radio.info

This is an update on the legislative initiatives I undertook.
First, the Amber Light bill was introduced by Sen. Price, KC5AYS. It
is LB573. I posted the bill on my website. You can download it from:

http://www.ctwsoft.com/arrlne/LB573.pdf

As I wrote earlier, it would allow Storm Spotters to use Flashing Amber
lights if they are within 500 feet of their designated spotting point
and if they are carrying an appropriate ID issued by NEMA or their
county emergency management. The Bill also charges NEMA with coming up
with standards for ID badges and certification. By having a standard
format, ID badges will be recognizable by law enforcement anywhere in
the state. The 500 foot restriction and the availability of a standard
ID answers the questions that prevented similar legislation from being
voted into law last year.

I will let you know when hearings are scheduled.

Second, the malicious interference bill was not introduced due to a
snafu. It ends up that this was probably good. The ARRL has worked
hard to make sure that there is only Federal regulation of amateur
radio. Even though the bill proposed was very restrictive in that the
law could only be invoked during an emergency declared by a government
official, the feeling was that it might cause unintended consequences
in terms of regulation.

The basic problem of protecting communications during emergency
conditions remains. I spoke with Dan Henderson, N1ND, ARRL Regulatory
Information Manager, and Cliff Ahrens, KØCA, Midwest Division
Director. They believe that we can find a solution through the Federal
government. I will be working with Cliff, ARRL HQ, and appropriate
Federal agencies to identify the specific means to obtain
near-real-time support in case malicious interference occurs during an
emergency.

I know that this topic is important to many of you and that you might
be disappointed. The positive feedback and words of encouragement are
very much appreciated. I did receive an email from Bill Jackson, K9RZ,
registering the same concern that the ARRL had. Thanks to all who took
time to comment.

Malicious interference during an emergency can endanger life and
property. My commitment is to resolve this issue.

73, Art KØAIZ

ARRL Nebraska Section
Section Manager: Arthur I Zygielbaum, K0AIZ

FAKE.

but howdidyou know I had a three-leggd dog?
...

My one legged wife and I dearly love our three-legged dog.
My wife often takes the dog for a walk around our neighborhood, but just recently was told by the HOA that three legged dogs were not allowed in our subdivision and that such dogs could be confiscated by the Humane Society if we refuse to abide by their rules.
She said that there is a current deed restriction that does not allow dogs with less than four legs in our area. I am going to be forced to hire an attorney to contest this restriction.
The HOA said that we must keep the dog inside a fenced area in our back yard and further, that the deed restrictions do not allow us to bring the dog in the house unless it is raining heavily or the outside temperatures fall to 32 degree Farenheit or less.
We were also told that our dog must be spayed, must be groomed monthly and that we must show the HOA a receipt each month from the groomer.
And to make things worse, the Nazi HOA told my wife that she is not allowed to use her cell phone while walking the dog. That is part of the deed restrictions that ban the use of any kinds of two way radios outside of our home. And cell phones ARE two way radios.
They went so far as to tell my wife that she is not allowed to use a cane or a crutch either, since both can be used as a weapon. She IS allowed to use a wheelchair, but the HOA mandates that all wheelchairs must be registered with the HOA along with a Doctor's note as to why the chair is necessary.
Our HOA issues an eight by ten inch tag for the wheelchair...a tag that must be displayed on the frontal area of the wheelchair and which must be lighted at night.

Just two weeks ago one of the homeowners called 911 because the lights on my wife's wheelchair tag had gone dim...bad battery.
The police showed up and gave my wife a warning ticket for the improper display of a registration tag. They followed her home and made her install new batteries in the license plate frame while they watched.
Then, while our three-legged dog was barking at them from inside our living room, the cops threatened to write her a citation for having the dog inside when it was not raining or freezing. She was forced to put the dog outside until they left. They said that if they had to come back that they would confiscate the dog and issue her a $200 citation that would be tacked on to our next house payment.
And the cops did a background check on me, too. They saw that I have a CB license, so they walked around the outside of my house to look for hidden antennas and coaxial cables. They found none and left.

This is how government works. This is how HOA groups work.

No of course you're not a troll. You're just an ignorant fool.
But the post was typical of all the bullshit you've posted.
Repeatedly.

Well, good buddy, you tell that to the cops who were going to take my dog
and give my wife a $200 fine.
She can't even go outside without having a light on her wheelchair tag.
Now she is afraid to go out at night, so she now stares out the window
instead. She is even afraid to use her cell phone when she is in the back
yard.
Next thing we hear is that the HOA is going to ban cordless phones in our
homes because those are two way radios, too.
The HOA says that we have to get permits for them and have to give them the
serial numbers.
The HOA reserves the right to come in and inspect them too, but they did say
that they would only do this while we were at home.

==> BOARD OF DIRECTORS: ARRL BOARD HOLDS 2011 ANNUAL MEETING

The ARRL Board of Directors held its 2011 Annual Meeting January
21-22 in Windsor, Connecticut. At the meeting, the Board set its new
legislative objectives for the 112th Congress, re-elected the ARRL
Executive Committee, bestowed various technical and service awards,
approved the organization's financial plan for 2011, set timelines for
the ongoing consideration of digital periodicals and more. A detailed
look at all the Board's actions, including the official minutes from
the meeting, will be forthcoming.

==> BOARD OF DIRECTORS: ARRL HUDSON DIVISION DIRECTOR FRANK FALLON,
N2FF, RETIRES FROM ARRL BOARD OF DIRECTORS
```

After more than 14 years as the ARRL Hudson Division Director, Frank Fallon, N2FF, announced his retirement from the Board at the conclusion of the 2011 Annual Meeting of the ARRL Board of Directors. Per the ARRL's Articles of Association, Hudson Division Vice Director Joyce Birmingham, KA2ANF, immediately moved up to the Director position to fill the remainder of Fallon's unexpired three year term, which runs through December 2012. In the coming days, ARRL President Kay Craigie, N3KN, will appoint a new Vice Director to fill Birmingham's unexpired three year term, also running through December 2012. Read more here <http://www.arrl.org/news/arrl-hudson-division-director-frank-fallon-n2ff-retires-from-arrl-board-of-directors>.

==> ARRL RECOGNIZES: ARRL BOARD BESTOWS AWARDS AT 2011 ANNUAL MEETING

The ARRL Board of Directors had the pleasure and distinction of bestowing three annual awards at its 2011 Annual Meeting -- the ARRL International Humanitarian Award, the George Hart Distinguished Service Award and the Bill Leonard, W2SKE, Professional Media Award. Read more here <http://www.arrl.org/news/arrl-board-bestows-awards-at-2011-annual-meeting>.

==> AMATEUR RADIO IN SPACE: NASA'S NANOSATELLITE HEARD BY HAMS

When a NASA nanosatellite -- NanoSail-D <http://www.nasa.gov/mission_pages/smallsats/nanosaild.html> -- ejected unexpectedly on January 17 from the Fast Affordable Scientific and Technology Satellite (FASTSAT <http://www.nasa.gov/mission_pages/smallsats/fastsat/10-156.html>), the agency called upon Amateur Radio operators to help track it. NASA asked radio amateurs to listen <http://www.arrl.org/news/nasa-seeks-amateur-radio-operators-aid-to-listen-for-nanosatellite-s-beacon-signal> on 437.270 MHz for the signal and verify that NanoSail-D was operating. NASA received almost 470 telemetry packets from 11 countries.

The NanoSail-D beacon sent an AX.25 packet every 10 seconds; the packet contained data about the spacecraft's systems operation. Listen here <http://nanosaild.engr.scu.edu/nanosaild2_pa3guo_20jan2011.mp3> for a recording of the nanosatellite's beacon, made by Hank Hamoen, PA3GUO, on January 21.

Once the NanoSail-D team received confirmation that the nanosatellite did indeed ejcect, NanoSail-D principal investigator Dean Alhorn quickly enlisted Alan Sieg, WB5RMG, and Stan Sims, N4PMF, to try to pick up NanoSail-D's radio beacon. Both hams work at the Marshall Space Flight Center in Huntsville, Alabama.

"The timing could not have been better," Sieg said. "NanoSail-D was going to track right over Huntsville, and the chance to be the first ones to hear and decode the signal was irresistible." Right before 2300 UTC on January 17, they heard a faint signal. As the spacecraft soared overhead, the signal grew stronger and the operators were able to decode the first packet: NanoSail-D was alive and well. "You could have

scraped Dean off the ceiling. He was bouncing around like a new father," Sieg recalled.

<http://www.youtube.com/watch?v=s1vZfm500hE> According to NASA, the nanosatellite was last heard at 1354 UTC on January 21. Telemetry indicates that the sail deployed on schedule and the satellite is now believed to be out of power, which NASA said was to be expected. NASA is now asking for visual tracking and sighting reports of NanoSail-D, which is about 650 km above the Earth. According to the agency, when the nanosatellite's sail reflects off the Sun, it could be up to 10 times as bright as the planet Venus -- especially later in the mission when the sail descends to lower orbits. You can track NanoSail-D on the web <http://spaceweather.com/flybys/> or on your smart phone <http://simpleflybys.com/>. NASA estimates that NanoSail-D will remain in low Earth orbit (LEO) between 70 and 120 days, depending on atmospheric conditions.

==> AMATEUR RADIO IN THE CLASSROOM: ARRL TEACHERS INSTITUTE NOW ACCEPTING APPLICATIONS FOR 2011 SESSIONS

The ARRL Education Services Department has announced the 2011 schedule for the Teachers Institute on Wireless Technology (TI) workshop. Offered through the ARRL's Education & Technology Program, the Teachers Institute is a four-day, expenses paid, in-residence learning opportunity designed for motivated teachers and other school staff who want to learn more about wireless technology and bring that knowledge to their students. A variety of topics are covered during the TI, including basic wireless technology literacy, electronics, the science of radio, radio astronomy, how to bring space into the classroom, ham radio operation, introduction to microcontrollers and basic robotics. While participants do not need to have an Amateur Radio license to attend the basic TI sessions, one is required for the advanced (TI-2) session. Read more here <http://www.arrl.org/news/arrl-teachers-institute-now-accepting-applications-for-2011-sessions>.

==> LEGISLATIVE MATTERS: ARRL LEGISLATIVE NEWSLETTER TO BE LAUNCHED

The inaugural issue of the ARRL Legislative Update -- an HTML newsletter focusing on the ARRL's legislative and advocacy efforts at the national level -- will launch the week of January 31. According to ARRL Regulatory Information Manager Dan Henderson, N1ND, this is not a monthly newsletter, but rather a timely newsletter with the goal to convey important information to the ARRL family. "The legislative process is a fickle thing, Henderson said. "Sometimes it moves as slow as molasses in a New England winter, while at other points, time is of the essence. Developing a newsletter designed to be e-mailed to interested ARRL members is a good way to provide important news and calls for action expediently." The ARRL Legislative Update is an "opt-in" newsletter available to ARRL members. To receive it, go to your Member Profile on the ARRL website <http://www.arrl.org/Users/edit> and select the tab for "Edit Email

Subscriptions." To receive the ARRL Legislative Update, simply check the appropriate box on that page then click "Save" at the bottom. To unsubscribe, follow the same process, but uncheck the box for this newsletter.

==> FOCUS ON YOUTH: ARRL SEEKS NEW YOUTH EDITOR

The ARRL has a proud tradition of promoting youth involvement in Amateur Radio. One of the ways we involve young people in our hobby is through our Youth Editor. This person is responsible for writing a monthly column for the ARRL website about youth and youth activities within the Amateur Radio Service. We are looking for a new Youth Editor. Do you know of someone who would be a good fit for this position? Maybe they hold leadership positions either in their Section or in their local club. The candidate must be an ARRL member and must keep their membership current throughout their tenure in the position. He or she will be required to write a monthly column of at least 1000 words and provide a minimum of three pictures (with captions) for each. For this, they will receive a small stipend for each column. Read more here <http://www.arrl.org/news/arrl-seeks-new-youth-editor>.

==> ARRL FOUNDATION SCHOLARSHIP APPLICATIONS AND TRANSCRIPTS DUE FEBRUARY 1

Students planning to apply for the more than 60 scholarships administered by the ARRL Foundation should be aware that the deadline is fast approaching. All materials -- including transcripts -- are due February 1. Beginning this year, applicants must submit all material electronically. No paper forms will be accepted. Read more here <http://www.arrl.org/news/arrl-foundation-scholarship-applications-and-transcripts-due-february-1>.

==> SOLAR UPDATE

Tad "Like a comet pulled from orbit as it passes a Sun <http://www.youtube.com/watch?v=H5WNeBZ4rBU>" Cook, K7RA, reports: The average daily sunspot numbers were up for the past week (ending January 26) by more than 11 points to 32.6, compared to the previous week. The average daily solar flux rose more than 3 points to 83.5. The planetary A index average was down 2 points to 2.9, and mid-latitude A index was down 1.5 points to 2.4. The latest prediction from NOAA/USAF shows lower solar activity with solar flux for January 27-28 at 79 and 78, then 76 for January 29 through February 2, 78 on February 3-4 and 80 on February 5-6. They show planetary A index at 5 on January 27-February 2, then 10 on February 3-4 and 7 on February 5. Geophysical Institute Prague sees quiet conditions January 28 through February 1, quiet to unsettled February 2 and unsettled February 3. Look for more information on the ARRL website on Friday, January 28. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Stephen Schwartz's For Good

<http://www.youtube.com/watch?v=H5WNeBZ4rBU> from the musical Wicked
<http://en.wikipedia.org/wiki/Wicked_%28musical%29>.

==> THIS WEEK ON THE RADIO

This week:

- January 28-30 -- CQ 160 Meter Contest (CW)
- January 29-30 -- REF Contest (CW); BA DX Contest (SSB); SPAR Winter
Field Day
- January 30-31 -- Classic Exchange (CW)

Next week:

- February 4 -- NCCC Sprint Ladder
- February 5 -- Minnesota QSO Party; FYBO Winter QRP Sprint; AGCW
Straight Key Party
- February 5-6 -- Delaware QSO Party; 10-10 International Winter
Contest (SSB); British Columbia QSO Party; Mexico RTTY International
Contest; YL-ISSB QSO Party (CW); EPC WW DX Contest
- February 5-7 -- Vermont QSO Party
- February 6 -- North American Sprint (CW)
- February 8 -- ARS Spartan Sprint
- February 9 -- NAQCC Straight Key/Bug Sprint
- February 9-10 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
info. Looking for a Special Event station? Be sure to check out the
ARRL Special Event Stations Web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- January 28-29 -- ARRL Mississippi State Convention
<http://www.msham.org/hamfest.php>, Jackson, Mississippi
- February 5 -- ARRL South Carolina Section Convention
<http://www.arrl.org/hamfests/south-carolina-section-convention-1>,
North Charleston, South Carolina; ARRL Virginia State Convention
<http://www.arrl.org/hamfests/virginia-state-convention-frostfest-2011>,
Richmond, Virginia
- February 11-13 -- ARRL Southeastern Division Convention
<http://www.arrl.org/hamfests/southeastern-division-convention-orlando-hamcat
ion>,
Orlando, Florida
- February 18-19 -- ARRL Arizona State Convention
<http://www.arrl.org/hamfests/arizona-state-convention-yuma-hamfest-emergency
-preparedness-show>,
Yuma, Arizona
- February 26 -- ARRL Vermont State Convention
<http://www.arrl.org/hamfests/vermont-state-convention-ham-con-1>,

Colchester, Vermont

To find a convention or hamfest near you, click here
<http://www.arrl.org/hamfests>.

Amateur Radio Newsline(tm) Report 1746 - January 28 2011

Amateur Radio Newsline report number 1746 with a release date of
Friday, January 28, 2011 to follow in 5-4-3-2-1.

The following is a QST. A Georgia ham radio group receives praise for
its rescue radio work during a snowstorm, an amateur radio emergency
response unit in Alaska looses its communications trailer to Mother
Nature, Brazil's military praises ham radio for its response to a flood
and mudslide disaster, a new bill is introduce in the Senate to create
an inter-operable firstr response broadband network and is the future
of ham radio in brainwave station control. Find out the details on
Amateur Radio Newsline(tm) report number 1746 coming your way right
now.

RESCUE RADIO: GEORGIA ARES GROUP PRAISED FOR STORM RESPONSE

A quick response by hams in Georgia during a recent snowstorm has
brought words of praise from civic leaders. Amateur Radio Newsline's
Norm Seeley, KI7UP, is here with the details:

--

Local emergency workers in Cherockee County Georgia who received a
major assist from a group of volunteer ham radio operators during the
snowstorm that covered the region are singing their praises of the
radio amateurs in the area. The group receiving the accolades is the
Cherokee Amateur Radio Emergency Service. This is a 40 member SKYWARN
organization made up of volunteers who share severe weather and
emergency information with the Cherokee County Emergency Operations
Center when called upon to do so.

According to Robby Westbrook, director of the Cherokee Sheriff's Office
Division of Emergency Management, the ham radio group is an invaluable
resource during the severe weather. Westbrook said that the hams began
radioing in reports when the storm first started. That helped us to
know where to deploy our resources.

County Commissioner Jim Hubbard works closely with the amateur radio
group. He said its members were a big help in the storm's first 30
hours. Hubbard noted that the group provided the Emergency Operations
Center with a good overview of how hard the region was getting hit.

Jim Millsap, WB4NWS, of Woodstock, Georgia is the Emergency Coordinator for Cherokee County ARES. He told a local newspaper the group's mission is to support Westbrook and the Emergency Operations Center staff any time a disaster happens. He added that when the ice storm suddenly hit Cherokee last month at rush hour, the group was able to provide information about dangerous areas on the roads. It also served the same role during the floods of 2009.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, watching this one from Scottsdale, Arizona

--

More about the Amateur Radio Emergency Service club is on line at www.Cherokee-ares.org

(Cherokee Tribune)

**

RESCUE RADIO: ALASKA CLUB LOOSES EMCOMM TRAILER TO MOTHER NATURE

A windstorm has destroyed a mobile ham radio emergency communications trailer in Alaska. According to a posting on Q-R-Zed dot com by District Emergency Coordinator Don Bush, KL7JFT, the Matanuska Amateur Radio Association lost its vehicle in the wind storm on January 12th.

Bush says that the trailer was originally purchased with a grant from the Anchorage Amateur Radio Club along with donations received from various members and organizations in Alaska. Not having any insurance on it, Bush says that the club does not know it can replace it. He adds that this is a big loss for a small club that is very active in the community in helping with all kinds of events. He also says that the trailer was the only backup communications for the Borough Emergency Services if conventional communications is lost.

A fund has been set up to try to raise funds to replace the destroyed vehicle. Itds on-line ay www dot kl7jfu dot com. (KL7JFT, QRZ.com)

**

RESCUE RADIO: COMMERCIAL RADIO AUSTRALIA NOW OFFICIAL INFO PROVIDER

A broadcast service down-under has become the latest provider of emergency alert information. Graham Kemp, VK4BB, of the WIA News has more:

--

Chief executive officer of Commercial Radio Australia, Joan Warner has welcomed the signing of a memorandum of understanding with the New South Wales Government, making commercial radio stations official providers of emergency services information.

Ms. Warner said the NSW memorandum of understanding follows a similar arrangement with the Victorian, South Australian and Queensland

Governments. The industry has argued for some time for commercial radio to be included and promoted as an official provider of information in emergencies, along with the ABC.

For the Amateur Radio Newsline I'm Grahm Kemp, VK4BB, of the WIA News in Australia.

--

This new agreement makes it easier to alert the public in times of emergencies. (WIA News)

**

RESCUE RADIO: BRAZILIAN MILITARY PRAISES HAMS IN WAKE OF MASSIVE FLOODS

Civil Defense forces in Brazil have praised the efforts of a local group of amateur radio enthusiasts. This after the hams helped them co-ordinate the rescue efforts in the first hours after the landslides brought on by flooding.

According to a report on the BBC News website, Lt Col Roberto Robadey said that without the help from the Brazilian ham community that his command couldn't have done anything in those first two days.

Robadey said that the ham radio operators took their gear to key points to provide a communication link between rescue groups. Since them, the Brazilian Air Force said it was installing a communication centre in Itaipava, so people could make phone calls and access data in their attempts to track down missing relatives.

About 100 soldiers have also been deployed to the Cuiaba valley, which has been cut off since the heaviest downpours in 44 years tore through the mountainous area near Rio de Janeiro. Officials say at least 600 people are known to have died in the floods.

The full BBC story on this ham radio first responder effort in Brazil is on-line at Read the full BBC News story at tinyurl.com/BrazilRescue

**

HAM RADIO IN SPACE: NANOSAIL-D HEARD BY HAMS IN HUNTSVILLE

Some good news on the health of the NanoSail-D spacecraft. The Marshall Amateur Radio Club WA4NZD in Huntsville, Alabama, has confiirmed ejection and activation of the NanoSail-D sub-satellite.

The WA4NZD team of Stanley Simms, N4PMF, and Alan Sieg, WB5RMG, along with NanoSail-D Principal Investigator Dean Alhorn were listening on 437.275 MHz FM at the club station on Wednesday, January 19th. That's when the NanoSail-D beacon was heard and subsequently decoded.

The only communication from the NanoSail-D vehicle is via ham radio with 1200 baud FM AX.25 beacon packets. Controllers are asking for

telemetry reception reports from all over the world to help track the bird. They say that the solar sail was to deploy after three days, but the battery may last longer than that.

This loaf-of-bread sized spacecraft was carried to orbit late last year on an Air Force rocket as part of NASA's FastSat project. It has now become the first successful deployment of a satellite, launched from a satellite already in orbit.

NanoSail-D is expected stay in low-Earth orbit between 70 and 120 days, depending on atmospheric conditions. The satellite is expected to eventually de-orbit itself and re-enter the earth's atmosphere. More information on this project is on-line at wa4nzd.wordpress.com.

(WA4ZND Release)

**

HAM RADIO IN SPACE: ARISSAT 1 SET FOR TRIP TO THE ISS

The ARISSat-1 space craft is mounted in the Progress vehicle at Baikonur and the hatch sealed.

Progress flight 41P is scheduled to lift off on Friday, January 28th. Due to the newly announced launch date of shuttle flight STS-133, the space walk to deploy ARISSat-1 has been moved up to February 16th.

A NASA press release describes the plans for ARISSat-1 in an article about planned Russian EVAs from the ISS is available at tinyurl.com/6kceotn.

NASA TV has already run a program featuring ARISSat-1. Watch for repeat playback in coming days. And we will have more ham radio space related news later on in this weeks Amateur Radio Newsline report.

RADIO POLITICS: ARRL HOLDS ANNUAL BOD MEETING

The ARRL Board of Directors held its 2011 Annual Meeting January on 21st and 22nd in Windsor, Connecticut. At the meeting, the Board set its new legislative objectives for the 112th Congress, re-elected the ARRL Executive Committee, bestowed various technical and service awards and approved the organization's financial plan for 2011. It also set

timelines for the ongoing consideration of digital periodicals and more.

A detailed look at all the Board's actions, including the official minutes from the meeting, will be available in the near future. Keep an eye on the front news page at www dot arrl dot org for the latest updates.

(ARRL)

**

RADIO LAW: ROCKEFELLER REINTRODUCES INTEROPERABLE RADIO BILL TO SENATE

Senate Commerce Chairman Jay Rockefeller, of West Virginia has reintroduced legislation that would re-allocate a chunk of spectrum to public safety officials. This, for the creation of a national broadband interoperable network.

Rockefeller said the bill mirrors the measure he offered last Congress. One that would re-allocate the so-called D-block of spectrum to public safety officials instead of auctioning it off to commercial bidders as the Federal Communications Commission has proposed.

Rockefeller noted that with the upcoming 10th anniversary of the September 11, 2001, al-Quida terrorist attacks on the Uniuted States, Congress needs to takes the steps necessary to implement a recommendation by the commission that investigated those attacks. That being to create a national broadband interoperable public safety network. He said that such a network is needed to assist first responders to better communicate during emergencies.

As you are likely aware, the 2001 terrorist attacks on the World Trade Center in New York City and on the Pentgon highlighted the problems first responders had in trying to communicate with each other during emergencies. With each responding service using a different radio system, communications between them was almost impossible. At the World Trade Center it fell to ham radio to provide the only inter operable communications for the first several days.

**

RADIO LAW: VERIZON SUES THE FCC OVER NET NEUTRALITY DECISION

Ham radio could have a vested interest in the outcome of Verizon Communications challenge to the Federal Communications Commission's controversial net neutrality order. This as the telecommunications giant becomes what likely will be the first of company's to try to stop the agency from requiring Internet companies to treat all Web traffic equally. Bill Pasternak, WA6ITF, is in the newsroom with more:

--

A legal challenge from one or more of the nations telecommunications and broadband providers to the recent FCC order mandating Net Neutrality was widely expected. This after the FCC has said it thinks Congress enabled it to pursue its Net Neutrality rules under several interpretations of telecommunications laws.

In simple terms, Net Neutrality means that service providers must treat all traffic on their networks equally and cannot speed up or slow down consumer access to any web destination based on network usage of that customer. It also effectively bans tiered service where heavy Internet users could be charged more than those who only use the net occasionally. The FCC's Net Neutrality rules are supported by consumer groups and Web giants such as Google and Facebook.

The Verizon appeal is the first step that will begin a chain of legal maneuvering that will initiate a lawsuit that will be heard in the same court that last year struck down the FCC's earlier attempt at enforcing Net Neutrality rules. Verizon and other providers claim that it is they and they alone who have the right to determine the business model that they operate under.

Another challenge to the FCC's Net Neutrality decision is likely to come from the Republican lead House Energy and Commerce Committee. It has already announced that undoing Net Neutrality through a resolution of disapproval under the Congressional Review Act is a top priority. However, that effort is likely to stall in the Democraratic controlled Senate.

What this might eventually mean to ham radio is simple. More and more communications technologies are being developed where interlinking of signals and control of remote stations forces the need for more and more bandwidth. Some on a full time basis. If Net Neutrality is overturned and if service providers decide to place some of these high bandwidth ham radio operations in the category of heavy use it could slow down these applications to a crawl or make them financially impossible for the average ham to continue.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF in the Newsroom in Los Angeles.

--

In its filing Verizon argues that the FCC does not have the legal authority to mandate how Internet service providers treat content on their networks. For its part, the FCC says that its mandate is to oversee all aspects of telecommunications in the United States. (Published News Reports)

**

HAM HAPPENINGS: COMMEMORATING THE 20TH ANNIVERSARY OF THE HOLYLAND CONTEST

The Israel Amateur Radio Club has announced that it will be sponsoring a special 3 month on the air activity. This, to commemorate the Holyland Contest's 20th anniversary.

Operation begins on February 1st and runs through April 30th. Two stations will be on CW, SSB and the Digital modes using the special callsigns 4X20HC and 4Z20HC. All QSL's go via 4Z4TL. For more details about the Holyland Contest take your web browser to tinyurl.com/holylandoperation and holylandoperation is spelled as one word.

**

HAM HAPPENINGS: 2011 SARL NATIONAL CONVENTION APRIL 15 - 16

The South African Radio League's 2011 National Convention will have two clubs as its host. The show which is slated for April 15th and 16th in the city of Vaal will be jointly sponsored by the Sasolburg and Vaal Triangle Amateur Radio Clubs.

The two organizations say that they are aiming to make the convention the biggest get-together of South African radio amateurs in years. Among the attractions is a Saturday afternoon visit to the Bloemendal medium wave radio broadcast station near the city of Meyerton. That's where attendees can experience first hand what a 500 kilowatt transmitter is capable of doing. More on all aspects of this event is on line at www dot qsl dot net slash zs4srk. (South African Radio League)

**

HAM HAPPENINGS: BLACKROCK CASTLE OBSERVATORY IRELAND FEB 19 - 20

And Ireland's North Cork Radio Group will be active the call EI1NC/P on February 19th and 20th. This from the Blackrock Castle Observatory which is a 16th century Castle located 4km from the heart of Cork city on the banks of the river Lee. The Castle has seen many uses in its long history and now houses a cutting edge of space and observation post. More informatyion on the Castle is available at www dot bco dot ie. The North Cork Radio Groups website is at www dot eilnc dot com. And less we forget, the operation from Blackrock Castle will run from and 10:00 to 17:00 hours UTC on both days. (Press Release)

**

HAM HAPPENINGS: ANNUAL GATHERING AT M2 ANTENNA SYSTEMS

Closer to home, the 13th annual ham radio gathering at M2 Antenna Systems is now set for Saturday, March 19th at the M2 factory in Fresno, California. Exact plans for this year's event will be revealed shortly. Keep an eye on www dot m2inc dot com for the latest details. (W6OMF)

**

NAMES IN THE NEWS: FRANK FALLON, N2FF RETIRES AS ARRL HUDSON DIRECTOR

Some names in the news. First up is Frank Fallon, N2FF, who announced his decision to retire from the position of ARRL Hudson Division Director at the conclusion of the League's first Board of Directors meeting of 2011. In announcing his decision to step aside after more than 14 years on the job, Fallon said that at age 72 he thinks it's time to cut down on night driving and to turn things over to his Division's Vice Director Joyce Birmingham, KA2ANF and let her have her turn in the front seat at Board meetings.

Under the ARRL's rules of succession, when a Director retires or can no longer serve for other reasons, the Division's Vice Director fills that position. In this case its' Joyce Birminham, who has been an active radio amateur for more than 30 years.

Birmingham began her ARRL career in 2000, when Fallon asked her to be an Assistant Director in the Hudson Division. This, after her husband Andy, WB2RQX, became a Silent Key. In 2003, she was elected ARRL Hudson Division Vice Director; she was re-elected for two more terms, in 2006 and 2009. Birmingham also serves as the District 2 Chairperson of the Young Ladies' Radio League and as the President of the East Coast DX Association. (ARRL)

**

HAM RADIO ON THE WEB: NEW 60 METER BLOG

And the Southgate news reports that Peter Ourednik, OK1RP, in the Czech Republic, now runs a blog covering the 60 meter or 5 MHz band. It features information on DX operation and related news for the band. You can read it on-line at 60mband.blogspot.com. (Southgate)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

HAM RADIO TECHNOLOGY: A BIG LEAP FOR CODEC 2

Codec 2 may not be ready for prime time, but its getting close. Take a listen.

--

Codec 2 audio: Hear it by downloading the MP3 version of this weeks newscast at www.arnewsline.org.

--

That was just a snippet of a long conversation between Bruce Robertson, VE9QRP, in Sackville, New Brunswick, Canada holding forth with Paul Saville, ZL3IN, in Christchurch, New Zealand using Codec2.

For those unaware, Codec 2 is an open source alternative to both D-Star and P25 that's being developed by a group of volunteers all around the world. The idea behind Codec 2 is to provide a single, free, software-based digital voice encode and decode system that would not require any proprietary firmware as is found in most other current digital voice systems. And as you can hear, even in this Internet-only QSO being held by two hams half a world apart, the quality is quite extraordinary. Likely on a par with all the systems available to hams today. Listen as ZL3IN describes his current career to VE9QRP:

--

Codec 2 audio: Hear it by downloading the MP3 version of this weeks newscast at www.arnewsline.org.

--

More about Codec 2 is on-line at Codec2 dot org. The complete QSO between VE9QRP and ZL3IN is at tinyurl.com/codec2video. (Southgate)

**

HAM RADIO IN SPACE: NASA ADDS ONE MORE SHUTTLE MISSION

NASA has officially added another space shuttle launch to its schedule and the final one for the fleet.

The space agency has set a target launch date of June 28th for shuttle Atlantis and started preparations for the 135th and last shuttle flight. The four-member crew will take up supplies to the International Space Station and return a faulty pump that has stumped engineers.

With the addition of STS-135 there are now three missions left before NASA retires its shuttle fleet this year. Shuttle Discovery's last mission is slated for February 24th nand the final flight of the Endeavour will take place in April.

The final flight of Atlantis will be commanded by Christopher Ferguson, KG4JCQ. The rest of the crew is composed of astronaut researchers and includes Douglas Hurley, Rex Walheim, and Sandra Magnus, KE5FYE. (NASA)

**

RADIO IN SPACE: SMARTPHONE BASED SATELLITE BEING DEVELOPED IN THE UK

Researchers at England's University of Surrey and Surrey Satellite Technology Limited are building a satellite containing a smartphone payload that will be launched into orbit around the Earth later this year.

Called STRaND-1, the name is an acronym for the Surrey Training, Research and Nanosatellite Demonstrator. The tiny bird is being developed by the Surrey team to demonstrate the advanced capabilities of a satellite built quickly using advanced commercial off-the-shelf components.

STRaND-1's lead researcher is Dr. Chris Bridges. He explained that a smartphone made an ideal satellite payload because these devices pack lots of components such as sensors, video cameras, GPS systems and Wi-Fi radios that are technologically advanced but a fraction of the size, weight and cost of components used in existing satellite systems. Also, because many smartphones run on free operating systems that this could lead online software developers to create applications that could feasibly be utilized on later satellites.

A smartphone avionics suite is one of many technological advances packed into this 4 kg nanosatellite. To precisely point and maneuver, the satellite also incorporates advanced guidance, navigation and control systems including miniature reaction wheels. It also contains a GPS receiver, as well as innovative pulse plasma thrusters to propel it through space.

If this experiment is successful, it could give new meaning to the line from the science fiction film for E-T to phone home. (Southgate)

**

DX

In DX, the Microlite Penguins DXpedition Team will be active as VP8ORK from the South Orkney Islands Antarctica, from January 27th to February 8th. The South Orkney Islands one of the world's most wanted DXCC entities. Operation will be CW, SSB and RTTY on 160 through 10 meters. QSL direct only to Garry Hammond, VE3XN, 5 McLaren Avenue, Listowel, Ontario, Canada, postal code N4W 3K1. For more information please visit the teams website at www dot vp8o dot com.

IK1PMR and PA3LEO are now operational portable EA8 from the CXanary Islands. They will be there until March 8th but their activity on the air will be holiday style on 160 through 6 meters. QSL via PA3LEO or Logbook of the World.

Lastly, F5LBG is now active portable FM from Martinique running only 5 watts QRP on 10 point 106, 14 point 060 and 18 dot 096 MHz. He will be thre until February 3rd operating holiday style. Listen out for him daily around 1000 UTC and 1800 UTC. QSL via F5LBG, direct or by the Bureau.

(Above from various DX News souraces.)

**

THAT FINAL ITEM: BRAINWAVE CONTROL IS COMING

And finally this week, get ready to control your, TV set, your stereo and maybe even your ham radio station with only your mind. That's what you may be able to do with brain waves if the technology developed by a company called PLX Devices proves out. No its' not science fiction as we hear in this report:

--

According to its website, the XWave from PXL Devices is the first consumer product priced under $100 which can sense and detect human brainwaves, interpret them and connect it to everyday technology.

PLX Devices founder and CEO is Paul Lowchareonkul. He recently told the U.K. Daily Mail that it was only a matter of time before products like the XWave entered the mainstream. Lowchareonkul says that the human brain is the most powerful, complex thing in the universe, and for the first time, we're able to harness its amazing power and connect it to everyday technology.

Lowchareonkul says that with the development of 3rd party applications or apps, the potential for innovation is limitless. At the moment, PLX is only offering apps that interact with the XWave for Apple mobile devices like the iPhone, iPad and iPod touch. There are four apps currently available that interact with the XWave. These include a basic set-up app; an app that allows you to upload your song list and sync your brainwaves with any song in your library; a "Tug of Mind" app and a meditation app. In the future, PLX says on its website that you will be able to control and float objects in video games by simply thinking about it, or train your mind to focus and relax on command.

And if you do get one and are able to develop an app to control your ham station with your brain, please be sure to let us know so that we can pass it along to what will then become a truly mew world of amateur radio.

For the Amateur Radio Newsline, Im Bruce Tennant, K6PZW. In Los Angeles.

--

>From pictures on-line, the XWave device itself looks almost like an ordinary headset for telephone operator. The PLX website claims that XWave is perfectly safe because it only listens to brainwaves and does not transmit or send out any signals. That's a good thing for many reasons including there being no need to add more QRM to our already overcrowd bands.

More on this rather interesting device is on-line at www.plxwave.com/info.html. (Daily Mail, Mobilehack.com, others)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). I am not a troll. You guys can make light of my plight, but I have to live with this restrictive HOA crap every waking moment.
Just this morning, when I left my house at 0530, there was some new snow that fell last night. We got about an inch or so.
Well...when I went out to get in my car the HOA had already posted a warning ticket on my door that I had just three hours to shovel my driveway...and they told me that if I did not wash the road salt from my car by this evening that I would have to park it in the garage so as to not be an eye sore.
They said that dirty vehicles detract from our property values and reminded me that I can be fined for having a vehicle that is "less than eighty percent clean".

I was already late for work, so my wheelchair bound wife said that she would do her best to clean the driveway.
I went to work.
Since it was 0530 and still dark, so my wife turned on our outside spotlights to aid her.
And one of the neighbors called the HOA President to complain that my driveway lights were "invasive" and that my wife was making too much noise with her snow shovel.
My wife couldn't call me on her cell phone since those are restricted to inside use only, so she went back inside.
And guess what? An hour later, at 0630, the HOA gal showed up and wanted to know why my wife had only partially cleaned our driveway.
My wife explained that the outside lights were not the best, that she is not in the best of health, and that she wanted to wait until the sun came up.
The HOA gal told my wife to use a flashlight and to tape it to her wheelchair. She told my wife that if the driveway was not clear of snow by 0800 that we would be fined.

We are seriously considering moving out of this neighborhood.

After Sored Mamzer, the Sword Brethren of Eastern Ohio filed a fraudulent DMCA complaint against Nimbusters, he only caused it to multiply into many boards and become even more annoying. Right now, I count five separate boards, plus a place where you can look at a group photo. They are as follows:

(nimbusters photo) http://www.nimbusters.org
(everyone) http://subgurls.com/busters/forum/index.php?mode=index
(nimbusters) http://subgurls.com/forumGOOD/forum.php?board=8
(hams) http://subgurls.com/forumGOOD/forum.php?board=1
(nimbusters) http://nimbusters.org/forum/forum.php?board=8
(hams) http://nimbusters.org/hams/forum.php?board=1

This is getting out of control and is downright scary. Please don't ToS Nimbusters again. It has already multiplied enough!

(Obviously, Mark can never win.)

?Hey Scott,

You - or *anyone* remember the last year the FCC issued CB licenses? That almost goes back almost as far as my licenses do .... LOL ...

I'm guessing mid 70s. They started really deregulating around 1978 to early 80s. I believe 78 was the last year they issued 3rd class radiotelephone tickets and then grandfathered 1st and 2nd class radiotelephone tickets to the GROL license in the very early 80s.

And an HT wouldn't count as an antenna either. It is not affixed to the house nor imbedded in the ground. Heck, otherwise they could nail you for your car's FM antenna (or satellite antenna, or gps for that matter).

Oh well, it served to liven up an otherwise dead group, right?

73 from Rochester, NY

ARRL Legislative Update - Issue # 1

January 31, 2011

What, another Newsletter?

I know you are asking yourself - "What, another newsletter? Why?"

There could be many answers to this question, but the best is probably "Because the ARRL needs to keep its members better informed on what we are doing in the area of advocacy and legislative action."

This will not be a monthly newsletter. Rather it will be a timely newsletter with the goal to convey important information in a timely manner to the ARRL family. The legislative process is a fickle thing - sometimes it moves as slow as molasses in a New England winter; at other points time is of the essence. Developing a newsletter designed to be emailed to interested ARRL members is a good way to provide important news and calls for action expediently.

No general member will be automatically signed-up to receive this newsletter: it is an "opt-in" addition available to ARRL members. To receive it, go to your Member Profile on the ARRL Web at www.arrl.org/Users/edit and select the tab for "Edit Email Subscriptions". To receive the Legislative Update when it is mailed, simply check the appropriate box on that page then click "SAVE" at the bottom. It is that simple. To unsubscribe, follow the same process, but uncheck the box for this newsletter.

The ARRL Legislative Update will focus on ARRL Legislative and Advocacy efforts at the national level. Your local ARRL Section Managers and their State Government Liaisons manage activities at the state level. At times there may be significant efforts at the state level that should be shared in the ARRL Legislative Update, but for regular information on what's happening at the state or local efforts, contact your ARRL Section Manager.

A Message from ARRL President Kay Craigie, N3KN

Dear Fellow League Members,

The ARRL's advocacy for Amateur Radio on Capitol Hill is almost as old as the organization itself. In 1917, just three years after the ARRL was founded, and again in 1918, we joined with other radio interests in successfully opposing legislation that would have granted control over all radio communications to the Navy. Members were asked to write to

their elected representatives in support of this effort.

After World War I ended in November 1918, Amateurs were allowed to receive radio transmissions, but the wartime ban on Amateur Radio transmitting continued in effect. The League's initial efforts to get hams back on the air were deflected with bureaucratic sandbagging. The Navy was again seeking control over international radio communications. Only after the ARRL arranged introduction of resolutions in Congress was the ban lifted, allowing Amateurs to resume transmitting -- a year after the war was over.

If the ARRL, with the support of our members, had not spoken out for Amateur Radio on Capitol Hill in those early days of radio and gotten us back on the air, would there even be ham radio in the United States today?

The League's advocacy in Congress was important then, and it is important now. The ARRL Washington team does our part, but Senators and Representatives listen best to you, their constituents. You can tell them specific examples of how Amateur Radio makes a difference in your state and your Congressional district. You can get their attention for Amateur Radio in ways no one else can do.

Please join me in continuing the ARRL's work as the authoritative voice speaking for Amateur Radio on Capitol Hill, as this new session of Congress gets under way.

73,

Kay Craigie, N3KN

President, ARRL

A Message from ARRL Executive Vice-President / CEO David Sumner, K1ZZ

Dear Member,

Thank you for reading this far in our inaugural Legislative Update. Your support of the ARRL's efforts to promote Amateur Radio on Capitol Hill is essential to our success.

That success is not measured only by bills that are passed and signed into law. At least as important is that we prevent unfavorable legislation from advancing to the President's desk. The ARRL legislative agenda for the 112th Congress includes our hopes for legislation to enhance our ability to serve our country and our neighbors as well as to guard against Congressional actions that would diminish our rights as federal licensees. Threats often come in the form of unintended consequences of well-meaning legislation, as in the case of "distracted driving" bills that are aimed against unsafe driving practices but are sometimes too vague or too broad.

You have a good team working on your behalf in Washington. Please count yourself as a part of that team - we do!

73,

David Sumner, K1ZZ

Chief Executive Officer

ARRL Legislative Agenda for the 112th Congress

At its annual meeting in January 2011, the ARRL Board of Directors unanimously adopted the following legislative objectives for the 112th Congress:

Objective #1: The ARRL seeks legislation to extend the requirement for "reasonable accommodation" of Amateur Radio station antennas and antenna support structures (requirement that now applies to state and local regulations) to all forms of land use regulation.

Objective #2: The ARRL opposes legislation that would lead to the reallocation of amateur spectrum or to sharing arrangements that reduce the utility of existing allocations.

Objective #3: The ARRL opposes legislation that diminishes the rights of federal licensees in favor of unlicensed emitters or encourages the deployment of spectrum-polluting technologies.

Objective #4: The ARRL seeks recognition of the unique resources, capabilities and expertise of the Amateur Radio Service in any legislation addressing communications issues related to emergencies, disasters, or homeland security.

Objective #5: The ARRL supports the complementary legislative objectives of other radiocommunication services, particularly the public safety and scientific services that require spectrum access and protection from interference for noncommercial purposes that benefit the public.

Objective #6: The ARRL opposes "distracted driving" legislation that does not clearly exempt two-way mobile radio transmitters or receivers used by licensees of the Federal Communications Commission in the Amateur Radio Service.

Objective #7: The ARRL supports The FCC Commissioners' Technical Resources Enhancement Act to ensure that Commissioners have adequate access to technical expertise when making decisions."

Over the next months, ARRL members will be kept informed about our plan of action for moving this agenda forward. You will at times be asked to send letters to key members of Congress and the Senate to help them gauge the wishes of their constituents (that is YOU) on various pieces of legislation. When we ask you to act, we encourage you to do so promptly, as time is of the essence as we try to coordinate our response with the various timetables when pieces of legislation are being considered.

To keep the legislative interests of Amateurs moving, remember the most important piece of this puzzle is YOU! With maximum member

participation, we can make this happen! Get Involved!

Some Basic Questions and Answers

Q. Who determines the ARRL Legislative Agenda?

A. The ARRL Board of Directors is the policy maker for the organization. The Executive Committee, working in conjunction with the ARRL Washington team, makes recommendations for consideration by the full Board. After discussion and debate, the Board votes upon the policy goals.

Q. Who is this company Chwat & Co that I hear about and what is their role?

A. The ARRL has retained the Washington firm of Chwat & Co to assist in developing the most effective action program. Headed by John Chwat, the firm monitors the activities of Congress, identifying legislation that could possibly impact the Amateur Radio Service. When the ARRL decides to promote or influence legislation, Chwat & Co spearheads direct ARRL contact with key legislators and their staffs.

Q. Why are we asked to send letters to Chwat & Co to deliver to our members of Congress? Why should I do that instead of contacting my member directly?

A. There are several reasons. First, when letters from constituents are hand-delivered to a Congressional office, it gives our Washington team the opportunity to have some direct "face time" with the Congressperson and/or their key staff. Hand delivering a stack of letters supporting a bill makes a greater impact than having those letters trickle in through the US mail system.

Because of security concerns, when you mail a letter to your member of Congress, it is automatically directed to a warehouse in Maryland for security screening, including tests for possible dangerous substances. This can delay delivery of even routine letters by up to six weeks.

Q. I noticed on my Congressperson's website a form where I can send in my comments using a web form. Should I use that instead of mailing a letter to Chwat?

A. While those web forms are convenient for constituent use, our Washington team says they really are not effective communications for a concerted lobbying effort. Again, the impact of several dozen letters being hand-delivered to the Congressional office is far more effective than a web form or telephone calls to their office.

Q. I have sent my letters to Chwat's office as directed in the past, but never heard back from the Congressman's office. Should I be concerned that my letter wasn't delivered?

A. Rest assured that all letters received by our Washington lobbyist's office are delivered to the appropriate Congressional office. Different

members of Congress are not always as efficient as others in sending acknowledgements to their constituents.

HR 81 -"The Amateur Radio Emergency Communications Enhancement Act" - is introduced into the 112th House of Representatives

On January 5, 2011, Representative Sheila Jackson-Lee (TX) introduced "The Amateur Radio Emergency Communications Enhancement Act of 2011" into the US House of Representatives. Congresswoman Jackson-Lee introduced the same bill that was previously identified as HR 2160 into the 111th Congress. Identified this session as HR 81, the bill has been referred to the House Committee on Energy and Commerce.

In the 111th Congress, HR 2160 secured the support and co-sponsorship of 41 members of the House, but was not moved out of committee for consideration by the full House. Though not enacted, the support received for HR 2160 was significant, which led Congresswoman Jackson-Lee to reintroduce the bill, now assigned a new number, to the new Congress.

S 191 - "The Amateur Radio Emergency Communications Enhancement Act" - is introduced into the 112th Senate

Senator Joe Lieberman (CT), again with the initial co-sponsorship of Senator Susan Collins (ME), introduced "The Amateur Radio Emergency Communications Enhancement Act" into the US Senate on January 26, 2011. The bill is nearly identical to S 1755, which unanimously passed the Senate in the fall of 2009 and was sent to the House of Representatives for consideration. According to THOMAS (The Library of Congress website that provides information on legislation), as of January 31, the text of the bill has not yet been received from the GPO.

What's Simmering On The Stove?

When it comes to legislative affairs and regulatory issues, it is often compared to trying to take aim on a moving target. What may be the "hot button" issue today may well be "yesterday's news" in a month. Getting ARRL members accurate information in a timely manner leads to those same ARRL members taking quick action when asked to contact their Representatives or Senators about an issue

Over the next several weeks, the ARRL Washington team will be making contacts with key legislators and Congressional staffers, as we plan our strategy for promoting S 191 and HR 81. After that plan has been finalized, ARRL will be using its resources - QST, the ARRL Web, this Legislative Update newsletter, the Grassroots program, and one-on-one member contacts - to help get the word out. That call for action will be the cue for you - the ARRL membership - to begin YOUR lobbying of Congress on these key bills.

We came tantalizingly close to achieving success in the 111th Congress. With your help, we can be successful in the 112th Congress. Stay tuned for more information and direction plans of action! 73

Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

/*IARU E-LETTER*/

IARU Electronic Newsletter

January, 2011

In this Issue:

The ITU - International Telecommunication Union

ITU

If you were to ask most amateur radio operators what entity is responsible for granting privileges to use portions of the radio spectrum for amateur radio purposes the answer would likely be their own national telecommunication authority. However, that's only partially true. The ultimate authority for the use of the radio spectrum is the International Telecommunication Union (ITU). It is desirable that each amateur radio operator understand what the ITU is and why its work and decisions are important.

Most countries are Member States of the ITU and by way of treaty generally agree to be bound by the decisions of the ITU when it comes to the usage of the radio spectrum. Each country can decide that a certain use determined by the ITU may not apply in their own jurisdiction. It is not common for countries to do that but it is within their sovereign authority to do so.

The International Telecommunication Union is a United Nations agency that deals with information and communications technology issues. They have an extensive web site at _www.itu.int_ <http://www.itu.int/>that details much of their work. The ITU is based in Geneva, Switzerland and includes in its membership 192 Member States and more than 700 Sector Members and Associates.

ITU has coordinated the shared global use of the radio spectrum, promoted international cooperation in assigning satellite orbits, worked to improve telecommunication infrastructure in the developing world, established the worldwide standards that foster seamless interconnection of a vast range of communications systems and addressed other global concerns, such as mitigating climate change and strengthening cybersecurity.

The top staff official of the ITU is its Secretary-General, Dr. Hamadoun Toure who is also a licensed radio amateur with the call sign HB9EHT. There are three sectors in the ITU: Radio- communication (ITU-R),

Development (ITU-D) and Standardization (ITU-T). The IARU is a Sector Member in both the ITU-R Sector and the ITU-D Sector. The IARU fully participates in both of those sectors by attending any and all meetings that involve issues that may impact the amateur or the amateur-satellite services. The Secretary-General, the Deputy Secretary-General and the Directors of the three ITU Sectors are elected to four-year terms by the Member States at Plenipotentiary Conferences held every four years. The IARU is a recognized international telecommunication organization and is invited to participate as an observer at the Plenipotentiary Conferences. The most recent "Plenipot" was held in October, 2010 in Guadalajara, Mexico.

The ITU Council was established in 1947 under the name Administrative Council, following a decision taken by the 1947 Plenipotentiary Conference in Atlantic City, New Jersey, United States. The Council comprises a maximum of 25% of the total number of Member States, which are elected by the Conference with due regard to the need for equitable distribution of Council seats among the five world regions (Americas, Western Europe, Eastern Europe, Africa, Asia, and Australasia). The current Council is comprised of 48 members.

The role of Council is to consider, in the interval between Plenipotentiary Conferences, broad telecommunication policy issues to ensure that the Union's activities, policies and strategies fully respond to today's dynamic, rapidly changing telecommunications environment. It also prepares a report on the policy and strategic planning of the ITU. In addition, Council is responsible for ensuring the smooth day-to-day running of the Union, coordinating work programs, approving budgets and controlling finances and expenditures. Finally, Council also takes all steps to facilitate the implementation of the provisions of the /ITU Constitution/, the /ITU Convention/, the Administrative Regulations (International Telecommunications Regulations and Radio Regulations), the decisions of Plenipotentiary Conferences and, where appropriate, the decisions of other conferences and meetings of the Union. The IARU has attended several ITU Council meetings in the recent past.

The ITU-R Sector is very important for radiocommunication services, including the amateur and amateur-satellite services. Every 4 or 5 years the ITU holds a World Radiocommunication Conference (WRC) to revise the international Radio Regulations. It is the job of WRC to review, and, if necessary, revise the Radio Regulations <http://www.itu.int/pub/R-REG-RR/en>, the international treaty governing the use of the radio-frequency spectrum and the geostationary-satellite and non-geostationary-satellite orbits. Revisions are made on the basis of an agenda determined by the ITU Council <http://www.itu.int/council/index.html>, which takes into account recommendations made by previous world radiocommunication conferences. The general scope of the agenda of world radiocommunication conferences is established four to six years in advance, with the final agenda set by the ITU Council two years before the conference, with the concurrence

of a majority of Member States. The next WRC is scheduled for 23 January to 17 February 2012, just one year away.

Under the terms of the ITU Constitution <http://www.itu.int/aboutitu/basic-texts/index.html>, a WRC can:

1. revise the Radio Regulations and any associated Frequency assignment and allotment Plans;

2. address any radiocommunication matter of worldwide character;

3. instruct the Radio Regulations Board <http://www.itu.int/ITU-R/go/rrb/en>and the Radiocommunication Bureau <http://www.itu.int/ITU-R/go/br/en>, and review their activities;

4. determine Questions <http://www.itu.int/ITU-R/go/questions/en>for study by the Radiocommunication Assembly <http://www.itu.int/ITU-R/go/ra/en>and its Study Groups <http://www.itu.int/ITU-R/go/rsg/en>in preparation for future Radiocommunication Conferences.

There is a lengthy preparatory process for every WRC in which the IARU participates as a Sector Member. There are usually countless meetings dealing with each agenda item that has been determined to be on the agenda for a WRC. Many of those agenda items can, and do, have a substantial impact on the amateur radio usage of portions of the radio spectrum. It is important for the IARU to participate to "protect our frequencies" and when the opportunity presents itself, to expand our spectrum.

ITU-R Study Groups and Working Parties address each agenda item on the WRC agenda and try to arrive at a consensus and recommendation(s) how the agenda item may be addressed or dealt with at the WRC. Studies are conducted many times to determine how a proposed new usage may impact the other services, or not. Each of these agenda items are thoroughly discussed for at least a couple of years leading up to the WRC. You can imagine how important it is for the worldwide amateur community that IARU participate in the entire study group/working party process.

ITU-D is where much of the ITU's work on disaster response takes place. The development arm of the ITU considers emergency telecommunications an integral part of its projects integrating telecommunications/information and communication technology in disaster predication, detection, and alerting. Emergency Telecommunications play a critical role in the immediate aftermath of disasters by ensuring timely flow of vital information which is much needed by government agencies, and other humanitarian actors that are involved in rescue operations and providing medical assistance to the injured. IARU's task in the ITU-D Sector is to ensure that amateur radio's role in disaster communications is understood and appreciated by the ITU members. The ITU-D Sector also conducts a worldwide conference. The current schedule calls for a World Telecommunication Development Conference every 4 years. In 2010, the WTDC was held in Hyderabad, India in late May and early June. IARU

participated in the conference.

The ITU also sponsors regional and global exhibitions called TELECOMS. An ITU Telecom offers a global ICT community platform that gathers stakeholders from across the telecommunications/ICT sector to connect, collaborate and create the future ICT landscape. Forums or seminars related to ICT are conducted at the Telecoms and IARU has participated in such forums, usually on topics related to emergency communications.

In one of the ITU buildings, there is a permanent amateur radio station, 4U1ITU. 4U1ITU is the club station of the International Amateur Radio Club.

In an upcoming IARU E-Letter, I will describe the organization of IARU and how it works within the ITU and the regional telecommunication organizations like CEPT, CITEL and APT to ensure amateur radio's continued place in the radio spectrum landscape.

73, Rod W6ROD

How to Subscribe to This E-Letter

You can send an email to secretary@iaru.org <mailto:secretary@iaru.org>requesting that you be added to the distribution list. Or, you may be able to receive it via your own IARU member-society, either in English or translated into your own language.

If you are an ARRL member you can subscribe to this E-Letter directly on the ARRL web site. Log in as a member, then go to "Edit your Profile" and then to "Edit your Email Subscriptions." Check the box next to "The IARU E-Letter (International Amateur Radio Union news)" -- that's all there is to it!

An archive of earlier issues is available at http://www.iaru.org/e-letter/.

If you have any information that would be appropriate to publish in this electronic newsletter, please contact me at w6rod@iaru.org <mailto:w6rod@iaru.org>.

SCOUTING: BOY SCOUTS OF AMERICA AND ARRL TEAM UP TO HELP SCOUTS LEARN
COMMUNICATIONS SKILLS

After working together for nearly a century to provide Scouts with the
ability to learn radio communication skills, Boy Scouts of America and
the ARRL have officially teamed up by signing a memorandum of
understanding. This MOU designates the ARRL as a key resource for K2BSA
and Radio Merit Badge training at the BSA National Scout Jamboree and
establishes the ARRL as the go-to source for Scouts interested in
learning about and becoming involved in radio communication.

BSA Chief Scout Executive Bob Mazzuca and ARRL President Kay
Craigie, N3KN, launched the partnership January 31 by holding a unique
communications meeting. Mazzuca joined Craigie virtually during an
Internet video conference and document-signing ceremony. From separate
locations, the pair took the opportunity to talk about the importance
of each organization to the ongoing development of the other.

"Throughout the years, going all the way back to the Wireless Merit
Badge in 1918, the ARRL has worked hand-in-hand with Boy Scouts of
America to help teach Scouts the skills and joys of radio
```

communication," said Chief Scout Executive Bob Mazzuca. "Today, we are making official a relationship that has been beneficial for both of our organizations for nearly a century." [Read more here <http://www.arrl.org/news/boy-scouts-of-america-and-arrl-team-up-to-help-scouts-learn-communications-skills>]

==> BOARD OF DIRECTORS: PRESIDENT CRAIGIE APPOINTS FORMER SM WILLIAM HUDZIK AS HUDSON DIVISION VICE DIRECTOR

After review of eligibility by the ARRL Ethics and Elections Committee, President Kay Craigie, N3KN, has appointed William W. Hudzik, W2UDT, of Gillette, New Jersey, to serve as Vice Director of the ARRL's Hudson Division for the remainder of the current term that expires January 1, 2013. Hudzik fills the vacancy created when Frank Fallon, N2FF, retired from the ARRL Board of Directors after more than 14 years of service and his Vice Director, Joyce Birmingham, KA2ANF, assumed the Director position. Read more here <http://www.arrl.org/news/former-northern-new-jersey-section-manager-appointed-hudson-division-vice-director>.

==> LEGISLATIVE MATTERS: AMATEUR RADIO BILL INTRODUCED IN THE US SENATE

On January 26, Senator Joe Lieberman (ID-CT), along with Senator Susan Collins (R-ME), introduced Senate Bill 191, The Amateur Radio Emergency

Communications Enhancement Act of 2011. Similar to HR 81 <http://www.gpo.gov/fdsys/pkg/BILLS-112hr81ih/pdf/BILLS-112hr81ih.pdf>, introduced in the US House by Representative Sheila Jackson Lee (D-TX-18) <http://www.arrl.org/news/new-amateur-radio-bill-introduced-in-congress> on January 5, the bill, if passed, would direct the Department of Homeland Security (DHS <http://www.dhs.gov/index.shtm>) to undertake a study on emergency communications. S 191 has been referred to the Committee on Homeland Security and Governmental Affairs <http://hsgac.senate.gov/public/>. Lieberman is the Chairman of the committee, while Collins is the Ranking Member. Read more here <http://www.arrl.org/news/senate-version-of-amateur-radio-legislation-introduced>.

==> ARRL FIELD DAY: 2011 FIELD DAY PACKET AVAILABLE

It's that time of year again -- time to start gearing up for ARRL Field Day, June 25-26, 2011! ARRL's flagship operating event -- always held the fourth full weekend in June -- brings together new and experienced hams for 24 hours of operating fun.

Field Day packets are now available for download <http://www.arrl.org/files/file/Field-Day/2011/2011_FD_Packet.pdf>and include the complete rules (including a change for 2011), as well as other reference items such as forms, ARRL Section abbreviation list, entry submission instructions, a Frequently Asked Questions section, guidelines for getting bonus points, instructions for GOTA stations and a kit to publicize your event with the local press.

There is one rule change for 2011. Starting this year, all stations operating in Class A may use a free VHF station without increasing their operating category. This is designed to encourage more activity on the VHF bands, especially 6 and 2 meters, during the best sporadic-E season of the year.

We have also included in the FD packet a brief one-page flier with basic "What is Field Day" information that may be reproduced as a handout for your information table.

==> ARRL AUDIO NEWS TO RESUME FEBRUARY 10

There will be no Audio News this week. It will resume next Thursday, February 10.

==> TAKE A (VIDEO) TOUR OF W1AW

Click here <http://www.arrl.org/multimedia> to watch a video tour of W1AW, conducted by Station Manager Joe Carcia, NJ1Q. Scroll down the page until you come to VIDEO: W1AW.

==> VOTE FOR YOUR FAVORITE ARTICLE IN THE FEBRUARY ISSUE OF QST

Now's the time to cast your vote for your favorite article in the February 2011 issue of QST <http://www.arrl.org/qst/>. Just head to the Cover Plaque Award page <http://www.arrl.org/cover-plaque-poll> and click on the article of your choice. The winner of the QST Cover Plaque Award for January is Jim Koehler, VE5FP, for his article "Reflow Soldering for the Radio Amateur." Congratulations Jim!

==>
SOLAR UPDATE

Tad Cook, K7RA, reports: The past week had a single zero sunspot day, on Thursday, January 27. Activity came right back, but the average daily sunspot number for the week fell over 12 points to 20.1, and average daily solar flux declined 2.7 points to 80.8.

Predicted solar flux values for the next week are below the average for the previous seven days. Values forecast by NOAA/USAF for solar flux are 78 on February 3-8, 76 on February 9-10, then 80, 80 and 82 on February 11-13.

Predicted A index on February 3-5 is 15, 8 and 8, followed by 5 for February 6-28.

Look for more information on the ARRL website on Friday, February 4. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>.

==> THIS WEEK ON THE RADIO

This week:

- February 4 -- NCCC Sprint Ladder
- February 5 -- Minnesota QSO Party; FYBO Winter QRP Sprint; AGCW Straight Key Party
- February 5-6 -- Delaware QSO Party; 10-10 International Winter Contest (SSB); British Columbia QSO Party; Mexico RTTY International Contest; YL-ISSB QSO Party (CW); EPC WW DX Contest
- February 5-7 -- Vermont QSO Party
- February 6 -- North American Sprint (CW)
- February 8 -- ARS Spartan Sprint
- February 9 -- NAQCC Straight Key/Bug Sprint
- February 9-10 -- CWops Mini-CWT Test

Next week:

- February 12 -- Asia-Pacific Spring Sprint
- February 12 -- FISTS Winter Sprint
- February 12-13 -- Dutch PACC Contest
- February 12-13 -- New Hampshire QSO Party
- February 12-13 -- CQ WW RTTY WPX Contest
- February 12-13 -- SARL Field Day Contest
- February 13 -- North American Sprint, SSB
- February 14-18 -- School Club Roundup

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- February 5 -- ARRL South Carolina Section Convention <http://www.arrl.org/hamfests/south-carolina-section-convention-1>, North Charleston, South Carolina; ARRL Virginia State Convention <http://www.arrl.org/hamfests/virginia-state-convention-frostfest-2011>, Richmond, Virginia
- February 11-13 -- ARRL Southeastern Division Convention <http://www.arrl.org/hamfests/southeastern-division-convention-orlando-hamcation>, Orlando, Florida
- February 18-19 -- ARRL Arizona State Convention <http://www.arrl.org/hamfests/arizona-state-convention-yuma-hamfest-emergency-preparedness-show>, Yuma, Arizona
- February 26 -- ARRL Vermont State Convention <http://www.arrl.org/hamfests/vermont-state-convention-ham-con-1>, Colchester, Vermont

To find a convention or hamfest near you, click here <http://www.arrl.org/hamfests>.

Amateur Radio Newsline(tm) Report 1747 - February 4 2011

Amateur Radio Newsline report number 1747 with a release date of
Friday, February 4, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. The mass media claims ham radio is part of
the uprising in Egypt but is it? Also ARISSAT-1 is now safely on the
International Space Station, Australian hams keep emergency channels
open for Cyclone Yasi and lots of action from the FCC. Find out the
details on Amateur Radio Newsline(tm)report number 1747 coming your way
right now. (Billboard Cart Here)

**

RADIO AND POLITICS: HAM RADIO AND THE EGYPT UPRISING

The mass media claims that ham radio has been an information channel
out of Egypt during the uprising against President Hosni Mubarak, while
others are not so sure. But the media still seems to be jumping in
without any way to confirm its stories on ham radios involvement.
Amateur Radio Newsline's Norm Seeley, KI7UP, is here with what we know
and what we can only surmise:

--

Once you spend the time to vette all these stories of ham radio
involvement in Egypt you realize not a one of them can be true.

First off, most reports are credited to unspecified hams or websites
around the world. Not one callsign or name has been attached to any
report so that it can be verified.

Second, if there were Egyptian hams on the air, it would be their
neighbor hams in Israel and the world's "Big Gun DX Super-Stations,"
rather than Joe Ham with his dipole and 100 watt transceiver hearing
them. But to date nobody has heard one word from any of the worlds
well known DX'ers or the Israeli amateur radio community. That in
itself is more than enough to make a reporter suspicious.

As we said, all reports so far have been rumors, most coming from
websites sympathetic to the Egyptian people who are demonstrating. And
some do claim that unnamed hams in their group have heard reports
transmitted in Morse code of conditions in Cairo and elsewhere. Reports
that at the time were impossible to confirm since Egyptian President
Hosni Mubarak had banned all news reporting out of that nation
including the pro-Arab Al Jazerra News Network. News reporting that

has since been partially restored.

But lets take this a step further. If you bother to look up a listing of hams licensed by the Egyptian government, the total is only about two dozen. Someone may claim a Morse message posted on a website sympathetic to the plight of the Egyptian people was delivered by ham radio, but if here are people transmitting from Egypt it's more likely to be that nations equivalent of unlicensed Freebanders than a person holding a valid SU prefix callsign. If there are stations sending reports in Morse, there is a far better chance that it's some fool in New York City, London or Paris taking advantage of the situation than a station in Cairo, Alexandria or Giza risking his or her life.

Of coarse for the moment we freely admit that this is all conjecture, but ask yourself this. If there were valid ham radio stations on the air from Cairo or anywhere in Egypt, who would be the ones hearing them? The answer as we said is the hams next door in Israel who have to be listening in because they can hear just about any signal coming out of Egypt. Also, the multi-million dollar DX and contest stations world wide can usually hear a pin drop on the other side of the world when band conditions are good. But with High Frequency band conditions in the doldrums, even for the very best of competition grade DX station installations would have little chance that any of the reported transmissions come from Egypt, if they exist at all.

For the Amateur Radio Newsline, I'm Norm Seeley, reporting what little is known from Scottsdale, Arizona.

--

One problem with ham radio is that most people who know how to use it in Egypt were probably trained by the military and may be opposed to the protests. Others may be wary of transmitting because they are worried about who might be listening.

The bottom line: It won't be until this uprising is over

that we might find out if ham radio really played any part

in the information flow out of Egypt. That is, if we ever

really do, find out.

(Various sources)

**

HAM RADIO IN SPACE: ARISSAT-1 NOW ON THE ISS

ARISSAT-1 is now safely on board the International Space Station and is being made ready for deployment.

The new ham radio bird made its trip to the I-S-S on-board a Russian Soyuz-U rocket carrying a Progress cargo vehicle that was launched from the Baikonur Cosmodrome in Kazakhstan. The Progress main cargo was

fuel, oxygen, food and other supplies for the space station. It docked with the space station at 8:39 Central Standard Time on Saturday, January 29th.

ARISSAT-1 is scheduled to be hand-launched during a spacewalk on February 16th. It features a new software defined transponder that will allow simultaneous FM, CW and BPSK transmissions on 2 meters. It also carries a traditional Mode U/V transponder that uses 70 centimeters as an uplink and 2 meters down to hams on the ground.

More information on ARISSAT-1 is available at the AMSAT North America website. It's in cyberspace at tinyurl.com/78nmh. (ANS, ARISSAT)

**

RESCUE RADIO: AUSTRALIAN HAMS READY FOR CYCLONE YASI

Australian hams have been keeping in touch via High Frequency radio and keeping a vital link alive during the passage of one of the more fierce and expansive tropical cyclones to hit the North East coast of Australia in recent times. Amateur Radio Newsline's Bruce Tennent, K6PZW, has the details:

--

Severe tropical cyclone Yasi, named by the Regional Specialist Meteorological Center at Nadi, Fiji, tracked from its breeding ground east of Vanuatu to make landfall on Australias far North Queensland Coast, during late Wednesday, February 2nd.

According to a report from Gavin Reibelt, VK4ZZ, in Townsville, North Queensland, the storm system was so vast that it affected communities along a 900 kilometer stretch of coast from Cooktown to Mackay and 500 kilometers inland to the cities of Croydon, Richmond, Charters Towers and Clermont.

A storm surge forecast of between 3 and 5 meters along with high seas forced the evacuation of many coastal facilities such as nursing homes, caravan parks and low lying residential areas.

VK4ZZ says that a massive effort on Tuesday February 1st was undertaken at construction sites, business areas, government centres, tourist facilities and farms to secure everything to prevent the incidence of flying debris during the onset of hurricane force winds.

Schools in most areas affected were closed on Wednesday and Thursday, with only those not damaged by the passage of Yasi scheduled to reopen on Friday.

VK4ZZ says that while making sure that their families and houses were safe, radio amateurs within the warning area and across the country kept in touch via HF Radio. They kept a listening watch on Queensland WICEN frequency of 7.075 MHz and regular contact via the morning Gnarly Net on 3.600 MHz and the afternoon Friendly Net on 7.115 MHz. These

regular contacts kept the communication lines open just in case the well engineered cyclone rated commercial telecommunication networks failed. Operators also maintained operations on VHF and UHF during the phenomenal weather conditions.

A number of Radio Amateurs who are members of the Australian Defense Force have been involved with flood relief operations during the previous weeks. VK4ZZ says that they are now assisting with the relief effort following the passage of tropical cyclone Yasi.

For the Amateur Radio Newsline, Im Bruce Tennant, K6PZW, in Los Angeles.

--

Radio Amateurs living in the disaster area are now picking up the pieces, getting their stations back up and running as the cyclone season in Northern Australia is not over until the end of April and there might be another call to action during the months ahead. (VK4ZZ)

**

RESCUED RADIO RELIC: ANTIQUE RADIO FOUND IN VK FLOOD DEBRIS

Still from down-under, Radio 4BC in Brisbane along with The Toowoomba Chronicle say that among the tones of flood debris, Lockyer Valley resident Howard Reck thinks he has stumbled across someone's family heirloom. Three days after the region was hit by floodwater, Reck found what he believed to be a World War II or Korean War antique radio, 30 kilometres downstream from Grantham.

peaking on 4BC he explained how it looked like one of those big units seen in the Mash TV show, but has a Polish name engraved at same stage on the rear of the metal cabinet. If you are the item's rightful owner, and can provide information about its special markings, contact Chronicle reporter Anthea Gleeson by e-mail to anthea (dot) Gleeson (at) thechronicle (dot) com (dot) au.

**

RESCUE RADIO: HAM RADIO VS. THE SHOWS OF 2011

--
AUDIO: CHIPPING ICE
--

That's the sound of one Amateur Radio Operator trying to clear a path on his driveway so he can head down to the local Emergency Operations Center. Hams from Texas to New England were put on alert this week as a massive winter storm swept across the country covering everything with 2 inches of ice and nearly two feet of snow. Chicago, Michigan and Northern Indiana got over 20 inches of snow in 24 hours as blizzard conditions made travel difficult. Thousands were left without power for several days as crews repaired power lines pulled down by the weight of

ice and strong winter winds.

Amateur radio operators reported bent antenna elements and high S-W-R from the thick ice coating as they began to report local storm damage to various Emergency Operations Centers.

In Chicago, hours after the snow stopped falling traffic ground to a halt. The iconic Lake Shore drive had over 200 cars, trucks and buses stuck and abandoned.

Across central Indiana and western Ohio a think layer of ice covered roads and sidewalks making travel almost impossible. Most schools and business were closed as State Emergency Management Officials asked residents to "just stay home".

By the weekend, temperatures continued to drop and most people found it impossible to chip or scrape they way clear of the think icy build up.

--
Audio: Scraping
--

Winter weary residents are just hoping for an early spring.

Reporting for Amateur Radio Newsline, this is Jack Parker, W8ISH.

RESCUE RADIO: FCC TAKES ANOTHER STEP TOWARD NATIONWIDE INTEROPERABLE RADIO SYSTEM

The Federal Communications Commission has adopted a Third Report and Order and Fourth Further Notice of Proposed Rulemaking that it says will significantly advance communications interoperability for our Nation's first responders. Amateur Radio Newsline's Mark Abramovich, NT3V, is here with the details:

--

The rules adopted and those proposed in the January 25th Order and Fourth Further Notice of Proposed Rulemaking support the build out of robust, dedicated and secure mobile broadband networks specifically for rescue radio service. The FCC says that these will enable public safety

broadband users to share information, videos, photos and emails across departments and jurisdictions nationwide for day-to-day operations and during large-scale emergencies.

The Order and Fourth Further Notice of Proposed Rulemaking requires all 700 MHz public safety mobile broadband networks to use a common air interface called Long Term Evolution or LTE. This to support roaming and interoperable communications, The NPRM seeks comment on additional rules to enable nationwide interoperability.

The FCC says that its action builds on the technical requirements that state and local 700 MHz broadband waiver recipients are already subject to in the early buildout of their regional public safety broadband networks.

The Fourth Further Notice of Proposed Rulemaking seeks public comment on, among other things the architectural vision of the network; the effectiveness of open standards; interconnectivity between networks; network robustness and resiliency along with several other key points. The deadlines for public comments and reply comments on the Fourth Further Notice of Proposed Rulemaking are 45 days and 75 days, respectively, after publication in the Federal Registry.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

More on this one as a downloadable Word file is at tinyurl.com/interoperableradio (FCC, CGC)

**

RESCUE RADIO: FCC SEEKS COMMENTS ON ARIEL COMMUNICATIONS ARCHITECTURES

The FCC's Public Safety and Homeland Security Bureau is seeking comment regarding the creation of low-altitude aerial telecommunications architectures. Ones that are accessible, reliable, resilient, cost-effective and secure. They also have to be systems which are capable of providing public safety and emergency response personnel the capability to communicate during the critical restoration period after a major disaster over a multitude of communications platforms. These might include High Frequency, UHF and VHF two-way radio, cellular telephones, the Internet, and satellite circuits.

Specifically being looked at are such aerial telecommunications architectures such as unmanned aerial vehicles or balloon mounted or unmounted systems. These are believed to be communications platforms that can be rapidly deployed to an area within the first few hours after major natural disasters or terrorist attacks. As such, the Public Safety and Homeland Security Bureau is seeking comment on the means of coordinating and managing such solutions before and during deployment, what public safety agencies may be involved in the

operations of such systems or those who own communications operations that may be adversely impacted by such systems.

This inquiry has been designated as PS Docket No. 11-15. Interested parties may file comments to it on or before February 28th. More details on PS Docket No. 11-15 is on line also as a downloadable Word file at tinyurl.com/4agoxg2

(FCC, CGC)

**

ENFORCEMENT: UNLICENSED CALIFORNIA BROADCASTER WARNED OFF THE AIR BY FCC

The Los Angeles Office of the Federal Communications Commission has issued a Notice of Unlicensed Operation to Robert Gwynne of Covina, California. This, after confirming that an unlicensed broadcast radio station on 107.9 MHz was allegedly operating from his residence.

According to the FCC, its records show that no license was issued for operation of a broadcast station at this location on 107.9 MHz in Covina, California. Based on this the regulatory agency told Gwynne in its January 12th notification that this unlicensed operation must be discontinued immediately.

The FCC also warned Gwynne that the operation of radio transmitting equipment without a valid radio station authorization constitutes a violation of the Federal law. As such it could subject the operator of an illegal station to severe penalties, including fines, seizure of transmitting equipment and criminal sanctions including imprisonment. (FCC)

**

ENFORCEMENT: FCC CITES COMPANY OVER SALE OF CELLPHONE JAMMERS

The FCC has issued an Official Citation to DeadlyDeal.com. This based on allegations that between August 25, 2008 and January 16, 2010 the company offered for sale a cellular telephone jamming device called the Blocker.

While DeadlyDeal.com says that it no longer offers these devices to its clientel, the FCC states that even the manufacturing or importation of such units to United States shores is a direct violation of its rules. This is because jamming devices cannot be certified or authorized because the main purpose of a jamming device is to block or interfere with radio communications.

In its communication the FCC warns DeadlyDeal.com that if after receipt of the Citation that should the company violate the Communications Act or the FCC's Rules that the regulatory agency can impose monetary forfeitures of up to $16,000 for each such violation or each day of a continuing violation and up to $112,500 for any single act or failure

to act. In addition, violations of the Communications Act or the Rules can result in seizure of equipment as well as criminal sanctions, including time behind prison bars.

Deadly Deal was given 30 days following the Janyary 26th date of the Citations release to respond either through a personal interview at the closest FCC office, or by filing a written statement with the agency.

**

RADIO ON THE WEB: WWW.RADIOSHACKCATALOGS.COM

Want to spend some time strolling vicariously through the history of the electronics retailing? Now you can thanks to a website called RadioShackCatalogs.com.

The site contains catalogs for the company that date all the way back to 1939. Each one is animated in a way that a click of your mouse lets you turn the pages or zoom in to see that special part ofd item that evokes a memory of days gone by. The site also has the complete history of the company along with the story of how in 1963, Charles Tandy purchased Radio Shack Corporation when it was on the verge of bankruptcy for only $300,000 and built it into the mega corporation it is today.

Whether or not you are a fan of Radio Shack you will likely get a thrill of this trip back in time. You will find it at www.RadioShackCatalogs.com on the World Wide Web. (K3MSB)

**

NAMES IN THE NEWS: RADIO RECORD OF 2317 KM ON 2.4 GHZ ACROSS THE TASMAN SEA

A new distance record has been set between Steve Hayman, ZL1TPH, and Adrian Pollock, VK4OX. This for the first trans-Tasman Sea contact on 13 Centimeters over a path of 2317 Kilometers. That's 1439 miles on a band considered totally line of sight.

ZL1TPH lives in Orewa, New Zealand. He was running 80 to 100 watts at the feed of a 1 meter dish. VK4OX was in Bald Knob, Queensland, Australia pushing only about 20 watts to the feed of a 24 dBi Gridpack antenna about 9 meters off the ground.

Only a few years ago a contact such as this would likely not have been possible. Today's technology has made it so. (ZL4PLM via ZL2BHF)

**

NAMES IN THE NEWS: W2UDT NAMED ARRL HUDSON DIV VICE DIRECTOR

ARRL President Kay Craigie, N3KN, has appointed William Hudzik, W2UDT, of Gillette, New Jersey, to serve as Vice Director of the League's Hudson Division for the remainder of the current term that expires January 1, 2013.

Hudzik is a Senior Engineering Aide and Project Manager for Morris County, New Jersey. His wife Maryann is Morris County Superior Court judge.

Hudzik fills the vacancy created when Frank Fallon, N2FF, retired from the ARRL Board of Directors after more than 14 years of service. As reported last week, ARRL Hudson Division Vice Director, Joyce Birmingham, KA2ANF, assumed the Director position when Fallon tendered his resignation from the post. (ARRL)

**

NAMES IN THE NEWS: 741 QSL CARDS SO FAR TO CELEBRATE W0GFQ 100TH BIRTHDAY - MORE WANTED

And Quarter Century Wireless Association President Bob Roske, N0UF, reports that as of February 2nd, the request to have hams worldwide send 100th birthday greeting QSL cards to World Radio Labs founder Leo Meyerson, W0GFQ, has so far brought 741 responses from the amateur radio community. Meyerson who celebrates his personal centenary later this month will have this event celebrated on February 24th by QCWA Chapter 154 in West Palm Springs, California. If you have not done so already, please take a moment, write the words Happy Birthday Leo, and mail it to Leo Meyerson, W0GFQ, 19 Park Lane, Rancho Mirage, California, 92270. We are 100 percent certain that Leo will enjoy hearing from you. (N0UF)

EMERGING TECHNOLOGY: VIDEO DNA MAY PUT AN END TO MOVIE PIRACY

Video pirates beware. A new system called Video DNA may land you behind prison bars. Amateur Radio Newsline's Frank Haas, KB4T, has more:

--

Three Israeli researchers have come up with what they believe to be a sure fire way to end video piracy. Dr. Alex Bronstein working with his twin brother Michael and Israeli researcher Proffessor Ron Kimmel, has developed a way of treating video footage like DNA.

Dr. Bronstein who is with of Tel Aviv University's Department of Electrical Engineering says that it is not only members of the animal and plant kingdom that can have DNA. He says if a DNA test can identify

and catch criminals, his group believes that a similar code might be applicable to video. Then if the code were copied and changed, it would be obvious to law enforcement.

As video does not have a real genetic code like members of the animal kingdom, Dr. Bronstein and his team created a DNA equivalent that can be applied to video files. The result is a unique DNA fingerprint for each individual movie anywhere on the planet. When scenes are altered, colors changed, or film is bootlegged on a camera at the movie theatre, the film can be tracked and traced on the Internet. And says Dr. Bronstein, like the films, the video thieves themselves can be tracked and caught.

I'm Frank Haas, KB4T.

--

If the entertainment industry adopts this new video DNA codeing, it could mean that a lot of video pirate could eventually be looking at the world from the other side of prison bars. (adapted from Science Daily)

EMERGING TECHNOLOGY: SMARTER ID TAGS THAT USE LESS ENERGY

Researcher Bjorn Nilsson's research has developed a system that makes RFID tagging technology even more effective and more energy efficient. Nillson has come up with a new protocol or rules for communication between readers and tags that use less energy and permit reader unit batteries last longer. This means that it is now possible to produce simpler and cheaper tags.

Today's active tags have been relatively limited since they have been energy-consuming and expensive to produce. There has long been a demand for more energy efficient tags with a longer lifespan. There's also the quirk that if multiple tags pass a reader at the same time, it might be that all tags are not read. But with Nilsson's protocol tags cannot interrupt one another leading to greater accuracy.

The next step is to develop an active tag with a single circuit and Nilsson is already working on this. Together with his colleague Emil Nilsson at Halmstad University, he is running a project where Bj"rn's job is to see to it that readers and tags communicate with each other, while Emil is developing the electronics to make it all more efficient.

RFID tags are found on numerous items in a great number of different areas where someone wants to trace, identify, and store information. Its believed that industries such as logistics, transportation, and animal husbandry can be made considerably more efficient with the aid of Nillsson's more modern tags. (VHF Reflector, KB9TVD)

EMERGING TECHNOLOGY: THE VALUE OF SCIENCE IN THE PUBLIC RYE

Still with emerging technology, most US citizens value the nation's scientific achievements, but unlike most scientists, they often pick and choose which scientific findings they agree with. This, according to a recent survey conducted by the famed Pew Research Center.

The center conducted the wide-ranging telephone survey in collaboration with the American Association for the Advancement of Science. The research included responses from 2,533 scientists in the American Association for the Advancement of Science, and 2,001 public respondents.

Among the findings it was noted that while nearly 9 out of 10 scientists accept the idea of evolution by natural selection, only a third of the public does. And while 84 percent of scientists say the Earth is getting warmer because of human activity, less than half of the public agrees with that. Also, although 27 percent of Americans said scientific advances are the nation's greatest achievement, that was down from 47 percent in the group's May 1999 survey.

According to the survey, most scientists and the public agree it is appropriate for scientists to take part in political debate over issues such as stem cell research. And even Americans who disagree with scientific conclusions think highly of scientists. (Adapted from Science OnLine)

RADIO IN SPACE: THE NEW LONG WAVELEGNTH ARRAY

Whats being termed as an innovative new radio telescope array is now under construction in central New Mexico. One that will eventually harness the power of more than 13,000 antennas and provide a fresh eye to the sky.

This antenna farm will form what is being called the Long Wavelength Array. This is a radio telescope designed to survey the sky from horizon to horizon over a wide range of frequencies in the High Frequency spectrum from 20 to 80 MHz.

The first station in the Long Wavelength Array, with 256 antennas, is scheduled to start surveying the sky by this summer. When complete, the entire system will consist of 53 station locations, with a total of 13,000 antennas strategically placed in an area nearly 248 miles in diameter.

The overall receiving system is expected to provide sensitive, high-resolution images of a region of the sky hundreds of times larger than that of a full moon. Investigators believe that these images could reveal radio signals coming from planets outside our solar system, and thus would turn out to be a new way to detect these worlds. In addition to planets, the telescope will hopefully reveal a host of other cosmic phenomena.

The University of New Mexico is the lead researcher in this project,. NASA's Jet Propulsion Laboratory in Pasadena, California is providing the advanced digital electronic systems, which represent a major component of the observatory. (Adapted from Space Daily)

ON THE AIR: W4H CELEBRATES THE 6th ANNUAL GREAT HAMFEST OF THE NORTH

On the air, members of the Caribbean Amateur Radio Group have activated the special event call W4H and will be on the air with it through February 11th. This, as part of the 6th Great Hamfest of the North, which was to be held on Sunday, February 6th at the Coliseum of the city of Hatillo, Puerto Rico. Modes being used are RTTY, PSK31 and SSTV. QSL information is on line at QRZ.com (WP3GW}

**

DX

In DX, KA1YMX stroke 8 P will be active from Barbados while on vacation between February 26th and March 5th. His operation will be on CW and SSB using an Elecraft K 2. No other details are available. QSL via his home callsign.

G3RWF will be active as 5X1NH from Fort Portal in western Uganda between February 20th and April 14th. He prefers to operate CW but plans to also be on the Digital modes with some SSB on all bands except 160 meters QSL via his home callsign or electronically using Logbook of the World.

Finally, PE1KL and PA2LS will be operational as 9G5LK near the village of Ampenyi, Ghana between April 28th and May 6th. Their activity will be on 80 through 10 meters using SSB, PSK31 and RTTY. QSL via PA2LS.

(Above from various DX news sources)

THAT FINAL ITEM: SPAM BROADBAND MESSAGE BLOWS UP SUICIDE TERRORIST

And finally this week, proof positive that spam e-mail to a cellular telephone can be deadly. This is especially true if you happen to be a negligent terrorist with little knowledge of radio. Amateur Radio Newsline's Bill Pasternak, WA6ITF, is in our Newsroom with the rather bizarre details:

--

What Russia's security calls a "Black Widow" suicide bomber who was apparently planning a terrorist attack in central Moscow on New Year's Eve was killed before she could blow herself up. This after an unexpected text message set off her bomb too early. The unnamed woman is thought to have been part of the same group that recently struck Moscow's Domodedovo airport. She apparently intended to detonate a suicide belt in a busy area near Red Square on New Year's Eve in an

attack that could have killed hundreds. But security sources believe a spam message from her mobile phone operator wishing her a happy new year received just hours before the planned attack triggered her suicide belt, killing her but nobody else. According to the UK newspaper the Telegraph, the woman was at her Moscow safe house at the time getting ready with two accomplices. Both of them survived and were seen fleeing the scene. The newspaper says that Islamist terrorists in Russia often use cheap unused wireless mobile phones as detonators. The phones are usually kept switched off until the very last minute. But in this case, Russian security sources believe the terrorists were negligent and left this one turned on. That carelessness on the terror group's part likely saved many, many innocent lives.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.
--
According to the newspaper, Russian security sources believe the new year's eve bomber and the airport bombers may have been members of a suicide squad trained in al-Qaeda strongholds in Pakistan and sent to the Russian capital last December to target the city's transportation system. (UK Telegraph)

Mark hates Robeson. Stalked him for years and made fun of Robeson's Special Needs daughter's death.
Mark Morgan once opined that Steve's wife should have had an abortion before his Special Needs daughter was even born.
Mark even made light of the fact that Steve held his beloved little daughter as she took her last breath.
Mark Morgan is a cruel person. He himself is dysfunctional...cannot decide if he is gay, bisexual, or what. It is a shame that Mark's mom did not destroy HIM while he was still in her womb.
And Mark's wife is equally as dysfunctional. She is also bisexual, by Mark's own posts.
And she is a self proclaimed, practicing Witch to boot.
And the fact that Steve is a Major in the military reserves seems to rankle Mark.
Mark, who has claimed to be everything from a Colonel to a Lieutenant in the National Guard has no proof of his claims. (Mark once stated that he was drafted into the Army as a Colonel)
There are no records that show that Mark Morgan ever served in any of the military services.
So what did liar Mark do? He falsely claimed that the Govt. allowed him to serve under a different name for secrecy reasons.
Mark Morgan is delusional. Mark lives in his own fantasy world. He is a liar.

Mark offered to give them blowjobs for the cost of a glass of wine.
Meanwhile, Gav was outside in the parking lot, communing with the "energies"
that the barrier stones were giving off.

Somehow that fits together...Gav talking to stones...and Mark being of
little more intellect than a stone...

URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

==> + AMATEUR RADIO AND THE LAW : MIXED DECISION FROM THE CALIFORNIA
COURT OF APPEALS IN PALMDALE, CALIFORNIA ANTENNA CASE

On January 27, the California Court of Appeals, Second Appellate
District, issued its Opinion in the antenna case of Alec Zubarau, WB6X.
In several respects, it is a win for Amateur Radio in California;
however, the Court decreed that Zubarau was not entitled to his HF
antenna, and said that his vertical antenna would suffice as a
substitute for it.
```

The Court found that the Palmdale antenna ordinance, as it pertained to the height limit for vertical antennas, was "unenforceable" because it allowed a radio amateur to have a vertical antenna up to 75 feet high when measured from the ground but limited the "active element of the antenna array" to 30 feet. The ordinance did not define "array" or "active element" and did not specify from where the 30 permitted feet for such "array" was to be measured. The Court found that if even one reasonable interpretation of the ordinance could be found, the ordinance could be upheld, but that in this case, no one could understand what the limitations were and how they could be applied. That portion of the City's ordinance was therefore unconstitutional and unenforceable. Read more here <http://www.arrl.org/news/mixed-decision-from-the-california-court-of-appeals-in-palmdale-california-antenna-case>.

==> + BOARD OF DIRECTORS: ARRL BOARD SETS LEGISLATIVE AGENDA AT 2011 ANNUAL MEETING

The ARRL Board of Directors held its 2011 Annual Meeting January 21-22, 2011 in Windsor, Connecticut, under the chairmanship of President Kay Craigie, N3KN. At the meeting, the Board set the legislative agenda for the current Congressional session, approved the 2011 operating plan, looked at the benefits of electronic publishing of ARRL periodicals and more. Read more here <http://www.arrl.org/news/arrl-board-sets-legislative-agenda-at-2011-annual-meeting>.

==> + ON THE AIR: THE ARRL INTERNATIONAL DX CW CONTEST IS JUST ONE WEEK AWAY!

The weekend of February 19-20 is prime time for CW DXing as the 2011 ARRL International DX CW Contest <http://www.arrl.org/arrl-dx> takes to the airwaves. According to ARRL Contest Branch Manager Sean Kutzko, KX9X, stations in the US and Canada work only DX stations -- Alaska and Hawaii are considered DX for this contest -- and DX stations only work the US and Canada. DX stations will be trying to make QSOs with all US states and Canadian provinces. The contest exchange is simple: US and Canadian stations send a signal report and their state or province, while DX stations send a signal report and the amount of power they are transmitting with. Read more here <http://www.arrl.org/news/the-arrl-international-dx-cw-contest-is-just-one-week-away>.

==> + AMATEUR RADIO IN SPACE: ARISSAT-1 TO BE DEPLOYED FROM ISS NEXT WEEK; WATCH LIVE ON NASA TV

Expedition 26 Flight Engineers Dmitry Kondratyev and Oleg Skripochka, RN3FU, will step outside the International Space Station (ISS) on Wednesday, February 16. While in space, they will install and retrieve experiments on the Russian segment of the complex and deploy ARISSat-1 <http://www.arrl.org/amateur-radio-on-the-international-space-station>, a small ham radio satellite. NASA TV coverage will begin at 6:45 AM (CST), while the extra-vehicular activity -- commonly called a

spacewalk -- will begin about 30 minutes later. The spacewalk will be the second for Kondratyev, who will wear the spacesuit marked with red stripes, and the third for Skripochka, who will wear the suit with blue stripes.

During the nearly six hour spacewalk, Kondratyev and Skripochka will deploy an experiment called ARISSat-1, a boxy 57-pound nanosatellite that houses congratulatory messages commemorating the 50th anniversary of Yuri Gagarin's launch to become the first human in space. The ham radio transmitter will enable communications with Amateur Radio operators around the world for three to six months. It is the first of a series of educational satellites being developed in a partnership with the Radio Amateur Satellite Corp, the NASA Office of Education International Space Station National Lab Project, the Amateur Radio on the International Space Station (ARISS <http://www.rac.ca/ariss/oindex.htm/>) program and RSC-Energia.

The two cosmonauts will also install two experiments: One will collect information useful in seismic forecasts and earthquake predictions, and the second will look at gamma splashes and optical radiation during terrestrial lightning and thunderstorms. The spacewalkers also will retrieve a pair of panels exposed to space as part of an experiment to identify the best materials for building long-duration spacecraft.

You can watch live online <http://www.nasa.gov/multimedia/nasatv/index.html> on the NASA TV Public and Media channels, or on your television set. Contact your local provider for the NASA TV channel in your area. -- Thanks to NASA for the information

==> FCC: FCC ADDS NEW COUNTRY TO CEPT RECIPROCAL AGREEMENT FOR AMATEURS

On Monday, February 7, the FCC released a Public Notice, adding a new country to the CEPT reciprocal operating arrangements for US citizens who hold an FCC-issued General, Advanced or Amateur Extra class Amateur Radio licenses. US hams may now operate in Montenegro, as well as the other countries covered by the European Conference of Postal and Telecommunications Administrations (CEPT), subject to the regulations in force in the country visited, to operate in those countries. CEPT has also set up Web sites that list all countries covered by reciprocal agreements. Read more here <http://www.arrl.org/news/fcc-adds-new-country-to-cept-reciprocal-agreement-for-amateurs>.

==> + GET READY FOR THE MARCH ISSUE OF QST!

The March issue of QST -- our annual antenna issue! -- is jam-packed with all sorts of things that today's Amateur Radio operator needs. >From product reviews to experiments to contesting -- including antennas you can build yourself as well as a guide to buying your first commercial HF antenna -- this issue of QST has something for just about everyone.

With a multitude of articles on antennas -- ranging from antennas for HF, VHF and even antennas for hams with limited space, you are sure to find something to fit your needs. In his article "A Four Wire Steerable V Beam for 10 through 40 Meters," Sam Moore, NX5Z, shows how you can put a strong signal across the upper HF spectrum just where you want it. And if you're into the low bands? If your property doesn't have space for Beverages, check out "A Roof Mount for a Rotatable 160 Meter Receiving Loop" by Steve Lawrence, WB6RSE. And now that your antennas are up in the air, how do you make sure that they are tuned correctly? Check out "Using a Noise Bridge and Spectrum Scope to Adjust Your Antenna Tuner" by Walter G. Mellish, KC2KZJ, to learn how to measure and adjust your antenna without putting a signal on the air.

Amateur Radio has long been a partner on airplane and hot air balloon flights. But what about hang gliding? Join Bill Schell, W4UHE, and get the hang of operating while gliding in "Hang Gliding with Ham Radio." With all of today's social networking capabilities, conversation is a lost art. QST Editor Steve Ford, WB8IMY, takes a look at this in his article "The Art of Conversation." And speaking of conversation, many hams enjoy chatting on their local repeater system, but getting frequencies, offset and tone into VHF FM transceivers can be a challenge. In his article "Making Memories -- Programming Your Local Repeaters," Sumner Weisman, W1VIV, presents some ways to make this a bit easier.

ARRL Contributing Editor Rick Palm, K1CE, takes a look at the ICOM IC-80 handheld VHF transceiver and the ICOM IC-T70A handheld dual band transceiver in this month's Product Review. He calls the IC-80 a "rugged 2 meter handheld with attractive features for emergency communications, as well as daily use." In looking at the IC-T70A, Palm said this radio "is a solid dual band handheld transceiver that includes a wide range of features, yet is easy to operate." QST Contributing Editor Phil Salas, AD5X, checks out the Array Solutions VNA 2180 vector network analyzer. He says that it "brings powerful vector network analyzer capabilities to the home workshop. It harnesses the power of your computer for control and display functions, bringing the cost to a level comparable to surplus commercial equipment with unknown issues or accuracy."

Of course, there are the usual columns you know and expect in the March QST: Happenings, Hints & Kinks, The Doctor Is IN, How's DX, Technical Correspondence, Vintage Radio and more. Look for your March issue in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <https://www.arrl.org/join>.

==> FOCUS ON YOUTH: ARRL SEEKS NEW YOUTH EDITOR

The ARRL has a proud tradition of promoting youth involvement in Amateur Radio. One of the ways we involve young people is through our Youth Editor. This person is responsible for writing a monthly column for the ARRL website about youth and youth activities within the

Amateur Radio Service. We are looking for a new Youth Editor. Do you know of someone who would be a good fit for this position? Maybe they hold leadership positions either in their Section or in their local club. The candidate must be an ARRL member and must keep their membership current throughout their tenure in the position. He or she will be required to write a monthly column of at least 1000 words and provide a minimum of three pictures (with captions) for each. For this, they will receive a small stipend for each column. Read more here <http://www.arrl.org/news/arrl-seeks-new-youth-editor>.

==> HAPPY VALENTINE'S DAY: LOVE IS ON-THE-AIR

Every once in a while, we will feature a story written that has been sent to us by a ham. This is one of those times. We hope you enjoy it.

Life can be funny at times. In high school, I was one of those kids who kept to themselves. I was so into the academic side of things that I only went out with a few girls. But there was one girl in school who every time she walked by, my heart would skip a beat. I never saw her with a boyfriend; she was one of the prettiest girls in school and all the guys were too afraid to ask her out. In our senior year, we had a math and English class together, and when we graduated, I joined the Navy.

I saw the world in the Navy. I spent some time overseas and from time to time, I wondered about that beautiful girl who I never asked out in high school. I was too busy with my naval career to settle down, always on the move with Special Ops. I spent 25 years in the Navy and when I retired, I was ready for my next career. I had some radioman experience in the Navy, so I got my Amateur Radio license and started work at a major communications company.

Years later, I found myself at a hamfest, looking for some new radio gear. I saw this radio I wanted back when I was a kid. I saw a guy pick it up and start to look at it. I ran over to the booth and waited for him to put it back on the table. He finally walked away so I asked how much the radio was and if it worked. The lady behind the table looked at me, told me the price and that the rig worked the last time she used it. Then we locked eyes. It was her! The girl from high school! I would know her face anywhere.

After the shock wore off, I asked her if this was her gear for sale. She told me that it was hers and her late husband's. She got her license back in high school and met him at a local club meeting. She told me that they had been married for 23 wonderful years and had one child who was now in the Navy. We talked for hours. She told me that she had had a crush on me back in high school, but was too afraid to ask me out; I told her I felt the same. After the hamfest, I helped her pack up the table and we went to get a bite to eat.

We talked all night, getting caught up on everyone we went to school with. Then she asked me if I had ever thought of her over the years and

if I still had feelings for her. Of course I said yes! After a few dates, I asked her to marry me and she said yes.

We have now been married 10 years and I can honestly say that I married my high school sweetheart. I looked over my station logs and found that years ago I had worked her in a contest, but I never knew it was her. Oh, about the radio that started the whole thing -- yes, it works! -- Paul Rios, KC6QLS, kc6qls@arrl.net

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

Compiled by ARRL News Editor S. Khrystyne Keane, K1SFA

This feature is a concise monthly update of some of the things ARRL is doing on behalf of its members. This installment -- which covers the month of January -- looks at the ARRL Board of Directors 2011 Annual Meeting, legislative actions affecting the Amateur Radio Service, filings with the FCC over vanity and club call signs, reports from the Official Observer Desk and more. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-30>.

==> + RADIO CLUB D'HAITI RECEIVES REPEATER FROM ARRL AND RADIO CLUB DOMINICANO

As part of the relief efforts after the earthquake in Haiti, the ARRL -- through its Ham Aid Program -- with the help of IARU Region 2 and the Radio Club Dominicano (RCD <http://www.radioclubdominicano.com/>), delivered a Vertex VXR-7000 <http://www.vertexstandard.com/ap/vxr-7000.html> repeater to the Radio Club d'Haiti. This repeater, part of the original equipment sent by the ARRL during the devastating Haitian earthquakes in January 2010 <http://www.arrl.org/news/arrl-sends-ham-aid-equipment-to-haiti>, will help with radio communications coverage in that devastated nation. Both the Radio Club Dominicano and the Radio Club d'Haiti are IARU Member-Societies. Read more here <http://www.arrl.org/news/radio-club-d-haiti-receives-repeater-from-arrl-and-radio-club-dominicano>.

==> ARRL ATLANTIC DIVISION TO HOST TWO WEBINARS IN FEBRUARY

Periodically, the ARRL's Atlantic Division hosts a "webinar" -- an interactive web-based seminar, designed to facilitate communication between a small number of presenters and a large remote audience using the Internet. During February, Atlantic Division Director Bill Edgar, N3LLR, will host two webinars for ARRL members, one on 503(c)(3) organizations and one on using Narrow Band Emergency Messaging Software (NBEMS) -- a set of programs used to send messages and files via Amateur Radio using an audio interface. Read more here <http://www.arrl.org/news/arrl-atlantic-division-to-host-two-webinars-in-febr uary>.

==> SOLAR UPDATE

Tad "The Sun rose over the shadows <http://www.gardendigest.com/zen/above.htm>" Cook, K7RA, reports: Seven different sunspot groups were visible over the past week; the high sunspot number in the past seven days was 71 on Tuesday. The average daily sunspot number more than doubled, rising over 24 points to 44.3 and the average daily solar flux was up nearly three points to 83.5. 71 is the highest sunspot number since May 5, 2010, when it was 77. Coincidentally, both February 8, 2010 and February 8, 2011 had a sunspot number of 71, and between those dates it was never higher except for 77 on May 5. NOAA/USAF predicts solar flux for February 10-20 at 88, 86, 84, 82, 82, 82, 82, 84, 88, 88 and 88. They predict a constant planetary A index of 5 through the end of the month, then 7, 10, 10 and 7 on March 1-4. Even though NOAA sees a constant and quiet geomagnetic environment through the end of the month, Geophysical Institute Prague sees it a little differently for February 11-17. They predict quiet on February 11-12, quiet to unsettled February 13, unsettled February 14-16 and quiet to unsettled February 17. Look for more information on the ARRL website on Friday, February 11. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Michael P. Garofalo's Master Chang San Feng <http://www.gardendigest.com/zen/above.htm>.

==> AMATEUR RADIO FUN: NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL WEBSITE

Four new poll questions have just been published on the QuickStats page <http://www.arrl.org/quickstats> on the ARRL website. Let your voice be heard!

Questions in this month's QuickStats poll include:

- Do you own an eBook reader?
- What type of product do you most like to see evaluated in QST Product Reviews and Short Takes?
- Has the severe weather damaged your antennas?
- How often do you attend the meetings of your local Amateur Radio club?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure to bookmark it in your browser. Results from this QuickStats poll will be published in the May 2011 issue of QST on the QuickStats page, located in the rear advertising section of the magazine. Along with monthly poll results, QST QuickStats offers colorful charts and graphs that highlight interesting Amateur Radio statistics.

==> DXCC NEWS: DXCC DESK APPROVES 9X0SP RWANDA 2010 DXPEDITION

ARRL DXCC Manager Bill Moore, NC1L, reports that the 9X0SP 2010 DXpedition to Rwanda has been approved for DXCC credit. "If you had cards that were recently rejected for this operation, please send an e-mail <dxcc@arrl.org> to the ARRL DXCC Desk," Moore said. "Please note

that due to extremely heavy e-mail, DXCC staff may not respond to your message. Once your record is updated, results will appear in Logbook of The World (LoTW <https://p1k.arrl.org/lotwuser/default>) accounts or in the live, daily DXCC Standings <http://www.arrl.org/dxcc/>."

==> THIS WEEK ON THE RADIO

This week:

- February 12 -- Asia-Pacific Spring Sprint, FISTS Winter Sprint
- February 12-13 -- New Hampshire QSO Party, CQ WW RTTY WPX Contest, Dutch PACC Contest
- February 13 -- North American Sprint (SSB)
- February 14-18 -- School Club Roundup

Next week:

- February 18 -- NCCC Sprint Ladder
- February 18-19 -- Russian PSK WW Contest
- February 19 -- Feld Hell Sprint
- February 19-20 -- ARRL International DX Contest (CW) <http://www.arrl.org/arrl-dx>, AWA Amplitude Modulation QSO Party
- February 21 -- Run for the Bacon QRP Contest
- February 23 -- SKCC Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

It's california dude. They do as they damned well please.
Federal law says possession of marijuana is illegal, except in california.
Persons who cross the US border illegally are violating federal law, but
not in california.

http://www.arrl.org/news/mixed-decision-from-the-california-court-of-appeals-in-palmdale-california-antenna-case

Mixed Decision from the California Court of Appeals in Palmdale,
California Antenna Case
TAGS: court of appeals
02/08/2011

On January 27, 2011, the California Court of Appeals, Second Appellate
District, issued its Opinion in the antenna case of Alec Zubarau,
WB6X. In several respects, it is a win for Amateur Radio in
California. Working with his ARRL Volunteer Counsel, Len Shaffer,
WA6QHD, Mr Zubarau is now considering their next course of action.

The Court found that the Palmdale antenna ordinance, as it pertained
to the height limit for vertical antennas, was “unenforceable” because
it allowed a radio amateur to have a vertical antenna up to 75 feet
high when measured from the ground but limited the “active element of
the antenna array” to 30 feet. The ordinance did not define “array” or
“active element” and did not specify from where the 30 permitted feet
for such “array” was to be measured. The Court found that if even one
reasonable interpretation of the ordinance could be found, the
ordinance could be upheld, but that in this case, no one could
understand what the limitations were and how they could be applied.
That portion of the City’s ordinance was therefore unconstitutional
and unenforceable.

The Court also held that the ordinance was unenforceable to the extent
that it attempted to regulate radio frequency interference. The City
maintained that it could regulate RFI, but the Court, citing case law

and argument in ARRL Amicus Curiae brief, held that only the FCC could regulate RFI. Any State or municipal law that attempts to regulate RFI is preempted.

Of some concern to Len Shaffer, however, is that the Court held that Palmdale properly ordered Zubarau to remove his permitted 55-foot crankup tower. The Court opined that the small, VHF/UHF vertical on the roof constituted “reasonable accommodation” under PRB-1 and California PRB-1 statute (California Government Code Section 65850.3). The Court said that leaving Zubarau with a VHF/UHF antenna constituted a reasonable accommodation because it allowed him to be active in some part of Amateur Radio. There was no analysis of the “minimum practicable regulation” test in PRB-1 and the California statute, so that part of the three-prong PRB-1 test was left unexamined. Because the Court reversed the trial court on this finding, Zubarau had no longer clearly “substantially prevailed” in this case and so the Court remanded the case to the trial judge to re-examine the issue of attorney’s fees claimed by Zubarau.

The Court’s application of the “reasonable accommodation” standard of PRB-1 in this case is, in the view of Len Shaffer and ARRL, both unique and very narrow. Said ARRL General Counsel Chris Imlay, W3KD:

“While this decision is positive for Amateur Radio in California in two significant respects, the record in this case shows that the small, roof-mounted VHF/UHF antenna at WB6X was insufficient to conduct any international communications. Alec’s tower is necessary in order to conduct international communications and to permit even a 50/50 chance of contacting Alec’s native Belarus on any given day. The Court ignored this evidence and it did not apply the “reasonable accommodation” test articulated by FCC and in prior case law, and it did not apply PRB-1’s “least practicable restriction” test at all. In essence, the Court applied a balancing test which FCC and several Federal courts have said is improper in conducting the PRB-1 analysis. It is not true that any accommodation for a radio amateur is reasonable accommodation, and it is not sufficient to simply permit a radio amateur “some participation” in our avocation. Instead, PRB-1 permits effective, reliable Amateur communications. It is hoped that the Court will revisit this portion of its otherwise favorable decision and get it right the second time.”

The court made three decisions that affect amateurs in California. First the court found that part of the Palmdale ordinance was unconstitutional because it was vague and could not be understood by a reasonable person. That part of the ordinance allowed an Amateur to have a vertical antenna up to 75 feet high when measured from the ground but limited the “active element of the antenna array” to 30 feet in height. The court found that the ordinance did not define “array” or “active element” and did not say where the height of such array was measured from. After a number of questions were submitted regarding this ordinance, the court determined that no one could

really understand what it meant and declared it unconstitutional. This part of the decision, said ARRL Volunteer Counsel Shaffer, will affect only hams living in Palmdale.

The next issue decided by the court had to do with radio frequency interference. They said that only the Federal government could regulate RFI and any state or municipal law that tried to address it was preempted. That means it is not enforceable. That part of the decision affects hams throughout the state, according to Shaffer. He asks any California amateur whose municipality or county has an ordinance that limits Amateur Radio antennas or operations based on whether there is interference to consumer or other devices to contact Southwestern Division Vice Director Marty Woll, N6VI, at n6vi@arrl.org.

The final part of the decision had to do with whether Palmdale followed the law when they made Alec Zubarau take down his permitted tower but allowed him to keep a VHF/UHF vertical on his roof. The court said they thought this was a reasonable accommodation because it allowed him to be active in some part of Amateur Radio. “This decision is troubling,” said Shaffer, “and we are considering what options we may have regarding any further review of the issue. We will be conferring with various legal sources before any final determination is made.”

I think you'll find federal law makes it illegal there as well.
State law in California allows it, but federal law does not.

>Persons who cross the US border illegally are violating federal law, but
>not in california.

Even in California, the smuggler is violating both federal and
state law.

Amateur Radio Newsline(tm) Report 1748 - February 11 2011

Amateur Radio Newsline report number 1748 with a release date of
Friday, February 11, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. The FCC clears the way for President Obama
to become the first residential voice of a national test of the
Emergency Alert System, VK hams look back on Typhoon Yasi, a new
broadcast intruder on 40 meters, a mixed decision in a Palmdale
California tower and antenna case and a new method to create terahertz
waves. Find out the details on Amateur Radio Newsline(tm) report
number 1748 coming your way right now.

RESCUE RADIO: PRESIDENT TO TAKE PART IN FCC APPROVED EAS TEST

The President of the United States will soon be taking part in a
national test of the of the Emergency Alert System. We have more in
this report:

--

The Federal Communications Commission has taken the necessary action
help pave the way for the first-ever Presidential alert to be aired
across the United States on the Nation's Emergency Alert System. This
as the regulatory agency voted on February 3rd to adopt a Third Report
and Order that sets forth rules that will facilitate the federal
government's efforts to conduct a national E-A-S test by transmitting a
Presidential Alert from Washington, D.C. to television and radio
broadcasters, cable systems and satellite service providers who will
then deliver the alert to the American public.

The national test will require EAS participants to be part of the
exercise and to receive and transmit a live code that includes a
Presidential alert message to their respective viewers and listeners.
The FCC, FEMA and the Nation Weather Service, in coordination with
E-A-S participants, will work together to launch a nationwide public
education and awareness campaign. This will include press statements,
workshops, regional outreach, and television and radio public service
announcements. All will be targeted to consumers in general, and more
specifically to persons with disabilities and seniors, as well as first
responders and state, local and tribal governments. The outreach will
help ensure that the American public is aware that the national test

will be conducted and the benefits of these kinds of public alerts in a real emergency.

For the Amateur Radio Newsline, I'm Brucew Tennant, K6PZW, in Los Angeles.

--

The FCC adds that the national test will also help determine the reliability of the Emergency Alert System and its effectiveness in notifying the public of emergencies and potential danger, both nationwide and regionally. (FCC)

**

RESCUE RADIO: HAM RADIO AND CYCLONE YASI - A FOLLOW-UP

A follow up to least weeks story about Cyclone Yasi that was ravaging Ausatralia's North-East area just at about the time we went to air. Graham Kemp, VK4BB, of the W-I-A News is in Brisbane with an update on the storm and the part radio amateurs played:

--

Hams have been keeping in touch via HF radio and keeping a vital link alive during the passage of one of the more fierce and expansive severe tropical cyclones to hit the North East coast of Australia in recent times. The system was so vast that it affected communities along a 900km stretch of coast and 500km inland.

Whilst making sure that their families and houses were safe, radio amateurs within the warning area and across the country kept in touch via HF Radio with a listening watch on Queensland WICEN frequency 7075 kHz and regular contact via the morning Gnarly Net on 3600 kHz and the afternoon Friendly Net on 7115 kHz. This regular contact has kept the communication lines open. Some 40 cellphone sites were damaged and some 400 had low fuel reserves.

Townsville hams have been monitoring the local repeaters along with the Atherton Tablelands hams. Rockhampton hams are monitoring the local repeaters along with 7075kHz and 3600kHz and Cairns hams are doing this as well.

Radio Amateurs living in the disaster area are now picking up the pieces, getting their stations back up and running as the Cyclone Season in Northern Australia is not over until the end of April and there might be another call to action during the next few months ahead.

For the Amateur Radio Newsline, I'm Graham Kemp, VK4BB, of the WIA News in Australia.

--

Also assisting are some 120 Queensland, Tasmanian and Victorian State Emergency Service personnel. They have headed north to assist with the

Cyclone Yasi recovery effort. (WIA News)

INTRUDER WATCH: VOICE OF RUSSIA ON 7.2 MHZ

Another broadcast interloper has shown up 40 meters. DJ9KR reports via the IARU Region 1 website that a station identified as the Voice of Russia has been heard on the exclusive Amateur Radio frequency 7 point 200 MHz. The report says that since February 1st, the Voice of Russia is transmitting programs in Russian language with high power and is causing very harmful interference to the amateur radio service all around the globe.

The location of the transmitter has been pegged at being in or near the Russian city of St. Petersburg. The transmissions are from 0800 to 1500 UTC.

Hams around the world are being asked to write their nations ham radio intruder watch coordinator and to ask that body to file a formal complaint with Russian telecommunications authorities. Ham radio has an exclusive allocation for 7 dot 0 to 7 point 2 MHz and no one other than hams are supposed to be heard in that frequency range. (IARU Region 1)

**

HAM RADIO IN SPACE: ARISSAT-1 READY FOR DEPLOYMENT

Hams world-wide are awaiting the deployment of ARISSat-1 ham radio satellite. This, from the ISS during a space walk slated for February 16th.

NASA will cover the event on NASA Select TV. Unfortunately, there has not been a final time during the launch spacewalk when the deployment of ARISSat-1 will occur.

Mealtime the ARISSat team says that it continuing to work on the arissat1 dot org website and adding information as its available. People can also follow ARISSat on Twitter as @Arissat1. (WA4SXM, ANS)

HAM RADIO AND SCOUTING: ARRL & BSA TIE KNOT IN MOU

The American Radio Relay League and the Boy Scouts of America have officially tied the knot of cooperation between the two groups. Amateur Radio Newsline welcomes Michael Grebert, KJ4ZZV who has the details:

--

After working together for nearly a century to provide Scouts with the ability to learn radio communication skills, Boy Scouts of America and the American Radio Relay League have officially teamed up by signing a memorandum of understanding. This document designates the ARRL as a key resource for K2BSA and Radio Merit Badge training at the BSA National Scout Jamboree and establishes the ARRL as the go-to source for Scouts interested in learning about and becoming involved in radio communication.

In addition to its National Scout Jamboree involvement, ARRL will continue to promote participation in the annual Jamboree on the Air event. ARRL will also serve as contributing editor to the Radio Merit Badge publication, will assist with the review, creation and modification of requirements as necessary, and will assist in developing course material, lesson plans, and other resources for teaching the Radio Merit Badge to Scouts. ARRL also will contribute to the content of the Electricity, Electronics, and Emergency Preparedness and Communications merit badge publications.

As its part of this strategic alliance, the Boy Scouts of America will encourage Scouts and Scouters to become familiar with opportunities for public and community service. It will also foster learning and personal growth through involvement in Amateur Radio.

For the Amateur Radio Newsline, I'm Michael Grebert, KJ4ZZV, reporting from Music City, Nashville, Tennessee.

--

Boy Scouts of America Chief Scout Executive Bob Mazzuca and ARRL President Kay Craigie , N3KN, launched the partnership by holding a truly unique wireless communications meeting. Mazzuca joined Craigie virtually during an Internet video conference and document-signing ceremony. From separate locations, the pair also took the opportunity to talk about the importance of each organization to the ongoing development of the other. (ARRL, BSA)

**

RADIO LAW: MIXED DECISION IN PALMDALE CA ANTENNA CASE

It's a mixed decision in a Palmdale California Appellate court antenna and tower case ruling. This as the California Court of Appeals hands down its ruling in the matter of Alec Zubarau, WB6X versus the City of Palmdale.

The court made three decisions that affect Amateurs in California. First it found that part of the Palmdale ordinance was unconstitutional because it was vague and could not be understood by a reasonable

person. That part of the ordinance allowed an Amateur to have a vertical antenna up to 75 feet high when measured from the ground but limited the "active element of the antenna array" to 30 feet in height.

The court found that the ordinance did not define "array" or "active element" and did not say where the height of such array was measured from. After a number of questions were submitted regarding this ordinance, the court determined that no one could really understand what it meant and declared it unconstitutional. ARRL Volunteer Counsel Len Shaffer, WA6QHD, says that this part of the decision will affect only hams living in Palmdale.

The next issue decided by the court had to do with radio frequency interference. They said that only the Federal government could regulate RFI and any state or municipal law that tried to address it was preempted. That means it is not enforceable. Shaffer says that part of the decision affects hams throughout the state Shafer asks any California amateur whose municipality or county has an ordinance that limits Amateur Radio antennas or operations based on whether there is interference to consumer or other devices to contact Southwestern Division Vice-Director Marty Woll via e-mail at n6vi@arrl.org.

The final part of the decision had to do with whether Palmdale followed the law when they made Alec Zubarau take down his permitted tower but allowed him to keep a VHF/UHF vertical on his roof. The court said they thought this was a reasonable accommodation because it allowed him to be active in some part of amateur radio.

On this point Shaffer says that the decision is troubling. He says that he and his client are considering what options they may have regarding any further review of the issue. Shaffer adds that he will be conferring with various legal sources before any final determination is made. (N6VI)

RADIO OOPS: CELL COMPANY INSTALLS TOWER ON PRIVATE FRONT LAWN IN MOUNT SINAI, NY According to news reports a cellular telephone provider apparently crossed the line when without permission it installed a tower and antenna on the front lawn of a private home in Mount Sinai, New York.

Town resident Lori DiMarco told news reporters that she and her family were horrified when they walked out of their house and found that a cell tower had been constructed under the cover of darkness on their front lawn.

Also appalled was Town Of Brookhaven Highway Superintendent John Rouse. He termed the action by NextG Networks as being the height of corporate arrogance. Rouse said that if he has to get in a truck himself and take it down, it's coming down. And as a show of force, Rouse brought out a town bucket truck and threatened to rip down the mast and antenna if the company that installed it doesn't remove it within the next

several days.

In a statement, NextG admitted they installed the tower without the proper permits. It said that it sincerely apologizes to the DiMarco family and a pledge to do it's best to ensure that this does not happen again. However in the same statement, NextG also complained the town was taking too long to review its cell tower applications.

The company says it will take the tower down. As we go to air its unknown if the DiMarco family or the town are planning any legal action against NextG.

More on this bizarre story is on line at several websites including www.wsbt.com/news/wpix-cell-fight,0,7995185.story (Published news reports)

HAM RADIO ON THE BOOKSHELF: WE BE BIG - A BOOK ABOUT BROADCASTING AND HAM RADIO

A new book from a couple of New York Times bestselling authors who are also nationally-syndicated broadcast personalities will offer readers unprecedented exposure to the hobby of amateur radio.

"We Be Big" from Thomas Nelson Publishers is the autobiography of Rick Burgess and Bill "Bubba" Bussey, whose morning radio show is heard in over fifty cities across America as well as on XM satellite radio. The team has previously published several books that landed near the top on the New York Times bestseller list. Their highly successful Rick and Bubba Show feature their down-home view on life in a spirited and fun presentation.

The amateur radio connection comes from several angles. Fitst, Bill "Bubba" Bussey is a longtime active ham radio operator. He holds an Advanced class license and the call sign KJ4JJ. He cites amateur radio as one influence that led to a career in broadcast engineering, ownership, and on-the-air success. Bussey talks in the book about how he came to the hobby at an early age and has been active ever since. He also often discusses the amateur radio on the show.

Additionally, "We Be Big" was co-written with the help of national-bestselling author Don Keith, who also happens to be an active amateur radio enthusiast. Keith holds an Amateur Extra class license and his call sign is N4KC, and has been licensed for almost fifty years.

Keith has over twenty books in print, both fiction and nonfiction, and writes on subjects such as college athletics, broadcasting, submarines, and World War II history. N4KC was also a long-time broadcaster, twice named Billboard Magazine's "Broadcast Personality of the Year."

Publication date for "We Be Big" is scheduled for March 22nd. Pre-orders are being accepted by many booksellers nationwide. (Press

Release)

THE CHANGING OF THE GUARD: NEW MEXICO BROADCASTER GARY DIAMOND, K5FSB - S.K.

The man who at one time was the youngest radio amateur in the state of New Mexico and then went on to an illustrious career in broadcasting has become a silent key. This, with the sad news that Gary Diamond, K5FSB, passed away at an Albuquerque hospice care center at the age of 62.

As those in the broadcast industry are aware, Gary Diamond had a long and distinguished career in Albuquerque radio and television. He graduated from Del Norte High School in 1966 and from the University of

New Mexico in 1971. He began his on-air career as a disk jockey for KARA, KQEO, and other radio stations in the Duke City where among other things he became well known for his lively drive time shows. Gary earned the respect of his colleagues and audiences through his comprehensive technical wisdom as well as his broad knowledge of musical artists in all genres.

But Gary's real love was for the technical side of broadcasting and he ultimately gave up his on the air gigs to become an engineer for KOAT Channel 7 and KRKE Channel 13. He eventually achieved his lifelong dream when he was hired as Chief Engineer for station KOB. Following his retirement he went on to become a respected broadcasting consulting engineer across the great American South-West.

Gary Diamond was a member of the Society of Radio Engineers and the Upper Rio FM Society. The latter is an organization dedicated to promoting amateur radio in New Mexico. In addition to his radio interests, K5FSB was a licensed pilot and a member of Aircraft Owners and Pilots Association.

A memorial for Gary was held at The First Unitarian Church in Albuquerque on February 5th. In lieu of flowers, donations in Gary Diamond's name can be made to National Kidney Foundation or American Diabetes Association. (ARNewsline(tm) with information provided by WA5WHN)

RADIO IN EDUCATION: ARRL ANNOUNCES TEACHERS INSTITUTE FOR 2011

The ARRL Education Services Department has announced the 2011 schedule for the Teachers Institute on Wireless Technology workshop. Offered through the ARRL's Education and Technology Program, the Teachers Institute is a four-day, expenses paid, in-residence learning opportunity. One that is designed for motivated teachers and other school staff who want to learn more about wireless technology and bring that knowledge to their students.

A variety of topics are covered during the workshop. These include basic wireless technology literacy, electronics, the science of radio, radio astronomy, how to bring space into the classroom, ham radio operation, introduction to microcontrollers and basic robotics.

While participants do not need to have an Amateur Radio license to attend the basic sessions, one is required for the advanced session called TI-2 Space. This training experience is sponsored by the Dayton Amateur Radio Association with the curriculum focusing on the nuts and bolts of setting up and operating a satellite ground station. This in turn serves as excellent preparatory training ground for a scheduled contact with the ISS through the Amateur Radio on the International Space Station program.

Dates of the Institute are July 11th to the 14th with applications due no later than May 15th. Full information and applications are on-line at the Leagues website Its in cyberspace at www dot arrl dot org. (ARRL, ANS)

**

WORLDBEAT: BBC TO CUT BACK FOREIGN LANGUAGE BROADCASTS

The British Broadcasting Corporation has confirmed plans to cease five of its 32 World Service language transmissions. According to the GB2RS News, the Macedonian, Albanian and Serbian services will be the first axed, as will English for the Caribbean and Portuguese for Africa.

The World Service will also eliminate short wave transmission of six more language services in March. These will be Hindi, Indonesian, Kyrgyz, Nepali, Swahili and the Great Lakes service for Rwanda and Burundi. (GB2RS)

**

ON THE AIR: THE ISLE OF TIENGEMTEN COMMERATIVE

On the air listen out for the special event callsign P-D-Zero-4-I-S-L-E. This station will be active throughout all of 2011 from the nature reserve on the Isle of Tiengemeten. QSL this one as directed by whomever you contract. (OPDX)

**

ON THE AIR: SOUTH AMERIUCAN LIGHTHOUSE WEEKEND

CE3FZL and possibly others will be operational as CE2C from the Faro, Cofradia Nautica del Pacifico, Algarrobo, during the South American Lighthouse Weekend that runs from February 25th to the 27th Activity will be on 40, 20, 15 and 10 meters. QSL direct to his QRZ.com address with 2 IRCs, or via the Bureau. No electronic QSL are being accepted for this one. (Press release)

**

ON THE AIR: CELEBRTING 50 YEARS OF KUWAIT INDEPENDENCE

And keep an ear open for amateur radio operators in Kuwait using the special prefix 9K50 through 28th February. This activity is to celebrate the 50th anniversary of Kuwait's independence. Also, 9K50NLD will be on the air between 24 and 28 February by members of the Kuwait Amateur Radio Society. QSL this one as directed on the air. (OPDX)

**

DX

In DX, a team of seven ham radio operators from Germany are activate Sao Tome Island as S9DX through February 17th. They have at least two stations on the air at all times using such modes as CW, SSB and RTTY

on 160 through 10 meters. A special emphasis is on the lower bands in CW and RTTY. QSLs via bureau or direct via DL1RTL.

DH1BL will be on the air as FH4VOS from Combani, Mayotte for the next three years. Lately he has been active on 20 meters using SSB. QSL his operation via DL7BC.

WD9DZV will be active as P40A from Aruba between March 8th through the 13th. His operations will be holiday style on most bands and modes. QSL via WD9DZV.

ZS6SIG has relocated to Nairobi, Kenya, and will be signing 5Z4EE for the next four years. He has announced that he will be in the CQWW WPX SSB Contest on March 26th and 27th as well as the ARRL DX CW Contest from February 19th to the 20th and ARRL DX SSB Contest on March 5th and 6th. Activity outside of the contests will be on all bands from 160 through 10 meters. QSL via NV7E or at the address shown for 5Z4EE on QRZ.com.

Lastly, KL7JR and WL7MY will both be be active portable HI3 from Hispaniola Island between March 1st and sometime in June. Their operation will be on 80 through 10 meters SSB using several different wire antennas from their beach location. QSL via KL7JR as listed on QRZ.com or in thee Callbook.

(Above from various DX news sources)

THAT FINAL ITEM: JILA ANNOUNCES A BEW SOURCE OF TERAHERTZ RADIATION

And finally this week, word that JILA researchers have developed a laser-based source of terahertz radiation that is unusually efficient and less prone to damage than similar systems. The technology might be useful in applications such as detecting trace gases or imaging weapons in security screening.

JILA is a joint institute of the National Institute of Standards and Technology and the University of Colorado at Boulder. Its technology is a new twist on a common terahertz wave source. That being a semiconductor surface patterned with metal electrodes and excited by ultrafast laser pulses.

An electric field is applied across the semiconductor while near-infrared pulses lasting about 70 quadrillionths of a second, produced 89 million times per second, dislodge electrons from the semiconductor. The electrons accelerate in the electric field and emit the terahertz waves.

Terahertz radiation which fall between the radio and optical bands of the electromagnetic spectrum have the ability to penetrate materials such as clothing and plastic but can be used to detect many substances that have unique absorption characteristics at these wavelengths. Terahertz systems are challenging to build because they require a blend

of electronic and optical technologies that are integrated to work together flawlessly. The complete story of this advancement in this technology is on line at tinyurl.com/terahertz. (NIST)

Sadly, this clown has worn out his attempts at humor.

His shtick is getting old and tiresome.

It was entertaining for a while, but now it is time to move on to something
a bit more, shall we say, creative?
Look, Jane, Look. See this story again?
Yes, Jane. It is boring.

The ARRL submitted a Petition for Reconsideration in the Matter of
Amendment of the Amateur Service Governing Vanity and Club Station
Callsigns. The ARRL asked for reconsideration of proposed limits on
club station callsigns and to consider addressing the apparent shortage
of available Class A callsigns.

The text of the Petition is available from the FCC's Electronic Comment
Filing System (ECFS):

http://fjallfoss.fcc.gov/ecfs/document/view?id=7021025735

==> + LEGISLATIVE NEWS: SPECTRUM MANAGEMENT BILL THREATENS AMATEUR
FREQUENCIES

On February 10, Representative Peter King (R-NY-3), Chairman of the
House Homeland Security Committee, introduced HR 607, the Broadband for
First Responders Act of 2011. The bill been referred to the House
Energy and Commerce Committee, which handles telecommunications
legislation. HR 607 addresses certain spectrum management issues,
including the creation and maintenance of a nationwide Public Safety
broadband network. As part of that network, the bill provides for the
allocation of the so-called "D-Block" of spectrum in the 700 MHz range
for Public Safety use.

The D-Block consists of two, 5 megahertz-wide segments of spectrum
(758-763 and 788-793 MHz) that became available when the FCC ended
analog television broadcasts in June 2009 and reallocated the 698-806
```

MHz band for Public Safety and commercial broadband. It was anticipated that the D-Block would be auctioned for commercial use. There are several bills in Congress providing for the allocation of the D-Block for Public Safety use, and HR 607 is one of those. But HR 607 uniquely provides for the reallocation of other spectrum for auction to commercial users, in order to offset the loss of revenue that would occur as the result of the allocation of the D-Block to Public Safety instead of commercial auction. HR 607 lists the paired bands of 420-440 MHz and 450-470 MHz among the bands to be reallocated for commercial auction within 10 years of its passage. Read more here <http://www.arrl.org/news/spectrum-management-bill-threatens-amateur-frequencies>.

==> + SPACEWEATHER : SUNSPOT 1158 PRODUCES LARGEST FLARE OF SOLAR CYCLE 24; CME HEADED TOWARD EARTH

Over the past few days, there has been a lot of activity on the Sun. On Sunday, February 13 at 1738 UTC, sunspot 1158 unleashed an M6.6-level blast and on Tuesday, February 15, the same sunspot unleashed an X-class flare, the strongest solar flare in more than four years. On Thursday, February 17, the solar flux index reached 114, the highest yet in Solar Cycle 24. It is expected to continue to be at least 100 for the next few days.

The source of this activity is growing rapidly. Sunspot 1158 is in the Sun's southern hemisphere, which has been lagging behind the northern hemisphere in activity for Solar Cycle 24. This active region is now more than 100,000 km wide, with at least a dozen Earth-sized dark cores in the group. More Earth-directed eruptions are likely.

In addition to flashing Earth with UV radiation, data from NASA's Solar Terrestrial Relations Observatory (STEREO) and its Solar Heliospheric Observatory (SOHO) show that the explosion also hurled a coronal mass ejection (CME) toward Earth. According to the Space Weather Prediction Center (SWPC), three CMEs are headed toward Earth. The last of the three seems to be the fastest and may catch both of the forerunners about mid- to late day on Thursday, February 17.

Solar activity is expected to be moderate with a chance for an isolated major flare through February 19. Sunspot group 1158 is expected to produce more M-class flares and still has the potential for producing an M5 or greater x-ray event. There is also a chance for isolated M-class activity from sunspot group 1161. Geomagnetic storms are possible when the CME hits the Earth's magnetic field, and auroras are possible. Read more here <http://www.arrl.org/news/sunspot-1158-produces-largest-flare-of-solar-cycle-24-cme-headed-toward-earth>.

==> + AMATEUR RADIO IN SPACE: ARISSAT-1 DEPLOYMENT POSTPONED

According to the AMSAT News Service, the deployment of the ARISSat-1 satellite from the International Space Station -- previously scheduled

for Wednesday, February 16 -- has been postponed. The postponement was necessary because of changes in the work schedule for the February 16 space walk. Instead, ARISSat-1 deployment will be added to a spacewalk scheduled for July 2011.

When launched, ARISSat-1 will add another dimension to science classrooms worldwide, in addition to space communications for the Amateur Radio community. Unfortunately this delay will considerably narrow the window of opportunity for US school calendar activities, but may provide opportunities for summer learning activities.

The project is a cooperative effort between AMSAT, ARISS (Amateur Radio on the International Space Station,) RSC-Energia (the Russian space agency) and NASA. The design, development and construction of the satellite were done entirely by AMSAT volunteers. Original plans called for the satellite to be hosted inside an old Russian spacesuit. But when the suit became unavailable, the radio equipment was modified and refitted to a newly designed space frame and named ARISSat-1.

After it is deployed from the International Space Station, ARISSat-1 is expected to be operational in orbit for up to six months. For more on ARISSat-1, check out this article
<http://www.arrl.org/files/file/ARISS/Get%20Ready%20for%20ARISSat-1-QST%20Feb%202011.pdf>
from the February 2011 issue of QST.

==> + DAYTON HAMVENTION : ASTRONAUT DOUG WHEELOCK, KF5BOC, TO BE HONORED GUEST OF ARRL AND AMSAT

Doug Wheelock, KF5BOC, will be attending the 2011 ARRL EXPO - part of the Dayton Hamvention® -- as a special guest of the ARRL and AMSAT. While at Hamvention, Wheelock will share his experiences about using Amateur Radio in space. Wheelock spent six months on the ISS, seven weeks as ISS Commander; while on board the ISS, he, along with fellow astronaut Shannon Walker, KD5DXB, participated in the Amateur Radio on the International Space Station (ARISS) program. Together, the two made 22 ISS-to-school and ISS-to-camp QSOs. Read more here <http://www.arrl.org/news/astronaut-doug-wheelock-kf5boc-to-be-guest-of-arrl-and-amsat-at-hamvention>.

==> + ROCKERS WITH HAM CONNECTION WIN BIG AT GRAMMYS

One of the biggest prizes handed out during the February 13 Grammy awards went to rockers Arcade Fire. Their highly acclaimed album The Suburbs was crowned Album of the Year. While Arcade Fire's win was a surprise -- facing competition from Eminem, Lady Antebellum, Lady Gaga and Katy Perry -- it wasn't totally unexpected, as The Suburbs dominated many critics' best-of lists of 2010.

Arcade Fire's Win Butler was visibly stunned as the group accepted their trophy and then quickly rushed to perform the last song of the night. Band members Win and Will Butler are the grandsons of the late

orchestra leader Alvino Rey, W6UK.

The song We Used to Wait from their winning album relates to communications and, during their concert performances of the song, the band displays images of Amateur Radio QSL cards. Arcade Fire was profiled in an article by ARRL Media and Public Relations Manager Allen Pitts, W1AGP, in the November 2010 issue of QST.

==> QEX -- THE MARCH/APRIL 2011 ISSUE

The March/April issue of QEX is coming soon, and it is full of theoretical and practical technical articles that you won't want to miss. QEX is the ARRL's "Forum for Communications Experimenters." Published bimonthly, it features technical articles, columns and other items of interest to radio amateurs and communications professionals. The mission of QEX is threefold: To provide a medium for the exchange of ideas and information among Amateur Radio experimenters; to document advanced technical work in the Amateur Radio field, and to support efforts to advance the state of the Amateur Radio art. Read more here <http://www.arrl.org/news/qex-the-march-april-2011-issue>.

==> + ARRL ATLANTIC DIVISION TO HOST TWO WEBINARS IN FEBRUARY

Periodically, the ARRL's Atlantic Division hosts a "webinar" -- an interactive web-based seminar, designed to facilitate communication between a small number of presenters and a large remote audience using the Internet. During February, Atlantic Division Director Bill Edgar, N3LLR, will host two webinars for ARRL members, one on 501(c)(3) organizations and one on using Narrow Band Emergency Messaging Software (NBEMS) -- a set of programs used to send messages and files via Amateur Radio using an audio interface. Read more here <http://www.arrl.org/news/arrl-atlantic-division-to-host-two-webinars-in-febr uary>.

==> ARRL HEADQUARTERS TO CLOSE IN OBSERVANCE OF PRESIDENTS' DAY

ARRL Headquarters will be closed in observance of Presidents' Day on Monday, February 21. There will be no W1AW bulletin or code practice transmissions <http://www.arrl.org/w1aw-operating-schedule> that day. ARRL Headquarters will reopen Tuesday, February 22 at 8 AM Eastern Standard Time. We wish everyone a safe Presidents' Day holiday.

==> SOLAR UPDATE

Tad "The glory of the departing Sun piled up masses of gold and burning fire" Cook, K7RA, reports: A dramatic surge in solar activity is underway, with a level of sunspot numbers and solar flux not seen since 2005-2006. Tuesday's sunspot number of 100 has not been observed since April 6, 2006 when it was 105. On Wednesday the solar flux was 114.1, and the last time it was that high was September 15, 2005 when it was 119.4. The average daily sunspot numbers rose this week by more than 25 points to 69.9, and the average daily solar flux was up 20 points to 103.5. NOAA/USAF predicts solar flux at 105 on February

17-18, 100 on February 19-21, 98 on February 22-24 and 80 on February 25-28. The planetary A index is predicted at 18, 25 and 12 on February 17-19 and 5 on February 20-28. Look for more information on the ARRL website on Friday, February 18. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Charles Dickens' The Old Curiosity Shop.

==> ARRL FIELD DAY: 2011 FIELD DAY PACKETS AVAILABLE

It's that time of year again -- time to start gearing up for ARRL Field Day, June 25-26, 2011! ARRL's flagship operating event -- always held the fourth full weekend in June -- brings together new and experienced hams for 24 hours of operating fun. Field Day packets are now available for download <http://www.arrl.org/files/file/Field-Day/2011/2011_FD_Packet.pdf>and include the complete rules (including a change for 2011), as well as other reference items such as forms, ARRL Section abbreviation list, entry submission instructions, a Frequently Asked Questions section, guidelines for getting bonus points, instructions for GOTA stations and a kit to publicize your event with the local press. Read more here <http://www.arrl.org/news/2011-field-day-packet-now-available>.

==> THIS WEEK ON THE RADIO

This week:

- February 18 -- NCCC Sprint Ladder
- February 18-19 -- Russian PSK WW Contest
- February 19 -- Feld Hell Sprint
- February 19-20 -- ARRL International DX Contest (CW) <http://www.arrl.org/arrl-dx>, AWA Amplitude Modulation QSO Party
- February 21 -- Run for the Bacon QRP Contest
- February 23 -- SKCC Sprint

Next week:

- February 25 -- NCCC Sprint Ladder
- February 25-February 27 -- CQ 160 Meter Contest (SSB)
- February 26-27 -- Mississippi QSO Party; North American QSO Party (RTTY)
- February 27 -- High Speed Club CW Contest
- February 27-28 -- North Carolina QSO Party
- February 28 -- CQC Winter QSO Sprint
- March 1 -- AGCW YL-CW Party

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

Amateur Radio Newsline(tm) Report 1749 - February 18 2011

Amateur Radio Newsline report number 1749 with a release date of
Friday, February 18, 2011 to follow in 5-4-3-2-1. The following is a

Q-S-T. The deployment of ARISSAT One is delayed until this summer but
a test from inside the I-S-S shows that the bird should perform
flawlessly. Also, the Sun wakes up with a big flare on February 13th,
the United States recognizes reciprocal C-E-P-T licensing with
Montenegro, lots of enforcement news from the FCC and a cockroach may
soon be headed to the edge of space. Find out the details on Amateur
Radio Newsline(tm) report number 1749 coming your way right now.

HAM RADIO IN SPACE: ARISSAT-1 DEPLOYMET DELYED UNTIL JULY

A delay until this summer for the deployment of ARISSAT One from the
International Space Station. This as the Russian space station manager
RSC Energia announces the delay based on the work schedule of the
Cosmonauts and Astronauts during the upcoming space walk otherwise
known as an Extra Vehicular Activity or E-V-A.

On Wednesday, February 9th NASA had announced that E-V-A number 28 will
be broadcast live on NASA TV, starting at 1245 UTC on February 16th.
Included in the schedule posted by NASA was the deployment of ARISSAT
One.

On Thursday, February 10th Energia decided to have the crew do a
checkout of ARISSAT One to make certain that it had survived the trip
up on board the re-supply cargo flight that had carried it to its
temporary home on the I-S.S.. This test was not an event that was
previously scheduled and there was no public announcement of it made.
Instead, a message was sent to the I-S-S- crew to connect ARISSAT to
one of the external ham radio antennas, to turn it on and listen to it
on the Kenwood dual-bander normally used for ARISS school contacts.
During the test, Energia decided to keep the ARISSAT transmitter on
through to the next day after with the crew reported back that the
satellite was functioning flawlessly and it was ready to go off into
space on its own.

But that was not to be. On Friday, February 11th Energia management
announced that the deployment of the ARISSAT One satellite had been
removed from the schedule of events for E-V-A 28. This Energia said
was due to changes in the tasks associated with the work scheduled to

be performed during this spacewalk. Subsequently, Energia informed NASA that deployment of ARISSAT One will be added to E-V-A number 29. It's currently scheduled for sometime this coming July.

But the good news in all this is that ARISSAT One will likely work exactly as it was designed to once deployed on-orbit. Hams on the ground who heard ARISSAT One during the test period said its signal was definitely loud and clear.

(ANS, ARISSAT)

PROPAGATION: EARTH-DIRECTED SOLAR FLARE COMES OUR WAY

Has Mother Nature finally heard the prayers of hams worldwide? This may be the case as Old Sol unleashed Sunspot number 1158 at 17:58 UTC on Sunday, February 13th.

Sunspot 1158 is described as the strongest solar flare of the year so far. It was an M6.6-category blast. The eruption produced a loud blast of radio waves heard in shortwave receivers around the dayside of our Eaeth. NASA's Solar Dynamics Observatory recorded the intense flash as being of extreme ultraviolet radiation.

Preliminary data from the STEREO-A and SOHO observatories in space agree that the explosion produced a fast but not particularly bright coronal mass ejection. The actual cloud was predicted to hit our planets magnetic field on or about February 15th and held the potential to cause high latitude auroral displays.

At its initial peak also on February 15th the active region of this solar eruption was more than 100,000 km wide with at least a dozen Earth-sized dark cores scattered beneath its unstable magnetic canopy.

RADIO LAW: USA RECOGNIZES MONTENEGRO UNDER CEPT LICENSE

The FCC has added Montenegro as the latest nation that the United States recognizes in accord with the C-E-P-T reciprocal agreement for radio amateurs. Under the compact, US citizens who hold an FCC-issued General, Advanced or Amateur Extra class Amateur Radio licenses may now operate in Montenegro, as well as the other countries covered by the European Conference of Postal and Telecommunications Administrations This, subject to the regulations in force in the country visited, to operate in those countries. US amateurs with a General class license will be granted CEPT Novice Radio Amateur License privileges while those holding an Advanced or Amateur Extra class license will be granted CEPT Radio Amateur License privileges.

BREAKING DX NEWS: SABLE ISLNAND TEAM HOPES MARCH 7 - 15 WILL BE A

CHARM

The C Y Zero DXpedition team has set March 7th to the 15th as its target schedule to be on the air from Sable Island.

The operators plan to travel to Halifax, Nova Scotia, Canada on 5 March to take care of final logistics details in preparation for the charter flight to Sable on the 7th. The team says that it has maximized its personal schedules to be as flexible as possible to adapt to any potential weather delays. One change in operators has K8LEE replacing WA4DAN who had to withdraw due to business commitments.

As most listeners know, this will be the third try to make it to Sable with the previous attempts put on hold due to long term weather delays. The team leaders say that even weather will always be impossible to predict, they have been encouraged by several successful supply flights to Sable in the past month. Should they experience yet another weather delay, they hope to stay in Halifax in anticipation that the delay with be short term rather than an extensive one. In other words they will remain ready to go on a day-to-day basis for a period of time as the weather permits.

The website will be updated periodically as to the status and any potential impact on the planned activation date. Its in cyberspace at www.cy0dxpedition.com. We will have more DX news at the end of this week's Amateur Radio Newsline report.

ENFORCEMENT: FCC ENORCEMENT BUREAU AGREES TO POSTPONE K1MAN LICENSE RENEWAL HEARING

The FCC's Enforcement Bureau has agreed with Glenn Baxter, K1MAN, that the hearing on his license renewal should not go forward until the civil action to collect a $21,000 fine against the Maine radio amateur has been adjudicated.

In her February 10th filing to Chief Administrative Law Judge Richard Sippel, Enforcement Bureau Chief Michelle Ellison stated that the Bureau agrees with K1MAN that the proceeding in the matter of Baxter's pending license renewal should not be scheduled until the matter of the federal litigation to collect the fine has concluded.

She did however include one proviso. This being that the discovery aspect of the case continue per its schedule to provide for judicial economy and efficiency. Ellison says that this will permit the parties to move to trial as quickly as possible after a final decision in the federal collection action is reached.

(FCC)

**

ENFORCEMENT: $25000 NAL ISSUED TO UTAH U-NII OPERATOR

The FCC has issued a $25,000 Notice of Apparent Liability for Forfeiture and Order to Utah Broadband who the regulatory agency clams to be the operator of two Unlicensed National Information Infrastructure or U-NII transmission systems in Salt Lake City, Utah. This by operating intentional radiators not in accordance with Part 15 of the Rules and the devices Equipment Authorization.

In its February 11th release the FCC says that on October 5, 2010, FCC agents from the Enforcement Bureau's Denver and San Diego Offices, along with FAA personnel, used direction-finding techniques to locate emissions on the frequencies 5580 and 5640 MHz. On the following day, FCC and FAA personnel used those same techniques to confirm that the identified interference resulted from radio emissions emanating from a pair of transmission systems located on the rooftop of the Brody Chemical Building in Salt Lake City.

The FCC agents inspected the systems which were operated by Utah Broadband. Both U-NII systems utilized the modular transceiver model XtremeRange5, an intentional radiator manufactured by Ubiquiti Networks, Inc. The FCC Equipment Authorization for the Ubiquiti XtremeRange5 transceiver limits the device to operations within a frequency range of 5745 MHz to 5825 MHz. During the inspection the FCC agents observed that both were operating out of band. The FCC agents also observed, and Utah Broadband personnel acknowledged, that the required frequency assurance functionality of each transceiver was disabled. During the inspection, Utah Broadband adjusted the devices' operating frequencies to end any interference they were causing.

In assessing the $25,000 N-A-L the FCC says that based on the evidence before it the agency finds that Utah Broadband apparently willfully and repeatedly violated sections 301 and 302(b) of the Act, and sections 15.1(b) and 15.1(c) of the FCC's Rules, by operating intentional radiators in a manner not in compliance with the Part 15 Rules. Also doing so in a manner inconsistent with their Equipment Authorization and, consequently, without authorization.

Utah Broadband was given the customary 30 days to pay the N-A-L or to file an appeal.

**

ENFORCEMENT: FCC ISSUES $10000 NAL TO ALLEGED NJ UNLICENSED STATION

And the FCC has also issued a $10,000 Notice of Apparent Liability for Forfeiture to one Bernabe Moreno. This, for his alleged operation of an unlicensed radio transmitter on the frequency 102.3 MHz in Passaic, New Jersey.

On April 3 and April 7, 2010, in response to a complaint, agents of the Enforcement Bureau's New York Office used mobile direction-finding techniques to monitor the frequency 102.3 MHz in Passaic and determined the source of the transmissions to be a radio station operating from a building located on Passaic's Monroe Street. The agents observed an FM broadcast antenna on the roof of the building and a coaxial cable going from the antenna on the roof to the second floor of the building. The agents subsequently took field strength measurements and determined that the signals being broadcast exceeded the limits for operation under Part 15 of the Commission's rules and therefore required a license. A review of the Commission's records revealed no evidence of a Commission authorization for operation of a radio station on 102.3 MHz in the Passaic, New Jersey area.

On April 7, 2010, the agents returned to the building to conduct an inspection of the radio station and knocked on the door where they believed the station was located. The person who answered the door identified himself as Bernabe Moreno.

Moreno told the agents that he owns and operates the station on 102.3 MHz at this location. The agents observed that the station was active at the time of the inspection until Mr. Moreno turned off the transmitter at the agents' request. The agents then verbally warned Moreno about the consequences of continued operation of an unlicensed radio station and provided him with a written Notice of Unlicensed Operation, requiring him to permanently cease operation.

Now in its follow-up, the FCC has issued the $10,000 Notice of Apparent Liability to Moreno for operating the unlicensed station. Moreno was given the usual 30 days to pay or to file an appeal.

HAM HAPPENININGS: VISALIA DX CONVENTION TOP BAND DINNER

Turning to the ham radio social calendar, the 2011 Top-Band Dinner Banquet at the Visalia DX Convention is now open for reservations. This year's event will take place on Friday, April 15th, at 6:30 PM at the Holiday Inn, Visalia, California. This years program will be a presentation titled The Low Bands from VP8ORK South Orkneys. The cost is $37 per person. If you wish to attend, please send an E-mail with the number of reservations you would like along with your call, name and e-mail to wb6rse (at) mac (dot) com.

(WB6RSE)

**

HAM HAPPENINGS: IRTS AGM AND RALLYE IN LIMERICK MARCH 26-27

The Irish Radio Transmitting Society's Annual General Meeting weekend, including the Annual Dinner and Rally will be held on Saturday March 26th and Sunday March 27th. The event will be hosted by the Limerick Radio Club. The venue is the Radisson Blu Hotel in the city of Limerick. For more information contact, Ger McNamara EI4GXB by e-mail to ei4gxb (at) gmail (dot) com. And for those of you not aware, in Europe a rally is the same as a convention or large hamfest here in the USA.

NAMES IN THE NEWS: GEORGE TRANOS, N2GA, NAMED NEW CQ MAGZINE CONTEST EDITOR

Some names in the news. First up is George Tranos, N2GA, of Long Island, New York, who has been named the new Contesting Editor of CQ Amateur Radio magazine.

George Tranos comes to this position with over two decades of contesting experience in a variety of station settings, and has several top scores to his credit. Both as a single operator and as part of contesting teams. He has operated extensively from the Caribbean as well as from his home station in New York. He has been also been a referee at three World Radio Teamsport Championship competitions.

Professionally, N2GA is president of a software and management consulting firm, vice president of a school for professional motorcycle riders, and a freelance journalist. He is married to Diane Ortiz, K2DO, an accomplished contester herself and a former columnist for CQ Contest magazine during the 1990s.

Tranos succeeds John Dorr, K1AR, who stepped down after writing the magazine's contesting column for nearly 22 years. George Tranos' first column will appear in the March 2011 issue of CQ.
**

NAMES IN THE NEWS: WEATHER BRAINS AT AGE 5

And a well done to Alabama Meteorologist James Spann, W-Oh-4-W and the crew at Weather Brains. This, as the on-line show about the weather celebrates its 5th anniversary this month.

For those of you who never heard of Weather Brains, this is a weekly audio presentation delivered over the Internet that says it unites weather geeks worldwide. According to its website, the presenters do their best to cover the world of weather in a fun way, and believe that they have the best weather show on the web.

Each show generally runs 60 to 80 minutes. They are recorded on Monday nights and are usually available about midnight Monday nights Eastern Time. So far, W-Oh-4-W and his Weather Brains associates have produced over 200 shows and have never missed a week since the day they started.

You can hear a new show each week on-line at www dot weatherbrains dot com. And we add our own congratulations to the crew at Weather Brains

on a job well done.

**

WOLDBEAT: COMMEMORATING RADIO PRAGUE

Mike Barraclough reports that a special broadcast commemorating the end of Short Wave transmissions from Radio Prague is now available online. Included are two recordings from 1937 and two from 1968 along with an interview with Oldrich Cip, now head of the High Frequency Co-ordination Committee. Back in the 1960's he hosted the stations DX program in the 1960's using the stage name of Peter Skala. Also included are contributions from listeners. The show is on line at tinyurl.com/48pn5qd .

**

WORLDBEAT: NEW DUTCH CONTEST CLUB FORMED

A new Dutch amateur radio contest group has been born and located in the northwest part of the Noord-Holland Province. Its call sign is PA6NH with PA2PAC, PA3FUN, PA7TWO, PH9HB, PD1AIQ and PE1OPK as the charter members. Currently, their station setup consists of surplus Harris 590 receivers and Telefunken S2525 amplifiers, with Yaesu and ICOM equipment as backup. This new radiosporting team plans to participate in all the major contests as they come along. As a general rule, all QSOs will be uploaded electronically to the Logbook Of The World. The group invites you to checkout the PA6NH pictures on QRZ.com.

**

ON THE AIR: COMMEMORARTING THE LAST SWISS MEDIUM WAVE TRANSMITTER

On the air, members of Switzerland's Rav Radio Amateurs of Vaudios whose regular club call sign is HB9MM will activate the special callsign HE3OM from the town of Sottens during the month of February. Sottens is a small village where the last medium wave transmitter active in Switzerland was located. It ceased operation on December 31st, 2010.

Permission has now been granted to the club to use the stations two giant antennas for amateur radio purposes. The tallest is 188 meters high, and is being used on the High Frequency bands, especially the lower frequencies such as 160 and 80 meters. The somewhat smaller mast at 125 meters in height is connected to the VLF station transmitting on the 137 kHz amateur band.

QSL cards go to HE3OM via HB9TOB. For more details, see www (dot) hb9mm (dot) com/sottens

**

DX

In DX, the X-F-4 Revillagigedo DXpediton has been assigned callsign 4A4A. A team of 9 operators will take to the air from Isla Socorro March 4th to the 19th on 160 to 10 meters using CW, SSB and some digital modes. A possibility of 6 meters was also mentioned. More on line at www (dot) revillagigedo2011 (dot) com

ARRL DXCC Manager Bill Moore, NC1L, reports that the 9X0SP 2010 DXpedition to Rwanda has been approved for DXCC credit. If you have cards that were recently rejected for this operation, please send an e-mail to the ARRL DXCC Desk. Moore says that once your record is updated, results will appear in Logbook of The World accounts or in the live, daily DXCC Standing.

VK8NSB, VK8FNCY, 9M6DXX, 9M6XRO and MW0JRX will be operating from TImor-Leste in East Timor between September 16th and the 26th. The precise location will be Atauro Island, which is about 30 kilometers north of the capital, Dili. The group says that it is working closely with the Timor-Leste licensing authority and the DXpedition callsign will be announced soon. They will have three stations on all bands 10 - 160m using CW, SSB and RTTY. QSL information will be announced in a future news release.

Lastly, VK3FY is reporting on DX-World.Net he is hoping that the weather improves in the South China Seas so that he and his group can board the ship which will take four operators to Pag-Asa in the Spratly Islands. He notes that as this is a scouting trip, operating time on the island will be limited to a few hours to a maximum of three days. The time on the island will be utilized in taking pictures of prospective sites and time permitting getting D-X-Zero-D-X on the air

as a prelude to the planned April operation. QSL for this trip will be as per D-X-Zero-D-X via N-2-O-O.

**

THAT FINL ITEM: VK CLUBS TO LUNCH COCKROCH TO NEAR SPACE

And finally this week, two clubs down-under are joining forces to send a cockroach to the edge of space in a balloon aptly named Loki One. Yes, we said a cockroach as in those kind of disgusting bugs that nobody wants to find in their homes. Here's the rest of the story.

Norse mythology claims that Loki is the great mischief-maker. It's also the name of the edge of space balloon experiment that the Tamworth Radio Club members and Tamworth Oxley Scout members will be launching in the coming weeks.

The payload of Loki-1 includes APRS equipment for tracking and flight data; a camera set to take photo's at 1 minute intervals; sensors to record temp and radiation, some paper aircraft that will be dropped from a height of approx. 30 kilometres with information on them about the scout group and, of coarse, the previously mentioned cockroach.

The Tamworth radio club has installed 7 ground stations around the North West and New England regions of New South Wales. These will be used to receive APRS data from Loki-1 then transfer it to the internet for live tracking via the APRS network. It is expected that Loki-1 will reach an altitude of about 100,000 feet giving the craft a radio horizon of 700 kilometers.

As airspace is heavily regulated regarding its use, the flight planners say that negotiations are well in hand with Australia's airspace regulator the Civil Aviation Safety Authority as well as air traffic controllers. This, regarding a host of regulations that need to be complied with regarding the flight of the balloon through controlled air space which in Australia starts at various altitudes above ground depending on where you are, and extends right straight up to 60,000 feet. Most civilian jet aircraft cruise at an altitude between 25,000 and 40,000 feet. Non compliance with all the necessary regulations can carry severe penalties.

As to the welfare of the cockroach? Well nothing has been said if it will fly in a pressurized compartment or just have to take its chances as the balloon makes its way to the edge of space and back down to the ground. And at airtime there has not been any outcry of inhumane treatment of the bug from the Society for the Prevention of Cruelty to Cockroaches, if such a group even exists.

Up to date information on this high altitude balloon flight can be found on Tamworth Radio Club's web site under the topic of projects. It's in cyberspace at www.trci.org.au (Southgate, VK2BOZ and VK2YGV)

**

NEWSCAST CLOSE

The hearing on LB573, the Amber Flashing Lights for Storm Spotters Bill, was held this afternoon (Wednesday, February 16th) before the Transportation and Telecommunications Committee of the Nebraska Legislature. Three people testified in favor of the Bill and no one testified opposed.

Pat Gerdes, representing the Nebraska Association of Emergency Managers, gave very positive comments about hams and our support of emergency and public service activities. There was a representative from the Nebraska Association of County Officials (unfortunately, I did not get his name) who was also was very supportive. I testified as an individual in favor of the Bill.

The Senators posed many questions about how hams were deployed, how amber lights helped to protect them, as well as about issues of identification, training and certification.

The committee went into executive session after they received testimony. As soon as I hear anything more, I will send out an email.

73, Art KØAIZ

260. Ping Roger Wiseman, DeVry alumnus

Newsgroup: rec.radio.amateur.policy
Date: 2011-02-20 23:37:44 UTC
From: LEO <anon@anon>
Message-ID: <4fou55.7vc.17.1@news.alt.net>
Source record: 244631
Body handling: Inline uuencoded payload not displayed: biggrin.gif

Author: Stagger Lee
Subject: Ping Roger Wiseman, DeVry alumnus.

I said I'd get back to you Roger, and I've found your own posts about one Tom Wheeler, the author of a textbook you said you used in college. The book is titled "Electronic Communications for Technicians" and turns out to be one of those special texts originally written by the author for use in his own courses. That is to say, the text was initially used only by DeVry. Eventually, it was sold through Prentice Hall but never became a popular text (Amazon currently sells its paperback edition for around $87 and ranks it as #569,981 in its book section). See http://www.amazon.com/Electronic-Communications-Technicians-2nd-Wheeler/dp/0131130498 for proof.

Since the book was a local text for a time, and since you felt comfortable emailing the author of the book, I say that you already knew Tom Wheeler from taking a course taught by him, either in person or by correspondence through DeVry.

The post in which you claim the book as the text you used in a course is archived here:

http://groups.google.com/group/alt.sci.seti/msg/302246502cf4cbf2?hl=en&dmode=source

Also, in another Usenet post titled "THE SAD BUT TRUE STORY OF WOGER WISEMAN," the poster gives credible details of your life, including the statement that you took courses from DeVry Correspondence School at one point in time. The post can be found at

http://groups.google.com/group/alt.alien.vampire.flonk.flonk.flonk/msg/179ef4d1153ae2b5?hl=en&dmode=source

You, of course, lie about almost everything, so I don't expect you to admit to the truth of the preceding material. I just want it out there for future reference (this post has also been made to Usenet so that Google will archive it).

Have fun denying everything, Woger, and keep on digging that hole you've been working on for more than ten years. It looks as though your latest interaction with one "Sword Brethren" - a scary ex skinhead now affiliated with the racist "religion" its practitioners call Dual Seedline Christian Identity - may be your final undoing. Have a 'fraidy weekend.

Your old Usenet pal,
Stagger Lee

I just saw 64.136.27.229 (Roger) and 208.124.71.79 (Todd) both browsing this place, and both of them were using MSIE 8.0, except that Todd was on Windows Media Center and had a more recent version.

Don't the two of you know that there is an unpatched 0-day flaw in the Windows SMB system, as well as a critical flaw in IE8's mhtml system? The latter flaw was patched just last week, but the SMB problem remains. I could p0wn either one of you, but you both have enough problems at the moment.

Roger is hiding from someone he made a death threat against, and Todd is under court restriction for doing a very similar thing.

Lloyd, N0VFP is full of shit, just like that "Stagger Lee" idiot who got mail order college degrees from a diploma mill and tries to pretend he knows what he is talkinbg about. Ask him about the Marshall County WV, ARES website, he insisted that a similar county named ARES website was the one for the county in WV. The topic of the post was the Marshall county ARES website, as usual wannabe Lee got it wrong. Just like he insisted erroneously, that Eric Clapton wrote "Layla" for a ham's spouse, not Patty Boyd Harrison, which is common knowledge. Stagger Lee is a wealth on erroneous information, plagiarism, and lies. Lloyd is n0vfp@msn.com.
Saggytits Lee is Ace Ratshit, er, Ratliff., WH2T. Ratliff likes to mess around with little boys in his church congregation.

--
"FUCKUP Lee" <SLee@houston-hunks.com> geography idiot and imbecile
fucks up as usual when he thinks Marshall County, Alabama
and Marshall County, West Virginia are the same place in message
<afvsc2$6a...@pita.alt.net>:
" Then what is at http://www.geocities.com/skywarncanwarn/ doodle
brain? It sure looks like the Marshall County ARES, and it even has a place to
send email."

Fuckup Stagger Lee <SLee@houston-hunks.com> proves he's as ignorant of
music as he is in everything else when he utters the following
stupidity in <k8mn.is.a.god@houston-hunks.com>:
"Eric Clapton even wrote a song about Leila!"

271. Threat to 440 MHz Band

Newsgroup: rec.radio.amateur.policy
Date: 2011-02-23 21:01:00 UTC
From: ARRL Members Only Web site <memberlist@www.arrl.org>
Message-ID: <20110223133412.5EEB720837@bmail.arrl.org>
Source record: 244642
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.policy,rec.radio.info

This message is from Dan Henderson, N1ND, Regulatory Information Manager
at the ARRL.

As you may have read, Rep. Peter King (R-NY) has introduced the
"Broadband for First Responders Act of 2011" and the bill has been
assigned HR 607 as its number. The full story about the Bill's
introduction can be found on the ARRL web at

http://www.arrl.org/news/spectrum-management-bill-threatens-amateur-frequencies

As you will read, while the ARRL supports spectrum for the Public
Safety needs, we oppose HR 607 in its current form because of the
inclusion of the 420-440 MHz spectrum (most of the Amateur 70-cm UHF
allocation) as part of a spectrum swap.

At the request of ARRL President Kay Craigie, N3KN, we are asking ARRL
members to contact their local Representative asking them to oppose HR
607 in its current form. Members should be directed to
http://www.arrl.org/sample-letters for resources tools to assist them
in their letter writing. These include:

A sample letter opposing HR 607 in its current form
A link to the ARRL Webpage that gives the ARRL member the
contact information for their Members of Congress
A link to information sending their letters to our Washington
lobbyist to hand-deliver to Capitol Hill

A couple of key points to remember when discussing our opposition to HR
607:

We understand and support the principle that Public Safety and
First responders should have the D-Block frequencies.
Our opposition to the bill stems from the inclusion of the
420-440 MHZ Amateur allocation as part of the proposed "frequency
swap".

Time is of the essence on this request, as the bill is gathering steam
in Congress. So please make your membership contacts as soon as
possible. Finally, please include my address n1nd@arrl.org in what you
distribute to the ARRL membership (for our records here at HQ.)

Thanks for stepping up to the plate to assist with the direct threat to
our Amateur Radio spectrum. What you bring to the table helps us keep
this ship heading in the right direction. Please contact me if you
have any problems or questions with this request.

73

607

The ARRL is asking its members to contact their US representatives
in opposition to the sections of HR 607 <http://www.arrl.org/hr-607>
that could affect the Amateur Radio Service allocation at 420-440 MHz.
HR 607 -- The Broadband for First Responders Act of 2011 -- would
address certain spectrum management issues, including the creation and
maintenance of a nationwide Public Safety broadband network. It was
introduced
<http://www.arrl.org/news/spectrum-management-bill-threatens-amateur-frequenc
ies>
into the US House of Representatives February 10.
```

ARRL Regulatory Information Manager Dan Henderson, N1ND, clarified that the League opposes HR 607 in its present form. "We do not oppose the concept of dedicated spectrum for the development of a Public Safety infrastructure and wireless network. We object to the bill because of the inclusion of 420-440 MHz as part of the spectrum to be swapped and auctioned to commercial users." You can find a sample letter, "How to Find your Representative" and the contact information for ARRL's legislative consultant, Chwat & Co, here <http://www.arrl.org/sample-letters>.

==> + PUBLIC SERVICE: NEW ZEALAND AMATEURS ASSIST IN EARTHQUAKE'S AFTERMATH

<http://www.arrl.org/images/view/News/2011_Canterbury_earthquake_intensity.jpg>
A 6.3 magnitude earthquake struck the Canterbury region in New Zealand's South Island on Tuesday, February 22 at 12:51 PM local time (2351 on February 21 UTC). According to IARU Region 3 Disaster Communications Committee Chairman Jim Linton, VK3PC, 10 radio amateurs are using their two emergency broadcast vans to keep rescue teams and Civil Defense staff in touch. One is at a major welfare center, providing portable communication so they can talk to Civil Defense, and the other vehicle is on its way to assist search-and-rescue teams in an area where communication is poor . Read more here <http://www.arrl.org/news/new-zealand-amateurs-assist-in-earthquake-s-aftermath>.

==> + WRC-12 : AMATEUR MF ALLOCATION MOVES A STEP CLOSER

Amateur Radio has moved a step closer to a medium frequency (MF) allocation below the AM broadcast band. During the first week of the Conference Preparatory Meeting (CPM) for the 2012 World Radiocommunication Conference (WRC-12) of the International Telecommunication Union, held in Geneva February 14-25, delegates completed the drafting of nine pages of analysis of the technical and regulatory issues related to WRC-12 Agenda Item 1.23: consideration of a possible secondary allocation to the Amateur Service of about 15 kHz somewhere between 415 and 526.5 kHz. Two possible methods of satisfying the agenda item, along with the possibility of there being no change (and therefore no allocation), are set out in the CPM Report, along with the advantages and disadvantages of each . Read more here <http://www.arrl.org/news/amateur-mf-allocation-moves-a-step-closer>.

==> + IN THE NEWS : THREE YACHTSMEN KILLED BY SOMALI PIRATES WERE HAMS

Four Americans -- including three Amateur Radio operators -- who were being held hostage on their yacht by pirates off the coast of Oman have been killed. Scott Adam, K9ESO, and his wife Jean, KF6RVB, along with Bob Riggle, KE7IIV, and Phyllis Macay were on board the S/V Quest when pirates boarded their vessel on Friday, February 18. The Adams were based in the Los Angeles area; Riggle and Macay were from Seattle.

According to the US Central Command, the boat was in the Indian Ocean, headed toward the Somali coast when on Friday, the 58 foot yacht sent a distress signal. The boat was being trailed by US Navy forces; it was about a two day sail from the Somali coast. They had begun tracking the yacht after being alerted that a Danish naval helicopter had seen the Quest off Oman under the pirates' control. The Central Command oversees US anti-piracy operations in the Indian Ocean.

Officials were in the process of negotiating for the Americans' release when gunfire was heard around 1 AM (EST) on Tuesday, February 22. "As (US forces) responded to the gunfire, reaching and boarding the Quest, the forces discovered all four hostages had been shot by their captors," a statement from US Central Command said. "Despite immediate steps to provide life-saving care, all four hostages ultimately died of their wounds." Read more here <http://www.arrl.org/news/three-yachtsmen-killed-by-somali-pirates-were-hams> .

==> + ON THE AIR : THE HF BANDS COME ALIVE FOR THE ARRL INTERNATIONAL DX SSB CONTEST

With the CW running of the ARRL International DX Contest over, it's time to get ready for the phone portion. With the solar flux peaking at 125 during the CW contest -- and 10 meters in unexpectedly good shape and open to Europe during the event -- one wonders if the same kind of conditions will be present for the phone running, 0000 UTC Saturday, March 5-2359 UTC Sunday, March 6. With another region of the Sun coming around to face Earth for this contest, there could be more unstable conditions. But if the solar flux index stays high -- and there aren't any more solar flares -- the ARRL DX SSB Contest could have some openings like there haven't been in years. Are you ready? Read more here <http://www.arrl.org/news/the-hf-bands-come-alive-for-the-arrl-international-dx-ssb-contest>.

==> + SECTION MANAGER ELECTIONS : NEW SECTION MANAGER ELECTED IN ARKANSAS

In the only balloted Section Manager election this winter, ARRL members in Arkansas have elected Dale Temple, W5RXU, North Little Rock, as Section Manager for the next two year term of office that starts April 1. Temple received 362 votes, and his opponent, incumbent Section Manager J. M. Rowe, N5XFW, received 290 votes. Rowe has served as Section Manager since December 2008. Ballots were counted and verified at ARRL Headquarters on Tuesday, February 22. Read more here <http://www.arrl.org/news/new-section-manager-elected-in-arkansas>.

==> ARRL ATLANTIC DIVISION TO HOST TWO WEBINARS IN FEBRUARY

Periodically, the ARRL's Atlantic Division hosts a "webinar" -- an interactive web-based seminar, designed to facilitate communication between a small number of presenters and a large remote audience using the Internet. This month, Atlantic Division Director Bill Edgar, N3LLR,

will host two webinars for ARRL members, one on 501(c)(3) organizations (Thursday, February 24) and one on using Narrow Band Emergency Messaging Software (NBEMS) -- a set of programs used to send messages and files via Amateur Radio using an audio interface (Saturday, February 26). Read more here <http://www.arrl.org/news/arrl-atlantic-division-to-host-two-webinars-in-febr uary>.

==> ARRL FIELD DAY: 2011 FIELD DAY PACKETS AVAILABLE

It's that time of year again -- time to start gearing up for ARRL Field Day, June 25-26, 2011! ARRL's flagship operating event -- always held the fourth full weekend in June -- brings together new and experienced hams for 24 hours of operating fun. Field Day packets are now available for download <http://www.arrl.org/files/file/Field-Day/2011/2011_FD_Packet.pdf>and include the complete rules (including a change for 2011), as well as other reference items such as forms, ARRL Section abbreviation list, entry submission instructions, a Frequently Asked Questions section, guidelines for getting bonus points, instructions for GOTA stations and a kit to publicize your event with the local press. Read more here <http://www.arrl.org/news/2011-field-day-packet-now-available>.

==> SOLAR UPDATE

Tad "Away from the Sun <http://www.youtube.com/watch?v=25upz6PME3I>" Cook, K7RA, reports: The weekly averages for solar flux and sunspot numbers were nearly unchanged this week, although last week they were rising and this week declining. The average daily sunspot number was down less than five points to 65, while the average daily solar flux was up just 0.3 points to 103.8. The outlook from NOAA/USAF shows a gradually rising solar flux, 85 on February 24-26, 88 on February 27 through March 3, 90 on March 4 and rising to 110 on March 10-15. The predicted planetary A index for February 24-through March 5 is 5, 7, 7, 5, 15, 12, 8, 10, 7 and 5. Sunspot groups 1161 and 1162 -- which brought so much activity last week -- are now rotating over our Sun's western horizon, but with the STEREO craft <http://stereo.gsfc.nasa.gov/>, we can see a new active region rotating over the eastern horizon. The predicted geomagnetic storm just before last weekend's ARRL International DX CW Contest did not persist, lasting only half a day through February 18. Look for more information on the ARRL website on Friday, February 25. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by 3 Doors Down's Away from the Sun <http://www.youtube.com/watch?v=25upz6PME3I>.

==> AMATEUR RADIO FUN: BE A STAR! ENTER THE ARRL VIDEO CONTEST

If you've ever wanted a way to show the world how exciting Amateur Radio can be, here's your chance: The ARRL is sponsoring its first-ever

video contest <http://www.arrl.org/video-contest>! We are looking for ARRL members to shoot and submit videos that showcase how fun and electrifying our hobby is; extra points will be awarded for a video showing someone, young or old, licensed or not, making their first contact. Videos will be judged on overall quality and composition, and prizes will be awarded. The video author/producer must be an ARRL member; however, the people who appear in your video can be non-members. This contest is intended for amateur videographers. If you are a professional, please do not apply. Check out all the details -- including the fine print -- on the ARRL Video Contest Rules and Guidelines Web page <http://www.arrl.org/video-contest>. The submission deadline is Monday, February 28, 2011.

==> THIS WEEK ON THE RADIO

This week:

- February 25 -- NCCC Sprint Ladder
- February 25-February 27 -- CQ 160 Meter Contest (SSB)
- February 26-27 -- Mississippi QSO Party; North American QSO Party (RTTY)
- February 27 -- High Speed Club CW Contest
- February 27-28 -- North Carolina QSO Party
- February 28 -- CQC Winter QSO Sprint
- March 1 -- AGCW YL-CW Party

Next week:

- March 5 -- Wake-Up! QRP Sprint
- March 5-6 -- ARRL International DX Contest (SSB) <http://www.arrl.org/arrl-dx>; Open Ukraine RTTY Championship
- March 6 -- DARC 10 Meter Digital Contest
- March 8 -- ARS Spartan Sprint
- March 9-10 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- February 26 -- ARRL Vermont State Convention <http://www.arrl.org/hamfests/vermont-state-convention-ham-con-1>, Colchester, Vermont
- March 5 -- ARRL South Texas Section Convention <http://www.arrl.org/hamfests/south-texas-section-convention-greater-houston-hamfest-1>, Rosenberg, Texas; ARRL Alabama Section Convention <http://www.arrl.org/hamfests/alabama-section-convention-birminghamfest>,

Birmingham, Alabama
- March 11-12 -- ARRL Oklahoma Section Convention

While it does not affect us directly as amateurs, It should also be noted
that the 450-470 Mhz segment, which is also included in the bill, is already
heavily used by commercial and public safety users.

This segment also includes GMRS and FRS services, which are used by many
users, amateurs and non-amateurs alike.

Amateur Radio Newsline(tm) Report 1750 - February 25 2011

Now, Amateur Radio Newsline report number 1750 with a release date of Friday, February 25, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. Hams respond to an Earthquake that devastates parts of Christchurch, New Zealand; A congressional measure to create a national emergency radio system threatens the 70 cm ham radio band; 500 Kilohertz digitally across the Atlantic Ocean and Dayton names the 2011 Hamvention award winners. Find out who they are on Amateur Radio Newsline(tm) report number 1750 coming your way right now.

RESCUE RADIO: HAMS ON ALERT FOLLOWING NEW ZEALAND QUAKE

Rescue workers in Christchurch, New Zealand, are in full callout. This, following a devastating, shallow level 6.3 Richter scale earthquake which struck the heavily populated business area of the city at 12.51 p.m. on Tuesday, February 22nd local New Zealand time. Jim Meachen, ZL2BHF, is in Auckland with the rest of the story:

--

The utter devastation caused by the quake has severely damaged many buildings in downtown Christchurch including the main cathedral in the central city. While 120 survivors were pulled from the wreckage during the first night more than 300 people remain unaccounted for. According to the latest news reports, as many as 75 are dead and scores injured. Others are believed to be trapped in the rubble as buildings simply collapsed burying anyone inside. Officials expect the death toll to rise as the post quake relief operations continue.

Jim Linton, VK3PC, is the Chairman of the IARU Region 3 Disaster Communications Committee. As this newscast is being prepared, VK3PC reports that communications and power have been cut in many areas, and water supplies disrupted. Under formal arrangements already in place, members of New Zealand's A. R. E. C. will find their services put to use as the post quake rescue operations proceed.

And this is what seems to be happening. In a bulletin the Wireless Institute of Australia's news service reports that a small team of amateur radio operators are keeping the lines of communication open in

earthquake-hit areas of Christchurch. The head of the Amateur Radio Emergency Communications team, Richard Smart, ZL4FZ, says 10 amateurs are using their two emergency communications vans to keep rescue teams and Civil Defense staff in touch with one another.

Smart notes that one unit is at a major welfare center. It's providing portable communication so personnel can talk to Civil Defence officials. The other vehicle is en route to assist search and rescue teams in an area where communication is poor. Smart says that amateur radio operators from around New Zealand are volunteering to help out and others are sending updates on the disaster to the families of people in Christchurch who are overseas.

Meantime, Arnie Coro, CO2KK, the International Amateur Radio Union Region II Area C Emergency Coordinator, has issued a notice to hams in the America's. Coro advises users of the 40 and 20 meter bands to be aware of possible earthquake emergency communications traffic taking place in and around the affected areas of New Zealand's South Island, where Christchurch is located.

Coro continues that the propagation on 40 meters more likely to cause problems to the New Zealanders from unintentional QRM coming from the Americas in the window that starts about two or three hours before sunrise and lasts until sunrise on this side of the path. A similar pattern, with a slight time shift shows up on 20 meters as well. More on this story in future reports.

>From Auckland, New Zealand, on the North island, I'm Jim Meachen, ZL2BHF, reporting for the Amateur Radio Newsline.

--

It should be noted that this is the second quake to hit the Christchurch area since last year. While the 7.1 earthquake last September was more than 30km underground, the latest 6.3 quake was a mere five kilometers in depth. It has been followed by a number of major aftershocks.

(VK3PC, ZL3DWS, ZL4FZ, CO2KK, NZ Hearald, others)

**

RADIO POLITICS: CONGRESSIONAL MEASURE COULD LEAD TO LOSS OF 70CM AMATEUR ALLOCATION

A new measure introduced into Congress could eventually lead to the reallocation of the amateur 70 centimeter band to other services. That's if the big business lobby can convince legislators that the security of the nation will not be compromised by such a change. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

On February 10th, Representative Peter King of New York introduced HR 607, the Broadband for First Responders Act of 2011. King is the Chairman of the House Homeland Security Committee. HR 607 addresses certain spectrum management issues, including the creation and maintenance of a nationwide Public Safety broadband network. As part of that network, the bill provides for the allocation of the so-called "D-Block" of spectrum in the 700 MHz range for Public Safety use.

The D-Block consists of two, 5 megahertz-wide segments of spectrum from 758 to 763 and 788 to 793 MHz. These became available when the FCC ended analog television broadcasts in June 2009 and reallocated the 698 to 806 MHz band for Public Safety and commercial broadband.

At that time it was anticipated that the D-Block would be auctioned for commercial use. However there are several bills in Congress providing for the allocation of the D-Block for Public Safety use, and HR 607 is one of those.

But HR 607 uniquely provides for the reallocation of other spectrum for auction to commercial users, in order to offset the loss of revenue that would occur as the result of the allocation of the D-Block to Public Safety instead of commercial auction. HR 607 lists the paired bands of 420 to 440 MHz and 450 to 470 MHz among the bands to be reallocated for commercial auction within 10 years of its passage.

His measure has been referred to the House Energy and Commerce Committee, which handles telecommunications legislation. There it is likely to see opposition from the United States military and others concerned with the nations overall security. This is because of the infrastructure that currently exists to protect our nations cities and shores.

One thing to keep in mind is that the spectrum in question is allocated as military as primary user and all others, including amateur radio as secondary users. As we in ham radio all know, the military recently spent 10's of millions if not billions of taxpayer dollars to upgrade its PAVE-PAWS long range radar system to a point where UHF ham repeaters and even some individual operations on both coasts were forced to reduce power or go completely QRT.

Ironically the cooperation between hams and the military in resolving issues associated with the PAVE-PAWS upgrade more than likely makes them one of amateur radios best allies in retaining the spectrum in question. That's because Representative King and his co-sponsors could face strong opposition from the U.S. military establishment which is almost certain to do all it can to derail such a spectrum reallocation.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, reporting from Scottsdale Arizona.

--

In related news, the Society of Broadcast Engineers issued a legislative alert to its members regarding this measure. Its advisory

notes that the spectrum targeted at 450 to 451 and 455 to 456 MHz is heavily used by commercial radio broadcasters for remote pick-ups, as well as by many other civilian and defense users. (ARRL, SBE, ARNewsline(tm))

**

RADIO POLITICS: ARRL ASKS HAMS TO WRITE CONGRESS TO DEFEAT HR-607

And this just in: The ARRL is asking that every radio club and individual ham operator in the United States to write to their congressional representative in opposition to HR-607 as it is currently written.

Because of security measures in place in Washington, the ARRL says that it will likely not do any good to mail them direct. Instead the League asks that you go to its website at www dot arrl dot org stroke sample-letters, fill in the sections of the attached letter for your own representative, print it and then send it to Chwat & Co. They in turn will hand deliver it to the appropriate congressional office.

The address to send those letters to is John Chwat in care of Chwat & Co., 625 Slaters Lane, Suite 103, Alexandria, Virginia, Zipcode 22314. Or you can fax it to 703-684-7594.

The bottom line here is that thousands of bills are introduced every Congressional season but very, very few ever make it to the President's desk. If hams, broadcasters and the military all work together, there's a good chance that HR-607 will never see a White House signature or even the political light of day. More is on-line at tinyurl.com/4rgbayj

RADIO VIOLENCE: THREE HAMS KILLED BY SOMALI PIRATES OFF THE COAST OF EAST AFRICA

Three Radio Amateurs Scott Adam, K9ESO, his wife Jean, KF6RVB, and Bob Riggle, KE7IIV, have been murdered by Somali pirates. Also killed with them was Phylis Macay.

The four were onboard the Adam's owned yacht the Quest off the coast of Oman, East Africa, when pirates boarded their vessel on Friday,

February 18. Officials were in the process of negotiating for their release when gunfire was heard around 1 AM on Tuesday, February 22.

United States Naval forces responded to the gunfire. Navy Seals then boarded the yacht only to discover that all four hostages had been shot by the pirates.

According to a statement from the US Central Command, despite immediate steps to provide life-saving care, all four hostages ultimately succumb to their wounds.

Somali-based pirates have plagued the shipping industry off East Africa for years, but the violence used during the attacks and the money demanded in ransoms has increased in recent months. Sea going bandits are currently holding some 30 ships and more than 660 hostages, however, this is first time American hostages have been killed by a Somali pirate raid. (Southgate, other published reports)

**

RADIO RECORDS: ROS ACROSS THE ATLANTIC ON 500 KHZ

A new low frequency record between the United Kingdom and Canada has been set using a newly developed digital mode called R-O-S. Jeramy Boot, G4NJH, is in Nottingham, in the United Kingdom with the rest of the story:

--

At 2134GMT on 13 February, Joe, VO1NA managed a full beacon decode from Graham, G0NBD on 502kHz using the ROS mode. It is believed this was the first live data mode decoded over the Atlantic on this band.

The signal to noise ranged from -23 to -27dB, giving a 100% decode of the test message. The transmission was sent using MF-7 with an estimated ERP of 1 watt from a 35ft top loaded vertical. The ROS mode did a good job of resolving the signals despite deep and rapid QSB over the 3500km path.

At just over a year old the ROS data mode is relatively new and uses an adaptation of multiple frequency shift keying and forward error correction to help make successful contacts under very difficult band conditions.

I'm Jeramy Boot, G4NJH and this is the Amateur Radio Newsline.

--

The software for the R-O-S is completely free, but is still not legal for use by United States amateurs to transmit with. None the less US hams are free to listen in using it world-wide. More information can be found in cyberspace at rosmodem.wordpress.com (GB2RS)

**

INTRUDER WATCH: COMPLAINTS FROM HAMS MOVE VOICE OF RUSSIA OFF 7.200 MHZ

Shortwave station the Voice of Russia is now in the part of the 40 meter band where it belongs.

The station was first heard on 7.200 MHz on February 1st and reported to the IARU Monitoring System by Dick van Elpelen, PA0GRU, in the Netherlands. Ulrich Bihlmayer, DJ9KR, from the IARU Region 1 Monitoring System then reported the station to the German Telecommunicationss authorities on February 2nd.

Then, in correspondence with the Russian General Radiofrequency Centre, DJ9KR was able to demonstrate the interference. Subsequently, the Voice of Russia moved up the band to 7.265 MHz. (Southgate)

**

ARISSAT-1 UPDATE: MORE ON THE ARISSAT-1 DEPLOYMENT DELAY

An update on the delayed deployment of the ARISSat One ham satellite. As reported last week, ARISSat-1 satellite is still inside the I-S-S and will remain there for the next several months. The Russian space management agency Roscosmos has announced that the satellite will be deployed during the next space walk in July of this year.

Meantime, the United States based ARISSat team is trying to get clarification from Roscosmos about a report that a reported weak batteries condition causing the satellite not to be deployed in the latest E-V-A. The news item can be found in the Russian language on the Roscosmos web page. Its in cyberspace at tinyurl.com/arissat-batteries.

**

ARISSAT-1 UPDATE: ARISSAT-1 TO HELP CELEBRATE 50th ANNIVERSARY OF YURIL GAGARIN'S FIRST SPACEFLIGHT

The Russian space management group Roscosmos has also announced that the ARISSat One satellite will be turned on inside the International Space Station using an external antenna on April 12th. This, to celebrate the 50th anniversary of Cosmonaut Yuri Gagarin's first manned space flight. AMSAT says that it will support this event and issue certificates to those stations reporting reception of the ARISSat One's signals.

Also, Tony Monteiro, AA2TX has an excellent article describing the ARISSat One power system using the Russian Olan suit battery in the upcoming AMSAT Journal. It will have been mailed to AMSAT members by the time this newscast goes to air.

ENFORCEMENT: FAILURE TO FILE TIMELY RENEWAL BRINGS $13000 NAL

A North Carolina broadcaster who let its station license lapse but continued operations under several Special Temporary Authority grants has been handed a $13,000 proposed fine.

WOOW AM of Greenville, North Carolina and its owner The Minority Voice, Inc. have been issued the Notice of Apparent Liability to Monetary Forfeiture for what the FCC says was willfully violating Section 73.3539 of the Commission's Rules and willfully and repeatedly violating Section 301 of the Communications Act. This, by failing to timely file its license renewal application and engaging in unauthorized operation of the station.

As is usually the case, the station licensee has been given the customary time to pay the forfeiture or to file an appeal. (FCC)

**

ENFORCEMENT: FCC INVESTIGATING WWOR TO SEE IF IT REALLY SERVES NEW JERSEY

According to the Los Angeles Times, the FCC is currently investigating Fox Television owned WWOR TV in Seacaucus, New Jersey. At the center of the inquiry is whether the station has been ignoring its state of license in favor of covering New York area news and other events.

The newspaper says that the FCC has written to Fox about the charges. It says that in a letter sent on Thursday, February 17th, the regulatory agency is seeking to determine if Fox and WWOR intentionally provided material factual information that was incorrect or is guilty of intentionally omitting material information.

WWOR has been criticized by media watchdogs and by New Jersey Senator Frank Lautenberg for not providing ample coverage of New Jersey on the station. A spokesperson for Fox said the company will respond to the FCC's request. Also that Fox is confident that on review of all facts and applicable law, the FCC will recognize that these unwarranted claims hold no merit.

Fox purchased WWOR in 2001. A quick link to the L.A. Times story is tinyurl.com/wwortv. (Multiple published news reports)

TELECOMMUNICATIONS LAW: DO NOT TRACK ME ON THE INTERNET LAW INTRODUCED INTO CONGRESS

An Internet version of the popular "Do Not Call" telephone legislation took a step toward reality on Friday, February 11th. This when a House of Representative legislator from California introduced a measure in Congress designed to let consumers block unwanted tracking of their information online.

Written by Representative Jackie Speier, the "Do Not Track Me Online" bill authorizes the Federal Trade Commission to enact and enforce regulations that give consumers the right to bar organizations from tracking their activities as they use the Internet.

Speier's measure already has one major backer. Consumer Watchdog, a non-profit and non-partisan advocacy group, has already applauded the proposed law. In a press release Consumer Watchdog said that consumers should have the right to choose if their private information from being collected, analyzed, and profiled by companies tracking activities online. It says that "Do Not Track Me Online" is the simple way for consumers to say no to being monitored while they surf the Web. (Webnews)

HAMVENTION 2011: NEWSMAN OR ACTOR NEEDED FOR HAM RADIO TOWN MEETING

If you are a radio amateur planning to attend Hamvention 2011 and one who is a professional television newsman or an actor with on-camera experience, you are neded to take part in this years Ham Radio Town Meeting.

This years session is titled "How To Make A Ham Radio Video In The 21st Century." Among the many topics we want to cover is how to properly appear when the camera lens is on you and tape is rolling. Obviously nobody has better expertise in this area than a TV newsman or an actor who regularly appears on TV or in the movies.

If you want to take on this volunteer role, please contact us or send your resume with your contact information to Bill Pasternak, WA6ITF, who is producing and moderating the session. Our e-mail address is still newsline (at) ix (do)t netcom (dot) com and we look forward to hearing from you. (ARNewsline(tm))

**

HAM RADIO CONFERENCES: CALL FOR PAPERS FOR AMSAT-UL COLLOQUIUM

A first call for speakers for the AMSAT-UK Colloquium 2011 has been issued by the events planners. This years Colloquium will be held at the Holiday Inn, in Guildford, from Friday, July 29th to Sunday July 31st. Presenters are invited to speaker about amateur radio, space and associated activities. Those interested should contact G4DPZ, by e-mail to david (dot) johnson (at) blackpepper (dot) co (dot) uk. (G4DPZ)

CONTEST INFO: RESULTS OF 1010 10 GHZ AND UP CONTEST

Sean Kutzko, KX9X, who is the ARRL's Contest Branch Manager says that the results for the 2010 ARRL 10 GHz and Up Cumulative Contest are now online. You can read them at www.arrl.org/contest-results-articles. (ARRL)

**

NAMES IN THE NEWS: KR4X RETIRES FROM HILLSBOROUGH FLORIDA EMCOMM POSITION

Some names in the news. First up is Larry Gispert, KR4X, who recently retired as the Director of Emergency Management for the County of Hillsborough in the Tampa Bay, Florida area.

According to Peter Kemp, KZ1Z, Gispert's contributions have seen him take on leadership positions in regional, state and national emergency management organizations. He has also been a presenter at major conferences and in Washington, DC.

The Hillsborough Board of County Commissioners recently presented Gispert with a Proclamation for his work. He was commended for his straight talk approach when dealing with Emergency Management issues. (KZ1Z)

**

CHANGING OF THE GUARD: TOM C GLEEMAN KE6YNH - HAM AMBASSADOR _SK

And we are sad to report that one of the true gentlemen of ham radio has become a Silent Key. This with word that Tom Gleeman, KE6YNH, of San Diego, California passed at his home the evening of February 17th.

Gleeman was best known as a late night ambassador of good will on 3.840 MHz in the 75 meter band. He is generally credited with starting the post Art Bell, W6OBB-era 3840 Group in the western states that eventually expanded to the whole country.

A memorial page for KE6YNH is on QRZ.com. The shortcut link to it is tinyurl.com/4wgmss2. Tom Gleeman, KE6YNH, was only age 60 at the time of his passing. (KE6ENI)

RADIO BALLOONING: HAM RADIO "MAKERS" TO LAUNCH TRANS-ATLANTIC BALLOON ON 7.102 MHZ USB

A ham radio equipped balloon called Speedball-1 will soon attempt to become the first amateur radio balloon to cross the Atlantic. Amateur Radio Newsline's Michael Grebert, KJ4ZZV, has more:

--

Speedball-1 was originally scheduled to launch the weekend of February 26th from Space Port Indiana located in Columbus, Indiana. According to the projects website, that date has now been pushed back to when both the Jet Stream as well as ground launch conditions are more favorable for such a flight.

While no exact launch date for Speewdball-1 has been announced, once aloft it will be transmitting RTTY and DominoEX on a Upper Sideband with dial frequency of 7 point 102 MHz. The actual signal will be on 7 dot 1035 MHz and the transmitter will alternate between 110bps RTTY and the DominoEX digital mode. Free dl-fldigi decoder software to follow the balloons progress is at tinyurl.com/4lplegv

Speedball-1 is a project of the new LVL1 Makerspace in Louisville, Kentuckey. They vdescribe themselves as a team of makers, hackers, and amateur scientists, loving the incredible number of challenges this has project presented.

Also on the team are remote members, contributing significantly, despite the distance. These include Bill Brown, of Huntsville, Alabama, who is considered the father of modern amateur weather ballooning, and Carl Lyster, WA4ADG, who is the electronics designer from the Spirit of Knoxville. Quite an all star team.

For the Amateur Radio Newsline, I'm Michael Grebert, KJ4ZZV, near Nashville, Tennessee.

--

You can sign up for a launch notification announcement on the right-hand side of the home page at http://whitestarballoon.org. (ARNewsline(tm), Southgate, White Star Balloons)

HAM RADIO IN SPACE: SA-AMSAT ANNOUNCES KLETSKOUS SATELLITE PAYLOAD

South Africa AMSAT has announced that the main payload on the upcoming KLETSkous ham radio CubeSat. The decision is for the tiny bird to carry a linear UHF to VHF transponder with a bandwidth of 20 kHz.

The U/V mode which uses a 70 centimeter uplink and 2 meter downlink was chosen in line with internationally recommended practice as it will minimize interference. Another aim of this decision is to make possible the satellite to operate over Africa without the need of an access tone to activate the transponder.

South Africa AMSAT says that a multi-city team is working on the designs and will soon finalize the transponders specifications. You can visit www.amsatsa.org.za for more about the KLETSkous project. (SARL, Southgate)

DX

In DX, G5XW will be active as GJ5XW from the Isle of Jersey between March 24th and the 30th. Operations will be on the HF bands but will also include the CQWW WPX SSB Contest on March 26th and the 27th. QSL via G5XW, direct only to his QRZ.com address.

Members of the "DX Plus" Hellenic Amateur Radio Team will be active as SX5F from the Farmakonisi Rocky Islet between May 14th and the 22nd. Operation will be on all HF bands using CW, SSB and the several digital modes. QSL via the RAAG Bureau. For more details, see www.qrz.com/db/SX5F

G3SWH and G3RTE plan to operate from the West Island in the Cocos group through March 5th. They will be active as VK9C stroke G6AY on 10 through to 80 meters using CW only. The Cocos Keeling is ranked number 75 most wanted worldwide. QSL via their home callsigns, either direct or via the bureau

2E0WMG and G0DVJ will be active from Lundy Island between March 21st and the 26th. Operations will be on all HF bands 80 through 10 meters. G0DVJ will be on CW and SSB, while 2E0WMG will be on SSB only. Look for QSL details on QRZ.com.

Members of the "DXciting Group" will be active as EG5CI from Columbretes Island between April 7th nand the 10th. QSL's will all be sent via the bureau or direct from EA5EOR. For more details, visit www.dxciting.com

Lastly, the next DXpedition by the I2YSB Team will take place from Liberia between March 31st and April 13th. The group plans to use 3 stations for the HF bands and one other for the 50 MHz band. Modes are CW, SSB and RTTY. The pilot station will be IK7JWY and an online log will be provided by IH9GPI. The expeditions callsign will be announced at a later date. QSL via I2YSB.

(Above from various DX news sources)

THAT FINAL ITEM: DAYTON HAMVENTIONr NAMES 2011 AWARD WINNERS

And finally this week, word that the names of the winners of the most celebrated awards in ham radio have been announced. Bill Pasternak, WA6ITF, is in the newsroom with the details:

--

N8LX: "I was just totally astounded. Flabbergasted. I never would have believed that in my lifetime that this would happen to me. And my husband said that someone could have probably knocked me over with a feather at that point."
--

That's Shirley Roberts, N8LX, of Dayton Ohio has been selected as the 2011 Radio Amateur of the Year by the Dayton Hamvention. This prestigious award goes to an amateur operator who has demonstrated

significant contributions to amateur radio as well as related public service.

Among Shirley Roberts numerous achievements has been her work with and for the Dayton Amateur Radio Association and with making the Hamvention happen every year for the past to decades. In the latter she has worked on numerous committees related to the various aspects of Hamvention. She has also been the voice of the Hamvention answer line for the past three and a half years.

But Hamvention is not Shirley Roberts only ham radio interest. Over the years she has been a Control Operator and Manager for a Dayton area repeater and has been directly involved in numerous public service events. And, as reported right here on Amateur Radio Newsline, several years ago it was Shirley Roberts, N8LX, who coordinated the rescue of a ham radio operator trucker who was suffering from a badly infected tooth that was affecting his ability to safely drive his big-rig.

Another of her interests is SKYWARN and there she has been more than just your average volunteer:

--

N8LX: "Several years ago I was one of the people who ran a preliminary net for them as the people who operated the net were on their way to the focal point to where the net was usually done."

--

According to Awards Committee chairman Frank Beafore, WS8B, Shirley Roberts, N8LX, exemplifies all of the deepest aspects of being named the 2011 Radio Amateur of the Year.

The Special Achievement Award this year goes to Fred Lloyd, AA7BQ of QRZ dot com fame. Starting out as a simple on-line call sign look-up project, Lloyd has developed the QRZ website into an interactive one stop web-based home for all things related to amateur radio. Now in 2011, the Arizona-based QRZ dot com operation provides detailed operating and technical information to ham radio operators worldwide and is among the most often visited of any hobby radio spot in cyberspace. And its still the place to go to find the address of that station to which you want to send a QSL card.

Moving on, the committee has chosen Roy Lewallen, W7EL,of Beaverton, Oregon to receive the 2011 Technical Excellence Award. This in recognition of his development of EZNEC. EZNEC is an antenna modeling software system used by hams worldwide. Lewallan's software is also now the basis for numerous amateur radio antenna training courses in the United States and world-wide.

Last but by no means least, the Albemarle Amateur Radio Club, WA4TFZ, of Charlottesville, Virginia has been named Club of The Year. According to the judging committee, in addition to all the normal club activities

of a well led organization, the Albemarle Amateur Radio Club has shown exemplary contributions in public service, emergency communications and in youth recruiting.

With congratulations to all of this years winners, Im Bill Pasternak, WA6ITF, in the Newsroom in the City of Angels.

--

The award winners were announced on February 18th. All will be guests of honor at the 2011 Hamvention which runs from May 20 to May 22 at Hara Arena in suburban Dayton. More details are on-line at www dot Hamvention dot org. We hope to see many of you there.

(DARA, W8HJR, ARNewsline(tm))

When Roger was yet a little tyke, his father took him to the local tavern and put Roger in the back room while his dad had a few beers with his buddies.
One of the customers asked Roger's dad, "Is that your little boy?"
Roger's dad said, "Nope, that is the result of a faulty condom. I'm on my way to the drug store to turn him in for a refund."

Indeed I told Laura teh band should be taken away from teh hams
because they is all assholes. 70cm should be made into a new Cb band.
FUCK TEH HAMS.

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

I read about a CB shoot out where one radio had a 70 K watt amp.
It was enough to wipe out the video on a camcorder and to eject the
tapes on some others.

My desk fan runs OS/2. OS/2 runs Windows software. And it oscillates.

YOU WOULD KNOW THIS IF YOU KNEW THE FIRST THING ABOUT OS/2. YOU ARE
CLEARLY NOT THE SAMRT COMPUTAR GUY YOU SEEM TO THINK YOU ARE, MISTAR.

I happened to be traveling through Huntsville, Alabama early this morning, I decided to stop in Athens and see just how tough Lloyd Davies was going to act when he saw me in person.

Many of you know that a few years ago, Lloyd got smart with several people in the Deja Newsgroup (now Google) and I issued a challenge to him. I told him I would be attending the Dalton, Ga. Hamfest if he wanted to continue the conversation. He said he would be there and he was going to kick my ass.

Well, Lloyd was a no-show and continued the verbal assault on the newsgroups. He always talks tough behind his keyboard. And, I understand he is now doing the same sort of thing on the NIM Busters Board.

Well, about 8.35 this morning (December 23, 2004) I located his apartment in a nasty looking section of town. I'm a pretty good sized man, but I put my gun in my back waistband after exiting the car. I located his apartment and knocked on the door. The doorbell was missing and bare wires were sticking out of the wall. I heard someone say I'm coming and shortly the door opened with a safety chain lock still engaged. He asked what I wanted and I introduced myself and asked if we could have a conversation. He turned white as a sheet and attempted to slam the door, but I already had a foot wedged in the opening. He started shaking uncontrollably and was shouting leave me alone, leave me alone! I told him he didn't seem so tough now face to face and then noticed a putrid odor of urine and he was pissing his pants and crying like a baby. Please leave me alone Oris he said, I was just having fun and meant no harm, please leave, please. I could see the filthy floor of this apartment and the dirty floors and the stench of a grown man pissing on himself were almost enough to make me want to vomit, and I don't have a queasy stomach. Upon telling him that this time he would escape a ass kicking and not to ever get a smart mouth with me again and a verbal yes from him, I departed. That apartment complex looked like a crackhouse, niggers everywhere, filthy grounds and stairwells. Junk cars everywhere and garbage overflowing the garbage cans.

This Lloyd is nothing more than white trash that delivers pizzas and could afford to take a trip out of town if the ticket cost $5.00.

I'm sending this to a friend who despises Lloyd Davies and he wanted to post it for everyone to see just what kind of chickenshit asshole this Davies really is.

Oris Grim

Grow up, try college, drop out, deliver pizzas, buy a computer, flame any and all message boards, Usenet, etc. Get my ass kicked by Roger, run off to Nim Busters board.......

Find a homo buddy in Steve Holsten.........

Get my ass kicked day after day with no end in sight.....

Nominate yourself as the B.A.R.F. Chief of Communications, the members of B.A.R.F. laugh at and ridicule you.....

Pretend that you are a member of the Stumpjumpers, when they all despise you.....

Pretend I am a time traveler and command an army of trash can robots.....

Try to pretend I have a talk show on the internet, talk in a high pitched voice and say that it is a dalek.....

Make more threats, "I will Law You," etc........

Pretend to have a brother named Jim Davies who is a lawyer.....

Pretend to be a female named Christy Davies who is yet another lawyer

Open the door when Oris came by and piss and shit myself and cry and plead for him to leave me alone..........

Talk tough and when confronted, run and hide......

Be nominated for best internet punching bag nine years running.....

That is the 38 year old virgin, Lloyd Austin Davies, internet retard and biggest loser on planet earth!

Legislative Update - Issue # 2

March 2, 2011

ARRL - 225 Main Street - Newington, CT 06111

Edited by Dan Henderson, N1ND, ARRL Regulatory Information Manager

House Bill 607 Threatens Amateur Radio Spectrum

On February 10, 2011, Rep. Peter King (R-NY), Chairman of the House Homeland Security Committee, introduced H.R. 607, the "Broadband for First Responders Act of 2011," which has been referred to the House Energy and Commerce Committee (which handles telecommunications legislation). The bill addresses certain spectrum management issues including the creation and maintenance of a nationwide Public Safety broadband network. As part of that network, the Bill provides for the allocation of the so-called "D-Block" of frequencies in the 700 MHz range for Public Safety use.

The "D-Block" consists of two, 5 megahertz-wide segments of spectrum (758-763 and 788-793 MHz) that became available when the FCC ended analog television broadcasts in June 2009 and reallocated the 698-806 MHz band for Public Safety and commercial broadband. It was initially expected the D-Block would be auctioned for commercial use. However, there are now several Bills in Congress providing for the allocation of the D-Block for Public Safety use. H.R. 607 is one of those bills. However, H.R. 607 uniquely provides for the reallocation of other spectrum for auction to commercial users in order to offset the loss of revenue that would occur as the result of the allocation of the D-Block to Public Safety instead of commercial auction. Among the bands to be reallocated for commercial auction within ten years of the passage of H.R. 607 are the paired bands 420-440 MHz and 450-470 MHz.

"Of serious concern to the ARRL is the inclusion of the 420-440 MHz Amateur allocation in the list of frequencies to be cleared for auction," said ARRL Regulatory Information Manager Dan Henderson, N1ND. "The ARRL and the Amateur Radio community certainly support the work of public safety agencies and understand their desire for an interoperable network. However, the inclusion of most of the Amateur 70-cm spectrum as one of the replacement bands is illogical and unacceptable. The 420-440 MHz band is not Public Safety spectrum and should never have been included in any spectrum swap of Public Safety allocations."

"The ARRL Washington team has already begun meeting with key Congressional staff on Capitol Hill," Henderson continued. "We share

the 70-cm band on a secondary basis with the governmental radiolocation services, such as the PAVE PAWS radar systems. The 70-cm band is a critical and irreplaceable resource for Amateur Radio public service and emergency communications. The Amateur Satellites operating on this band would become unusable. Weak-signal operators would be forced to migrate to the remaining 440-450 MHz spectrum already occupied by repeaters. The inclusion of the 420-440 MHz band in this legislation is ill conceived. To be sure, ARRL will vigorously oppose this legislation in its present form. It is, as evidenced by other legislation, unnecessary to the creation of a nationwide Public Safety broadband network or the use by Public Safety of the D-Block for that purpose."

H.R. 607 is presently cosponsored by the Homeland Security Committee's Ranking Member, Rep. Bennie Thompson (D-MS) as well as Reps. Shelley Berkley (D-NV), Yvette Clarke (D-NY), Keith Ellison (D-MN), James Langevin (D-RI) Billy Long (R-MO), Candice S. Miller (R-MI), Laura Richardson (D-CA), Mike Rogers (R-AL), and Michael Grimm (R-NY). ARRL President Kay Craigie, N3KN has written to Chairman King and to each co-sponsor to explain why the ARRL opposes H.R. 607 in its current form.

A Message from ARRL President Kay Craigie, N3KN

"Eternal vigilance is the price of liberty." This famous statement has been attributed to Thomas Jefferson, Thomas Paine, Abraham Lincoln, Patrick Henry, and various other American statesmen. No matter who actually coined the phrase long ago, we Amateur Radio operators can apply it today in a different context and say, "eternal vigilance is the price of spectrum."

Thanks to the vigilance of the League's Washington team, we spotted the provision in H.R. 607 that would deprive Amateurs of access to the 420-440 MHz band. Work began immediately to organize opposition to the legislation in its present form.

I have written to my own Congressman from Virginia. As President of the League, I have also written to Representative King of New York, who introduced H.R. 607, and the current co-sponsors detailing the ARRL's objections to this provision in the bill.

As head of the League's Washington team - and it is a good team - I want you to understand that we cannot successfully advocate for spectrum protection by ourselves. The ARRL Headquarters Staff and the volunteer Board of Directors cannot do it by themselves, either. Your letters to your legislators on Capitol Hill are the essential key to success. You, as a member of the ARRL, must step up and respectfully tell your Representative that H.R. 607 in its present form is the wrong way to go.

You may be thinking, "I don't operate on 440. What does this have to do with me?" Here is the answer. Whether or not you operate on that particular band is irrelevant. The entire Amateur Radio Service relies on our spectrum allocations as a whole. When spectrum is on the line, we forget about our particular personal interests and work together as one

Amateur Radio Service, indivisible.

73,

Kay Craigie N3KN

President, ARRL

Sample Letter Opposing H.R. 607 Available On the ARRL Web

ARRL members can find a sample letter opposing H.R. 607 in its current form at:

http://www.arrl.org/sample-letters <http://www.arrl.org/sample-letters>

On that page you will also find links showing contact information for your Member of the House of Representatives as well as information on sending your letter to the ARRL's Washington legislative relations firm of Chwat & Co.

ARRL members should send their signed letters to Chwat & Co. for hand delivery to Congress. This personal contact provides our Washington team an opportunity for a face-to-face meeting with key staff in each Congressional office when a delivery is made - giving our team the chance to lobby for our position.

Questions & Answers: H.R. 607 - What Are The Key Points?

Q. Why is the ARRL opposing H.R. 607?

A. The answer is straightforward: In its current form, it would remove Amateur Radio from the majority of the 70-cm band (420-440 MHz) and require that spectrum be auctioned for commercial use.

Q. Does opposing H.R. 607 send the wrong message about ARRL and Amateur Radio supporting Public Safety communications?

A. Simply put, no. The ARRL and Amateur Radio have been and remain strong supporters of Public Safety communications. We recognize their need for spectrum and do not oppose them using the so-called "D-Block" for their needs. Our opposition to this bill in its current form is based solely on the inappropriate and illogical inclusion of the 420-440 MHz band as part of a swap of Public Safety spectrum, which this band is not.

Q. I thought 420-440 MHz was allocated to governmental radiolocation services, like the PAVE PAWS radar systems.

A. You are correct - the primary designated user is radiolocation services. Amateur Radio is allocated on a secondary user basis to the 70-cm band. One of the reasons this bill seems odd is that the 420-440 MHz frequencies are not allocated for Public Safety communications.

Q. To whom should I send letters opposing H.R. 607?

A. At this time we are requesting letters be sent to your member of the US House of Representatives. We are not asking for letters to members of the US Senate at this time, as legislation requiring the frequency swap is not currently being considered by that body.

Q. What should I tell my member of Congress when I contact them?

A. First and foremost, be polite. Express your concerns in a professional manner. Say that while you do not oppose the Public Safety services being assigned the D-Block allocation for their needs, you do oppose H.R. 607 in its current form because of the specific designation of the 420-440 MHz Amateur Radio allocation as one of the frequencies targeted in the "frequency swap".

Second, point out that the 420-440 MHz frequencies are not currently designated for Public Safety communications. Rather, they are assigned on a primary basis for governmental radiolocation purposes with Amateur Radio being allocated to the band on a secondary basis.

Third, briefly (no more than one short paragraph) explain that the 420-440 MHz frequencies are one of the most-used pieces of spectrum by Amateurs in our support of Public Safety communications and services. Losing that portion of spectrum will severely limit the Amateur Service from providing efficient communications in support of our neighborhoods, local emergency management agencies, and public service agencies.

Although emergency and public service communications are the 70-cm activities most easily understood by members of Congress and the general public, the ARRL is keenly aware that other important amateur operations take place in the 420-440 MHz segment. Don't hesitate to tell your Representative - keeping it brief and in layman's language - about those other activities. For example, if you operate via the Amateur Radio Satellites on 70-cm, point out that these expensive spacecraft created by and for Amateurs cannot be retuned to other frequencies. If you are a weak signal operator, note the scientific importance of what we learn about radio propagation at UHF through access to this frequency spectrum.

Finally, thank your Representative for considering what you have to say and directly ask them to oppose H.R. 607 in its current form or any other legislation that would reduce the limited amount of spectrum allocated to use by the Amateur Radio Service.

A Message from ARRL Regulatory Information Manager Dan Henderson, N1ND

Within the first week of the initial request for ARRL members to contact their Representative to oppose H.R. 607 in its current form, almost 1,000 letters were received at Chwat & Co, our Washington legislative relations firm. That is a great start and many thanks to the diligent members who have risen to the challenge. However, it cannot stop there. As long as H.R. 607 is in its current form, we must continue this campaign.

One of the most frequently asked questions I receive is "Why does the ARRL ask us to funnel our letters to Congress through Chwat & Co.? Why can't I send my letter directly to my Representative? Trust me when I say I understand your concern and firmly believe the more input members of Congress receive either for or against an issue from their constituents, the better the public interest is served. However, using the services of Chwat & Co. has many advantages that help the ARRL further its legislative agenda. The most important part of our system is that hand-delivery of constituent letters to a Congressional office provides the opportunity for us to have a face-to-face meeting with key staff of your Member of Congress -- an opportunity to make our point directly."

I have been asked to share a few reminders with those sending letters. These are important points to remember. Unfortunately, several dozen letters received by Chwat & Co. are not usable for a variety of reasons. A few have been received supporting bills that the ARRL supported in previous sessions but have no bearing on H.R. 607. Bill numbers change in subsequent Congresses, as do the issues being addressed. Reminder number one: Please make sure your letter is addressing the correct issue. (Do not "dust off" one that you previously sent - it will not help with the current problem.)

While we all look for "easy" ways to express ourselves to our Representatives, a letter sent without a signature carries little weight when Congressional staffs begin assessing support or opposition to a bill. Though many members of Congress have websites where constituents can simply fill out a web page form to share their thoughts with their representative, such web forms have only limited usefulness in lobbying on a specific issue. The fact that a constituent makes the effort to sign a letter personally - then sends it in via fax, regular US Mail, or by scanning the signed letter into a PDF then emailing it - has a far greater impact than an unsigned email or web-based form. Reminder number two: Please make sure your letter carries your signature. It does make a difference!

Several letters received at Chwat & Co. were addressed to the wrong person. For example there were several letters addressed to Senator Boxer, but began with "Dear Representative Boxer" - an incorrect title. Also, at this time we are not asking letters be sent to members of the Senate - only to your representative in the US House. In our eagerness to help, we sometimes overlook some of the basics, like grammar, proper form of address, and the like. Reminder number three: Please proof read your letter several times to ensure it is accurate. This should include all names, addresses, and salutations as well as any comments / edits you may add to our form letter. Read the final letter out loud to yourself several times before sending to Chwat & Co.

Defeating H.R. 607 in its present form is a fight Amateur Radio can win - but only with thoughtful participation by us all. Thanks to all of you for your efforts - and let us keep this moving forward. Protecting our spectrum is important to all of us!

73

The call was placed almost right after Lloyd signed off his shoutcast
show "On the Domestic Front" where Lloyd was crying for real on the air
about what was going on. Lloyd knows he did it and he spoofed the caller
id number of Steve Holsten (Lloyd's only friend, but that is why Lloyd
did it, thinking Steve would believe him) using a service called
camophone.com or a similiar service. After that, Lloyd posted on NIM
Busters that he opened up a Yahoo chat room. I went in the chat and
spoke with Lloyd. He acted like nothing at all happened but for the last
time, I also tried to be a friend to him. Which now I know is impossible
until Lloyd gets the professional help he needs. I've talk to Lloyd

enough that I am convinced he does need professional help.
>
> No, it was probably Wiseman who forged return addresses in NIM Busters
> posts and attached your name to the posts themselves.

I'm convinced that was Lloyd also. I saw the thread, it was meant for
Roger Wiseman and others to reply to that their replies would be
forwarded to the FBI.

Replies were
> automatically emailed to the FBI by Network54, because Wiseman checked
> off the "email replies" option box.

I'm convinced it was Lloyd. I saw the threads. Why would Roger set
himself up with the FBI? Again, it was a set up against Roger Wiseman
and a few others.

>>
>> Just leave me alone...
>>
>
> It may be a good idea for you to take your own advice: Just leave
> your antagonists alone.

He has been told that dozens of times only to come back. Sometimes he
outright comes back, sometimes he'll invent characters like Jim Davies
or impersonate others. He'll spam a message board into the group using
multiple nyms, then use his real name to claim he had nothing to do with
it. People have seen this on newsgroups for years from Davies. It is a
sign of someone who is mentally ill.

> For that reason, the "Just leave me alone" plea you repeatedly use
> isn't believeable any more.

No it isn't. I even debated him once on a neutral forum and when Lloyd
started losing the debate, all he could respond to is "fuck you" and
"leave me alone", even though Lloyd challenged me to the debate. I used
his own usenet postings against him including his racism, anti-semitism,
and hatred toward homosexuals.

Another sign something is wrong with this man.

I've tried several times talking sense into Lloyd. It all failed and
Lloyd deserves everything I and others throw at him for it.

Lloyd should simply walk away, drop that stupid "I'm a timelord stuff"
that he pretends to be and leave these discussion groups.

I have a fantasy I've been wanting to share with my fellow hams for a long time. You see, I've long had a crush on my fellow ham and mental surperior, KB9RQZ.

I have dreamed of laying down next to Mark and gently stroking his hot and sexy beard. Next I would kiss his hot pouty lips as I stroked his buldging lady stick.

Then Mark would grab my long greasy hair as he shoved his massive man meat into my waiting mouth. He'd pump my mouth and treat me like the sissy bitch that I am !

We know, Lloyd, you called Roger up and asked if you could give him oral sex.

Thanks for sharing your butthurts, Retardo Davies, N0VFP. Yeah, I spanked your ass eight ways to last week. I learned from your mom that you had to ride the short yellow bus growing up. Apparently, the kids at school called you "Spittles". Mainly because you'd drool all over your homemade Star Trek classic series uniform.

We were hired many years ago by Mr. Wright to investigate Mr. Davies.
What we found shocked even our most toughened investigators. Mr.
Davies lives in one of the filthiest apartment complexes ever seen by
our agency. His apartment was crawling with roaches, spiders and
silverfish on the floors, walls and kitchen cabinets. Our lead
investigator said he threw his clothes away and showered right after
tossing his place for the evidence that Mr. Wright said was there.

It was and Mr. Davies was served with a subpoena to appear in court.
He did and full restitution was made along with 30 days in jail. He
lost his pizza delivery job and lived in the Mission at Athens for
several months until he was once again delivering pizzas.

He is one of the most unsavory characters we have ever investigated in
all the years we have been in business.

Lewis Louis

==> + LEGISLATIVE NEWS: ARRL MEMBERS RESPOND TO HR 607

Last month, a bill was introduced in the US House of Representatives
that addresses certain spectrum management issues, including the
creation and maintenance of a nationwide Public Safety broadband
network. This bill -- HR 607, known as The Broadband for First
Responders Act of 2011 -- if passed, also calls to auction off parts of
the 70 cm band, namely 420-440 and 450-470 MHz. As such, the ARRL asked
its members to write their Representative, asking them to not support
HR 607 in its current form.

According to ARRL Regulatory Information Manager Dan Henderson, N1ND,
Chwat & Co -- the ARRL's legislative relations firm in Washington, DC
-- received almost 1000 letters from League members in opposition to HR
607. "This is a great start and many thanks to the diligent members who
have risen to the challenge; however, it cannot stop there. As long as
HR 607 is in its current form, we must continue this campaign." He
```

clarified that the ARRL opposes HR 607 in its present form: "We do not oppose the concept of dedicated spectrum for the development of a Public Safety infrastructure and wireless network. We object to the bill because of the inclusion of 420-440 MHz as part of the spectrum to be swapped and auctioned to commercial users." Click here <http://www.arrl.org/sample-letters> for some pointers for writing letters in opposition to HR 607.

==> + GET READY FOR THE APRIL ISSUE OF QST!

No foolin' -- the April issue of QST is jam-packed with all sorts of things that today's Amateur Radio operator needs. From product reviews to experiments to contesting -- including articles featuring a homebrew 40 meter transmitter, ground radials, digital modes and the 2011 ARRL Board of Directors Annual Meeting -- this issue of QST has something for just about everyone.

Who says life's too short for QRP? Not Lou Burke, W7JI. Following up on his February 2011 QST article about a homebrew QRP superhet receiver, Burke brings us "The W7JI Low or Lower Power 40 Meter Transmitter," a companion to that receiver. This transmitter features a VFO, CW keyer and automatic antenna switching. Ron Harger, WD8BCS, shows readers an inexpensive and easy-to-build radial system for temporary vertical antenna installations in his article "Does Your Ground Radial Kit Measure Up?" When you keep your audio controls in check, it really does make a difference in how your station sounds. QST Technical Editor Joel Hallas, W1ZR, demonstrates how to set up your SSB transceiver with the proper audio levels in "Sounding Good on the Air -- Setting Your Audio Controls."

Amateur Radio is all about experimentation. One of the newer ways for hams to have fun and play around on the bands is via the digital modes. QST editor Steve Ford, WB8IMY, takes a look at one of the newer digital modes in "JT65 -- The 'Musical' Mode." In January, the ARRL Board of Director met in Connecticut for its Annual Meeting. Join ARRL News Editor S. Khrystyne Keane, K1SFA, and QST Managing Editor Joel Kleinman, N1BKE, as they take you inside the meeting room as the Board charts the course for the coming year and beyond. Keane also tells of the recipients of the ARRL International Humanitarian Award, the George Hart Distinguished Service Award and the print, video and audio winners of the Bill Leonard, W2SKE, Professional Media Award.

QST Technical Editor Joel Hallas, W1ZR, takes a look at the Elecraft P3 panadapter in this month's Product Review. He says this add-on to Elecraft's popular K3 rig "adds high performance, stand-alone functionality. If you want to see what's happening on the band, this will provide the needed view, as well as another way to control radio tuning, if you wish." ARRL Contributing Author Curt Phillips, W4CP, checks out the Uniden HomePatrol-1 scanning receiver. He says that it "brings user friendliness to a new level. It performs complicated scanning functions with ease, and loading local frequencies is a snap."

Carl Luetzelschwab, K9LA, delivers the results of the 2010 IARU HF World Championship, held this past July. What makes this 24 hour contest so much fun? "Everyone works everyone, we get to operate both CW and phone, the exchange is simple and we get to work HQ stations and receive their nifty QSLs," said one participant. "It's also during the summer break, which allows busy college students to take it seriously." ARRL Regulatory Information Manager Dan Henderson, N1ND, tells about the 2011 ARRL Straight Key Night. As one participant described it, Straight Key Night participants appreciate "the opportunity it affords us Old Timers to relive the past in such a wonderful way."

Of course, there are the usual columns you know and expect in the April QST: Happenings, Hints & Kinks, The Doctor Is IN, How's DX, Vintage Radio and more. Look for your April issue in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <https://www.arrl.org/join>.

==> THE DOCTOR IS IN : MEASURING A METER'S TOLERANCE

David Van Doorn, W9WEL, of Fort Wayne, Indiana, wrote to the ARRL's Doctor, asking about his analog meter's tolerance. He wanted to know if the tolerance is listed as 10% of full scale, does that actually mean ±10% of full scale? For example, a meter with a 300 unit full scale would have a specified accuracy of the measured value of ±30. Thus, a reading of 40 could actually be anywhere from 10 to 70. Or does that mean ±10% at full scale? For example, at 300 full scale, an actual value of 300 could read 270 or 330 and every other reading on that scale would read ±10%? So an actual value of 40 could read 36 or 44?

Here's what the Doctor had to say:

I'm afraid it is the former. This suggests that the scale selected be one with the reading near the top of the range for maximum accuracy. Keep in mind that the actual accuracy could be -- and often will be -- much better than that specified, just not worse.

Thanks Doctor! Do you have a question or a problem? Send your questions via e-mail <doctor@arrl.org> or to The Doctor, ARRL, 225 Main St, Newington, CT 06111 (no phone calls, please). Look for "The Doctor Is IN" every month in QST <http://www.arrl.org/qst>, the official journal of the ARRL.

==> + PUBLIC SERVICE: NO HF FREQUENCIES BEING USED IN NEW ZEALAND EARTHQUAKE OPERATIONS

The ARRL has received word from the New Zealand Association of Radio Transmitters (NZART <http://www.nzart.org.nz/>) -- that country's IARU <http://www.iaru.org/> Member-Society -- that amateurs there providing communications support in the aftermath of the 6.3 earthquake <http://www.arrl.org/news/new-zealand-amateurs-assist-in-earthquake-s-afterma th>

are using 2 meters (144 MHz). No HF frequencies are being used. If this changes, the information will be posted on the ARRL website.

==> + ARRL IN ACTION : WHAT HAVE WE BEEN UP TO LATELY?

Compiled by ARRL News Editor S. Khrystyne Keane, K1SFA

This feature is a concise monthly update of some of the things ARRL is doing on behalf of its members. This installment -- which covers the month of February -- looks at how the ARRL is responding to HR 607, a new Memorandum of Understanding between the ARRL and the Boy Scouts of America, improvements at W1AW and in the ARRL Lab, reports from the Official Observer Desk and more . Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-31>.

==> ARRL FIELD DAY: 2011 FIELD DAY PACKETS AVAILABLE

It's that time of year again -- time to start gearing up for ARRL Field Day, June 25-26, 2011! ARRL's flagship operating event -- always held the fourth full weekend in June -- brings together new and experienced hams for 24 hours of operating fun. Field Day packets are now available for download <http://www.arrl.org/files/file/Field-Day/2011/2011_FD_Packet.pdf>and include the complete rules (including a change for 2011), as well as other reference items such as forms, ARRL Section abbreviation list, entry submission instructions, a Frequently Asked Questions section, guidelines for getting bonus points, instructions for GOTA stations and a kit to publicize your event with the local press. Read more here <http://www.arrl.org/news/2011-field-day-packet-now-available>.

==> SOLAR UPDATE

Tad "Waiting for the Sun <http://www.youtube.com/watch?v=A0kypyGSKsE>" Cook, K7RA, reports: Solar activity is on the rise again, but the average sunspot and solar flux numbers are down, compared with last week. This week, the average daily sunspot number declined more than 14 points to 50.9, and the average daily solar flux was off 7 points to 96.8. The average daily planetary A index rose from 6.1 to 9, and the average mid-latitude A index was about the same, declining from 5.4 to 5.1. The most active day for geomagnetic indexes was March 1, with a planetary A index of 31. The planetary K index rose as high as 6 on that day. NOAA and USAF predict solar flux at 115 on March 3, 120 on March 4-10, 110 on March 11-15 and 105 on March 16-17. The planetary A index is forecast at 15, 12 and 10 on March 3-5, 5 on March 6-13 and 7 on March 14-15. The monthly average of sunspot numbers for December through February was 22, 32.2 and 53.5. Look for more information -- including a take on why Solar Cycle 24 has been so weak -- on the ARRL website on Friday, March 4. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by The Doors' Waiting for the Sun

<http://www.youtube.com/watch?v=A0kypyGSKsE>.

==> + SILENT KEY: EUGENE PRESSLER, W3ZXV (SK)

Eugene "Gene" Pressler, W3ZXV, of Gwynedd, Pennsylvania, passed away February 22. He was 80. Pressler, who served as an Assistant Director in the ARRL Atlantic Division, also served as the Public Information Coordinator and Assistant Section Manager for Eastern Pennsylvania, as well as the Division's representative on the Public Relations Advisory Committee for several years. In 1996, Pressler was honored by the Atlantic Division as its Amateur of the Year for a "lifetime of service to Amateur Radio." He co-founded and served as Director Emeritus of the Area Repeater Coordination Council, the regional Amateur Radio repeater frequency coordinator for Eastern Pennsylvania and Southern New Jersey. Read more here <http://www.arrl.org/news/former-atlantic-division-assistant-director-eugene-pressler-w3zxv-sk>.

==> + ARRL RECOGNIZES: LOU BURKE, W7JI, WINS FEBRUARY QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for February is Lou Burke, W7JI , for his article "A Compact 40 Meter Receiver. " Congratulations Lou! The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/cover-plaque-poll> . Cast a ballot for your favorite article in the March issue today.

==> DX NEWS: SPRATLY ISLANDS DXPEDITION POSTPONED TO 2012

In the March 3 edition of The Daily DX <http://www.dailydx.com/>, Editor Bernie McClenny, W3UR, reports that the planned DXpedition to the Spratly Islands <http://www.arrl.org/news/the-spratly-islands-dxpedition-gets-wings> has been postponed until April 2012. According to DX0DX Team Leader Chris Dimitrijevic, VK3FY, the postponement is due to circumstances beyond the control of the DX0DX Team and "in the best interests of the Team of Operators." The DX0DX DXpedition was originally scheduled to run January 6-February 1, 2011. Spratly currently sits at #32 on DX Magazine <http://www.dxpub.com/dx_news.html>'s "Most Wanted" List.

==> THIS WEEK ON THE RADIO

This week:

- March 5 -- Wake-Up! QRP Sprint
- March 5-6 -- ARRL International DX Contest (SSB) <http://www.arrl.org/arrl-dx>; Open Ukraine RTTY Championship
- March 6 -- DARC 10 Meter Digital Contest
- March 8 -- ARS Spartan Sprint
- March 9-10 -- CWops Mini-CWT Test

Next week:

- March 12 -- AGCW QRP Contest
- March 12-13 -- Idaho QSO Party
- March 13 -- North American Sprint (RTTY); SKCC Weekend Sprint; UBA
Spring Contest (CW)
- March 13-14 -- Wisconsin QSO Party; EA PSK31 Contest
- March 15-16 -- CLARA HF Contest

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
info. Looking for a Special Event station? Be sure to check out the
ARRL Special Event Stations Web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- March 5 -- ARRL South Texas Section Convention
<http://www.arrl.org/hamfests/south-texas-section-convention-greater-houston-
hamfest-1>,
Rosenberg, Texas; ARRL Alabama Section Convention
<http://www.arrl.org/hamfests/alabama-section-convention-birminghamfest>,
Birmingham, Alabama
- March 11-12 -- ARRL Oklahoma Section Convention
<http://www.arrl.org/hamfests/oklahoma-section-convention-green-country-hamfe
st>,
Claremore, Oklahoma
- March 12-13 -- ARRL North Carolina Section Convention
<http://www.arrl.org/hamfests/north-carolina-section-convention-charlotte-ham
fest>,
Concord, North Carolina
- March 19 -- ARRL West Texas Section Convention

> who has recently been using that alias.

You're "Dave," Dave... as in:

"Open the pod bay door, Hal."
"I'm afraid I can't do that, Dave."

And you're Tholenating in my group again. Also, you're still attempting to set
followups to alt.test, which is a breach of decorum in my group.

"I'm afraid you can't do that, Dave."

Shouldn't you be studying Uranus or something?

> 211> What does your question have to do
> 211> with the study or worship of Checkmate?
>
> What does your question have to do with OS/2, Checkmate?

Amateur Radio Newsline(tm) Report 1751 - March 4 2011

Amateur Radio Newsline report number 1751 with a release date of
Friday, March 4, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio continues its role in the wake of
the Christchurch New Zealand earthquake. We have a report from the
scene. Also, a United Kingdom ham is funded to conduct a study on
digital communications in emergency communications and the latest on
the proposal to create a new 500 kilohertz ham band. Find out the
details are on Amateur Radio Newsline(tm) report number 1751 coming
your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: THE CHRISTCHURCH NEW ZEALAND EARTHQUAKE STORY CONTINUES

Ham radio continues to be an important factor in rescue and recovery
efforts in the wake of the earthquake that hit Christchurch, New
Zealand, on Tuesday, February 22nd. Jim Meachen, ZL2BHF, is several
hundred miles to the North in Auckland with the latest:

--

ZL4FZ: "At this stage were still extensively supporting the Land Star
operation that's the more major component. Today with 300 searchers in
the field we have deployed probably 50 radios to teams of operators and
each of those teams has each got its own radios. There are about an
actual 250 staff on foot in the field and all of that communications is
coming back through AREC"

--

That's Richard Smart, ZL4FZ, who is head of the Amateur Radio Emergency
Communications team explaining the role that his emergency
communications group is currently playing in the aftermath of the 6.3
earthquake. A quake that as of airtime is believed responsible for at
least 160 deaths and scores of injuries in and around the Christchurch
area. According to Smart ham radio was on scene from the time the quake
hit and right though the present:

--

ZL4FZ: "AREC involvement in the Christchurch earthquake has been to
support Civil Defense directly with the welfare centers, initially at

the temporary welfare center in Hagley Park. (This is) a small tent city where AREC provided effectively a complete communications terminal right through to the extensive support for the Land Star operation which has been visiting every home in the Western suburb of Christchurch. To date a total of some eighteen thousand homes have been visited by the Land Star teams and the AREC teams have provided communications for upward of 300 volunteers in the field at any one time."

--

Smart tells Amateur Radio Newsline that it's the ability of hams to quickly adapt and respond to any emergency that masks them valuable in situations such as this. He also says that those in charge of relief efforts are very satisfied with the AREC ham radio operations:

--

ZL4FZ: "I believe in this case that AREC has managed to provide a solution to unforeseen communications difficulties, and in the case of the Land Star deployment particularly because it has become a linchpin to allow the operation to work.

"We have been told by the senior management for the Land Star operation that basically it would not have been possible to achieve what they have achieved which is spectacular in its own right, without the assistance of AREC in that role."

--

So what role will AREC play as recovery efforts continue? ZL4FZ says that at this moment its hard to say:

--

ZL4FZ: "Its very difficult to tell at this stage and the difficulty is that there a number of significant issues that the city is facing and there are a number of agencies involved, obviously with specializations in different areas. One of the things the Civil Defense emergency management teams are working on is setting the appropriate team for the tasks that they have. And at this stage, while this tasking is drawing nearer to a close, we are waiting word as to what the next tasking may be."

--

The story of the Christchurch earthquake and the part being played by ham radio in post quake recovery efforts is far from over and we will have more for you in future Amateur Radio Newsline reports.

>From Auckland, on the North Island of New Zealand, I'm Jim Meachen, ZL2BHF, reporting for the Amateur Radio Newsline.

--

It has to be noted that so far, this has been a VHF only operation. Word from the New Zealand Association of Radio Transmitters is that hams providing communications support in the aftermath of the quake are using only 2 meter FM. No High Frequency communications into and out of the Christchurch area has been found to be necessary. (ARNewsline(tm), ZL2BHF, ZL4FZ)

**

RESCUE RADIO: UK HAM GETS FUNDING TO STUDY DIGITAL EMCOMM SYSTEMS FOR RAYNET

A member of The United Kingdom's Radio Amateurs' Emergency Network or RAYNET has received two months' funding to examine how that group could best use data communications to support police and other services.

Howard Winter, G1BYY, a member of Mid-Herts RAYNET, made an application to the Vodafone World of Difference Scheme in November. According to the RSGB News, Winter will spend two months undertaking his own research and experimentation, collating the work that has already been done by RAYNET Groups and comparing the experiences of members experimenting with data. He will then be producing documents that will be available nationally, to groups of all affiliations.

An increasing demand from emergency response services using RAYNET to have it provide data links has led many groups to experimenting on a variety of digital systems. RAYNET members are now using APRS to track vehicles responding to incidents in remote locations, transmitting photographs from the scenes of emergencies and sending data files back to their control and command centers (GB2RS)

**

RESTRUCTURING: THE LATEST ON THE 500 KHZ PROPOSAL

A possible hitch in the creation of a permanent low frequency allocation at or near 500 KHz. Jeremy Boot, G4NJH is in Nottingham in the UK with more:

--

The ITU Conference Preparatory Meeting, or CPM, for the World Radiocommunication Conference 2012, or WRC-12, has completed its work on the agenda item that considers an allocation of up to 15kHz in the band 415 to 526.5kHz.

Three options, one of which is no allocation to the amateurs, are proposed. Whilst initially it was hoped that spectrum around and near to 500kHz could be allocated for amateur use, the maritime service has identified a new requirement for this part of the spectrum. Because of this there is no support from national administrations like Ofcom to support amateur allocation in this part of the spectrum.

One of the remaining options agreed by the ITU CPM is the so-called Method A, originally put forward by the RSGB. This is for an

allocation of up to 15kHz between 472kHz and 487kHz. The Americans, Canadians and others within their regional group, CITEL, favor a different option, Method B, which is for a split allocation between 461 - 469kHz and 471 - 478kHz, totaling 15kHz. Method A is the main option being considered within CEPT, which has yet to reach what it terms a European Common Proposal on the option.

I'm Jeremy Boot, G4NJH.

--

None of this preparatory work affects any temporary experimental access to this spectrum other than tests that have been carried out by the maritime service in respect of its proposed new system. Further information is at tinyurl.com/lowfreq (RSGB News)

**

BREAKING DX NEWS: SABLE ISLAND MAY BE ON BY MARCH 7

And some breaking news in the world of DX. This with news that the long anticipated Sable Island DXpedition may be on the air before our next newscast.

Randy Rowe, N0TG, reports via the Southgate news that providing flight conditions are suitable, all is set for operations to begin around 2100 UTC on March 7th. Rowe also says that the team will standby and be ready to go on a day to day basis should there be delay.

Three stations will be operational simultaneously as much as possible using the calls N0TG/CY0, K8LEE/CY0 and N1SNB/CY0. Additional details are available on line at www.cy0dxpedition.com. And we will have more DX news later on in this weeks Amateur Radio Newsline report. (Southgate)

**

RADIO LAW: FCC GRANTS CONTROVERSIAL CONDITIONAL WAIVER TO BROADBAND PROVIDER TO OPERATE ADJACENT TO THE GPS BAND

A big bru-ha-ha is building over a new service grant adjacent to the G-P-S band. Amateur Radio Newsline's Norm Seeley, KI7UP, is here with the rest of the story:

--

The Air Transport Association and other aerospace companies say that a project to help make broadband wireless service available to all residents across the United States has the potential to interfere with the current users of the Global Positioning System. Also, it that it could jeopardize the cornerstone of the Federal Aviation Administration's $40 billion next generation air navigation and transportation system.

At the heart of the controversy is what broadband suppliers are calling an innovative project by service provider LightSquared, Inc. to rebroadcast L-band satellite data and voice communications over a large terrestrial network. This using a new technology that would bring terrestrial broadband to 260 million people by 2015.

On January 26th LightSquared received a conditional waiver from the Federal Communications Commission to rebroadcast its satellite signals using high power transmitters on as many as 40,000 tower sites around the country. LightSquared launched its SkyTerra-1 communications satellite in November 2010, and plans to launch a second satellite in 2012.

The FCC approved the request from LightSquared in less than three months, angering the nations aerospace industry that had requested that the normal Notice of Proposed Rule Making process be followed. This, allow for more time to analyze the potential impacts to air navigation. Also in opposition is the GPS equipment supply industry with well known manufacturer Garmin leading those who do not want to see the LightSquared rushed into place at the expense of G-P-S users world-wide.

The issues involve the potential for out-of-band interference between LightSquared's operating spectrum of 1525 of 1559 MHz and the GPS band of 1559 to 1610 MHz. A study released by Garmin, whose GPS units are installed in more than 43,000 aircraft showed that aviation units would detect interference, or jamming, more than 12 Nautical Miles from a simulated LightSquared antenna site and suffer loss of its positional fix at 5 Nautical Miles. Garmin says its results were conservative, and actual implementation of the LightSquared system could increase the distances.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, reporting from Scottsdale, Arizona.

--

Meantime, caught in the middle of this fight are the tens of millions of U-S citizens who use G-P-S to navigate from one place to another. All they want is to get from point A to point B without being interfered with by anyone. (Various sources)

**

ENFORCEMENT: LASER POINTER HITS COCKPIT OF PHOENIX NEWS HELICOPTER

A Phoenix news helicopter was the victim of an attack from the ground in late February. This as someone shot a bright laser beam into its cockpit that was also caught by the choppers on-board camera.

According to The Arizona Republic, authorities are currently investigating the incident and have yet to identify the perpetrator. The newspaper goes on to note that local police actually searched door-to-door in the area where the beam originated but so far have come up empty handed.

A spokesman with the Federal Aviation Administration commenting on the incident said that the message here is very simple. If you want to engage in this kind of dangerous and irresponsible behavior, you can be caught and arrested. If caught, and if prosecuted by the perpetrator of this stunt could face up to 20 years in prison. (Published news reports)

**

HAM RADIO POLITICS: NEW SM ELECTED IN ARKANSAS

Turning to the ham radio political scene, in the only balloted Section Manager election this winter, ARRL members in Arkansas have elected Dale Temple, W5RXU, North Little Rock, as Section Manager. Temple received 362 votes, and his opponent, incumbent Section Manager J. M. Rowe, N5XFW, of Hot Springs, received 290 votes.

Temple begins his two year term of office on April 1st. Outgoing Section Manager Rowe has served in that position since December 2008.

Ballots were counted and verified at ARRL Headquarters on Tuesday, February 22. (ARRL)

**

HAM HAPPENINGS: RADIO CLUB OF AMERICA BREAKFAST AT IWCE

On the social scene, the Radio Club of America Breakfast at IWCE Mobile Communications Show is slated for Thursday, March 10th. The venue is the Las Vegas Hilton Hotel from 7:30 AM to 9:00 AM. The keynote speaker is Mark Crosby who will discuss Existing Licensees and the Push to Broadband. More information is on line at tinyurl.com/4buj9lm. (RCA)

**

HAM HAPPENINGS: HAMVENTION EXHIBITS FLOOR MAP AVAILABLE

If you plan on attending Hamvention 2011, listen up. Hamvention planners have announced that a file containing a map of all the inside exhibits has been uploaded to the files area of the Hamvention Yahoogroup on-line discussion. If you are a Yahoogroups member you an access this map at tnyurl.com/324qy9.

Hamvention 2011 is slated for May 20th to the 22nd at the Hara Arena is suburban Dayton, Ohio. We hope to see you there. (AC8DE)

**

NAMES IN THE NEWS: RICHARD FISHER, KI6SN, NAMED NEW EDITOR OF POPULAR COMMUNICATIONS MAGAZINE

And another change at CQ Communications. This with word that veteran journalist and writer Richard Fisher, KI6SN, has been named the new Editor of Popular Communications magazine.

Fisher will succeed Edith Lennon, N2ZRW, who is stepping down after four years at the Popular Communications editors desk. This, to pursue freelance editing and writing projects and to work with a non-profit organization.

Richard Fisher, KI6SN lives in Riverside, California, and is no newcomer to the CQ family. In addition to his new position, Fisher will also continue in his current position as Editor of WorldRadio Online magazine and will also continue to write his current columns in Popular Communications, WorldRadio Online and CQ magazines. KI6SN also manages three related Internet sites, including blog sites for WorldRadio Online, his "Trail-Friendly Radio" column in that magazine, and his "Public Service" column in CQ magazine. He is also an administrator of the Facebook pages for all four CQ Communications publications.

Richard Fisher, KI6SN, assumes the Popular Communications Editors mantle effective with the June 2011 issue. (CQ)

**

NAMES IN THE NEWS: UTAH'S WOMEN IN RADIO CELEBRATE NUMBER 10

And the group Women in Amateur Radio, the largest class for female ham radio operators in Utah, for and taught by women, is celebrating its 10th anniversary on March 7th. According to Linda Reader, N7HVF, most of those who graduated from that class are still active in the hobby, with some involved in emergency and public service communications. The group hopes to make these classes a regular event for those women in Utah seeking to become radio amateurs. (N7HVF)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

EMERGING TECHNOLOGY: NEW STUDY FINDS CELLPHONES AFFECT BRAIN WAVES

A newly completed study indicates that electromagnetic radiation from the antenna of cellular telephones may be altering the way we think and behave. This according to an article published Tuesday, February 22nd in the Journal of the American Medical Association.

According to news reports, researchers peered inside the brains of 47 healthy subjects using Positron Emission Tomography to measure the location and timing of brain activity by detecting signs that cells were consuming energy. They found that despite official skepticism including statements issued by the Food and Drug Administration that cellphones' electromagnetic energy exerts any influence on nearby cells.

The preliminary study, led by a respected neuroscientist at the National Institutes of Health provides what other researchers are calling solid evidence that cellular telephone use has measurable effects on brain activity. It also suggests that the peoples attachment to its millions of wireless phones may be altering the way we think and behave in subtle ways. (Various published reports)

**

ON THE AIR: CELEBRATING 100 YEARS OF THE REPUBLIC OF CHINA

On the air, keep an ear open for members of the Republic of China Centenary Foundation who will be activating special event station BV100 during the CQ WW WPX SSB Contest on March 26th and 27th. The operators from Taiwan will then be on the air from Shaio-Liu-Chiu Island until the end of the year as a special event is to celebrate the 100th anniversary of their homeland. Operations will be on all bands and modes. Complete details, a operating schedule and information as to how to earn a BV100 award is available at www.bv100.tw/EN. QSL's go via BV2KI. (OPDX)

**

ON THE AIR: CELEBRATING THE UNIFICATION OF ITALY

And keep on the lookout for special event station IO4UI to be active between March 1st and September 30th. This operation is to celebrate the 150th anniversary of the Unification of Italy. All of QSOs will be confirmed automatically via the bureau. More details are available on QRZ.com. QSL this one via I4JEE. (OPDX)

**

ON THE AIR: 90 YEARS FOR THE LINCOLN SHORTWAVE CLUB

The United Kingdom based Lincoln Short Wave Club is celebrating its 90th anniversary this year. According to GB2RS, anyone working the club callsign G5FZ will receive a limited edition QSL card that will only be available through December 31st. (GB2RS)

**

ON THE AIR: K5B - THE BATAAN MEMORIAL DEATH MARCH MARATHON

Closer to home, the Mesilla Valley Radio Club of Las Cruces, New Mexico will be operating special events station K5B on March 27th. This in conjunction with the 22nd annual Bataan Memorial Death March Marathon held at the White Sands Missile Range from 10:00 to 23:00 UTC.

K5B will be operating on or near 3.893, 7.225, 14.330 and 21.337 MHz. QSL cards go to Special Events Station K5B in care of the Mesilla Valley Radio Club, P. O. Box 1443, Las Cruces, New Mexico 88004. Please put `K5B' on the lower, left hand corner of your outer envelope. Complete information on this event is on-line at www.n5bl.org/bataan. (WB4AEJ)

**

DX

In DX, DO1BEN and DO1IQ will be on the air portable OZ from Lolland Island between April 22nd and the 29th. Operation will be on 80 through 10 meters using SSB and some digital modes. QSL each operator via their home callsigns, either via the bureau or direct. For updates, visit www.do1ben.de

EI7CC, will be active as 7P8PB from his brother-in-law's 7P8CC station in Maseru, Lesotho between March 9th and the 23rd. His operating time will be limited because he will be on a family holiday. QSL via EI7CC via the bureau or direct. Logs will be uploaded to Logbook if the World immediately upon his return to Ireland.

A team of six operators from Italy will be active as from Albania as I2GPT portable ZA between March 9th and the 13th. Their operations will be on 40, 30, 20 and 17 meters using CW and SSB. QSL to I2GPT, either direct or via the bureau.

MJ0ASP is returning to Marrakech, Morocco, between March 14th through the 21st, and will be active as CN2MR. Operation will be on 40 through 10 meters using CW. He says that he will focus on the 30, 17 and 12 meter bands. QSL via MJ0ASP.

Listen out for Antigua on the air as W4OWY and W9OP will once again be active as V25WY and V25OP, respectively. They will be on the island between March 8th and the 18th. Operation will be on 160 through 6 meters using CW, SSB and RTTY. QSL via their home callsign. Either direct or via the bureau.

Lastly, DL3KWR and DL3KWF will be active portable CT9 from Madeira between March 10th and April 6th. Their operation will be on 30, 17 and12 meters using mostly CW. DL3KWF is expected to try some RTTY and PSK31. QSL via their home callsign. And if you are a Limeliters fan you might say to this one, have some Madeira, my dear.

(Above from various DX news sources)

**

THAT FINAL ITEM: WISE RADIOS ITS LAST SPACE PHOTO BACK HOME

And finally this week, its 73 to a NASA sky-mapping telescope that spent 13 months scanning cosmic objects as it roamed through space. The agency's Wide-Field Infrared Survey Explorer, nicknamed WISE, captured one last snapshot of a portion of our Milky Way galaxy as the spacecraft shut down for good.

During its thirteen months of operation, WISE scanned the sky taking about 1.8 million images of asteroids, stars and galaxies that it dutifully radioed back to Earth. The spacecrafts mission netted some nineteen previously unseen comets and more than 33,500 asteroids. The latter included 20 near Earth objects which are items in space with orbits that pass relatively close to our Earth's own orbit.

The final image it took and sent home shows thousands of stars in the constellation Perseus covering an area three times the size of the full moon. Its one of those spectacular photos that once seen is hard to forget. You can view it and read more abut the WISE mission on-line at tinyurl.com/4ce63wd. (Space)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, a reminder that Amateur Radio Newsline is looking for a radio amateur planning to attend Hamvention 2011 and who is a professional television newsman or an actor with on-camera experience. This to take part in this years Ham Radio Town Meeting.

This years session is titled "How To Make A Ham Radio Video In The 21st Century." Among the many topics we want to cover is how to properly appear when the camera lens is on you and tape is rolling. Obviously nobody has better expertise in this area than a TV newsman or an actor who regularly appears on TV or in the movies.

If you want to take on this volunteer role, please contact us or send your resume with your contact information to Bill Pasternak, WA6ITF, who is producing and moderating the session. Our e-mail address is still newsline (at) ix (dot) netcom (dot) com and we look forward to hearing from you.

For now, with Bill Pasternak, WA6ITF, at the editor's desk, I'm Jim Damron, N8TMW, and I'm Jeff Clark, K8JAC, saying 73 and we thank you for listening.

360. Besides retro operating systems, tholen also enjoys retro gaming!

Newsgroup: rec.radio.amateur.policy
Date: 2011-03-04 20:46:45 UTC
From: Ken Wesson <kwesson@gmail.com>
Message-ID: <4d714fb5$1@news.x-privat.org>
Source record: 244681
Cross-posted to: comp.os.os2.advocacy,rec.arts.tv,comp.lang.lisp,alt.usenet.kooks,rec.radio.amateur.policy

[xposted to some groups tholen has posted to recently]

I was on a Quake 1 CTF server this morning (yes, there really are still such things), and decided to sit out one game as a spectator (as I was having lunch at the time), parking myself over the blue flag as the particular map that had come up in the rotation tended to have its most intense fighting in the flag rooms.

Guess who showed up within about five minutes.

When I noticed the name, at first I thought it was a coincidence. Then this happened:

tholen eats zlata?'s pineapple
$19.95 chewed on Hydro's boomstick
zlata?: hehehe! what -- a -- MESS! hehe!
tholen: What does your classic unsubstantiated and erroneous claim have to do with OS/2, Zlata?

Needless to say, when I saw that last message go up I did a spit-take.

Then I had the presence of mind to drop the console down and take a screenshot before newer messages shoved this exchange off the top of the console buffer:

http://turboimg.com/p/wjo1299269787c.jpg

Fascinated, I left the console down and watched for more messages from tholen. I eventually took these ten additional screenshots:

http://turboimg.com/p/epl1299269825z.jpg
http://turboimg.com/p/aur1299269844b.jpg
http://turboimg.com/p/keh1299269862c.jpg
http://turboimg.com/p/yke1299269878z.jpg
http://turboimg.com/p/wjo1299269892q.jpg
http://turboimg.com/p/keh1299269911k.jpg
http://turboimg.com/p/jef1299269926n.jpg
http://turboimg.com/p/aur1299269940t.jpg
http://turboimg.com/p/jef1299269961v.jpg
http://turboimg.com/p/xnk1299269978e.jpg

These screenshots are genuine and completely unaltered, save that I boosted the contrast of certain areas to make tholen's actions, messages, and deaths stand out, along with one or two other events apparently relevant to subsequent tholen utterances.

Besides another "classic unsubstantiated and erroneous claim", there are some "classic illogic"s, a "classic ambiguity", "suffering from lag?", "still suffering from shrapnel woulds?" (after grenading someone), and of course "who is tholenbot, 1995? There is nobody on this server using that alias".

My personal favorite? Hard to be sure, but I'd say the top 4 are definitely

What does this utter bedlam have to do with OS/2? (during some particularly heavy fighting)

Classic illogic. Flags should be better defended than this. (immediately after picking up the red flag)

What does your psychotic attack have to do with OS/2, MilkDud? (after being killed by axe+grappling hook combo by a player named MilkDud who had run out of ammo and was desperate)

Who is "evildoer", Darkwing Duck? There is nobody on this server using that alias. (after being fragged by a player using said name, who had proceeded to utter the comic book character's catchphrase "Suck gas, evildoer!" The same player also at one point proclaimed himself to be "the packet loss in the network of evil", among other themed witticisms.)

He also asked what various flag takings and captures had to do with OS/2, and when the capture limit was hit and the map changed again, "What does ctf2m1 have to do with OS/2?" By that time, I was done my lunch so I joined the team tholen wasn't on and proceeded to rip him a new one a few times. I got asked several times what my classic misguided attacks had to do with OS/2. :)

FWIW, tholen doesn't actually seem to be a particularly bad player. He got his share of frags (though, never me) and even captured once. ("What does that fanfare have to do with OS/2?" a moment later, natch.)

Whoa. While digging into more of the screenshots I took, I found one with the "network of evil" remark and also this gem from tholen:

What does your picking up of our flag have to do with OS/2, Corpse Grinder?

Here it is:

http://turboimg.com/p/yke1299272526n.jpg

The interesting thing is, tholen seems to understand the game and how it is played. He isn't particularly confused by the mechanics, scoring rules, or anything. He knows what he's supposed to do with the flag, and that it should be defended. He's intelligent about going after ammo and runes and he protects his health. And he's constantly wondering aloud what all of it has to do with OS/2.

And most of the other players call him things like "tholoon" and "tholenbot" and "thingamabob", just like they do in the newsgroups and resulting in similar responses.

Go figure.

What does your gaming have to do with OS/2, Wesson?

5> Guess who showed up within about five minutes.

What does your request have to do with OS/2, Wesson?

5> When I noticed the name, at first I thought it was a coincidence.

What does the correctness of your first thought have to do with OS/2,
Wesson?

5> Then this happened:

5> Needless to say, when I saw that last message go up I did a spit-
take.

Do non sequiturs often have that effect on you, Wesson?

5> Then I had the presence of mind to drop the console down and take
a
5> screenshot before newer messages shoved this exchange off the top
of the
5> console buffer:

What do any of those exchanges have to do with amateur radio policy,
Wesson?

5> Fascinated, I left the console down and watched for more messages
from
5> tholen. I eventually took these ten additional screenshots:

Did any of those have anything to do with amateur radio policy,
Wesson?

5> These screenshots are genuine and completely unaltered, save that
I
5> boosted the contrast of certain areas to make tholen's actions,
messages,
5> and deaths stand out, along with one or two other events
apparently
5> relevant to subsequent tholen utterances.

Classic contradiction.

5> Besides another "classic unsubstantiated and erroneous claim",
there are
5> some "classic illogic"s, a "classic ambiguity", "suffering from
lag?",
5> "still suffering from shrapnel woulds?" (after grenading someone),
and of
5> course "who is tholenbot, 1995? There is nobody on this server
using that
5> alias".

It's been said that imitation is the sincerest form of flattery,
Wesson. Are you upset that you weren't the one being flattered?

5> My personal favorite? Hard to be sure, but I'd say the top 4 are
5> definitely

What does your question have to do with amateur radio policy, Wesson?

5> He also asked what various flag takings and captures had to do with
OS/2,
5> and when the capture limit was hit and the map changed again, "What
does
5> ctf2m1 have to do with OS/2?" By that time, I was done my lunch so
I
5> joined the team tholen wasn't on and proceeded to rip him a new one
a few
5> times. I got asked several times what my classic misguided attacks
had to
5> do with OS/2. :)

On what basis do you claim that the correspondent is a "he", Wesson?

5> FWIW, tholen doesn't actually seem to be a particularly bad player.
He
5> got his share of frags (though, never me) and even captured once.
("What
5> does that fanfare have to do with OS/2?" a moment later, natch.)

You've flattered someone, Wesson, but not me.

6> Newsgroups:
comp.os.os2.advocacy,rec.arts.tv,comp.lang.lisp,alt.usenet.kooks,rec.radio.amateur.policy

6> Whoa. While digging into more of the screenshots I took, I found
one with
6> the "network of evil" remark and also this gem from tholen:

Do you often find it necessary to respond to yourself, Wesson?

6> Here it is:

Still responding to yourself, eh Wesson?

6> The interesting thing is, tholen seems to understand the game and
how it
6> is played. He isn't particularly confused by the mechanics,
scoring
6> rules, or anything. He knows what he's supposed to do with the
flag, and
6> that it should be defended. He's intelligent about going after ammo
and
6> runes and he protects his health.

Why do you find that so interesting, Wesson?

5> And he's constantly wondering aloud
6> what all of it has to do with OS/2.

From that do you conclude that gamers have non sequitur problems,
Wesson? Do you conclude that the newsgroup posters with non sequitur
problems are gamers?

6> And most of the other players call him things like "tholoon" and
6> "tholenbot" and "thingamabob", just like they do in the newsgroups
and
6> resulting in similar responses.

From that do you conclude that gamers have attribution problems,
Wesson? Do you conclude that the newsgroup posters with attribution
problems are gamers?

6> Go figure.

What does your suggestion have to do with amateur radio policy,
Wesson?

363. Re: Besides retro operating systems, tholen also enjoys retro gaming!

comp.os.os2.advocacy,rec.arts.tv,comp.lang.lisp,alt.usenet.kooks,rec.radio.amateur.policy

1> HERE'S A TIP FOR BOTH OF YOU ASSWIPES.

Who is "ASSWIPES", Horace? There is nobody in this newsgroup
using that alias. And what does your tip have to do with OS/2,
Horace? And why are you shouting, Horace?

1> BOTH OF YOU ASSWIPES NEED TO KEEP YOUR SISSIFIED NON HAM RELATED
1> BULLSHIT OUT OF RRAP.

Who is "ASSWIPES", Horace? There is nobody in this newsgroup
using that alias. Ironically, you didn't keep your sissified
non-OS/2 related bullshit out of comp.os.os2.advocacy, Horace.
And why are you shouting, Horace?

If you have a problem with this thread, Horace, take it up
with Ken Wesson, who started the thread and chose the newsgroups
in which it appeared.

365. My Home Sweet Home

Roger. Is that you?

Of course it is, you little pussy.

Did you enjoy Dave Heil's visit?
When his wife knocked on your front door? With you inside?
And the photos he and his wife took of your house?
The street sign photos?
Oh, but wait. YOU weren't home, were you? (your story #1)
Or, you WERE home but refused to answer the door. (your story #2)
Or you were gone and your girlfriend was there and she was afraid to answer the door. (your story #3)

Now, which of the three was it, Roger?

And do you still have that Celtic cross on your front door...the one that the Heils described in detail?
How would they have known about that Roger, if they were not there?

That must have been a fearsome night for you, Roger.
Did you pee your panties?

I bet you could not sleep for two weeks after their visit.

369. Seeking New FAQ/Intro Maintainers for rec.radio.amateur.*

Newsgroup: rec.radio.amateur.policy
Date: 2011-03-07 07:05:01 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/recruitment-1-1299481501@panix.com>
Source record: 244690
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

It's eexactly as trollish as your posts to thosee newsgroups, tholeen.

(Just to recap, for those of you who missed the first installment and
since tholen is constitutionally incapable of quoting more than one level
deep: I bumped into tholen on a quake 1 CTF server the other day and took
screenshots. Amusingly, he's a reasonably proficient player, but peppers
the message log with assorted questions of a very familiar sort for the
entire game -- quite long ones, too, so I'm pretty sure he's got some
macros he's spamming. Unless, of course, he's a bot.

> What does your gaming have to do with OS/2, Wesson?

It's your gaming as well, both last Friday and again a few minutes ago on the same server where you showed up and joined the team I was on about 1/4 of the way through the game.

By the way, sorry about that rocket a few minutes ago. Oh, for the benefit of everyone else reading this, here's an excerpt from my console log of the game:

kwickie defends BLUE's flag carrier against an aggressive enemy
Spock rides kwickie's rocket
Black Flag: no can do undertaker
kwickie defends BLUE's flag carrier against an aggressive enemy
KillCreek was gibbed by kwickie's rocket
tholen visits the Volcano God
tholen lost the RED flag!
The RED flag has been returned
terminator got the RED flag!

That damn reactor room in ctf2m1 is such a pain that way. :) Maybe if you'd grappled yourself to the wall (or up and out towards blue base!) as soon as the shrapnel started flying ... but what's done is done, and we won 5-0 anyway when you capped a few minutes later after terminator got terminated on his attempt.

I must say your reaction was quite mild, and rather amusing:

tholen: What does this place's classic failure to be OSHA compliant have to do with OS/2?

Especially compared to this, earlier, when you and troy walked into the same teleporter in blue base at the same time:

tholen was telefragged by troy
troy was telefragged by tholen
troy lost the RED flag!
tholen: What does your murder of a teammate have to do with OS/2, troy?
troy: MOTHERFUCKER!!

Heck, you weren't even the one carrying the flag that time (and troy respawned close by, grabbed the flag again, and capped, so no biggie for him either despite his initial reaction) and it was certainly more accidental than my rocket shoving you into that lava. ;)

It's also nice of the server admin to run that mod that auto-respawns the flag immediately if it falls in lava. Otherwise it would have been sitting down there for ten minutes while we all got bored playing plain old deathmatch. Maybe I'd have even been more careful where I aimed my rockets if we'd been on another server. ;)

> 5> When I noticed the name, at first I thought it was a coincidence.
>
> What does the correctness of your first thought have to do with OS/2,
> Wesson?

Correctness? But it *wasn't* coincidence, unless there are *twoo* people running around out there called "tholen" that constantly ask what various things have to do with OOS/2.

> 5> Then this happened:
>
> 5> Needless to say, when I saw that last message go up I did a spit-

>
> Do non sequiturs often have that effect on you, Wesson?

Yoours have been known too do so froom time to time, thoolen.

> 5> Then I had the presence of mind to drop the console down and take a
> 5> screenshot before newer messages shoved this exchange off the top of
> the
> 5> console buffer:
>
> What do any of those exchanges have to do with amateur radio policy,
> Wesson?

As much as most of your posts to rec.radio.amateeur.policy do, thooleen. Oh, soorry, some of the vowel keys on my keyboard seem to be getting stuck, and the deleete key doesn't work. Bear with me during these trying timees. :)

>
> On what basis do you claim that the correspondent is a "he", Wesson?

Welll, he was you, and you appear to be a he. Dr. David J. Tholen, lllate
of some astronomy institute or another, was it not, thollen?

Oh, damn, now my "ll" keeey is sticking too!

> 5> FWIW, tholen doesn't actually seem to be a particularly bad player.

> 5> got his share of frags (though, never me) and even captured once.
> ("What
> 5> does that fanfare have to do with OS/2?" a moment later, natch.)
>
> You've flattered someone, Wesson, but not me.

I don't think you have anything to be especially ashamed or embarrassed
about. You captured twice in tonight's game, two times more than the
entire red team, who, mind you, seemed to spend most of their time
fumbling with their shoelaces and tripping over their own grenades. ;)
When they weren't too busy typing out taunts like "no can do undertaker"
to play the game properly (and getting pineappled in the face for their
efforts, of course -- that's always what I do when I suspect a player's
typing, a grenade to the face, wakes them up right quick. Especially if
they are on the other team so they actually take damage.)

> 6> The interesting thing is, tholen seems to understand the game and how
> it
> 6> is played. He isn't particularly confused by the mechanics, scoring
> 6> rules, or anything. He knows what he's supposed to do with the flag,

> and
> 6> runes and he protects his health.
>
> Why do you find that so interesting, Wesson?

It givees some insight into your disordeer, tholeen. (Damn "e" key!) I
think it might be a form of OCD, or maybe even Tourette's. (The common
public perception of Tourette's is that it makes you blurt out nasty
swear words, like troy did when you telefragged him earlier. But actually
it quite commonly manifests as other physical and verbal tics, and "what
does X have to do with OS/2?" is certainly no less plausible a verbal tic
than some others. Not to mention "who is 'tholeen', Wesson? There is

nobody in this newsgroup using that alias." ;))

> 5> And he's constantly wondering aloud 6> what all of it has to do with
> OS/2.
>
> From that do you conclude that gamers have non sequitur problems,
> Wesson?

Noot gamers in general. Just you, thoolen.

> Do you conclude that the newsgroup posters with non sequitur
> problems are gamers?

One of them is, theelon.

(Aww, crap-dammit!)

Another couple of amusing exchanges:

tholen chewed on terminator's boomstick
terminator: astalavista, baby
tholen: Who is "baby", terminator? There is nobody on this server using
that alias.

Someone obviously fancies himself a T2 fan.

And then this:

tholen captured the RED flag!
KillCreek: dammit
troy: way to go tholenbot!
tholen: Who is "tholenbot", troy? There is nobody on this server using
that alias.

And this:

Spock rides tholen's rocket.
tholen: Suffering from blast wounds, Spock?
klepto rides kwickie's rocket.
troy got the RED flag!
klepto: dammit
KillCreek: defense?
Spock: That is illogical, Tholen.
crOoKed crOoK was gibbed by kwickie's grenade
tholen: What does your illogical failure to protect yourself have to do
with OS/2, Spock?
crOoKed crOoK: ow
kwickie ate 2 loads klepto's buckshot
klepto: payback's a bitch kwickie
Spock: Tholen, if I were human, I believe my response would be "go to
hell". If I were human.
klepto chewed on kwickie's boomstick
KillCreek accepts kwickie's shaft
klepto accepts kwickie's shaft

tholen: What does your classic pontification have to do with OS/2, Spock?

That's what, five messages total in your little argument? And given Spock is spoouting long, grammatically well-formed, capitalized sentences half of which are movie lines from The Undiscoovered Country, I'm guessing you were arguing with a bot, thoolen.

Perhaps you both were.

>   13. Report of the Ritual Abuse Task Force - Los Angeles County
> Commission for Women "Mind control is the cornerstone of ritual abuse,
> the key element in the subjugation and silencing of its victims.
> Victims of ritual abuse are subjected to a rigorously applied system
> of mind control designed to rob them of their sense of free will and
> to impose upon them the will of the cult and its leaders. Most often
> these ritually abusive cults are motivated by a satanic belief system
> [only on the surface.] The mind control is achieved through an
> elaborate system of brainwashing, programming, indoctrination,
> hypnosis, and the use of various mind-altering drugs. The purpose of
> the mind control is to compel ritual abuse victims to keep the secret
> of their abuse, to conform to the beliefs and behaviors of the cult,
> and to become functioning members who serve the cult by carrying out
> the directives of its leaders without being detected within society at
> large."http://ritualabuse.us/ritualabuse/articles/report-of-the-ritual-abuse...http://ww

> and Satanic Ritual Abuse: the Issue Of Credibility Dissociation Vol.
> III, No. 1 "A large number of adult MPD patients in psychotherapy are
> reporting memories of explicitly satanic ritual abuse beginning in
> childhood. The authors of two limited surveys, conducted with a select
> group of MPD therapists, suggest the percentage of reported satanic
> ritual abuse in the MPD population to be 20% (Braun & Gray, 1986) and
> 28% (Braun & Gray, 1987). A survey by Kaye and Klein (1987) reveals
> that 20 of the 42 MPD patients in treatment with seven Ohio therapists
> describe a history of satanic ritual abuse. Ilopponen (1987) states
> that 38 of the more than 70 MPD patients she has treated report
> memories of "satanic-type ritualized abuse " (p. 11). Two inpatient
> facilities specializing in the treatment of MPD report that
> approximately 50% of their patients disclose memories of satanic
> ritual abuse (Braun, 1989a; Ganaway, 1989). Similar accounts of
> satanic ritual abuse are being reported by personally unrelated MPD
> patients from across the United States (Braun, 1989b; Braun & Sachs,
> 1988; Kahaner, 1988; Sachs & Braun, 1987). In addition, according to
> Braun (1989b), the reports of patients in this country are similar to
> data collected from adult survivors in England, Holland, Germany,
> France, Canada, and Mexico...Brown (1986), noting many similar

> allegations in child and adult satanic ritual abuse accounts, suggests
> that reports are not only comparable across geographical and personal
> boundaries, but across generations as
well."http://www.empty-memories.nl/dis_90/vanbenschoten_sra.pdf

>   22. Cozolino, L.J. (1990). “Ritual child abuse, psychopathology, and
> evil”. Journal of Psychology and Theology, 18(3):218-227 "Ritualistic
> abuse is an extreme form of psychological, physical, and sexual
> maltreatment of children in the context of "religious" ceremony. The
> clinical presentation of the victims of such abuse is complex and
> raises many issues related in the diagnosis and treatment of
> psychopathology as well as the importance of spiritual
counseling"https://wisdom.biola.edu/jpt
>   23. Cozolino, L.J.; Shaffer, R.E (Fall 1992) "Adults who report
> childhood ritualistic abuse." Special Issue: Satanic ritual abuse: The
> current state of knowledge. Journal of Psychology and Theology 20(3)
> "Skeptics question the legitimacy of these reports, but many factors
> point to the reality of the phenomenon of ritualistic abuse. First of
> all, the degree of consistency between reports of individuals from
> different parts of the country is very high. The fact that children as
> young as 2 and 3 report ritualistic abuse experiences that mirror
> those reported by adult victims is especially striking in light of the
> fact that young children do not have access to the kind of printed
> information that might conceivably allow an older person to fabricate
> such experiences (Gould, 1987). Second, experiences of ritualistic
> abuse reported by victims of all ages are virtually identical to
> written historical accounts of Satan worship and the like (Hill &
> Goodwin, 1989; Russell, 1972), findings that substantiate our present-
> day understanding of Satanism and ritualistic abuse as
> intragenerational phenomenon. Third, the symptoms from which

> individuals reporting histories of ritualistic abuse tend to suffer
> are consistent with our current understanding of post-traumatic stress
> disorder and the dissociative disorders. The progression in which
> ritualistic abuse survivors respond to psychotherapy places these
> victims squarely within the category of individual who have suffered
> real-not imagined-trauma."https://wisdom.biola.edu/jpt
>   24. Gould, C., & Cozolino, L. (1992) “Ritual abuse, multiplicity,
> and mind-control.” Special Issue: Satanic ritual abuse: The current
> state of knowledge. Journal of Psychology and Theology 20(3):194-6 "As
> a result of the psychologically intolerable nature of their early
> childhood experiences, victims of ritual abuse frequently develop
> multiple personality disorder (MPD)....Ritual abuse is conducted on
> behalf of a cult whose purpose is to establish mind control over the
> victims. Thus, these perpetrators have a conscious motive for the
> abuse beyond compulsively repeating their own childhood abuse in an
> effort to gain mastery over the original trauma. Most victims state
> that they were ritually abused as part of satanic worship, for the
> purpose of indoctrinating them into satanic beliefs (Los Angeles
> County Commission for Women, 1989). Mind control is originally
> established when the victim is a child under 6 years old."https://wisdom.biola.edu/jpt

> "Women reporting ritualistic features scored significantly higher on
> measures of childhood sexual and physical abuse. Neither PTSD
> diagnostic status nor severity for PTSD nor dissociative experiences
> were significantly different between the
groups."http://www.sciencedirect.com/science?_ob=ArticleURL&_udi=B6V7N-3YB56D...
>   26. Gould, C. (1995). Denying ritual abuse of children. Journal of
> Psychohistory, 22(3), 329-339. "The evidence is rapidly accumulating
> that the problem of ritual abuse is considerable in scope and
> extremely grave in its consequences Among 2,709 members of the
> American Psychological Association who responded to a poll, 2,292
> cases of ritual abuse were reported (Bottoms, Shaver, & Goodman,
> 1993). In 1992 alone, Childhelp USA logged 1,741 calls pertaining to
> ritual abuse, Monarch Resources of Los Angeles logged approximately
> 5,000, Real Active Survivors tallied nearly 3,600, Justus Unlimited of
> Colorado received almost 7,000, and Looking Up of Maine handled around
> 6,000. Even allowing for some of these calls to have been made by
> people who assist survivors but arc not themselves survivors, and for
> some survivors to have called more that one helpline or made multiple
> calls to the same helpline, these numbers suggest that at a minimum
> there must be tens of thousands of survivors of ritual abuse in the
> United States. Evidence also continues to accumulate that the ritual
> abuse of children constitutes a child abuse problem of significant
> scope. In 1988, Finkelhor, Williams and Burns published the results of
> a nationwide study of substantiated reports of sexual abuse in day
> care involving 1,639 young child victims. Thirteen percent of these
> cases were found to involve ritual abuse. Other studies of ritually
> abused children have been relatively small. Kelly (1988; 1989; 1992a;

> 1992b; 1993) reported on 35 day care victims of ritual abuse, Waterman
> et al. (1993) reported on 82 children complaining of ritual abuse in
> preschool, Faller (1988; 1990) studied 18 children who had disclosed
> ritual abuse in their preschool, and Bybee and Mowbray (1993) from the
> Michigan State Department of Mental Health identified 62 children
> alleging ritual abuse in their preschool and 53 children who reported
> seeing others be ritually abused. Snow and Sorenson (1990) studied 39
> children reporting ritual abuse in five neighborhoods in Utah, and
> Jonker and Jonker-Bakker (1991) reported on a total group of 98
> children, at least 48 of whom were believed to be victims of ritual
> abuse. The latter case is the only one cited here which was conducted
> outside of the United States."http://ritualabuse.us/ritualabuse/articles/denying-ritual-abuse-of-ch...http://www.geocities.com/kidhistory/denyra.htm

> multiple personality disorder(PDF). Dissociation 5 (2): 111-116.
> "Apologists believe that reports of satanic cult abuse either must or
> could be true. There is some evidence to support the apologists. In
> 1986, the Supreme Judicial Court of Massachusetts in Commonwealth v.
> Drew (397 Mass. 65) upheld the conviction of Carl H. Drew for the
> murder of Karen Marsden. There was evidence that Drew conducted
> satanic ritual meetings and that he had killed Marsden "because she
> wanted to leave the cult " (Commonworth v. Drew, 1986, p. 66). Marsden
> had gone to the police and reported a human sacrifice. Scott
> Waterhouse was convicted of the murder of a twelve year-old girl, and
> the conviction was upheld in the State of Maine v. Scott Waterhouse
> (513 A. 2d 862, Me. 1986). It was ruled that the trial court's
> introduction of the defendant's satanic beliefs was relevant in
> establishing motive and intent. In a study of hundreds of day care
> centers, Finkelhor and Williams found that "... [c] lear-cut
> corroboration of ritualistic practices was available in a few cases,
> such as Country Walk [in Miami], where ritual objects were found by
> police and where the female perpetrators did admit to some of the
> sadistic practices alleged in the children's stories" (1988, pp.
> 59-60). Greaves (1992) describes a video made by the Chicago Police
> Department of two sites allegedly used for satanic ceremonies. He was
> struck by the similarity of the material to descriptions he had heard
> from many of his clients.

>   36. Summit, R.C. (1994). The Dark Tunnels of McMartin Journal of
> Psychohistory 21 (4): 397-416. "The opportunity came in April, 1990
> with permission from the new owner of the preschool to search for the
> tunnels before he demolished the building and redeveloped the
> property. These soiled but solid citizens managed to find what the
> district attorney had disclaimed: solid, scientific evidence that
> someone had not only dug tunnels under the preschool, but also had
> taken the trouble to try to undo them. The results of this definitive
> excavation are described in meticulous detail in the 185 page Report
> of the Archaeological Excavation of the McMartin Preschool Site by E.
> Gary Stickel, Ph.D., the UCLA archaeologist commissioned to do the

> study....Dr. Stickel's report (p.95) concludes: There is no other
> scenario that fits all of the facts except that the feature was indeed
> a tunnel. The date of the construction and use of the tunnel was not
> absolutely established, but an assessment of seven factors of data all
> indicate that it was probably constructed, used and completely filled
> back in after 1966 (the construction date of the preschool). This age
> assessment has also been corroborated by the consulting Geologist for
> the project, Dr. Don Michael."http://ritualabuse.us/ritualabuse/articles/the-dark-tunnel

> 42. McCulley, D. "Satanic ritual abuse: A question of
> memory."Journal of Psychology and Theology Fall 1994 22(3) p.167-172
> "leading memory researchers such as Dr. Bessel van der Kolk of Harvard
> Medical School maintain that traumatic memories, which typically are
> engraved in the sensorimotor processes, are not subject to the same
> kinds of contamination that can affect normal memory. Traumatic
> amnesia, described in the DSM-III-R as psychogenic amnesia, is a
> phenomenon which has been known to mental health professionals for
> more than 100 years. The clinically observed characteristics of
> traumatic memory formation and retrieval match precisely the patterns
> of memory recovery exhibited by SRA survivors, and strongly confirm
> the reality of their cult abuse....If satanic ritual abuse is a
> question of memory, the data redound to the credibility of those
> thousands of individuals who identify themselves as SRA survivors. All
> the scientific studies of memory under trauma indicate that the
> bimodal response described by van der Kolk (1994), whether
> hyperpotentiated or dissociative, heightens the reliability of recall.
> The phenomenon of recovered memory is not a new therapeutic fad
> created by irresponsible clinical experimentation, but a well

> established aspect of trauma. The connection between trauma and memory
> disturbance is made clear by the definition of psychogenic amnesia in
> the DSM-III-R (1987)...Further, there often is corroboration for these
> retrieved memories. Judith Herman and Emily Schatzow (1992) found that
> in a sample of 53 women who disclosed memories of abuse for which they
> had been amnesic, 74% of the subjects were able to find independent
> confirmation from family members, pornographic photos, or diaries.
> Ivor Browne (1990a) found the "internal consistency of the traumatic
> account" persuasive, and also discovered that in the sizeable minority
> of cases where there was an available witness that "in every instance,
> the traumatic events . turn out to be true" (p. 30). There is no
> longer room for denial and disbelief - for evading the grim reality of
> SRA - by recourse to memory research which simply does not apply.
> Solid scientific inquiry does not allow us that luxury; neither should
> Christian conscience."https://wisdom.biola.edu/jpt

==> + HR 607: NPSTC SAYS HR 607 "NEEDS TO BE AMENDED"

The National Public Safety Telecommunications Council (NPSTC) -- a
federation of more than a dozen public safety communications
organizations -- has gone on record as sharing the ARRL's concerns
regarding HR 607, the Broadband for First Responders' Act of 2011. The
ARRL is actively opposing the legislation in its current form because
Section 207(d) of the bill -- introduced in the US House of
Representatives by Representative Peter King (R-NY-3) -- calls for the
reallocation of 420-440 MHz for commercial auction. The ARRL, which is
a member of the NPSTC Governing Board, has assured NPSTC members that
its opposition is limited to Section 207(d) and that it supports the
underlying objective of the legislation, which is to provide spectrum
near 700 MHz for a nationwide interoperable public safety broadband
network. Read more here
```

<http://www.arrl.org/news/npstc-says-hr-607-needs-to-be-amended>.

==> + FCC NEWS: FCC ADOPTS SPREAD SPECTRUM RULES CHANGES

In a Report and Order adopted February 22 and released March 4, 2011, the FCC eliminated the requirement that amateur stations transmitting Spread Spectrum use Automatic Power Control (APC) to reduce transmitter power. At the same time, the Commission has reduced the maximum power of a Spread Spectrum emission from 100 to 10 W PEP. In March 2006, the ARRL filed a Petition for Rulemaking, asking that the APC requirement be eliminated.

The R&O explains the Commission's actions this way: "We believe that these rules changes will (1) encourage individuals who can contribute to the advancement of the radio art to more fully utilize SS technologies in experimentation, and (2) balance the interests of all users in mixed-mode and mixed-service frequency bands until sharing protocols are sufficiently developed to avoid interference." Read more here <http://www.arrl.org/news/fcc-adopts-spread-spectrum-rules-changes>.

==> + FCC NEWS: FCC ISSUES CALIFORNIA MAN $7000 FORFEITURE ORDER FOR REFUSING FCC INSPECTION

After a Merced, California man refused to let FCC investigators inspect his Citizens Band (CB) radio station, the FCC issued a Notice of Apparent Liability for Forfeiture (NAL) for $7000. The Commission found that Ira Jones "apparently willfully and repeatedly" violated Section 303(n) of the Communications Act of 1934, as amended, and Section 95.426(a) of the Commission's rules by failing to permit the inspection. Read more here <http://www.arrl.org/news/fcc-issues-california-man-7000-forfeiture-order-for-refusing-fcc-inspection>.

==> + AMATEUR RADIO IN THE CLASSROOM: MIDDLE SCHOOL STUDENTS TO LAUNCH NEAR-SPACE BALLOON

A group of students from Olde Towne Middle School (OTMS) in Ridgeland, Mississippi is preparing for a trip to space -- or as close as they can get. The OTMS RadioN5VEI] and Technology Club, along with the school's Science Team, are planning a near-space balloon launch at 9 AM (CDT) on March 26 (the date and time are subject to change depending on weather). The balloon -- nicknamed Titans in Space -- will use the call sign KC5NXD and is expected to reach an altitude of 94,825 feet. Read more here <http://www.arrl.org/news/middle-school-students-to-launch-near-space-balloon>.

==> + PROPAGATION: RESPECTED JOURNAL PUBLISHES EXPLANATION FOR LOW SUNSPOTS

An article in the March 3 issue of the journal Nature purports to explain the extended sunspot minimum from 2008-2010. According to one

of the authors, Piet Martens, the last time a sunspot minimum lasted twice as long as usual was around 1913 and before that, 1810. Although solar activity has increased recently, scientists have been puzzled by the lack of sunspots from 2008-2010. This quiet period had prevented the ionosphere from supporting much of the long-range higher frequency HF Amateur Radio communication that had been expected during the past few years. Read more here <http://www.arrl.org/news/respected-journal-publishes-explanation-for-low-sun spots>.

==> + ARES® E-LETTER NOW AVAILABLE IN AUDIO FORM

The ARES® E-Letter is now available in audio format <http://www.arrl.org/ares-e-letter-audio-version>. There are three editions currently available, including the most recent recording of the February 16 ARES® E-Letter. Edited for audio by Al Brown, KZ3AB, the ARES® E-Letter is voiced by Tony Riggs, W1FHN. Brown was licensed in 1966. He was a member of the White House Press Corps before retiring from the International Broadcasting Bureau/Voice of America (IBB/VOA). Licensed since 1955, Riggs has worked in both the commercial and public broadcasting venues. He retired after 21 years as a staff announcer and news anchor with the VOA. With more than 35,000 subscribers, the ARES® E-Letter is written by Rick Palm, K1CE and is published each month. Click here <http://www.arrl.org/ares-e-letter-audio-version> to subscribe to the ARES® E-Letter.

==> HINTS & KINKS : WEATHERPROOFING YOUR AUTOMATIC ANTENNA TUNER

Geoff Haines, N1GY, of Bradenton, Florida, sent us this idea for waterproofing your automatic antenna tuner. Contact Geoff via e-mail <n1gy@arrl.net> for more information.

As an avid Amateur Radio operator, I sometimes use an automatic antenna tuner to operate more than one band with the same antenna. My mobile unit uses an LDG RT-11 autotuner to feed a pair of "Hamstick" style antennas on several different bands. One antenna covers the lower bands and another antenna covers the higher ones. An excursion into operating "fixed portable" with a telescopic vertical had me looking for another solution.

In order to minimize the coax losses when feeding a vertical monopole away from its resonant band it is necessary to reduce the distance between the tuner and the antenna to a minimum. The use of ladder line is not feasible when the antenna is fed almost at ground level. In order to do this, it is necessary to place the tuner almost directly at the base of the antenna and thus reduce the coax run from the tuner to the antenna to nearly nothing. The coax from the tuner to the transmitter can then be any appropriate length since the mismatch has already been corrected.

Owning an LDG Z-100 automatic tuner already, I looked for a way to mount it at the base of the antenna and yet protect it from the

elements. A phone call to LDG gave me the necessary specifications for a 50 foot extension of the control cable so the only thing left was to find a workable enclosure for the tuner itself. I discussed the requirements for such an enclosure with my spouse, Audrey. Without a word, she rummaged through a kitchen cabinet and produced a semi flexible plastic container that had a snap-on lid and fit my Z-100 and its cables to a T.

I drilled four small holes in one end of the container into which I fitted two short coax jumpers, one for the antenna and one for the radio. I also made up and installed a short 4-conductor cable to connect the stock control harness to the 50 foot extension. The fourth opening was used for a similarly short insulated wire to connect the grounding stud on the Z-100 to the radial system of the antenna. Once these four cables were in place, I sealed the drilled openings with hot glue. Silicone caulk could be used just as easily, provided it will stick to the container. I did not try that because the hot glue was at hand so you are on your own there (see Figure 1).

With the jumpers connected to the tuner, the extension cable and coax were run to the transceiver and the antenna erected. Now, testing was in order. The pressing of the TUNE button on my IC-706MKIIG did exactly what it was supposed to do. The Z-100 ran through its paces and signaled a good match. Now if the afternoon showers come while I am operating "fixed portable," the only thing I have to worry about is keeping me and the radio dry. The tuner is cozy in its own little raincoat (see Figure 2).

Total cost, even if you had to buy the container new at the discount store, would probably not exceed $10. That does not include the extension control cable of course. The container was already here and I had enough UHF connectors, coax, wire and weatherproofing on hand for the project. The only thing I had to buy was the 4-conductor cable and Molex connectors to build the 50 foot extension cable.

This project has enabled me to comfortably operate "fixed portable" from the beach, at Field Day and many other events where a vertical was the only feasible antenna. As long as the container can handle the physical size of the tuner with room for the connecting cables, any automatic tuner could be protected in this way.

Do you have an idea or a simple project that has improved your operating? Maybe you've taken something commonly found around the home and developed a ham radio use for it? Why not share your hints with fellow hams in "Hints and Kinks," a monthly column in QST. If we publish your hint, you will receive $20. Send your hints via e-mail to h&k(at)arrl(dot)org or to ARRL Headquarters, Attn: "Hints and Kinks," 225 Main St, Newington, CT 06111. Please include your name, call sign, complete mailing address, daytime telephone number and e-mail address.

==> ARRL FIELD DAY: 2011 FIELD DAY PACKETS AVAILABLE

It's that time of year again -- time to start gearing up for ARRL Field Day, June 25-26, 2011! ARRL's flagship operating event -- always held the fourth full weekend in June -- brings together new and experienced hams for 24 hours of operating fun. Field Day packets are now available for download <http://www.arrl.org/files/file/Field-Day/2011/2011_FD_Packet.pdf>and include the complete rules (including a change for 2011), as well as other reference items such as forms, ARRL Section abbreviation list, entry submission instructions, a Frequently Asked Questions section, guidelines for getting bonus points, instructions for GOTA stations and a kit to publicize your event with the local press. Read more here <http://www.arrl.org/news/2011-field-day-packet-now-available>.

==> SOLAR UPDATE

Tad "Fun, fun, fun in the Sun, Sun, Sun <http://www.youtube.com/watch?v=-ZFLKXINNns>" Cook, K7RA, reports: Solar Cycle 24 continues to ramp up at a quickening pace. The average daily sunspot number this week was more than double the value of the week before, rising from 50.9 to 114. The average daily solar flux rose 44 percent, from 96.8 to 139.4. All this week through Tuesday, the sunspot numbers and solar flux kept rising and beating old numbers, and we had to look further and further back into Solar Cycle 23 to find comparable conditions. On Tuesday, March 8, the daily sunspot number was 137. The last time the daily sunspot number was higher than this was July 7, 2005 when it was 149. Twice this week, the 10.7 cm receiver at Penticton was overloaded, swamped by energy from a solar flare and the daily solar flux value had to be estimated. On March 7 and 8, the noon solar flux readings were 938.6 and 166.7, and they were corrected by NOAA to estimated values of 153 and 155. The estimated flux level of 155 was the highest since July 23, 2004, when the solar flux was 165. Predicted solar flux for March 10-17 is 150, 145, 140, 140, 135, 130, 125, 105 and then 100 on March 18-21, then going below 100 until April 2. The predicted planetary A index for March 10-11 is 22 and 18, then 5 on March 12-21, 7 on March 22-23, 5 on March 24-26, then 7, 7, 19 and 7 on March 27-30. Note the high predicted planetary A index on March 10-11 of 22 and 18. This is because of recent solar flares, and the disturbance will probably affect signals traversing a polar route. Look for more information -- including propagation reports, as well as a critical look at last week's report of a 2 meter FM signal from South America, reportedly monitored in North Carolina, more than 4700 miles away -- on the ARRL website on Friday, March 11. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by the British television series Red Dwarf <http://en.wikipedia.org/wiki/Red_Dwarf>.

==> AMATEUR RADIO FUN: NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL WEBSITE

Four new poll questions have just been published on the QuickStats page <http://www.arrl.org/quickstats> on the ARRL website. Let your voice be heard!

Questions in this month's QuickStats poll:

- How did you sign up for ARES&#65533;?
- When was the last time you built a transceiver from a kit?
- Are your station antennas supported by a tower?
- Do you regularly operate HF mobile?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure to bookmark it in your browser. Results from this QuickStats poll will be published in the June 2011 issue of QST on the QuickStats page, located in the rear advertising section of the magazine. Along with monthly poll results, QST QuickStats offers colorful charts and graphs that highlight interesting Amateur Radio statistics.

==> THIS WEEK ON THE RADIO

This week:

- March 12 -- AGCW QRP Contest; ARCI HF Grid Square Sprint
- March 12-13 -- Idaho QSO Party
- March 13 -- North American Sprint (RTTY); SKCC Weekend Sprint; UBA Spring Contest (CW)
- March 13-14 -- Wisconsin QSO Party; EA PSK31 Contest
- March 15-16 -- CLARA HF Contest

Next week:

- March 19 -- 10-10 International Mobile Contest; AGCW VHF/UHF Contest; Feld Hell Sprint (local time)
- March 19-20 -- Oklahoma QSO Party; North Dakota QSO Party; Russian DX Contest
- March 19-21 -- Virginia QSO Party; BARTG HF RTTY Contest
- March 21 -- Run for the Bacon QRP Contest
- March 23 -- SKCC Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- March 11-12 -- ARRL Oklahoma Section Convention <http://www.arrl.org/hamfests/oklahoma-section-convention-green-country-hamfest>,
Claremore, Oklahoma
- March 12-13 -- ARRL North Carolina Section Convention <http://www.arrl.org/hamfests/north-carolina-section-convention-charlotte-ham

fest>,
Concord, North Carolina
- March 19 -- ARRL West Texas Section Convention
<http://www.arrl.org/hamfests/west-texas-section-convention-56th-annual-st-pa
trick-s-day-hamfest>,
Midland, Texas; ARRL Nebraska State Convention
<http://www.arrl.org/hamfests/nebraska-state-convention-1>, Lincoln,
Nebraska
- March 25 -- ARRL Maine State Convention
<http://www.arrl.org/hamfests/maine-state-convention-1>, Lewiston,
Maine
- March 26 -- ARRL Maryland State Convention
<http://www.arrl.org/hamfests/maryland-state-convention-greater-baltimore-ham
boree-computerfest>,
Timonium, Maryland
- April 2 -- ARRL New Jersey State Convention
<http://www.arrl.org/hamfests/new-jersey-state-convention-1>, Ewing,
New Jersey
- April 21 -- ARRL Idaho State Convention
<http://www.arrl.org/hamfests/idaho-state-convention-1>, Boise, Idaho
- April 23 -- ARRL Louisiana State Convention
<http://www.arrl.org/hamfests/louisiana-state-convention-twin-city-ham-radio-
fest>,
Monroe, Louisiana; ARRL North Carolina State Convention
<http://www.arrl.org/hamfests/north-carolina-state-convention-raleigh-hamfest
>,
Raleigh, North Carolina

To find a convention or hamfest near you, click here
<http://www.arrl.org/hamfests>.

Amateur Radio Newsline(tm) Report 1753 - March 11 2011

Amateur Radio Newsline report number 1752 with a release date of
Friday, March 4, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. Three hamsats are lost when a launch booster
fails to achieve orbit, the FCC changes the rules on ham radio use of
Spread Spectrum, Argentina is heard on 2 meter FM in North Carolina and
a Digital Amateur Radio record is established down-under. Find out the
details are on Amateur Radio Newsline(tm) report number 1752 coming
your way right now.

**

HAM RADIO IN SPACE: THREE HAMSATS LOST IN TAURUS XL LAUNCH FAILURE

A launch failure has lead to the demise of several new ham radio birds.
Bill Pasternak, WA6ITF, is in the newsroom with the details:

--

Three amateur radio satellites were lost when a launch booster failed
to achieve orbit. The satellites were launched from Vandenberg Air
Force Base in California at 10:09 UTC on Friday, March 4th on board an
Orbital Sciences Taurus XL rocket.

According to news reports, its believed that the launchers fairing
which covers the satellites on top of the rocket, did not separate
properly. This added drag prevented the Taurus XL from gaining enough
momentum to attain orbit.

The ham radio payload consisted of the Explorer-1, KySat-1 and Hermes.
The rocket is believed to have crashed near the Antarctic.

For the Amateur Radio Newsline, I'm Bill Pasternak, in Los Angeles.

--

By the way, Bill actually saw and photographed the launch from his
front lawn in Santa Clarita, California. That's at least 80 miles from
Vandenberg Air Force Base. He says that it was the brightest abject in
the night sky. His pictures, which were a last minute idea are
grab-shots taken without a tripod. They are posted in his 2011 photo
album on Facebook. (Southgate, ARNewsline(tm))

**

RESCUE RADIO: CHRISTCHURCH NZ HAM RADIO QUAKE ASSISTANCE WINDS DOWN

Ham radio emergency communications operations in the wake of the recent Christchurch, New Zealand, earthquake have just about wound down.

In an e-mail to Newsline's Jim Meachen, ZL2BHF, Richard Smart, ZL4FZ, who is head of the Amateur Radio Emergency Communications team says hat Christchurch has made or is making the transition from rescue to recovery. As such the normal services such as cellular, landline and internet are being progressively restored, although they are yet far from completely reliable at this stage. Cellular in particular, suffers from periods where calls can be received but not made or unable to get any service at all as the very high loads seem to swamp the switches.

Smart says that some cellular sites have been damaged by buildings collapsing or have been dismantled to allow demolition work to occur. ZL4FZ says that the damage has affected the capacity of the networks as infrastructure essential to Christchurch in many cases traverses the closed off centre of the city and will either need to be bypassed or overbuilt.

Other essential services, water, power and sewage are being restored, although for some the restoration will likely be long and protracted. This he says is an indication of the very large number of faults and breaks that have occurred.

Smart ends by telling ZL2BHF that at this time only informal amateur communications is being heard on the repeaters during the day. but there is no formal AREC activation at this time. (ARNewsline(tm) via ZL2BHF, ZL4FZ)

**

RADIO LAW: FCC CHANGES PART 97 SPREAD SPECTRUM RULES

Back in the United States, the FCC has changed the rules regarding the way in which radio amateurs can use Spread Spectrum technology.

In its Report and Order released March 4th, the regulatory agency has eliminated the requirement that amateur stations transmitting Spread Spectrum to use Automatic Power Control or APC to reduce transmitter power. At the same time, the Commission has reduced the maximum power of a Spread Spectrum emission from 100 to 10 watts PEP.

The changes are to Sections 97.311 and 97.313 of the Commission's Rules. This all will become effective 30 days after the Report and Order is published in the Federal Register. (FCC)

**

RADIO LAW: MORE CHANGES MADE TO EAS LAWS

The FCC has made more changes to its Emergency Alert System rules. This, to allow for national EAS testing and data collection from such tests.

The commission's Part 11 rules now say all EAS participating stations must take part in national tests of the EAS system. The first national EAS test must use the Emergency Alert Notification and the live event code for nationwide presidential alerts. Whenever the national test occurs, it replaces the monthly and weekly EAS tests for that particular month and week.

The new rules require the FCC to give stations at least two months' notice before a national test; and stations must submit test-related diagnostic information. This includes whether they received the alert, if they re-transmitted it and the make and model of their EAS encoder/decoder. And the submission is due to the FCC within 45 days. The data won't be released to the public but can be shared with other federal agencies and state governmental emergency management agencies.

These latest changes, were adopted on February 2nd. Thy have now been published in the Federal Register and are in effect. The goal of the national test is to determine whether EAS functions as intended to deliver a national presidential alert. (RW, FCC)

**

PROPAGATION: ARGENTINA HEARD IN NORTH CAROLINA ON 2 METER FM ON WIRE ANTENNA

The recent sunspots have brought some interesting propagation. Even on some of the VHF and UHF bands.

According to W0WOI reporting over the VHF Reflector, at 16:55 U-T-C on March 2nd, Johnathon Ballard, KI4UKF who lives in Stokes County, North Carolina heard Claudio Costa, LW2ECC in Argentina calling CQ on 144.48 MHz FM.

What really makes this interesting is that KI4UKF was using a Moxon wire antenna tacked to a wall. He said the signal was steady for several minutes at about S6, before it faded away. H e emailed Claudio, who confirmed the transmission. Claudio reported that he was using three 5/8 wave verticals and 160 watts. (W0WOI via VHF Reflector)

**

BREAKING DX NEWS: DX0DX SPRATLEY ISLAND ON HOLD

The DX0DX mission to the Spratly's has been postponed to April 2012. This, following the initial expedition attempt in January this year.

Team Leader VK3FY says he is determined to recover as much of the costs as possible to put things right for all the team members, sponsors, organizations and individuals involved. This rare DX-entity was to have been activated from 6 January 2011 until 1 February 2011.

More DX news later on in this weeks Amateur Radio Newsline report. (Southgate)

ENFORCEMENT: FLORIDA UNLICENSED BROADCASTER ISSUED $20,000 NOTICE OF APPARENT LIABILITY FOR FORFEITURE

The FCC has issued a $20,000 Notice of Apparent Liability for Forfeiture to Whisler Fleurinor. This for his alleged willful and repeated violated section 301 of the Communications Act by operating an unlicensed radio transmitter at his commercial property in Fort Lauderdale, Florida. Here's the back-story.

--

On March 16th and August 24th of 2010, in response to complaints about an unlicensed station on 99.5 MHz, agents from the Enforcement Bureau's Miami Office used direction finding techniques to locate the source of radio frequency transmissions on to a commercial property in Fort Lauderdale, Florida. The FCC says it found that the property is owned by Whisler Fleurinor.

On March 16, 2010, the agents determined that the signals from Mr. Fleurinor's building exceeded the limits for operation under Part 15 of the Commission's and therefore required a license. Following up, on August 24th, the FCC agents inspected the unlicensed station. The Commission says that at that time Mr. Fleurinor showed them his antenna and transmitter. He admitted that the equipment was his, and then turned off the transmitter.

Prior to leaving the property, the agents issued a Notice of Unlicensed Operation to Fleurinor, which he signed acknowledging that he was in receipt of it. The Notice warned that operation of an unlicensed station violated the Communications Act and the Rules and could result in further enforcement action.

But the Commission alleges that not long after Fleurinor came back on the air with the unlicensed station. And so it was that on August 31, 2010, agents from the Miami Office again used direction-finding techniques to locate the source of radio frequency transmissions on 99.5 MHz to Mr. Fleurinor's commercial property in Fort Lauderdale. The agents again determined that these signals exceeded the limits for operation under Part 15 of the Rules and therefore required a license. As such, Whisler Fleurinor was issued a second Notice of Unlicensed Operation.

Pursuant to the Commission's Forfeiture Policy Statement and the base forfeiture amount for operation without an instrument of authorization is $10,000. In assessing the monetary forfeiture amount, the FCC says that it must also take into account the statutory factors set forth in section 503(b)(2)(E) of the Communications Act. These include the nature, circumstances, extent, and gravity of the violations, and with respect to the violator, the degree of culpability, any history of prior offenses, ability to pay, and other such matters as justice may require. Consequently, the $10,000 base forfeiture amount is subject to adjustment.

The FCC says that as proven by its investigation, on two separate occasions Fleurinor was issued a Notice of Unlicensed Operation. It says that despite having acknowledged receipt of both notices that he continued to operate the unlicensed radio station. It says that the fact that Fleurinor continued to operate with full knowledge that such activity violated the Communications Act and the FCC's Rules demonstrates a deliberate disregard for the Commission's requirements. As such it believes that the $20,000 proposed fine is warranted.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

The action in this case was adopted and released on March 4th, 2011. Whisler Fleurinor was given the customary 30 days to pay the $20,000 forfeiture amount or to file an appeal. (FCC)

**

ENFORCEMENT: FCC ISSUES OFFICIAL CITATION FOR ERRANT WIRELESS CAMERA

The FCC has issued an Official Citation to SecurityMan Inc. of Ontario, California. This, for marketing a non-compliant wireless camera that caused interference to other service.

According to the Citation, the camera in question apparently radiated an excessive second harmonic of the 902 to 928 MHz band on which it was designed to operate. This in turn caused interference to a nearby PCS cell site.

The matter goes back to In December 2009. That's when the FCC's Enforcement Bureau received a complaint alleging that the SecurityMan SM-302T wireless camera was causing harmful interference to U.S. Cellular's licensed operation of its PCS network in the 1850 to 1865 MHz band. If you do the math, a second harmonic of a 902 to 928 MHz transmitter has a good chance of falling within the cellular P-C-S band.

Once suspicious that the camera might be the cause of the interference, Enforcement Bureau staff visited the SecurityMan web site at www.securitymaninc.com. There they observed that SecurityMan was marketing the SecurityMan SM 302T wireless camera. They then purchased

a SecurityMan SM 302T wireless camera, and forwarded it to the FCC's Office of Engineering and Technology Laboratory for testing. The lab's tests demonstrated that the SecurityMan SM-302T does not comply with the radiated emission limits specified in sections 15.249(d) and 15.209 of the rules. (FCC)

**

ENFORCEMENT: LASER HITS COCKPIT OF PHOENIX NEWS HELICOPTER

Pointing a laser at aircraft is illegal and now authorities in Phoenix, Arizona, are looking for whomever it was that did just that to a news chopper. Jeff Clark, K8JAC, has more:

--

A Phoenix news helicopter was the victim of an attack from the ground in late February. This as someone shot a bright laser beam into its cockpit that was also caught by the choppers on-board camera.

According to The Arizona Republic, authorities are currently investigating the incident and have yet to identify the perpetrator. The newspaper goes on to note that local police actually searched door-to-door in the area where the beam originated but so far have come up empty handed.

A spokesman with the Federal Aviation Administration commenting on the incident said that the message here is very simple. If you want to engage in this kind of dangerous and irresponsible behavior, you can be caught and arrested.

Im Jeff Clark, K8JAC.

--

The helicopter in question shoots footage for multiple Phoenix stations. These include CBS-affiliate KPHO and independent station KTVK. If caught, and if prosecuted by the perpetrator of this stunt could face up to 20 years in prison. (Published news reports)

**

RESCUE RADIO: COMMUNICATIONS ACADEMY 2011

Registration is now open for Communications Academy 2011 to be held at South Seattle Community College, April 16th and 17th. ARRL Western Washington Section Manager Jim Pace, K7CEX, says that the theme this year is "Bringing Professionalism to Amateur Emergency Communications".

According to Pace, planners has an exciting lineup of speakers and breakout sessions scheduled. Saturday's keynote speaker is ARRL Media and Public Relations Manager Allen Pitts, W1AGP. He will be presenting an address titled "Reality Check: The four stages of ARES." On Sunday, Alan Komenski, AC2K, State Interoperability Executive Committee of the Washington State Patrol.

Early registration by April 3rd saves you 15% and groups of 5 or more registering at the same will save an additional 10%. You can register right at www.commacademy.org. (Press Release)

**

HAM HAPPENINGS: VHF CONVENTION DOWN-UNDER IN APRIL

The show must go on down-under. This with word that the Wellington VHF Group will hold its VHF Convention from April 22nd to the 24th Tawa College in Tawa. This years convention is being held in conjunction with the annual Wellington Radio Expo and Wellington Expo-11.

According to planners, the VHF Convention offers a great program line-up for both the newcomer and the experienced radio amateur alike. Some of the topics include forums on VHF, ATV, Satellites, Special Interest Groups and a forum for Repeater and Beacon Trustees.

More information along with registration forms are available on the Wellington VHF Group website. Its in cyberspace at www.vhf.org.nz (Wellington VHF Group)

**

HAM HAPPENINGS: HAPPY 20th BIRTHDAY TO THE OPDX NEWSLETTER

And congratulations to our friends at the Ohio/Penn DX Bulletin which celebrated its 20th anniversary and published its 1000th issue last week. To celebrate, the Northern Ohio DX Association which publishes the on-line newsletter was to activate the special event station NO8DX/20 between March 11th and the 13th. If you made contact, please send your QSL via the events QSL manager and editor of the OPDX, Tedd Mirgliotta, KB8NW at his callbook address. (DXNL)

**

HAM HAPPENINGS: NAMIBIAN AMATEUR RADIO LEAGUE CELEBRATES 21st ANNIVERSARY

And on March 21st the Namibian Amateur Radio League or NARL celebrate its 21st birthday. At the same time Namibia will celebrate 21 years of its own independence.

To commemorate these two event the NARL has been issued the special event callsign V521NAM. Plans are to activate the call from Saturday the March 19th to Monday the 21st. All amateurs in Namibia are allowed to use the special event callsign for the duration of the event but they will be required to send in their logs so the NARL QSL Bureau can send out special QSL cards to all worked stations.

All incoming QSL's should be via sent via the bureau or electronically using e-qsl. More on this special event operation is on the web at www.qsl.net/narl. (NARL)

WORLDBEAT: INTERNATIONAL MARCONI DAY - APRIL 30th

This years International Marconi Day takes place on Saturday April 30th. This is not a contest but there are several awards available for working the officially listed stations, each of which has an historic connection with Marconi. The event is organized by the Cornish Amateur Radio Club. For more information please visit the club's website at crac.g4usb.net/cracblog. (GB2RS)

**

WORLDBEAT: CANADIAN HAMS ASK RAC FOR ASSISTANCE IN RIDDING PLASMA TV INTERFERENCE

Members of Canada's Niagara Peninsula Amateur Radio Club say that noise and signals originating from Plasma screen digital television sets are causing considerable interference to their HF activities. They have asked their national society for help.

According to a news release from Radio Amateurs of Canada, complaints of this nature require specific and detailed information before it can consider taking this matter to telecommunications regulator Industry Canada. To gather this information, Radio Amateurs of Canada invites its members who own a Plasma screen television receivers to report their experiences of interference from such products. Specifically, these reports should describe the make and model of TV, a description of their HF station and antenna system and the exact nature of the interference. This means what bands are affected, what the interference sounds like and any other pertinent information. Remedies should also be tried and reported such as using ferrite chokes on power cords and signal cables if interference is detected.

Amateurs with advanced instrumentation such as spectrum analyzers and calibrated antennas should measure signal intensity levels at given distances; these measurements will add credibility to our investigation. Canadian hams suffering from this type of interference should send their reports to Norm Rashleigh, VE3LC, via email to ve3lc (at) rac (dot) ca. (RAC)

**

WORLDBEAT: RNW LAUNCHES IPHONE APP IN 9 LANGUAGES

Radio Netherlands Worldwide has developed a free news application in nine languages for the Apple iPhone. This application gives iPhone users 24-hour access to Radio Netherlands latest internet postings, including web articles, radio programs, videos and podcasts. The application called RNW. It is available free of charge from the iPhone App Store. (Media Network)

**

DX

In DX, word that JA1JQY, JA1KJW and JA8VE will be active from Thimphu Bhutan between April 19th and the 26th. Operations will be on 160 through 6 meters using CW, SSB and RTTY. QSL as directed by the operators.

DL7BC will be active from Morocco as CN2BC during the CQ WW WPX SSB Contest as a Single-Op, All-Band, Low-Power entry. QSL his operation via DL7BC. You can visit his Web page at www.qslnet.de/dl7bc for further information regarding this one.

VE3ZIK will be once again active portable 9A from Croatia between March 13th and the 30th. He also plans to be active in the Russian DX Contest, the CQ WPX SSB Contest and mentions that there is a good chance he will be on from Vrana Lake as well. QSL via DK8ZZ, via the bureau, Logbook of the World, eQSL or direct. E-mail Bureau requests for QSLs can go to ve3zik (at) gmail (dot) com.

And keep an ear open for F2JD will once again be active as stroke HR5 from Copna, Honduras starting mid-March and continuing through to mid-May. Operations will be on all HF bands using CW and SSB. QSL via F6AJA.

A group of hams from the Amateur Radio Society of India plan to become active as VU4PB from the Andaman Island capital Port Blair. This, from March 15th through the 31st. Modes used will be CW, SSB and RTTY on all bands using up to four stations. They also hope to work via moonbounce on 6 meters. Their QSL manager will be W3HNK, which means that QSLs are confirmed only direct but reliably.

Lastly, I2DMI will be active as CE0Y from

Easter Island between July 30th and August 8th.

His operation will be RTTY and what bands he

plans to use are at this time unknown. QSL via

his home callsign.

(Above from various DX news sources)

**

THAT FINAL ITEM: DIGITAL ATV RECORD SET DOWN

UNDER

And finally this week, word that new records for Digital Amateur Television have been set down-under. Robert Broomhead, VK3DN, of the WIA News is here with an in-depth look at what took place to make it all happen:

--

On Wednesday evening, 23 February 2011, Digital Amateur Television signals from Victoria were received in the northwest of VK7 by Winston, VK7EM. After noting the band conditions improving with a lift in the 70cm beacon strength and the appearance of Community TV Channel 31, Winston monitored VK3RTV, the Melbourne Digital ATV repeater.

At around 5.30pm color bars appeared. Then with liaison with Peter VK3BFG on 147.4 MHz simplex, who had made sure the repeater was activated, live pictures were organized, with Peter proudly showing off his equipment with a very professional `on camera' appearance.

Word spread and other stations like Neil VK3BCU, John VK3DQ, and Jack VK3WWW joined in. At one stage there were two independent pictures arriving, John 3DQ on one channel, VK3RTV1 and Peter 3BFG on VK3RTV2, and both in contact with each other.

At 8.00 PM signals on VK3RTV began to fade. It was then that a separate receiver monitoring 1250 MHz suddenly came to life with a perfect color bar signal. A call on 2 meters established that it was Rob, VK3TRX who chatted and then held up a 10 gig. antenna he will use in an upcoming ATV field day. These pictures on 23 centimeters analogue FM, became quite noise free.

The equipment used by Winston consisted of home-brew yagis on each band to a K7MEM design, masthead mounted preamplifiers designed by VK5EME, fed into a Teac SDB451 Digital Set Top Box on 70 centimeters, while for 23 centimeters a Drake ESR 700 satellite receiver.

I'm Robert, VK3DN.

--

For those listeners in North America who have never heard the term "lift conditions" it's the way most of the rest of the world describes what we call improved band conditions, especially on frequencies at and above 50 MHz. (WIA News)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is

What does your empty response have to do with OS/2, Kb9rqz? ;)

That server is running bots. I recognize them. It looks like the CTFBOT mod for Quake 1, but it's been further modified. I don't remember the bot chatter being anywhere near that varied, and there certainly wasn't a tholenbot among them.

Besides, human players don't produce such lengthy messages in the middle of a violent twitch-reflex game, unless it's by voice. Some of the stuff there, like MilkDud's repeated quip "Yummy, aren't they? Must be, they keep coming back for more", could be a human player spamming a macro, but the long messages naming specific players seem unlikely to be generated by anything as simple as a console alias. Maybe if there's a source port out there that lets you do stuff like "say Hey, %v, looks like you forgot to take the safety off" to refer to the last player you fragged -- but then, the names are often not capitalized and sometimes misspelt. Someone put a lot of effort into making the chat look real, except for the whole length thing.

I think the real question here though is, how did a modified CTFBOT get loose on usenet and start haunting comp.os.os2.advocacy and other newsgroups? And who is to be held responsible for the resulting mess? I didn't even think you could implement an NNTP client in QuakeC, but I've been surprised before, especially where the more advanced source ports like DarkPlaces are concerned. (Speaking of which, Ken ... Fitzquake 0.80? WTH?)

Say, I wonder if there's a port of the quake engine to OS/2?

Anyway, if you'll excuse me, I think I'll go boot up my older machine with Quake 1 and go ogle the CTFBOT female player model a bit. I'd forgotten she looked that good, and wore that little. :)

INDEED !
http://ccraa.net/landline/aug08.pdf

At 7:36 pm Gavrielah had to leave
suddenly (no reason given) and the roster of those present was turned
over to George,
W8FWG. Glenn, WA8QNF asked this question of the President. “Mark, in
the interest
of the CCRAA would you be willing to step down as President of the
organization.?”
The answer given by Mark was “No!” In view of the “turbulence” that
occurred, the
Property Chairman’s report (W8FWG’s report) did not get read, but it
is included here as
follows.....

A motion made by Glenn, WA8QNF and seconded by Roy, WB8ZYL to “Remove
Mark,
KB9RQZ from the office of President of the CCRAA” was introduced, and
a discussion
followed. When it came to a vote, there was one ABSTENTION, one NO
vote, 11 YES
votes, and the motion carried. George, W8FWG, being appointed Acting
Secretary took
ending notes.....

==> + PUBLIC SERVICE: AFTER DEVASTATING EARTHQUAKE, JAPAN'S RADIO
AMATEURS PROVIDE COMMUNICATIONS SUPPORT

After the 8.9 earthquake that struck near Sendai, Japan at 2:46 PM
JST (0546 UTC) on Friday, March 11, the island nation is trying to
recover. Soon after the earthquake -- which the US Geological Survey is
calling the largest to hit the island nation in 140 years -- Japan has
been rocked by tsunamis and power outages caused by trouble at a
nuclear power station. Reports from Japan tell of phone and Internet
service still up in most parts of the country. Even so, the Japan
Amateur Radio League (JARL) -- that country's IARU Member-Society --
has asked that 7.030 MHz be kept clear for emergency use. Other reports
are asking that these additional frequencies be kept clear: 3.525,
```

7.030, 7.077, 7.087, 7.097, 14.100, 21.200 and 28.200 MHz.

JA1RL, the JARL HQ station -- along with other amateurs throughout the island nation -- is maintaining the effort to support the disaster relief operation, according to IARU Region 3 Secretary Ken Yamamoto, JA1CJP. "In less damaged areas, the electric power supply is being restored gradually and local amateurs have started to establish stations at shelters," he said. Yamamoto said that JA1RL continues to operate as an emergency traffic center on 7.030 MHz, as well as 2 meters and 70 cm. It is receiving and reporting news from Japanese amateurs who are in the affected area. Using battery power or small generators, Japanese stations are active and are using various frequencies to exchange rescue and disaster relief operation information with JA1RL and others.

"While 3.525, 7.030, 7.043 and 7.075 MHz have been mentioned as in use, it's wise to keep those -- and all of the Center of Emergency frequencies -- clear of normal and non-urgent traffic," said IARU Region 3 Disaster Communications Committee Chairman Jim Linton, VK3PC, who added that there is no call for additional foreign radio amateurs in Japan.

For more on how radio amateurs in Japan are providing communications support after earthquake, click here <http://www.arrl.org/news/radio-amateurs-in-japan-provide-communications-support-after-earthquake>.
For information on how US amateurs are helping out, click here <http://www.arrl.org/news/japan-asks-radio-amateurs-to-keep-frequencies-clear-as-country-goes-into-recovery-mode-after-devasta>.
For more on how Japan, Hawaii and the Western US dealt with the immediate aftereffects of the earthquake and tsunami, click here <http://www.arrl.org/news/massive-earthquake-hits-japan-tsunami-warnings-issued>.

==> + YAESU, ICOM AND KENWOOD ISSUE STATEMENTS REGARDING EFFECTS OF EARTHQUAKE ON OPERATIONS

In a letter to the Amateur Radio community, Vertex Standard Chief Executive Officer and President Jun Hasegawa expressed his "sincere appreciation to all of you for your kind words and thoughts about us" after the devastating 8.9 earthquake that struck Japan last week <http://www.arrl.org/news/massive-earthquake-hits-japan-tsunami-warnings-issued>.
Vertex Standard is the parent company of Yaesu. All Vertex Standard employees and their families are safe and unhurt, Hasegawa said, but the company has not been able to reach many of their dealers and subcontractors who are located on the coast area: "We just hope that they are alive." Hasegawa said that a Vertex Standard factory in Fukushima was damaged in the earthquake. Even though the factory is not located near the coast and the damage was minimal, he said that Vertex Standard has decided to "disable the operation at this moment." Saying that they are working very hard to get the factory back to its normal

operation, Hasegawa said that "it may take one to two weeks to restart operation in the Fukushima factory. I would like to ask for your understanding and cooperation at this time."

According to a press release <http://www.icomamerica.com/en/features/earthquake.aspx>, no one from ICOM is known to be injured. No damage has been reported at ICOM's headquarters in Osaka, or at either of their two main factories in Wakayama; both Osaka and Wakayama are located far south of the most severely affected areas. The branch offices in Tokyo and Sendai, however, did suffer some minor damage. "Most of ICOM's facilities and systems are ready to get back to normal business, but supplier logistics, commuting issues and future power disruptions will affect our company," the press release said. "It is too soon to tell how big an impact the earthquake and its aftermath will have on ICOM. We appreciate your interest and concern."

"Thankfully, our staff in Japan is safe due to earthquake preparedness and the special construction of our buildings," said Kenwood USA President Junji Kobayashi on the Kenwood website <http://www.kenwoodusa.com/NewsArchive/2011/20fe1b7b-fe8a-4a94-b371-bb97d0fff096>.
"Power outages and interruption of mass transit have kept most of Kenwood's staff at home since the earthquake; however, we expect the infrastructure to improve in the coming week and our operations to fully resume accordingly. We appreciate the concern for our employees expressed by all those who have contacted us." Kenwood's primary office facilities in Yokohama and Hachioji were not damaged, due to their proximity further south and west of the quake's epicenter. Since Kenwood's primary manufacturing facilities are in Malaysia, electronics production is unaffected.

==> + FCC NEWS: ARRL FILES PETITION, REQUEST FOR TEMPORARY WAIVER WITH FCC REGARDING VHF VOICE AND DATA EMISSIONS

On Tuesday, March 15, the ARRL filed a Petition for Rulemaking and a Request for Temporary Waiver to authorize the use of single-time-slot Time Division Multiple Access (TDMA) emissions in the amateur bands at and above 50 MHz, wherever multiple-time-slot TDMA is authorized. The Petition asks the FCC to allow those amateurs who are presently using a Motorola narrowband (12.5 kHz) digital land mobile system -- commercially marketed as MotoTRBO -- to be used legally. Because of some restrictions in the Part 97 rules, the TDMA repeaters (which are multiple-time-slot devices) are legal, but the mobiles and portables are not because the emissions used (single-time-slot TDMA) are not authorized anywhere, due to the emission designator. Read more here <http://www.arrl.org/news/arrl-files-em-petition-em-em-request-for-temporary-waiver-em-with-fcc-regarding-vhf-voice-and-data-e>.

==> + FOCUS ON YOUTH: MEET NEW ARRL YOUTH EDITOR STERLING COFFEY, N0SSC

The ARRL welcomes its new Youth Editor, Sterling Coffey, N0SSC, of Warrenton, Missouri. Coffey is a freshman at the Missouri University of Science and Technology in Rolla, where he is studying electrical engineering. He said that since the age of five, he has been "intrigued and interested" in radio communication, crediting a gift of walkie-talkies "with a button and a letter diagram for Morse code." Read more here <http://www.arrl.org/news/youth-hamradio-fun-on-becoming-a-ham>.

==> + ARRL RECOGNIZES: NOMINATIONS FOR ARRL AWARDS NOW OPEN

Each year, the ARRL Board of Directors has the opportunity to select recipients for a number of awards in various categories that honor Amateur Radio operators. The nomination period is now open for those ARRL awards that recognize educational and technological pursuits in Amateur Radio. There are also awards to honor a young Amateur Radio operator and an outstanding ARRL Section Manager. Read more here <http://www.arrl.org/news/nominations-for-arrl-awards-now-open>.

==> + ON THE AIR: W1AW ANNOUNCES SPRING SCHEDULE

With the switch from Standard Time to Daylight Saving Time, W1AW Station Manager Joe Carcia, NJ1Q, has updated the W1AW operating schedule to reflect the change. The Eastern times have not changed, but the UTC times have. Read more here <http://www.arrl.org/news/w1aw-announces-spring-operating-schedule>.

==> ARRL PUBLICATIONS: EXAM SOFTWARE NOW INCLUDED WITH ARRL LICENSE MANUALS

Get a jump on your Amateur Radio license upgrade with ARRL license manuals. Now the manuals for the Technician, General and Amateur Extra class licenses include a CD-ROM, complete with exam review software. Each manual includes the complete question pool for its license class, including detailed explanations for all questions and answers. The ARRL Ham Radio License Manual -- Second Edition (valid through June 30, 2014), The ARRL General Class License Manual -- Sixth Edition (valid through June 30, 2011) and The ARRL Extra Class License Manual -- Ninth Edition (valid through June 30, 2012) will help you earn the privileges that come with upgrading your Amateur Radio license. Read more here <http://www.arrl.org/news/exam-software-now-included-with-arrl-license-manuals>.

==> + AMATEUR RADIO IN SPACE: HAMS INVITED TO TRACK SATELLITES

In November 2010, five research satellites were carried to orbit <http://www.arrl.org/news/hams-invited-to-listen-for-new-satellites> aboard a Minotaur V rocket from Kodiak Island, Alaska. Two of these satellites -- FASTRAC 1, known as "Sara Lily" and FASTRAC 2, referred to as "Emma" -- entered orbit as a single nanosatellite, but on March 15, scientists sent the command to have them separate. According to FASTRAC Student Program Manager Sebastian Munoz, KE5FKV, students at the University of Texas will be confirming the separation as the satellites pass: "We started one of the most exciting phases of our

project by separating both of our girls so that they can compute
on-orbit real-time relative navigation solutions while both of them are
freely drifting from one another." Munoz said that they will continue
to update the satellites' two line elements (TLEs) on their website
<http://fastrac.ae.utexas.edu/for_radio_operators/users/phpBB3/predictedorbit
.php>
for those radio amateurs interested in tracking the two nanosatellites.
"I want to thank the ham community all over the world for supporting
our project," Munoz said. "Your support has been incredible and we
really value it. We really appreciate all of your help so far and we
hope that we can continue to count on it."

==> SOLAR UPDATE

Tad "And look, the Sun is in the sky
<http://www.youtube.com/watch?v=4JDNTS2wHHo>" Cook, K7RA, reports: The
average daily sunspot numbers this week plummeted 45 points to 69,
while the average daily solar flux was off nearly 25 points to 114.5.
Last Friday, March 11, the planetary A index reached 40 due to a
powerful X1.5 class solar flare at 2323 on March 9. This is another
definite indication that Solar Cycle 24 is ramping up. After four years
of no X-class flares, there have been two in the last month. The past
few days have seen very quiet geomagnetic conditions, with the K index
in most locations at 0. The latest forecast shows quiet conditions with
planetary A index around 5 until March 27-30, when the predicted
planetary A index is expected to rise to 7, 7, 19 and 7. The predicted
solar flux for March 17-26 is 90, 85, 80, 85, 90, 95, 100, 110, 85 and
85. This Sunday is the spring equinox in the northern hemisphere, a
welcome sign for DXers everywhere. Look for more information on the
ARRL website -- including reports, anecdotes and observations on
propagation and an explanation about how the geomagnetic A index is
calculated -- on Friday, March 18. For more information concerning
radio propagation, visit the ARRL Technical Information Service
Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This
week's "Tad Cookism" is brought to you by the song Cool, Cool
Considerate Men <http://www.youtube.com/watch?v=4JDNTS2wHHo> from the
musical 1776 <http://en.wikipedia.org/wiki/1776_%28musical%29>.

==> ARRL EXECUTIVE COMMITTEE TO MEET THIS WEEKEND

The ARRL Executive Committee will be meeting this weekend in Chicago.
The agenda for their March 19, 2011 meeting is now available
<http://www.arrl.org/files/media/News/ARRL_Executive_Committee_Agenda_031911.
pdf>.

==> + ARES® E-LETTER NOW AVAILABLE IN AUDIO FORM

<http://www.arrl.org/multimedia> The ARES® E-Letter is now available
in audio format <http://www.arrl.org/ares-e-letter-audio-version>.
There are three editions currently available, including the most recent
recording of the February 16 ARES® E-Letter. Edited for audio by Al
Brown, KZ3AB, the ARES® E-Letter is voiced by Tony Riggs, W1FHN. Brown

was licensed in 1966. He was a member of the White House Press Corps before retiring from the International Broadcasting Bureau/Voice of America (IBB/VOA). Licensed since 1955, Riggs has worked in both the commercial and public broadcasting venues. He retired after 21 years as a staff announcer and news anchor with the VOA. With more than 35,000 subscribers, the ARES® E-Letter is written by Rick Palm, K1CE and is published each month. Click here <http://www.arrl.org/ares-e-letter-audio-version> to subscribe to the ARES® E-Letter.

==> THIS WEEK ON THE RADIO

This week:

- March 19 -- 10-10 International Mobile Contest; AGCW VHF/UHF Contest; Feld Hell Sprint (local time)
- March 19-20 -- Oklahoma QSO Party; North Dakota QSO Party; Russian DX Contest
- March 19-21 -- Virginia QSO Party; BARTG HF RTTY Contest
- March 21 -- Run for the Bacon QRP Contest
- March 23 -- SKCC Sprint

Next week:

- March 26-27 -- CQ WW WPX Contest (SSB)

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- March 19 -- ARRL West Texas Section Convention <http://www.arrl.org/hamfests/west-texas-section-convention-56th-annual-st-patrick-s-day-hamfest>, Midland, Texas; ARRL Nebraska State Convention <http://www.arrl.org/hamfests/nebraska-state-convention-1>, Lincoln, Nebraska
- March 25 -- ARRL Maine State Convention <http://www.arrl.org/hamfests/maine-state-convention-1>, Lewiston, Maine
- March 26 -- ARRL Maryland State Convention <http://www.arrl.org/hamfests/maryland-state-convention-greater-baltimore-hamboree-computerfest>, Timonium, Maryland
- April 2 -- ARRL New Jersey State Convention <http://www.arrl.org/hamfests/new-jersey-state-convention-1>, Ewing, New Jersey

- April 21 -- ARRL Idaho State Convention
<http://www.arrl.org/hamfests/idaho-state-convention-1>, Boise, Idaho
- April 23 -- ARRL Louisiana State Convention
<http://www.arrl.org/hamfests/louisiana-state-convention-twin-city-ham-radio-
fest>,
Monroe, Louisiana; ARRL North Carolina State Convention
<http://www.arrl.org/hamfests/north-carolina-state-convention-raleigh-hamfest
>,
Raleigh, North Carolina

442. Re: Besides retro operating systems, tholen also enjoys retro gaming!

Newsgroup: rec.radio.amateur.policy
Date: 2011-03-17 23:50:58 UTC
From: "tholen@antispam.ham" <tholen@ifa.hawaii.edu>
Message-ID: <1944a17b-353b-4620-879c-33178bca595f@t19g2000prd.googlegroups.com>
Source record: 244763
Cross-posted to: comp.os.os2.advocacy,rec.arts.tv,rec.radio.amateur.policy,rec.music.classical,rec.sport.basketball.college

Ken Wesson <kwesson@gmail.com>

7> Newsgroups:
comp.os.os2.advocacy,rec.arts.tv,rec.radio.amateur.policy,rec.music.classical,rec.sport.basketball.college

7> It's eexactly as trollish as your posts to thosee newsgroups,
tholeen.

Who is "tholeen", Wesson? There is nobody in this newsgroup
using that alias.

7> (Just to recap, for those of you who missed the first installment
and
7> since tholen is constitutionally incapable of quoting more than one
level
7> deep:

What does your classic unsubstantiated and erroneous claim have
to do with OS/2, Wesson?

7> I bumped into tholen on a quake 1 CTF server the other day and
took
7> screenshots.

What does your classic erroneous presupposition have to do with
OS/2, Wesson?

7> Amusingly, he's a reasonably proficient player, but peppers
7> the message log with assorted questions of a very familiar sort for
the
7> entire game -- quite long ones, too, so I'm pretty sure he's got
some
7> macros he's spamming. Unless, of course, he's a bot.

What does your classic erroneous presupposition have to do with
OS/2, Wesson?

7> Enjoy!)

What does that have to do with OS/2, Wesson?

7> It's your gaming as well,

What does your classic unsubstantiated and erroneous claim have
to do with OS/2, Wesson?

7> both last Friday and again a few minutes ago on
7> the same server where you showed up and joined the team I was on
about
7> 1/4 of the way through the game.

What does your classic unsubstantiated and erroneous claim have
to do with OS/2, Wesson?

7> By the way, sorry about that rocket a few minutes ago.

What does your classic unsubstantiated and erroneous claim have
to do with OS/2, Wesson?

7> Oh, for the
7> benefit of everyone else reading this, here's an excerpt from my
console
7> log of the game:

What does your console log have to do with OS/2, Wesson?

7> That damn reactor room in ctf2m1 is such a pain that way. :) Maybe
if
7> you'd grappled yourself to the wall (or up and out towards blue
base!) as
7> soon as the shrapnel started flying ... but what's done is done,
and we
7> won 5-0 anyway when you capped a few minutes later after terminator
got
7> terminated on his attempt.

What does some reactor room have to do with OS/2, Wesson?

7> I must say your reaction was quite mild, and rather amusing:

What does your classic erroneous presupposition have to do with
OS/2, Wesson?

7> Especially compared to this, earlier, when you and troy walked into
the
7> same teleporter in blue base at the same time:

What does your classic erroneous presupposition have to do with
OS/2, Wesson?

7> Heck, you weren't even the one carrying the flag that time (and
troy
7> respawned close by, grabbed the flag again, and capped, so no
biggie for
7> him either despite his initial reaction) and it was certainly more
7> accidental than my rocket shoving you into that lava. ;)

What does your classic erroneous presupposition have to do with
OS/2, Wesson?

7> It's also nice of the server admin to run that mod that auto-
respawns the

7> flag immediately if it falls in lava. Otherwise it would have been
7> sitting down there for ten minutes while we all got bored playing
plain
7> old deathmatch. Maybe I'd have even been more careful where I aimed
my
7> rockets if we'd been on another server. ;)

What do your rockets have to do with OS/2, Wesson?

7> Correctness?

What does your question have to do with OS/2, Wesson?

7> But it *wasn't* coincidence, unless there are *twoo* people
7> running around out there called "tholen" that constantly ask what
various
7> things have to do with OOS/2.

At least that many, Wesson, assuming, of course, that you meant
"two" instead of "twoo".

7> Yoours have been known too do so froom time to time, thoolen.

What does your classic erroneous presupposition have to do with
OS/2, Wesson?

7> As much as most of your posts to rec.radio.amateeur.policy do,
thooleen.

Who is "thooleen", Wesson? There is nobody in this newsgroup
using that alias.

7> Oh, soorry, some of the vowel keys on my keyboard seem to be
getting
7> stuck, and the deleete key doesn't work. Bear with me during these
trying
7> timees. :)

What do your keyboard problems have to do with OS/2, Wesson?

7> Hoow so?

What does your question have to do with OS/2, Wesson?

7> Are you genuinely cllaiming that someone else is out there
imitating your
7> inimitable style? ;)

What does your question have to do with OS/2, Wesson?

7> Welll, he was you,

What does your classic unsubstantiated and erroneous claim have
to do with OS/2, Wesson?

7> and you appear to be a he.

What does your presupposition have to do with OS/2, Wesson?

7> Dr. David J. Tholen, lllate
7> of some astronomy institute or another, was it not, thollen?

Who is "thollen", Wesson? There is nobody in this newsgroup using
that alias.

7> Oh, damn, now my "ll" keeey is sticking too!

What do your keyboard problems have to do with OS/2, Wesson?

7> I don't think you have anything to be especially ashamed or
embarrassed
7> about.

What you think is irrelevant, Wesson. You're the one who should be
embarrassed by all of your classic unsubstantiated and erroneous
claims and classic erroneous presuppositions.

7> You captured twice in tonight's game, two times more than the
7> entire red team, who, mind you, seemed to spend most of their time
7> fumbling with their shoelaces and tripping over their own
grenades. ;)

What does your classic erroneous presupposition have to do with
OS/2, Wesson?

7> When they weren't too busy typing out taunts like "no can do
undertaker"
7> to play the game properly (and getting pineappled in the face for
their
7> efforts, of course -- that's always what I do when I suspect a
player's
7> typing, a grenade to the face, wakes them up right quick.
Especially if
7> they are on the other team so they actually take damage.)

What does your game have to do with OS/2, Wesson?

7> It givees some insight into your disordeer, tholeen.

Who is "tholeen", Wesson? There is nobody in this newsgroup using
that alias.

7> (Damn "e" key!) I
7> think it might be a form of OCD, or maybe even Tourette's.

What does your OCD or Tourette's have to do with OS/2, Wesson?

7> (The common
7> public perception of Tourette's is that it makes you blurt out
nasty
7> swear words, like troy did when you telefragged him earlier.

What does your classic erroneous presupposition have to do with
OS/2, Wesson?

7> But actually
7> it quite commonly manifests as other physical and verbal tics, and
"what
7> does X have to do with OS/2?" is certainly no less plausible a
verbal tic
7> than some others.

What does your classic erroneous presupposition have to do with
OS/2, Wesson?

7> Not to mention "who is 'tholeen', Wesson? There is
7> nobody in this newsgroup using that alias." ;))

What do your verbal tics have to do with OS/2, Wesson?

7> Noot gamers in general. Just you, thoolen.

Who is "thoolen", Wesson? There is nobody in this newsgroup using
that alias.

7> One of them is, theelon.

Who is "theelon", Wesson? There is nobody in this newsgroup using
that alias.

7> (Aww, crap-dammit!)

What does that have to do with OS/2, Wesson?

7> Another couple of amusing exchanges:

What does your amusement have to do with OS/2, Wesson?

7> Someone obviously fancies himself a T2 fan.

What does your fancy have to do with OS/2, Wesson?

7> And then this:

What does that have to do with OS/2, Wesson?

7> And this:

What does that have to do with OS/2, Wesson?

7> That's what, five messages total in your little argument?

What does your classic erroneous presupposition have to do with
OS/2, Wesson?

7> And given Spock
7> is spoouting long, grammatically well-formed, capitalized sentences
half
7> of which are movie lines from The Undiscoovered Country, I'm
guessing you

7> were arguing with a bot, thoolen.

Who is "thoolen", Wesson? There is nobody in this newsgroup using
that alias.

7> Perhaps you both were.

Perhaps not, Wesson.

8> Newsgroups:
comp.os.os2.advocacy,rec.arts.tv,comp.lang.lisp,alt.usenet.kooks,rec.radio.amateur.policy

8> Oh, pardon me -- I thought anything that might give new insights
8> regarding these groups' most notorious, er, member would be of
interest
8> to their general population.

What does your notoriety have to do with OS/2, Wesson?

9> Newsgroups:
comp.os.os2.advocacy,rec.arts.tv,comp.lang.lisp,alt.usenet.kooks,rec.radio.amateur.policy

9> What does your empty response have to do with OS/2, Kb9rqz? ;)

What does your classic erroneous presupposition have to do with
OS/2, Wesson?

Nebulous <nebulous99@gmail.com> writes:

21> Newsgroups:
comp.os.os2.advocacy,rec.arts.tv,comp.lang.lisp,alt.usenet.kooks,rec.radio.amateur.policy

21> That server is running bots. I recognize them. It looks like the
21> CTFBOT mod for Quake 1, but it's been further modified. I don't
21> remember the bot chatter being anywhere near that varied, and
there
21> certainly wasn't a tholenbot among them.

What does your memory have to do with OS/2, Nebulous?

21> Besides, human players don't produce such lengthy messages in the
21> middle of a violent twitch-reflex game, unless it's by voice. Some
of
21> the stuff there, like MilkDud's repeated quip "Yummy, aren't they?
21> Must be, they keep coming back for more", could be a human player
21> spamming a macro, but the long messages naming specific players
seem
21> unlikely to be generated by anything as simple as a console alias.
21> Maybe if there's a source port out there that lets you do stuff
like
21> "say Hey, %v, looks like you forgot to take the safety off" to
refer
21> to the last player you fragged -- but then, the names are often
not
21> capitalized and sometimes misspelt. Someone put a lot of effort
into
21> making the chat look real, except for the whole length thing.

What does your effort into your posting have to do with
OS/2, Nebulous?

21> I think the real question here though is, how did a modified
CTFBOT
21> get loose on usenet and start haunting comp.os.os2.advocacy and
other
21> newsgroups? And who is to be held responsible for the resulting
mess?
21> I didn't even think you could implement an NNTP client in QuakeC,
but
21> I've been surprised before, especially where the more advanced
source
21> ports like DarkPlaces are concerned. (Speaking of which, Ken ...

21> Fitzquake 0.80? WTH?)

Are you suggesting that Wesson, or Harbl, or the myriad Harrison aliases are CTFBOTs, Nebulous? Perhaps even you?

21> Say, I wonder if there's a port of the quake engine to OS/2?

Why don't you ask your question in comp.os.os2.games, Nebulous?

21> Anyway, if you'll excuse me, I think I'll go boot up my older machine
21> with Quake 1 and go ogle the CTFBOT female player model a bit. I'd
21> forgotten she looked that good, and wore that little. :)

What does your thought have to do with OS/2, Nebulous?

Amateur Radio Newsline(tm) Report 1753 - March 18 2011

Amateur Radio Newsline report number 1753 with a release date of
Friday, March 18 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. An earthquake and tsunami bring death and
destruction to Japan and ham radio responds to the publics call. Also,
the Somali pirates who killed three American hams are indicted in the
USA, the Russian Federation adopts C-E-P-T licensing and the ARRL
releases a video that urges its members to save the 70 centimeter band
by opposing Congressional measure H R 607. Hear the Leagues message
right here on Amateur Radio Newsline(tm) report number 1753 coming your
way right now.

RESCUE RADIO: HAMS RESPOND IN JAPAN FOLLOWING 8.9 QUAKE AND TSUNAMI

Japan remains under its worst threat to an ever rising toll, widespread
destruction, power, fuel and water shortages follow the massive
earthquake, tsunami and failed 40-year old nuclear power station. Jim
Linton, VK3PC, has the latest developments in regard to ham radio
relief efforts taking place as we go to air:

--

IARU Region 3 Secretary, Ken Yamamoto JA1CJP said the Japan Amateur
Radio League HQ station JA1RL, and other amateur stations, are
maintaining their effort to support the disaster operation.

Ken JA1CJP said, ''In less damaged areas, the power supply is being
restored gradually, and local amateur radio club members have started
to establish stations at shelters."

The information is being coordinated, as part of an organized rescue
and relief effort. It seems likely to continue for some weeks, and
months, to come.

The 8.9 on the Richter scale quake hit off north-eastern Sendai, and
triggered a ten-meter tsunami, on last Friday.

Ken JA1CJP, quoting local news sources said, the situation is getting
worse. Some reports put the dead and missing at 11,000.

Some 55,000 houses/buildings were damaged by the earthquake and 3,000 houses washed away by the tsunami.

Rescue teams have arrived and started their activities. They came from many nations, including Australia, China, Korea, Singapore, New Zealand, USA, Germany, Switzerland and Russia.

In all, the Japanese government has received help from 91 nations and Territories, and nine international organizations.

Ken JA1CJP said another worry is leakage of radio-active gasses at the Fukushima nuclear plant, which was damaged by the earthquake and tsunami.

A shortage of fuel, disruption to rail and road transport have been reported from many affected areas, still recovering from the worst earthquake in 140 years, followed by a widespread tsunami that swept away so much.

JA1RL continues to operate under instruction to be an emergency traffic centre. Increasingly receiving help from JARL members in the affected area. It is using the 7 MHz, 144 MHz and 430 MHz.

Many other stations are active. Field stations are using various frequencies, including some battery powered and others using small generators.

Each is exchange rescue and disaster relief operation information with JA1RL and others.

While 3525, 7030, 7043 and 7075 have been mentioned as in use, it's wise to keep those, and all of the Centre of Emergency frequencies clear of normal and non-urgent traffic. There is no call for additional foreign radio amateurs.

I'm Jim Linton, VK3PC, Chairman of the IARU Region 3 Disaster Communications Committee reporting for the Amateur Radio Newsline.

--

Again, there is no call for radio amateur's from the United States or any other nation to travel to Japan. There are over 130,000 hams in that nation and they have all of the operators that they need. More on this story in upcoming Newsline reports. (JARL, JA1CJP, VK3PC)

**

RESCUE RADIO: A1 CLUB DX OF JAPAN SEEKS WORLD WIDE CLEAR EMCOMM FREQUENCIES

Meantime word from a group called A1 Club DX of Japan has issued a request that hams world-wide keep clear of several frequencies and blocks of frequencies that are being used for post quake and post tsunami relief efforts.

According to the note from club secretary JE1TRV, amateur radio operator are gathering and exchanging emergency information on a number of frequencies. On the H-F bands these are 3 dot 525 MHz+/-5KHz; 7 dot 030 MHz +/-5KHz; 14 dot 100 MHz +/-10KHz; 21.200 MHz+/-10KHz and 28.200 MHz +/10KHz. What this means is that hams should listen carefully in these spectral parcels before calling CQ for a contact.

While the frequencies on the VHF and UHF bands really are of little concern to hams outside the immediate disaster area, one never knows when a band opening might occur. So for reference sake, the needed clear channels are on these bands are 50.1, 51.000 and 51.500 MHz on 6 meters; 144.100M, 145.000M and 145.500 MHz on 2 meters and 430.1, 433.0 and 433.500 MHz in the 70 centimeter band.

Exactly what type of emergency communications was taking place was not spelled out in the A1 Club DX press release. (A1DX Club of Japan)

**

QUAKE AFTERMATH: YAESU TEMPORARILY HALTS PRODUCTION AFTER QUAKE

The CQ on-line newsroom reports that production of Yaesu radios at Vertex Standard's factory in Fukushima, Japan, has been temporarily halted. This, due to earthquake damage at that plant.

In an open letter to the amateur radio community, Vertex Standard CEO and President Jun Hasegawa expressed his gratitude for the many "kind words and thoughts about us during this difficult time."

He reports that all Vertex Standard employees and their families are OK, although the company has not been able to reach its many dealers and subcontractors located near the coast.

"We just hope that they are alive," he writes.

Hasegawa also reports that the Yaesu factory in Fukushima suffered "minimal" damage from the earthquake but has been temporarily shut down nonetheless. He says he expects it to be back in normal operation within one to two weeks and asks for everyone's understanding and cooperation.

At this time, there have been no public reports received from any of the other Japanese amateur radio manufacturers.

The closure affects only the Fukushima factory. All others remain in operation. (CQ)

**

QUAKE SCIENCE: THE POWER OF THE JAPAN QUAKE

And some stunning statistics about the awesome power of this earthquake. According to the British Broadcasting Company, experts they interviewed say that the massive shaker may have shifted Japan's main coastline by up to 13 feet to the east. This is based on the country's network of 1,200 GPS monitoring stations. The GeoNet GPS

network is the world's largest.

Also, the quake may have knocked the planet off its axis by about 6.5 inches. This says the BBC will cause the Earth to rotate a tiny bit faster and thereby shortening the day by about 1.8 millionths of a second.

The Japan Meteorological Agency has raised the quake's magnitude to 9 while the U.S. Geological Survey still has it rated at magnitude 8.9. The Japan Meteorological Agency has also officially named the tembler "The 2011 off the Pacific coast of Tohoku Earthquake." (BBC via Facebook)

**

ENFORCEMENT: 14 ALLEGED PIRATES INDICTED IN ATTACK THAT KILLED THREE HAM OPERATORS

A federal grand jury has indicted 13 suspected pirates from Somalia and one from Yemen in the February hijacking of a yacht that left three American radio amateurs and one nonamateur dead. The United States Department of Justice say that the men face piracy, kidnapping and firearms charges stemming from their efforts to hold the Americans for ransom, according to the indictment.

As previously reported, Scott Adam, K9ESO, his wife Jean, KF6RVB, and Bob Riggle, KE7IIV, were murdered by the Somali pirates. Also killed with them was Phylis Macay. The four were onboard the Adam's owned yacht the Quest off the coast of Oman, East Africa, when pirates boarded their vessel on Friday, February 18. Officials were in the process of negotiating for their release when gunfire was heard around 1 AM on Tuesday, February 22. At that point United States Naval forces responded to the gunfire. Navy Seals then boarded the yacht only to discover that all four hostages had been shot by the pirates.

The Adams', who were retired, had been sailing on their 58foot yacht delivering Bibles around the world. The indictment says at least three of the indicted men shot and killed the four Americans without provocation. They died less than a week after a Somali pirate was sentenced to more than 33 years in prison by a New York court for the 2009 hijacking of the vessel the Maersk Alabama. That hijacking ended when Navy sharpshooters killed two pirates holding the ship's American captain.

This group of pirates is the latest to be brought to Norfolk to face charges stemming from attacks on ships off the cost of Africa. Last April, a federal grand jury indicted 11 in separate attacks on two U.S. Navy ships, the USS Ashland and the USS Nicholas. The Virginia-based ships were part of an international flotilla protecting shipping in the pirateinfested waters off Africa. (Published news reports)

ENFORCEMENT: CALIFORNIA CB'er ISSUED $7000 NAL FOR REFUSING FCC STATION INSPECTION

A California CB'er operator has been issued a $7000 Notice of Apparent Liability for Forfeiture. In its March 10th release the FCC says that that Ira Jones who they identify as the owner and operator of a Citizens Band radio station in the city of Merced, apparently willfully and repeatedly violated section 303(n) of the Communications Act and section 95.426(a) of the Commission's rules by failing to permit inspection of the CB radio station. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

The story on this one began on March 19, 2010, agents from the Enforcement Bureau's San Francisco Office responded to a complaint regarding interference within the radio communication system equipment of the Merced County Fire Department. The agents observed that transmissions by a CB radio station on 27.165 MHz appeared to match the audio distortion received on the fire departments frequency of 154.4 MHz. The agents then monitored the transmissions on frequency 27.165 MHz and used radio direction finding techniques to locate the source of the signal associated with the interference to a CB radio station operating from Ira Jones's residence in Merced.

On March 26, 2010, agents from the San Francisco Office again monitored 27.165 MHz and used radio direction finding techniques to locate the source of the signal creating the audio rectification interference to a CB radio station operating from Jones's residence in Merced, California. Later the same day, the agents approached Jones's residence and attempted to conduct a station inspection. At that time they were denied access to Jones home and his C-B radio gear. The same thing happened when the agents accompanied by to Merced Police officers attempted a station inspection on August 27th.

And it did not end there. On September 1, 2010, the San Francisco FCC Office received another complaint from the Merced County Fire Department stating that Jones had resumed CB radio station operation at approximately 5:30 p.m.. Also that the interference within the Merced County Fire Department radio communication system equipment had also resumed. Now, almost a year after receiving its first complaint from the Merced Fire Department the FCC has issued Jones the $7000 Notice of Apparent Liability to Monetary Forfeiture. He was also warned that operation of his CB radio station with more power than authorized under the Part 95 rules could result in additional sanctions and monetary forfeitures.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, reporting from Scottsdale, Arizona, from the Amateur Radio Newsline.

--

Jones was given the customary 30 days to pay or to file an appeal. The FCC release did not say whether or not the Merced Fire Department is still receiving the alleged interference from Jones C-B station operation. (FCC)

**

ENFORCEMENT: CALIFORNIA UNLICENSED BROADCASTER ISSUED $25000 NAL

The FCC has also issued a $25,000 Notice of Apparent Liability to Monetary Forfeiture to a California resident identified as Gabriel Garcia. This for his alleged operation of an unlicensed station on various FM frequencies in the city of San Jose. Interference that the FCC says was to Federal Aviation Administration operations in that city. Bill Pasternak, WA6ITF, is in our newsroom with this one:

--

The case began in March 2010. That's when the FCC received a complaint from the Federal Aviation Administration about interference to the Aviation Services band from an unlicensed station on 92.9 MHz calling itself KNRG. FCC San Francisco field agents used RF direction-finding equipment to trace the source of the signal to a roof antenna at a San Jose residence. The agents took field-strength measurements and determined they were more than 1,957 times greater than the maximum permissible level for a non-licensed Part 15 transmitter and therefore required a license.

The FCC agents proceeded to inspect the station. During the inspection, the landlord identified Gabriel Garcia as the operator of the station. The FCC issued a Notice of Unlicensed Operation to Garcia, detailing penalties for continuing to operate the unlicensed station.

That May, the San Francisco field office received another complaint about an unlicensed station at 93.7 MHz in San Jose. The agents again traced the transmission to a different residence of Garcia. They again issued another Notice of Unlicensed Operation to Garcia.

In June 2010, the San Francisco field office received more complaints from the FAA about the KNRG station. Again it traced the signal to Garcia's residence and issued a third Notice of Unlicensed Operation to him. In July, the agents went through the same drill for an unlicensed operation on 104.3 MHz originating from another Garcia residence in San Jose. This time, the field agents saw Garcia leave and then return to the residence. They issued a fourth Notice of Unlicensed Operation to Garcia.

Now the FCC has made good to impose a penalty on Garcia's unlicensed radio operations by issuing him the $25,000 proposed fine. The base fine for operating an unlicensed station is $10,000. However the agency

found that Garcia operated on multiple frequencies, on multiple occasions. As such it found his behavior as being particularly egregious for conduct that apparently interfered with the FAA's Aviation Radio Services band. Based on this evidence, the commission fined him $25,000.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

As is always the case, Garcia was given the usual 30 days to pay up or to file his appeal. Meantime, there's no word if Garcia has taken his station off the air of if its still in operation. Maybe one of our listens in San Jose can take a listen to the FM broadcast band and let us know. (FCC)

RADIO JUSTICE: HAMS REPORTEDLY FOIL COPPER THIEVES

Ham radio appears to have foiled an attempt by copper thieves to do their illegal deed. This as a Paris, Texas, woman and Detroit man, along with three juveniles, were arrested by Paris police after stealing copper wiring from the old police and court building.

While details are sketchy Paris Police Department officers responded to a possible burglary call at the building after a person saw the suspects leave and followed them to Paris Iron and Metal. According to Matt Birch, public information officer for Paris Police Department they then reported what they knew to Paris Police who in turn collared the suspects.

More is on line at tinyurl.com/47tfrao (Via e-mail)

HAM HAPPENINGS: 14th ANNUAL INTERNATIONAL LIGHTHOUSE AND LIGHTSHIP WEEKEND

The 14th annual Lighthouse and Lightship Weekend will be held as a fun event in the weekend of August 20th and 21st. Already 135 registrations have been received and it is on track to nudge last year's total of 447. Germany and Australia traditionally account for most entries and their enthusiasm shows again this year.

Of particular interest will be DA2011LH. This is a special event callsign at Campen Lighthouse. To inquire about the International Lighthouse and Lightship Weekend visit the website at http://illw.net. (VK3PC)

**

HAM HAPPENINGS: AUSTRIAN BROADCASTING CORPORATION TO OPERATE INTERNATIONAL MARCONI DAY

The Amateur Radio Section of the Austrian Broadcasting Corporation, in conjunction with the Documentary Archives Radio Communications QSL Collection will operate station O-E11-M from 0000 hours UTC on April 29th to 23:59 UTC on May 1st. O-E-11-M is an official International Marconi Day station and contacts made on April 30th are valid for the International Marconi Day Award. If you do work this station QSL via the O E bureau or direct to OE1WHC. (Southgate)

**

HAM HAPPENINGS: EAA AIRVENTURE IN WISCONSIN IN JULY

And while its still ma bit down the road, the Fox Cities Amateur Radio Club Inc will operate July 27th to the 31st from EAA Airventure 2011.

Airventure is the largest air show and fly-in in the world held every year in Oshkosh Wisconsin. Special events station W9ZL will be on the air from 1500 to midnight UTC from the EAA grounds. Operation will use 7.250 and 14.250 on the H-F bands and 52.550 FM on 6 meters.

QSL with a large self addressed stamped envelope to FCARC AirVenture 2011, PO Box 2346, Appleton Wisconsin, 54912. (AB9AH)

RESTRUCTURING: RUSSIAN FEDERATION ADOPTS CEPT LICENSING

It should soon be easier to use amateur radio gear while visiting the Russian Federation. This, following its decision to join the CEPT Radio Amateur License agreement.

At a recent meeting the Russian State Commission for Radio Frequencies, it was decided that the Russian Federation will accept CEPT Recommendation for the CEPT Radio Amateur License and the CEPT Novice permit. The commission plans to advise CEPT Working Group R A of its decision in the near future. Working Group R A will be meeting in May and September.

IARU Region 1 says that it considers this a major step forward to eventually permit worldwide radio amateur roaming. CEPT licensing means that all nations accepting this recommendation also accept any other signatory's ham license, subject to certain limitations as valid in those nations as well. (Press Release)

**

HAM RADIO NEAR SPACE: MISSISSIPPI MIDDLE SCHOOL TO LAUNCH NEAR SPACE BALLOON

A group of students from Olde Towne Middle School in Ridgeland, Mississippi is preparing for a trip to space. Or at least as close as they can get.

The OTMS Radio and Technology Club, along with the school's Science Team, are planning a near-space balloon launch at 9 AM CDT on March 26th, conditions permitting.

The balloon -- nicknamed Titans in Space -- will use the call sign KC5NXD and is expected to reach an altitude of 94,825 feet. It will launch from the Madison County Career and Technology Center in Gluckstadt. Preflight will begin at 90 minutes before the scheduled launch. The preflight and launch will be stream-cast live on the Internet at www.ustream.tv/user/kc5nxd. You can also follow along on Twitter.

The project is led by Bill Richardson, N5VEI. He is encouraging radio amateurs to follow the balloon via APRS on 144.39 MHz, on http://aprs.fi with the call sign kc5nxd-11 and via a 2 meter voice beacon on 146.565 MHz. A 20 meter beacon at 14.079 or 14.080.5 MHz will offer telemetry as well. According to Richardson, the group will be using a special balloon-modified version of FLdigi, called dl FLdigi. Ground stations wanting to receive the balloon's telemetry using the program and a sound card interface can find the software can find it free at www.w1hkj.com (ARRL, Southgate, Others)

**

HAM RADIO IN SPACE: TWIN FASTRAC SATELLITES COMMANDED TO SEPARATE

Sebastian Munoz, KE5FKV, the FASTRAC Student Program Manager reports that the two amateur Radio FASTRAC AX.25 satellites have successfully separated in space. According to Munoz, on Monday, March 14th, a command was sent to the two birds to have them part ways. They did just that and are now in autonomous operation.

Munoz adds that FASTRAC 1 nick named "Sara Lily" has its Beacon on 437.345 MHz FM using AX.25 at 1200 bits per second. FASTRAC 2 also known as "Emma" has its Beacon on 145.825 MHz FM also running AX.25 protocol at 1200 bits per second. More on both birds is on-line at tinyurl.com/25sykwb (Southgate)

**

HAM RADIO IN SPACE: TWO MORE ASTRONAUTS PASS THEIR AMATEUR EXAM

Two more Astronauts are now licensed radio amateurs. According to AMSAT, Luca Parmitano, who is slated to fly on Expedition 36 and Chris Cassidy who is assigned Expedition 35 both passed their amateur radio license exams on March 8th.

On March 9th, Michael Hopkins completed his ARISS introductory course and is currently preparing for his amateur radio license exam. Hopkins is slated to fly with Expedition 37 in September of 2013.

Lastly, an ARISS refresher course was provided to Chris Hadfield, KC5RNJ/VA3OOG on March 11. Hadfield is currently scheduled for Expedition 34 in November of 2012. (AMSAT)

**

WORLDBEAT: LUXEMBOURG INAUGURATES NEW 60 METER BEACON

A new 60 meter beacon is on the air in Luxembourg. Operating with the callsign LX0HF its reportedly has been putting a good signal into the United Kingdom and other parts of Europe.

LX0HF operates on a frequency of 5 dot 205 dot 25 kHz. It is understood that the contact for the beacon is LX2A or LX7I of the Luxembourg Amateur Radio Society. (Southgate)

**

DX

In DX, UA0SC, UA0SE, UA0SW and RZ0SR will be active portable 6W from Senegal through March 28th. QSL via the operator's home callsign unless you work them using the call 6V7D during the Russia DX Contest on March 19-20th and the CQ WPX SSB Contest from March 26-27th. QSL for those contacts go only to UA0SE.

VE3DZ is on the air from Barbados as 8P9AA through March 29th. Activity is on all HF bands using CW, SSB and RTTY. He is expected to be in the CQWW WPX SSB Contest as 8P3A. QSL both callsigns via VE3DZ.

Lastly, 11 year old Y-L operator JF1VGZ along with JA1MFR will be active as KH7ERI and WN1Y portable KH0 from Saipan between March 25th and the 29th. QSL via JF1VGZ direct. Also, check out their Web page at www.qrz.com/db/kh7eri

(Above from various DX news sources)

THAT FINAL ITEM: A FEW IMPORTANT WORDS ABOUT HR-607 FROM THE ARRL

And finally this week, the ARRL has released a new video that urges its members to respond to their Congressional representatives in opposition to H-R 607. This is a measure now in committee that if passed as written would lead to the demise of most of the amateur 70 centimeter ham band as we know it today.

As we said, the ARRL has directed this video message to its members but in reality every ham in the United States and its possessions will be affected if HR-607 is passed into law as written. While we have no way to bring you the video portion of this message we can give you the audio. It runs three minutes and is perhaps the most important three

minute message ever issued by the league. Here with it is ARRL Chief Development Officer Mary Hobart, K1MMH:

--

"In February, Congressman Peter King of New York Chairman of the House Homeland Security Committee, introduced H.R. 607, called the "Broadband for First Responders Act of 2011." It has been referred to the House Energy and Commerce Committee

"The bill would create a nationwide Public Safety broadband network. As part of that network, the Bill provides for the allocation of the so-called "D-Block" of spectrum in the 700 MHz range for Public Safety use. These are part of the old UHF television frequencies no longer in use.

"We have no problem with that. But the bill also includes other frequencies that are to be taken and sold to commercial users. The bands to be sold at auction include the paired frequencies of 420-440 MHz and 450-470 MHz.

"420 to 440 Mhz is most of our amateur 70-cm band, It is one of the primary bands used by Amateur Radio operators. And this is a major problem.

"This band is already used by hundreds of thousands of handytalkies, thousands of Amateur Radio Emergency Service volunteers, severe weather spotters, weak signal operations, thousands of repeater systems, mobile operators Amateur Radio satellite communications, radio location beacons, amateur radio's nationwide system of digital and text communications, and more.

"This band is not just used for hobby activity, But used in the development of new radio technologies. And very important in continuing to meet our promises to provide communications for emergency groups with whom we have formal agreements.

"The National Public Telecommunications Council shares our concern and believes that the bill needs to be amended.

"420 to 440 MHz is already being heavily used for public service operations - by Amateur Radio operators. While the ARRL obviously supports the work of Public Safety organizations we vigorously oppose HR 607 in its present form. As it is written HR 607 is a direct threat to our limited spectrum and we encourage ARRL members to voice your opposition to this bill

"Here's how you can help. Write a letter for your congressional representative, but send it to ARRL's legislative consultants Chwat & Co. They will collect and hand-deliver your letter along with our message. You can find a sample letter, the name of your representative and where to send it for hand delivery, to be sure it gets to them, at http://www.arrl.org/sample-letter.

"Also please consider donating to the ARRL Spectrum Defense Fund. Our Amateur Radio frequencies are precious. We can't afford to have them taken away and sold at auctions. It's the donations from hams who care about preserving our frequencies that make our vigilance and defense of our bands possible.

"Don't just talk about it - do it. And please do it now."

--

According to one source, much of the credit for this new video goes to Al Petrunti, KA1TCH, of NewDay HD and video editor and graphics designer Kevin O'Dell, N0IRW. To view the video as well as hearing the audio, please take your web browser to tinyurl.com/607video. (Various)

Do you deny, then, that your posts only contain one level of quotation?
Please post the message-ID of a post you made in the past three months
that quotes at least two levels deep. (The time limit is because that's
my server's retention in most groups and Google message-ID search is
hopelessly broken these days.)

> 7> I bumped into tholen on a quake 1 CTF server the other day and took
> 7> screenshots.
>
> What does your classic erroneous presupposition have to do with OS/2,
> Wesson?

What erroneous presupposition are you talking about? I posted links to
the goddamn screenshots. Are you honestly claiming that they don't exist?

> 7> Amusingly, he's a reasonably proficient player, but peppers 7> the
> message log with assorted questions of a very familiar sort for the
> 7> entire game -- quite long ones, too, so I'm pretty sure he's got some
> 7> macros he's spamming. Unless, of course, he's a bot.
>
> What does your classic erroneous presupposition have to do with OS/2,
> Wesson?

I didn't presuppose that you were a bot. I merely considered the
possibility. Susan Calvin is the one who accused you point blank of being
a bot.

With that name, I suppose she is an expert on such matters though.

> 7> It's your gaming as well,
>
> What does your classic unsubstantiated and erroneous claim have to do
> with OS/2, Wesson?

Are you honestly asking me to believe there are *two* people out there
who call themselves "tholen" and constantly ask "what does X have to do

with OS/2"?

> 7> both last Friday and again a few minutes ago on 7> the same server
> where you showed up and joined the team I was on about
> 7> 1/4 of the way through the game.
>
> What does your classic unsubstantiated and erroneous claim have to do
> with OS/2, Wesson?

OK, maybe it was closer to 2/5 of the way through. I wasn't exactly keeping precise timing logs with a stopwatch, and console transcript entries don't have timestamps. So sue me!

> 7> By the way, sorry about that rocket a few minutes ago.
>
> What does your classic unsubstantiated and erroneous claim have to do
> with OS/2, Wesson?

What's erroneous about it? I genuinely was sorry! That was the other team's flag you were halfway home with, after all.

> 7> I must say your reaction was quite mild, and rather amusing:
>
> What does your classic erroneous presupposition have to do with OS/2,
> Wesson?

What? I did, too, find it amusing!

> 7> Especially compared to this, earlier, when you and troy walked into
> the
> 7> same teleporter in blue base at the same time:
>
> What does your classic erroneous presupposition have to do with OS/2,
> Wesson?

Nothing erroneous about it. You don't get mutual telefrags like that from spawnfragging, only from teleporting to the same place at the same time. Besides, your bloody remains (and the flag!) were lying right in front of one of the fucking teleporters in blue base, and nowhere near any of the map's deathmatch respawns.

> 7> Heck, you weren't even the one carrying the flag that time (and troy
> 7> respawned close by, grabbed the flag again, and capped, so no biggie
> for
> 7> him either despite his initial reaction) and it was certainly more 7>

>
> What does your classic erroneous presupposition have to do with OS/2,
> Wesson?

Keep tempting me like that and I might have another mishap with the rocket launcher. Maybe it'll be near one of ctf2m3's slime pools next time. That'd give you a fighting chance.

> 7> But it *wasn't* coincidence, unless there are *twoo* people 7>

Prove it. I flatly refuse to believe such an extraordinary claim without
evidence.

> 7> Yoours have been known too do so froom time to time, thoolen.
>
> What does your classic erroneous presupposition have to do with OS/2,
> Wesson?

Huh. I thought for sure you'd ask "who is 'thoolen', Wesson?" at this
point. Maybe Susan's wrong about you.

> 7> As much as most of your posts to rec.radio.amateeur.policy do,
> thooleen.
>
> Who is "thooleen", Wesson? There is nobody in this newsgroup using that
> alias.

You'll be glad to know that I've since replaced that shoddy old keyboard.

> 7> Welll, he was you,
>
> What does your classic unsubstantiated and erroneous claim have to do
> with OS/2, Wesson?

Are you saying you're *not* you?

That doesn't even make sense, thoolen.

Oh, no! It's happpening agaain!

> 7> I don't think you have anything to be especially ashamed or
> embarrassed
> 7> about.
>
> What you think is irrelevant, Wesson. You're the one who should be

Perhaps I misread something, but I could have sworn the computer said
"tholen captured the RED flag!" on two separate occasions during that
game.

> 7> When they weren't too busy typing out taunts like "no can do
> undertaker"
> 7> to play the game properly (and getting pineappled in the face for

Your game, too, thollen.

> 7> (Damn "e" key!) I
> 7> think it might be a form of OCD, or maybe even Tourette's.
>
> What does your OCD or Tourette's have to do with OS/2, Wesson?

It's not *my* OCD or Tourette's, it's *yoours*, thooolen. Suffering from
reading coomprehension prooblems, thoolen?

> 7> (The common
> 7> public perception of Tourette's is that it makes you blurt out nasty
> 7> swear words, like troy did when you telefragged him earlier.
>
> What does your classic erroneous presupposition have to do with OS/2,
> Wesson?

What part of "Troy McClure was telefragged by tholen" did you not
understand? For that matter, the screen turning red and you respawning
right as you jumped into a teleporter? You certainly seemed to have a
pretty good idea what had happened when you fired off "What does your
murder of a teammate have to do with OS/2, McClure?" afterward.

> 7> But actually
> 7> it quite commonly manifests as other physical and verbal tics, and
> "what
> 7> does X have to do with OS/2?" is certainly no less plausible a verbal
> tic
> 7> than some others.
>
> What does your classic erroneous presupposition have to do with OS/2,
> Wesson?

Are you arguing that it is not a plausible verbal tic? It may be an
unusual one but you'd need more evidence to convince me that it was not
physically possible for a verbal tic to take and specific form.

> 7> Not to mention "who is 'tholeen', Wesson? There is 7> nobody in this
> newsgroup using that alias." ;))
>
> What do your verbal tics have to do with OS/2, Wesson?

I don't have any veerbal tics, tholeen. Just baad luck with keeyboards. :P

> 7> Someone obviously fancies himself a T2 fan.
>
> What does your fancy have to do with OS/2, Wesson?

I didn't say it was my fancy. I was referring to another player on the
server that evening.

> 7> That's what, five messages total in your little argument?
>
> What does your classic erroneous presupposition have to do with OS/2,
> Wesson?

Oh, was there a sixth and I missed somewhere? Soorry.

Ken Wesson <kwesson@gmail.com> writes:

11> Newsgroups:
comp.os.os2.advocacy,rec.arts.tv,rec.radio.amateur.policy,rec.music.classical,rec.sport.basketball.college

11> Do you deny, then, that your posts only contain one level of
quotation?

What does your question have to do with OS/2, Wesson?

11> Please post the message-ID of a post you made in the past three
months
11> that quotes at least two levels deep. (The time limit is because
that's
11> my server's retention in most groups and Google message-ID search
is
11> hopelessly broken these days.)

What does your request have to do with OS/2, Wesson?

11> What erroneous presupposition are you talking about?

What does your question have to do with OS/2, Wesson?

11> I posted links to the goddamn screenshots. Are you honestly
claiming that
11> they don't exist?

What does your question have to do with OS/2, Wesson?

11> I didn't presuppose that you were a bot. I merely considered the
11> possibility. Susan Calvin is the one who accused you point blank
of being
11> a bot.

What does your consideration have to do with OS/2, Wesson?

11> With that name, I suppose she is an expert on such matters though.

What does your supposition have to do with OS/2, Wesson?

11> Are you honestly asking me to believe there are *two* people out
there
11> who call themselves "tholen" and constantly ask "what does X have
to do
11> with OS/2"?

What you want to believe is irrelevant, Wesson. The facts are
relevant.

11> OK, maybe it was closer to 2/5 of the way through. I wasn't
exactly
11> keeping precise timing logs with a stopwatch, and console
transcript
11> entries don't have timestamps. So sue me!

What does your classic erroneous presupposition have to do with
OS/2, Wesson?

11> What's erroneous about it? I genuinely was sorry! That was the
other
11> team's flag you were halfway home with, after all.

What does your question have to do with OS/2, Wesson?

11> What? I did, too, find it amusing!

What does your question have to do with OS/2, Wesson?

11> Nothing erroneous about it. You don't get mutual telefrags like
that from
11> spawnfragging, only from teleporting to the same place at the same
time.
11> Besides, your bloody remains (and the flag!) were lying right in
front of
11> one of the fucking teleporters in blue base, and nowhere near any
of the
11> map's deathmatch respawns.

What does your classic unsubstantiated and erroneous claim have
to do with OS/2, Wesson?

11> Keep tempting me like that and I might have another mishap with
the
11> rocket launcher. Maybe it'll be near one of ctf2m3's slime pools
next
11> time. That'd give you a fighting chance.

What does your classic erroneous presupposition have to do with
OS/2, Wesson?

11> Prove it. I flatly refuse to believe such an extraordinary claim
without
11> evidence.

You're the one making the extraordinary claim, Wesson. The onus
of proof falls on your shoulders, Wesson.

11> Huh. I thought for sure you'd ask "who is 'thoolen', Wesson?" at
this
11> point. Maybe Susan's wrong about you.

What does your thought have to do with OS/2, Wesson?

11> Sorry. I told you some of my keys were sticking and delete didn't
work.
11> You'll be glad to know that I've since replaced that shoddy old
keyboard.

What does your shoddy old keyboard have to do with OS/2, Wesson?

11> Are you saying you're *not* you?

What does your question have to do with OS/2, Wesson?

11> That doesn't even make sense, thoolen.

Who is "thoolen", Wesson? There is nobody in this newsgroup
using that alias.

11> Oh, no! It's happpening agaain!

What do your keyboard problems have to do with OS/2, Wesson?

11> All zero of them?

What does your question have to do with OS/2, Wesson?

11> But, but ... but why?

What does your question have to do with OS/2, Wesson?

11> Perhaps I misread something, but I could have sworn the computer
said
11> "tholen captured the RED flag!" on two separate occasions during
that
11> game.

What does your gaming have to do with OS/2, Wesson?

11> Your game, too, thollen.

Who is "thollen", Wesson? There is nobody in this newsgroup
using that alias.

11> It's not *my* OCD or Tourette's, it's *yoours*, thooolen.

Who is "thooolen", Wesson? There is nobody in this newsgroup
using that alias.

11> Suffering from reading coomprehension prooblems, thoolen?

Who is "thoolen", Wesson? There is nobody in this newsgroup
using that alias.

11> What part of "Troy McClure was telefragged by tholen" did you not
11> understand?

What does your question have to do with OS/2, Wesson?

11> For that matter, the screen turning red and you respawning
11> right as you jumped into a teleporter?

What does your question have to do with OS/2, Wesson?

11> You certainly seemed to have a
11> pretty good idea what had happened when you fired off "What does
your
11> murder of a teammate have to do with OS/2, McClure?" afterward.

Classic erroneous presupposition.

11> Are you arguing that it is not a plausible verbal tic?

What does your question have to do with OS/2, Wesson?

11> It may be an
11> unusual one but you'd need more evidence to convince me that it
was not
11> physically possible for a verbal tic to take and specific form.

Classic erroneous presupposition.

11> I don't have any veerbal tics, tholeen. Just baad luck with
keeyboards. :P

Who is "tholeen", Wesson? There is nobody in this newsgroup
using that alias.

11> I didn't say it was my fancy. I was referring to another player on
the
11> server that evening.

What does your gaming have to do with OS/2, Wesson?

11> Oh, was there a sixth and I missed somewhere? Soorry.

What does your question have to do with OS/2, Wesson?

11> Yeah, perhaps Spock was just a particularly hardcore Star Trek
fan.

What does your supposition have to do with OS/2, Wesson?

11> Oh, I don't have any notoriety to speak of, tholeen, unlikee you.

Who is "tholeen", Wesson? There is nobody in this newsgroup
using that alias.

11> I was making a leetle joke, sir.

Who is "sir", Wesson? There is nobody in this newsgroup
using that alias.

You can compile any linux soft.

Just install the gcc for os2
http://packages.debian.org/stable/hamradio/

"linux might be easier "

Or look for wubi, that is linux on win.

os2 is win compatible?

Is that meant to suggest that I am *in* denial about anything, or that
I'm lying? Because I'm not, tholenbot.

> 22> Don't you think games support would be a useful thing for OS/2

What would be inconsistent about using game availability to promote a
platform? For better or for worse, game availability is often one of
the criteria on which shoppers compare platforms.

479. A Painful Squeeze

Roger gets up from the bar and heads for the bathroom.

A few minutes later, a loud, blood curdling scream is heard coming from the bathroom.

A few minutes after that, another loud scream reverberates through the bar.

The bartender goes into the bathroom to investigate why Roger is screaming. "What's all the screaming about in there?" the bartender yells' "You're scaring the hell out of our customers!"

"I'm just sitting here on the toilet," slurs Roger, "and every time I try to flush, something comes up and squeezes the hell out of my nuts!"

The bartender opens the door, looks in, and says, "You dumbass! You're sitting on the mop bucket!"

[insult deleted again, tholoon]

What does your classic erroneous presupposition have to do with OS/2,
tholenbot? The only thing I snipped was some words *you* wrote,
thoolen. That could hardly be evidence of *my* alleged anythings,
thoron. Which is hardly surprising, thumbelina, because none of the
nasty things that you have said or implied about me are at all true,
thallium.

Let me put it this way. If I pulled a random person off the street and told them that some guy they'd never heard of played Quake, he'd probably believe me. If I told them that he was a notorious usenet kook famous for constantly asking what everything had to do with OS/2 and using particular catch-phrases, they'd be much less likely to believe me. If I told them there were *two* kooks with the same exact particular kooky behavior, they'd think *I* was the kook.

There's nothing at all erroneous about it -- I really did mean to send that. In fact it's rather remarkable that you claim my claim that I meant to send that is erroneous; what do you claim as the basis for your claim, telepathy?

> 14> *Oour* gaming, thoolen, *our* gaming.
>
> Classic erroneous presupposition.

Not at alll, thollen.

==> + PUBLIC SERVICE: RADIO AMATEURS IN JAPAN STILL PROVIDING
COMMUNICATIONS SUPPORT

Amateur Radio operators became involved in the rescue effort soon
after the March 11 8.9 earthquake and devastating tsunami that hit
northern Japan, and that effort continues nearly two weeks later. "In
the early stage following the earthquake and tsunami, several radio
amateurs were able to activate their stations with car batteries or
small engine generators, despite the electric power outages," IARU
Region 3 Secretary Ken Yamamoto, JA1CJP, told the ARRL. "They
transmitted rescue requests and information on the disaster situation
-- including refugee centers and their needs -- and the availability of
basic infrastructures, such as electricity, water and gas supplies."
After the earthquake and tsunami, there was no electricity, water or
gas service in many of the affected areas.

<http://www.arrl.org/images/view/News/JP_TLL0311_CT.JPG> In his
report to the ARRL, Yamamoto said that the Japan Amateur Radio League
(JARL) activated JA1RL -- its headquarters station in Tokyo -- soon
```

after the earthquake. With the help of many other amateurs, it also activated its regional headquarters station JA3RL in Osaka to communicate with the amateurs in the damaged areas, including its Tohoku headquarters station JA7RL in Sendai. "The communications were mostly on the 7 MHz band in daytime and the 3.5 MHz band at night," Yamamoto explained. "Short range communications were also made on the 144 and 430 MHz bands. The information gathered through Amateur Radio communications was reported to the rescue and disaster relief organizations for their appropriate deployment. Some other amateurs accepted health-and-welfare inquiries from the [impacted] areas and they posted the information on the Internet." Read more here <http://www.arrl.org/news/radio-amateurs-in-japan-still-providing-communications-support>.

==> + PUBLIC SERVICE: AMATEURS ASSIST WITH OCEAN RESCUE

At 10:04 AM PDT on March 21, Rex Weinheimer, KC5AGO, of Stonewall, Texas -- a member of the Maritime Mobile Service Net (MMSN) -- heard and responded to a "weak and broken MAYDAY call." The call was from the sailing vessel Gloria Jean, a 30 foot sailboat that was in the Pacific Ocean about 120 miles west of Ensenada, Mexico. Weinheimer heard the distress call on 14.300 MHz, a frequency monitored by the MMSN.

MMSN Net Controller Lee Langford, KG4DZN, told the ARRL that through the combined efforts of several net stations, the net was able to ascertain the situation and the position of the stricken vessel. MMSN operators contacted both the US and Mexican Coast Guards and both services deployed assets to the scene. The US Coast Guard dispatched an MH-60 Jayhawk helicopter from San Diego and a C-130 Hercules plane from Sacramento. According to the USCG, the Gloria Jean had no propulsion, food, water or safety equipment. Read more here <http://www.arrl.org/news/amateurs-assist-with-ocean-rescue>.

==> + FCC NEWS: FCC SEEKING COMMENTS ON ARRL PETITION REGARDING TDMA

Earlier this month, the ARRL filed a Petition for Rulemaking and a Request for Temporary Waiver with the FCC, seeking authorization of the use of single-time-slot Time Division Multiple Access (TDMA) emissions in the amateur bands at and above 50 MHz, wherever multiple-time-slot TDMA is authorized. The FCC has designated the Petition as RM-11625 and is soliciting comments on it. Comments may be filed electronically and will be accepted until April 22 . Read more here <http://www.arrl.org/news/fcc-seeking-comments-on-arrl-petition-regarding-tdma>.

==> ARRL RECOGNIZES: NOMINATIONS FOR ARRL AWARDS NOW OPEN

Each year, the ARRL Board of Directors has the opportunity to select recipients for a number of awards in various categories that honor Amateur Radio operators. The nomination period is now open for those ARRL awards that recognize educational and technological pursuits in Amateur Radio. There are also awards to honor a young Amateur Radio

operator and an outstanding ARRL Section Manager. Read more here <http://www.arrl.org/news/nominations-for-arrl-awards-now-open>.

==> + ON THE AIR: NIST TO CONDUCT TIME AND FREQUENCY USER SURVEY

The National Institute of Standards and Technology's (NIST) Time and Frequency Division is conducting a survey to learn more about its users, seeking to determine how the agency can make its services more useful in the future. NIST services include WWV, WWVH and WWVB, which provide reference time and frequency signals via radio. The NIST also provides the Internet Time Service -- which provides accurate time synchronization to computer systems -- and several other services to offer accurate time information via telephone or web pages. Radio amateurs are encouraged to complete the survey. Read more here <http://www.arrl.org/news/nist-to-conduct-time-and-frequency-user-survey>.

==> SOLAR UPDATE

Tad "The Earth turns, the Sun burns, but I die without you <http://www.youtube.com/watch?v=5L_wOdWD2t0>" Cook, K7RA, reports: For the second week in a row, all solar indicators were lower. The average daily sunspot numbers declined more than 28 points from the week before to 40.9, while the average daily solar flux was off more than 18 points to 94.8. But looking at solar images from the STEREO mission <http://stereo.gsfc.nasa.gov/>, we can see a great deal of activity about to rotate toward us over the Sun's eastern horizon. The whole "back" side of our Sun looks very busy. The NOAA forecast for March 23 for the planetary A index and solar flux still is not available, but the March 22 forecast sees solar flux for March 24-31 at 110, 115, 120, 120, 120, 125, 130 and 135. The planetary A index for the same period is predicted at 8 for March 24-25, 5 on March 26-27 and 8 on March 28-31. This indicates improving HF propagation for the near term, with geomagnetic indicators slightly unsettled, compared to recent quiet conditions. NASA has a video <http://www.youtube.com/watch?v=aTBgHd8exI4> explaining the very low sunspot activity over the past few years. Look for more information on the ARRL website on Friday, March 25. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by the song Without You <http://www.youtube.com/watch?v=5L_wOdWD2t0> from the musical Rent <http://en.wikipedia.org/wiki/Rent_%28musical%29>.

==> + SILENT KEY: THORMOD "TOM" B�E, LA7OF (SK)

Thormod "Tom" B�e, LA7OF, of Horten, Norway, passed away on Monday, March 21. He was 71. B�e was President of the Norsk Radio Relae Liga, Norway's IARU Member-Society. B�e actively worked for the Amateur Radio cause throughout his adult life in both a private and professional capacity. For many years, he worked on spectrum management matters with the Norwegian administration, was extremely active in CEPT and ITU forums and served as Director of the European Radiocommunications

Office in Copenhagen from 1998-2006.

ARRL Chief Executive Officer David Sumner, K1ZZ, remembered B�e fondly: "Tom was the spokesman for Norway in Committee 5, which was responsible for all frequency allocations -- and I do mean all, as the entire radio spectrum was under review at WARC-79. Norway was an outstanding supporter of Amateur Radio at the conference, and Tom was recognized as the 'most valuable delegate' by the IARU team." Read more here <http://www.arrl.org/news/thormod-tom-b-e-la7of-sk>.

==> + ARES® E-LETTER NOW AVAILABLE IN AUDIO FORM

The ARES® E-Letter is now available in audio format <http://www.arrl.org/ares-e-letter-audio-version>. Edited for audio by Al Brown, KZ3AB, the ARES® E-Letter is voiced by Tony Riggs, W1FHN. Brown was licensed in 1966. He was a member of the White House Press Corps before retiring from the International Broadcasting Bureau/Voice of America (IBB/VOA). Licensed since 1955, Riggs has worked in both the commercial and public broadcasting venues. He retired after 21 years as a staff announcer and news anchor with the VOA. With more than 35,000 subscribers, the ARES® E-Letter is written by Rick Palm, K1CE and is published each month. Click here <http://www.arrl.org/ares-e-letter-audio-version> to subscribe to the ARES® E-Letter.

==> THIS WEEK ON THE RADIO

This week:

- March 26-27 -- CQ WW WPX Contest (SSB)

Next week:

- April 2-3 -- Missouri QSO Party; QCWA Spring QSO Party; ARCI Spring QSO Party; SP DX Contest; EA RTTY Contest
- April 5 -- ARS Spartan Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Amateur Radio Newsline(tm) Report 1754 - March 25 2011

(Please note that this is an extended Newsline report running 33 min, 11 seconds and containing 3 breaks.)

Amateur Radio Newsline report number 1754 with a release date of Friday, March 25, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. The FCC offers its support to Japan in its recovery from the March 11th earthquake and tsunami; the story of Hawaii's ham radio activation as the tsunami headed its way, ARISS celebrates its 600th school contact and more radar and G-P-S jamming exercised are announced in the U-K. Find out the details are on Amateur Radio Newsline(tm) report number 1754 coming your way right now.

RESCUE RADIO: FCC OFFERS TECHNICAL EXPERTISE TO JAPAN

The FCC has offered its counterpart in Japan any assistance that it might be able to render. This, as recovery efforts continue in the wake of the March 11th earthquake and Tsunami. Bill Pasternak, WA6ITF, is in the newsroom with more:

--

According to the trade publication Radio World, soon after the devastating events occurred, the FCC made contact with officials in Japan. This, to offer any help on the telecommunications front that it might be able to supply.

Tom Sullivan is the spokesperson for the FCC International Bureau. He is quoted as saying that his agency has reached out to its regulatory contacts in Japan and is also working with the State Department and the National Telecommunications & Information Administration to consider what assistance the FCC might be able to provide.

According to Sullivan, soon after the massive earthquake that hit Haiti, the FCC took a proactive role. This included providing technical assistance on emergency communications as well as passing along offers of help from private industry.

But Sullivan also notes that Japan is a different situation. It's a nation with its own very robust communications system. He says that on

the telecommunications front Japan is very well prepared for a situations like this. Nevertheless, Sullivan says that the FCC will be able to offer its expertise should it be asked.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

In the article, Tom Sullivan noted that the FCC International Bureau could serve as a contact point for anyone in industry seeking information on whether and how they might be able to help but at this point in time no telecommunications assistance requests have been received. You can read more at tinyurl.com/fccjapan. (RW, B&C)

**

RESCUE RADIO: HAWAII RACES WAS READY FOR THE MARCH 11th TSUNAMI

As Japan begins its slow journey back from the March 11th earthquake and tsunami that devastated a part of that Pacific Rim nation, and the continuing story of the reactor meltdowns at the Fukushima nuclear power plant, lost in the news coverage has been the story of ham radio emergency preparedness across the Pacific. This as the tsunami hurled itself eastward.

One of the first major population centers to begin preparing for the unknown was the state of Hawaii where Ron Hashiro, AH6RH, is the State Civil Defense RACES Coordinator. He says that he learned about the approaching sea disturbance by e-mail and that triggered the alerting system that gets the trained emergency communicators ready for whatever they may soon face:

--

AH6RH: "At that point we started the notification system of phone calls and other means of activating all of the other hams. In the meantime the radio started to get busy because other people had found out through TV, radio and other forums that there was a tsunami watch in effect and they were quite concerned."

--

Hashiro tells Newsline that the system worked flawlessly and soon the needed emergency communications nets were in operation:

--

AH6RH: "We placed phone calls to the different Amateur Radio Civil Defense coordinators on the various islands, they in turn placed phone calls and notified their people and got nets running on the different repeaters.

"On Oahu, W6BJF, Tom, ran the net, kept it active and passed messages between our Department of Emergency Management and our amateur radio

community, keeping them both informed."

--

By the time the tsunami approached Hawaiian shores all was in readiness, but thankfully Mother Nature spared Hawaii from the kind of devastation seen on the Japanese mainland:

--

AH6RH: "We are fortunate that while we were waiting for the tsunami to come, it did not pose as great a (potential) for damage as it did in Japan. Some of the islands did pick up some damage on their west facing side but it was more localized as compared to what was on Japan."

--

The bottom line is that while there was not the need for ham radio to any great extent as the tidal wave passed Hawaii, the hams of the Island state were ready if it had been a far more serious event.

Also, you can hear more with Ron Hashiro, AH6RH, about Hawaii's state wide ham radio ARES, RACES and CD preparedness system on this weeks Rain Report. Its on line right now at www.therainreport.com. (ARNewsline(tm))

**

RESCUE RADIO: THE TSUNAMI HEADS TO THE AMERICAS

After passing Hawaii the giant wave front continued its trek eastward toward the Americas. Soon nations bordering on the Pacific began to issue warnings to their populations located near the coastline. Then reports started trickling in as we hear from Amateur Radio Newsline's Bruce Tennant, K6PZW:

--

Marco Loarca, TG9ANM, is the Emergency Coordinator for Area D of the IARU's Region 2. He reports that the Club de Radio Aficionados de Guatemala was able to maintain communication via VHF and UHF with radio operators located near the nations coastline. Meantime, Jorge Sierra, LU1AS, his counterpart in Area G of reported that the Red Chilena Nor Austral monitored the frequency 7.070 MHz and beginning at 17:00 local time while the VHF and UHF emergency communications network was also activated.

In the United States, the Amateur Radio Emergency Services of California's Santa Cruz County was activated at approximately 08:00 a.m. local time. More than 30 local A.R.E.S. radio operators were made available to served agencies. These included the Santa Cruz County Emergency Operations Center, area evacuation centers, the Red Cross, a Salvation Army canteen truck, the Santa Cruz County Harbor Coast Guard

Auxiliary and a number of local Fire Departments. Also on Friday morning the Santa Cruz County A.R.E.S. Team activated the Tsunami Resource Net in advance of the anticipated 5 to 7 foot wave that was expected to reach the coastline around 8:00 AM local time.

As expected, the tsunami did impact the Pacific coast. They caused an estimated 15 million dollars of damage to Santa Cruz Harbor. More that 100 boats were either damaged or sunk as a result of the waves.

Santa Cruz was not alone in receiving significant damage as a result of the powerful tidal surge. Crescent City, located approximately 500 miles North of Santa Cruz, also received heavy damage. This lead to newly elected Governor Jerry Brown declaring these areas disaster zones. News reports say that one person died as a result of being swept out to sea with the high waves.

Lastly, on the other side of the United States northern border, Daniel Lamoureux VE2KA, reported that there was no damage from the tsunami on Canada's west coast.

That's whats known as we go to air.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Our thanks to the International Amateur Radio Union for much of the information in Bruce's report. (IARU - R2 Report)

HAM RADIO IN SPACE: ARISS CELEBRATES 600th SCHOOL CONTACT

Amateur Radio on the International Space Station, better known by the acronym ARISS, reached a milestone on Thursday, March 17th. This, when it held its 600th space to ground contact between astronaut Cady Coleman, KC5ZTH on board the International Space Station and students from several schools in Plock and Liszyno, Poland.

The contact supported lessons about space and space exploration, communication and technology. Scout Amateur Radio Club S-P-5-Zed-B-A handled the radio connection during which the astronaut Coleman fielded 19 space related questions from the students at the two schools.

Nearly 120 people were in the audience and there was also extensive media coverage. This included newspapers, four scientific magazines, one radio magazine, a television station, national radio and two internet portals.

And less we forget, we will have more ham radio space related news later on in this weeks Amateur Radio Newsline report. (Southgate)

RESCUE RADIO: HAM RADIO REPLACES PHONES DURING HOSPITAL OUTAGE

When nurses and other caregivers picked up their phones at Childrens Hospital of Orange County at 5:30 AM on March 21, there was no dial tone. A power surge, probably from lightning, had caused failure of the central processor in the hospital's phone switch. How would they make contact with physicians and patient transport companies?

Fortunately, the lead operator at the switchboard knew just what to do. She opened her disaster book to the Amateur Radio support page and followed the established procedure for activating the Hospital Disaster Support Communications System, or HDSCS. She had several options, but this time she used an emergency tie-line to reach April Moell WA6OPS, who is head of this ARES group that specializes in helping hospitals when communications fail.

April established an on-air network and initiated a callout of HDSCS communicators by telephone and pager. Ken Simpson W6KOS and Clay Stearns KE6TZR arrived at the hospital shortly to establish a link with the outside world. More operators followed to communicate between the most important units within the hospital including the Emergency Department, Neonatal Intensive Care, Pediatric Intensive Care, and Pharmacy.

April had given her home telephone number to the Supervisor

at Orange County Communications for incoming call relay.

This resulted in several urgent messages for the hospital,

including one regarding transport of a young patient coming

in for an appendectomy.

--

(Audio from HDSCS net)

--

By 10:45 AM, some phones were working but additional repair components were being awaited from a supplier. HDSCS continued to provide unit-to-unit and hospital-to-community messaging as needed, including coordination of patient treatments and a request for blood. At 1:02 PM, the repair crew announced that the phone system was back to normal except for some voicemail functions. HDSCS members remained on station

for 30 more minutes as they always do to insure that phone systems are stable.

There's lightning here in southern California only a few days a year, but it's a definite danger to our hospital phone systems. During an intense thunderstorm last October, HDSCS members responded to St. Jude Hospital in Fullerton when a power outage caused overloading of the telephone system there.

A total of eleven HDSCS members participated in this [latest] communications emergency. They were familiar with this hospital because HDSCS has helped in communications emergencies there before, including a 22-hour external phone outage when a construction accident severed fiber optic cables in August 2006.

This is the 31st year of HDSCS service to medical facilities in Orange County and this was the 114th activation to provide support when telephones have failed or overloaded. The reasons have ranged from equipment failure, to cut cables, to natural disasters such as earthquakes, floods, and wildfires. Each member has his or her own Go-Kit, ready to take to any of the 36 supported hospitals to establish communications.

For more information on HDSCS -- and how hams in your community can organize to provide rapid response like this to hospitals -- point your Web browser to www.hdscs.org. Those are the initials for Hospital Disaster Support Communications System, followed by dot-org.

For the Amateur Radio Newsline, I'm Joe Moell. K0OV. (K0OV)

**

RESCUE RADIO: VK RADIO OPERATOR HONORED FOR HELPING SAVE SIX LIVES

The Australian MySailing dot com website reports that Marine Rescue Terrey Hills radio operator Ian Murdoch has been awarded the Region Commander's Certificate of Appreciation from New South Wales Police Assistant Commissioner Ken McKay. According to the report, Murdoch along with four members of Broken Bay Water Police, received awards for their part in the rescue of six people on board the stricken yacht Encore which foundered in gale force conditions off Broken Bay on the afternoon of October 23rd, 2008.

On that day Murdoch was sole radio operator at the Marine Rescue Sydney radio base and although alone, he managed 75 minutes of non-stop intense pressures in response to a Mayday call for help. He relayed the distressed vessel's position to other vessels in the area, informed Water Police, and coordinated a veritable fleet of responding vessels. These included a police launch, a passenger ferry, a bulk carrier and a training yacht. At the same time he maintained contact with the sinking vessel until Water Police were able to take rescue the six passengers on-board and thereby saving their lives.

The account did not say whether or not Murdoch was an Australian ham radio operator. You can read the full story in mysailing.com.au. (WIA News)

**

RADIO STANDARDS: NIST CONDUCTING TIME AND FREQUENCY USER SURVEY

The National Institute of Standards and Technology's Time and Frequency Division is conducting a survey to learn more about its users, and to find out how the can make its services more useful in the future.

NIST services include stations WWV, WWVH, and WWVB, which provide reference time and frequency signals by radio. NIST also operates its Internet Time Service, which provides accurate time synchronization to computer systems, and several other services that provide time information via telephone or web pages.

John Lowe, the manager of National Institute of Standards and Technology radio stations WWV, WWVH and WWVB in Ft. Collins, Colorado. He says that the survey should take just a few minutes to complete, and your input will be greatly appreciated.

If you use any of these services -- and what radio amateur doesn't --please complete the survey which is on-line at www.tf.nist.gov/survey. (NIST)

HAM HAPPENINGS: SOUTHWEST 75 METER VHF/UHF NET TIME CHANGE

The Sunday evening Southwest 75 Meter VHF/UHF and Above Weak Signal Net on 3 point 920 MHz has changed its operating schedule. According to a note from K6STK and WI6M, the net now begins at 5:30 p.m. Pacific Daylight Savings Time and ends one hour later at 6:30 p.m.. If you live in the region covered by this net and are into VHF/UHF weak signal work, give this group a try. (K6TSK and WI6M via the VHF Reflector)

**

HAM HAPPENINGS: AES SUPERFEST APRIL 1 - 2 IN MILWAUKEE

The annual Amateur Electronics Supply Superfest will take place on Friday, April 1st from 2:00 p.m. to 6:00 p.m. and on Saturday, April 2nd from 8:30 a.m to 3:00 p.m. at the AES Milwaukee Warehouse. This

venue is located at 5710 West Good Hope Road in Milwaukee, Wisconsin. Admission is free with many manufacturers' representatives present to answer your questions about their latest gear. This year's special guest is ARRL President Kay Craigie, N3KN. And late word that ham radio's Mr. Audio, Bob Heil, K9EID, and Radio School's Gordon West, WB6NOA will team up to conduct a ham radio oriented Audio Workshop. More about this and the entire 2011 AES Superfest is on line at www.aesham.com/superfest. (Press Release)

**

NAMES IN THE NEWS: NASA ASTRONAUT DOUG WHEELOCK, KB5BOC, TO HOST HAMVENTION FORUM

Some names in the news. First up is NASA Astronaut Doug Wheelock, KF5BOC , will be holding forth at his own forum at the 2011 Dayton Hamvention. Wheelock returned to Earth in November of 2010 after serving as Commander of the International Space Station will speak from 1:15 to 2:15 P.M. on Saturday, May 21st in Hara Arena Meeting Room 3.

During his stay on-orbit, KF5BOC along with fellow Astronaut Shannon Walker, KD5DXB, regularly participated in the Amateur Radio on the International Space Station program or ARISS program during which he made some two dozen general contacts each day he was on the air. Colonel Wheelock is expected to share his experiences about space flight and using amateur radio in space. (Dayton Hamventionr)

**

NAMES IN THE NEWS: KI6ZMV ELECTED NEWS TREASURER OF ARNEWSLINE

Leslie Monzon, KI6ZMV, of Valencia, California, has been elected as the new treasurer if the Amateur Radio Newsline. She replaces the late Andy Jarema, N6TCQ, who passed way in November of 2009.

Re-elected to the Newsline Board of Directors were incumbents Bill Pasternak, WA6ITF, as president; Davis Black, KB4KCH, as Vice President, Joe Schrader, W9JUV, as Secretary, Mark Abramowicz, NT3V as Chief Executive Officer and Don Wilkbnks, AE5DW, as Member-at Large. Abramowicz will also continue as Chairman of the Young Ham of the Year Judging Committee.

Elections were a part of the annual Amateur Radio Newsline Board of Directors Meeting held by teleconference on Sunday, March 20th. (ARNewsline(tm))

**

NAMES IN THE NEWS: G4FSU APPOINTED AS RSGB HF MANAGER

The Radio Society of Great Britain Board of Directors has approved the appointment of Ian Greenshields, G4FSU. This, following the decision by John Gould, G3WKL to step down from this honorary position.

Apart from a having a very successful career as an RF and microwave communications engineer, Greenshields is well versed in radio spectrum matters. This based on his role of Secretary to the International Amateur Radio Union Region One High Frequency Committee since 2005. Recently, the IARU also appointed G4FSU as a Technical Consultant that requires regular involvement in ITU and CEPT matters. (RSGB)

**

NAMES IN THE NEWS: NEW IARU REGION 3 SECRETARY

The Board of Directors of IARU Region 3 have announced the appointment of Ken Yamamoto, JA1CJP, as the organizations new Secretary. Yamamoto holds a Bachelor of Science degree in electronic engineering and has worked in the satellite communications field for many years. He replaces Jay Oka, JA1TRC, who has reportedly stepped down for personal reasons on March 9th. WIA News

RADIO HISTORY: BBC TO CLOSE ORDFORDNESS TRANSMITTER SITE Another famed radio transmitting site is being decommissioned. This one is owned by the British Broadcasting Company and is not one very many on this side of the Atlantic know about. Amateur Radio Newsline's Norm Seeley, has the rest of the story:

--

Unless you live in Europe or are a truly devoted low frequency DX'er here in the United States, you likely have never heard of the British Broadcasting Company's transmitter site at Ordfordness. It's an operation that sits on 648 KHz and has a five tower array beamed to Europe with very little signal off the back toward the United States. And that's what makes the signal from Ordfordness such a great catch for medium wave D-X listeners on this side of the Atlantic pond.

But all that will end on March 27th. That's when the BBC switches off this transmitter site for good.

But its demise will not go undocumented. As a historical note, Jonathan Marks, G-8-W-G-N, has released a short documentary that traces

the history of the Ordfordness transmitter site from its inception through 2003 when the video was made. Marks, who was the former producer and host of the famed Radio Netherlands Media Network program is joined by Ordfordness radio engineer Andy Matherson who explains the way in which the site operates.

It's a great tour of a historic moment in European medium wave broadcast radio. You can experience it for yourself on line at vimeo.com/20996209

For the Amateur Radio Newsline, Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

Another sad moment in broadcast history, but one that Jonathan Marks, G8WGN, has taken the time to preserve. (Via e-mail)

**

HAM RADIO IN SPACE: TWO NEW ASTRO-HAMS

And a follow-up to last weeks story about a pair of Astronauts who had been tested and had passed the Amateur Service exams. Since then, Luca Parmitano has been issued the call sign KF5KDP and Chris Cassidy received KF5KDR. Both passed their tests on March 8th are slated to fly on future International Space Station expeditions. (ARISS)

**

HAM RADIO IN SPACE: AO-51 ENTERS AN ECLIPSE PERIOD

Eclipses are back for AO-51, and the length is increasing every day. According to AO-51 Command Station, Mark Hammond, N8MH, eclipses are now lasting about 1 to 2 minutes per pass. They are expected to increase in length pretty fast, gaining a minute every day or two over the coming weeks and month.

AO-51 is still running under power management in single transmitter mode on the 435.300 MHz downlink running approximately 1 point 3 watts. The satellite will be off during eclipses and probably right before and after. You'll probably still hear the transmitter cycling off and on around eclipse times, but most voice users will appreciate the stronger signals. AO-51 be in this mode until further notice. (ANS)

**

HAM RADIO IN SPACE: BJ8TA AN EME AND SATELLITE DXPEDITION

AMSAT-China Chief Executive Officer Alan Kung, BA1DU reports that his group is organizing an expedition to southwest China. This, for EME experiments and amateur satellite communications. The expedition team will use the special technology experiments amateur radio call sign BJ8TA. The group will also be active on the available satellites during the expedition period. The BJ8TA Amateur Radio EME and

Satellites Expedition is supported by the Bureau of Radio Regulation of China and Yunnan Astronomical Observatory of the Chinese Academy of Sciences. (DX News)

**

WORLDBEAT - UK: MORE RADAR AND GPS JAMMING EXERCISES PLANNED

The United Kingdom's Ministry of Defense has informed U-K telecommunications regulator Ofcom that further Global Positioning System jamming exercises will be. The dates announced are May 19th to the 26th starting at 07:00 U-T-C each day.

Also, ground based radar jamming tests will take place in the South West approaches against the remote radar head at Portreath on May 21st and 22nd using F-18 Growler aircraft. There will also be radar jamming against deployed targets in South West Wales thru from May 19th to the 26th.

Communications and airborne radar jamming will take place throughout the same period on the East Coast with aircraft operating within the North Sea Military Danger Areas. The Ministry of Defense adds that safety of life operations will take precedence over these defense test exercise activities at all times.

The purpose of these tests is to likely to determine the vulnerability of U-K defenses to jamming of vital radio based defenses. (Southgate)

**

WORLDBEAT - NEW ZEALAND: HAM RADIO TO CELEBRATE THE 2011 RUGBY WORLD CUP GAMES

The New Zealand Amateur Radio Transmitters or NZART Council has declared the Rugby World Cup to be a Special Event and encourages you to use the ZM prefix. According to the NZART, declaring this a special event it allows New Zealand radio amateurs the use of this special prefix during September and October. A Map of New Zealand has been placed on the NZART website with game locations linked to contact details of local branches, any planned special events, on air events, and local repeater frequencies. NZART Branches are to be encouraged to invite visiting hams to attend meetings and any special events. The New Zealand Amateur Radio Transmitters is that nation's national amateur radio society. (NZART)

**

ON THE AIR: CELEBRATING 100 YEARS OF THE REPUBLIC OF CHINA

On the air, keep an ear open for members of the Republic of China Centenary Foundation who will be activating special event station BV100 during the CQ WW WPX SSB Contest on March 26th and 27th. The operators from Taiwan will then be on the air from Shaio-Liu-Chiu Island until the end of the year as a special event is to celebrate the 100th

anniversary of their homeland. Operations will be on all bands and modes. Complete details along with an operating schedule and information as to how to earn a BV100 award is available at www.bv100.tw/en. QSL's go via BV2KI. (OPDX)

**

ON THE AIR: NEPAL COMING TO EME

The 9N7WL 2 meter EME operation will take place as part of the 9N7AN DXpedition from Nepal's High View Resort which is located about 25 kilometers from the capital city of Kathmandu. This will be the first time that the DXCC entity Nepal and the Maidenhead main locator NL is activated on the 2 meter band via the moon.

E-M-E operation is scheduled to start on March 30th. Moonrise at 9N7WL will be at 3.30 UTC. The most difficult part of the world to reach by E-M-E will be to the southern part of the USA but there is no common moon with the state of Texas until Sunday April 3rd. This expedition is slated to end on April 7th. (K5WL, DL9GFB via MMMonVHF)

**

DX

In DX, ON4AEO will be active from Botswana as A25FC between April 14th and the 18th. Operation will be on 160-10 meters using CW, SSB, RTTY and PSK. QSL via ON4CJK.

LA8HGA will be operational as JW9HGA from the Longyearbyen Amateur Radio Club station located on Spitsbergen Island, Svalbard between May 19th and the 23rd. Activity will be on the HF bands and CW only. QSL is via LA8HGA via the bureau or direct.

VE3ZIK is active portable 9A from Croatia until March 30th. He also plans to be active in the Russian DX Contest, the CQ WPX SSB Contest and mentions that there is a good chance he will be on from Vrana Lake as well. QSL via DK8ZZ, via the bureau, Logbook of the World, eQSL or direct. E-mail Bureau requests for QSLs can go to ve3zik (at) gmail (dot) com

The Hellenic Amateur Radio Association of Australia are organizing a DXpeditiion to Lord Howe Island for July. They will be using the club call sign VK9HR and the organizers are looking for CW operators and experienced SSB and digital modes operators who would be interested in attending this operation. Any interested operators please contact Tommy Horozakis, VK2IR, via e-mail to president (at) haraoa (dot) com.

Lastly, A group of Mexican operators will be on

the air from the Isla de Lobos in Veracruz State

between April 29th and May 1st. They will also

activate the Lobos Island lighthouse on all HF

bands, plus 6 meters and AO 27, AO 51 and SO 50

ham satellites. Modes used will include CW, SSB

and RTTY. QSL via XE1AY.

(Above from various DX news sources)

**

THAT FINAL ITEM: EMCOMM - THE PARADIGM IS

CHANGING

And finally this week, a bit of an editorial comment. While ham radio within Japan is playing a role in post quake and post tsunami recovery efforts, there appears to be little if any international long haul emergency communication on the High Frequency bands. Instead, it seems that ham radio's traditional role in this area has largely been replaced by the popular social networks. Amateur Radio Newsline's Don Wilbanks, AE5DW, takes a look at the way these Twitter and Facebook are changing the paradigm and starting to displace ham radios place in the health and welfare information flow:

--

RESCUE RADIO: THE PARADIGM SHIFTS - NO NEED FOR LONG HAUL H&W TRAFFIC

So what about ham radios traditional role in post disaster relief as a carrier of long distance health and welfare traffic in the wake of the earthquake and tsunami? So far, there has not been very much of that and here is likely the reason why.

While the earthquake did knock out a lot of local telephone service across Japan, unaffected was the island nation's multi-redundant broadband system. Indeed, within minutes of the quake hitting, residents in Japan were texting and tweeting messages to their loved ones as to what had transpired. News services were looking at these tweets on Twitter and using them as a source of information for their initial reports on the disaster. So for those living in or near any of Japan's major population centers like Tokyo, there was little impact on their personal communications with the outside world

Also unaffected was the redundant communications networks used by the worlds various broadcast entities with news bureaus in Tokyo. And when the first wave of the Tsunami came ashore the world watched it happen live from an NHK news helicopter's camera whose signal was microwaved back to Tokyo and then out around the globe.

The rural areas of Japan are a totally different matter. Some towns are still without any form of utilities including water, gas, electrical power, telephone or broadband service. And its likely to be that way for some time. And sadly, there are those coastal towns in Northern Japan that took the full brunt of the tidal waves. Most of these were destroyed with little or nothing left to even say that only recently

they had existed. So, right now, trying to get health and welfare messages into those towns still isolated is a difficult if not impossible task. Messages addressed to residents of those towns wiped away by the tsunami will likely never be delivered.

When one takes a step back and takes a look at the whole picture it's easy to see and to hear why there are so few health and welfare messages being handled on the long haul ham radio bands. In the more populated areas, ham radio was replaced by Twitter and Facebook. In rural Japan there's simply no way to get a message through.

Or to put it another way, as massive and devastating as this earthquake was, its communications needs outside Japan do not fit any of the traditional models that hams world wide are accustomed to dealing with. It also says that as long as a nation's broadband infrastructure is not severely damaged, ham radios role as the long haul carrier of health and welfare traffic is being replace by a smart phone and an account on Facebook or Twitter.

I'm Don Wilbanks, AE5DW.

--

The bottom line appears to be this. As long as a nation's broadband infrastructure and its connections to the outside world are not severely damaged, and its population is communications savvy, the various social networks now provide a far faster way to pass health and welfare messaging than ham radio can ever hope to supply. But in those circumstances where there is no other means of long haul communications, ham radio will always have a significant role to play. (ARNewsline(tm))

yes w8fwg stbed me in the back along with a second stab from Glen Ekdaahl

I was expelled my wife wife resigned

what happened was a minor anoyyance you guys have started something that may destrory or cripple the CCRAA but you have

no I was epelled mfor allowing a fake warning leter to posted to net in point of fact

I think the club was near death when I took over and this will just accelrate the matter esp with the stuff in my inbox

again are you happy now? you have thrown a radio club in two and a weak one at that

my wife is sangery I am releived I no longer have to bust my butt for those dwebs

again congrats OTOH I am failry sure your victory is going to taste like ashed soon enough

but it amusing the role ole woger 2 test has played

but I am not lying I am relived I would have prefered iit happening before I took office

indeed beofre the motion I was asked by some of them to consider running again

I have been experiencing muscle twitching and spasms all over my body for a
few years now. It started in my left eye and then my right. At first, I
would notice it after I sent anonymous email, jammed 20 meters or thought
about Lloyd Davies.

Then it started to do it on a more frequent basis. Then I began noticing
small twitches in my arms, then my back, then in my face. By the end of the
week I felt them going off every few seconds, randomly, from head to toe. I
have gone to Doctor Stagger Lee, had EMG, and they found nothing! They said
my head is empty.

I admit I suffer from anxiety over Lloyd Davies, so I decided to try Zoloft
to see if this would stop the spasms.

So far it hasn't helped. I don't sleep well, and have other mental problems
and ill feelings.

I am wondering if anyone else has had this mania or could give me the name
of someone who can help me. I need help, and I need it now.

Roger Wiseman....Twice Tested!

Too bad that Lloyd didn't recieve any letters from Riley as YOU did.
Show us where Lloyd was forced by the FCC to retest as you were forced to
do.

You screwed up...not Lloyd.
And what is even more humorous?
See your own statement below.

Ken Wesson <kwesson@gmail.com> writes:

15> Newsgroups:
comp.os.os2.advocacy,rec.arts.tv,rec.radio.amateur.policy,rec.music.classical,rec.sport.basketball.college

15> Let me put it this way. If I pulled a random person off the street
and
15> told them that some guy they'd never heard of played Quake, he'd
probably
15> believe me.

Do you believe everything some random person tells you about
some other random person, Wesson? The answer is either yes,
in which case you're quite a gullible person, Wesson, or no,
in which case you've just undermined your own argument.
Either way, you look bad, Wesson.

15> If I told them that he was a notorious usenet kook famous for
15> constantly asking what everything had to do with OS/2 and using
15> particular catch-phrases, they'd be much less likely to believe
me.

Classic erroneous presupposition.

15> If I told them there were *two* kooks with the same exact
15> particular kooky behavior, they'd think *I* was the kook.

But you are a kook, Wesson, based on all the classic
erroneous presuppositions you've made.

15> Noot at all, thoolen.

Who is "thoolen", Wesson? There is nobody in this newsgroup
using that alias.

15> There're a few Wessons out there.

One too many, Wesson.

15> I very much doubt there's more than one
15> tholen that constantly natters on about OS/2.

Classic erroneous presupposition.

15> There's nothing at all erroneous about it -- I really did mean to
send
15> that.

Classic erroneous presupposition.

15> In fact it's rather remarkable that you claim my claim that I
meant
15> to send that is erroneous;

Classic erroneous presupposition.

15> what do you claim as the basis for your claim, telepathy?

What does your question have to do with OS/2, Wesson?

15> Not at alll, thollen.

Who is "thollen", Wesson? There is nobody in this newsgroup
using that alias.

16> Newsgroups:
comp.os.os2.advocacy,rec.arts.tv,rec.radio.amateur.policy,rec.sport.basketball.college

16> So you claim.

How ironic, coming from someone who made the contrary claim,
without offering any proof.

16> Because it's played host to the tholokook for a long time, so I
figured
16> its denizens might be interested to know that he's branching out.

Who is "tholokook", Wesson? There is nobody in this newsgroup
using that alias.

Mark moves stones over...Gav talks to them.

Mark throws them, Gav tries to put them in her "energy" piles.

Dingbats both....bisexuals both....

==> + PUBLIC SERVICE: HAMS HELP WHEN PHONES FAIL AT SOUTHERN CALIFORNIA
HOSPITAL
```

When nurses and other caregivers picked up their phones at Children's Hospital of Orange County in California in the early morning on March 21, there was no dial tone. A power surge caused the central processor in the hospital's phone switch to fail. Following established procedures, the lead operator at the hospital switchboard immediately activated the Hospital Disaster Support Communications System, using an off-switch tie-line to reach April Moell, WA6OPS, head of this ARES&#65533; group that specializes in helping hospitals when their communications fail. Read more here <http://www.arrl.org/news/hams-help-when-phones-fail-at-southern-california-h

ospital>.

==> PUBLIC SERVICE : WESTERN PENNSYLVANIA HAMS RESPOND AS TORNADO SWEEPS THROUGH AREA

At approximately 4:30 on the afternoon of Wednesday, March 23, severe thunderstorms started to roll into Westmoreland County, Pennsylvania, producing golf ball-sized hail and heavy winds. Members of the Westmoreland County Public Service/ARES® group began to meet on the W3CRC repeater in Derry, Pennsylvania, which serves as the main ARES®/SKYWARN repeater in Westmoreland County. Soon after, the National Weather Service issued a tornado warning for the area and the Public Service Net was opened formally at 5 PM. Walter Bashaw, W3ZEH, began taking check-ins and reports of severe weather, relaying them to the NWS in Pittsburgh. Read more here <http://www.arrl.org/news/western-pennsylvania-hams-respond-as-tornado-sweeps-through-area>.

==> + AMATEUR RADIO IN SPACE: TWO ASTRONAUTS GET THEIR HAM TICKET

Even though they aren't scheduled to go to the International Space Station until 2013, two astronauts -- Chris Cassidy and Luca Parmitano -- are now licensed amateurs. Cassidy, who received the call sign KF5KDR, is scheduled to head to the ISS in March 2013 as part of Expedition 35. Parmitano -- an Italian from the European Space Agency -- is KF5KDP; he goes to the ISS three months later in May, as part of Expedition 36.

"Our aim is to have at least one crew member licensed and trained in on-air protocol, who is somewhat excited about ham radio and the Amateur Radio on the International Space Station program, per expedition," explained ARRL ARISS Program Manager Rosalie White, K1STO. NASA ISS Ham Radio Project Engineer Kenneth Ransom, N5VHO, told the ARRL that both Cassidy and Parmitano are "excited and interested in the educational aspects of Amateur Radio on board the ISS." Read more here <http://www.arrl.org/news/two-astronauts-get-their-ham-ticket>.

==> + NCVEC DELETES QUESTION FROM AMATEUR EXTRA QUESTION POOL

Due to the FCC revising the rules concerning Spread Spectrum, the Question Pool Committee of the National Council of Volunteer Examiner Coordinator (NCVEC) has decided to delete a question from the Amateur Extra class question pool. According to QPC Chairman Rol Anders, K3RA, as of April 29 when the new Spread Spectrum rule change goes into effect, the answer to question E1F13 in the Amateur Extra class question pool will no longer be correct . Read more here <http://www.arrl.org/news/ncvec-deletes-question-from-amateur-extra-question-pool>.

==> + ARRL NEBRASKA SECTION INTRODUCES "ELMER SQUAD"

The Nebraska Elmer Squad made its first official appearance earlier this month at the ARRL Nebraska State Convention in Lincoln. Darwin

Piatt, W9HZC, and Darrel Swenson, K0AWB, were on hand to answer questions about the Squad's mission and plans. According to ARRL Nebraska Section Manager Art Zygielbaum, K0AIZ, the Squad is gathering a list of volunteer Elmers throughout the state who are willing to assist not only new Amateur Radio operators, but current operators who need some technical assistance.

"Mentoring of new or prospective hams will be an ongoing part of the mission," Zygielbaum told the ARRL. "The intent is to have Elmers participate in their local area radio clubs and give presentations on various subjects relating to Amateur Radio." Nearly a dozen hams signed up at the State Convention to be a part of the Elmer Squad.

Piatt and Swenson said that they believe that people should remember that Amateur Radio is a hobby -- and it should be fun. Both men are QRP operators and builders; part of their enjoyment comes from passing on the fun of building to others.

The Elmer Squad will be traveling around Nebraska this summer and fall, giving presentations and signing up more Elmers. In addition, Piatt and Swenson are working on a Nebraska Elmer Squad website. Zygielbaum said that this will provide a central contact point to match Elmers with those who would like assistance. Once the site is up and running, the URL will be posted on the ARRL Nebraska Section website <http://www.arrl.org/Groups/view/nebraska>.

"Our motto is 'Hey, this is a hobby -- it is supposed to be fun!'" Zygielbaum explained. "We're looking for good people to help us keep it that way."

==> + NEW MARS ROVER TO FEATURE MORSE CODE

As the Jet Propulsion Laboratory (JPL <http://marsprogram.jpl.nasa.gov/msl/>) builds the next Mars rover -- this one is named Curiosity -- to deploy to the red planet in the fall of 2011, they're having a little fun with it. Back in 2007 when the Curiosity team was putting together the rover, its wheel cleats had a raised pattern with the letters "JPL," leaving a little stamp of the rover's birthplace everywhere it rolled. "At the time, I asked whether the real rover would have those wheels, and they said, no, they weren't going to get to advertise JPL with each turn of each of the rover's six wheels; the real rover would have some other pattern," said Emily Lakdawalla of The Planetary Society <http://www.planetary.org/> in her blog <http://www.planetary.org/blog/article/00002967/>. Lakdawalla is the organization's Science and Technology Coordinator.

Lakdawalla said that there is nothing special about the shapes of the markers in Opportunity's wheels; they are just square holes through the wheels through which the wheels were bolted to the lander during cruise and landing." Opportunity is the name of the rover that went to Mars back in 2003. "But Curiosity didn't need holes in its wheels for attaching to any lander -- there isn't one. So the engineers got to

make the markers in any shape they wanted to."

But in March 2011, she saw a video <http://www.youtube.com/watch?v=G019Jci0abs> of the rover as it is today: "I had to chuckle at those 'visual odometry markers' [on its tires]. Before I explain why, I'll point out that they really are useful things to have in rover wheels. The repeating pattern of the 'visual odometry markers'...makes it fairly easy for both the rover and human operators to determine visually how far the rover has roved using rear-view imagery."

So what pattern did JPL choose to put on Curiosity's wheels? One that Lakdawalla called "very amusing. The holes are in a pattern of short squares and longer rectangles -- almost like dots and dashes. Morse code." And what does it spell out in Morse code? JPL.

According to JPL, Curiosity is about the size of a small SUV -- 10 feet long (not including the arm), 9 feet wide and 7 feet tall -- or about the height of a basketball player -- and weighs 2000 pounds. It features a geology lab, rocker-bogie suspension, a rock-vaporizing laser and lots of cameras. Curiosity will search areas of Mars for past or present conditions favorable for life and for conditions capable of preserving a record of life. It is set to launch between November 25-December 18, 2011 from Cape Canaveral, Florida and will arrive on Mars between August 6-20, 2012. The prime mission will last one Mars year, or about 23 Earth months

==> ON THE AIR : NIST TO CONDUCT TIME AND FREQUENCY USER SURVEY

The National Institute of Standards and Technology's (NIST) Time and Frequency Division is conducting a survey to learn more about its users, seeking to determine how the agency can make its services more useful in the future. NIST services include WWV, WWVH and WWVB, which provide reference time and frequency signals via radio. The NIST also provides the Internet Time Service -- which provides accurate time synchronization to computer systems -- and several other services to offer accurate time information via telephone or web pages. Radio amateurs are encouraged to complete the survey. Read more here <http://www.arrl.org/news/nist-to-conduct-time-and-frequency-user-survey>.

==> SOLAR UPDATE

Tad "The Sun is shining, it's a lovely day <http://www.youtube.com/watch?v=z36r2fmutXQ>" Cook, K7RA, reports: The activity we could see recently on our Sun's far side -- thanks to the STEREO mission <http://stereo.gsfc.nasa.gov/> -- has been rotating into view, producing some nice sunspot activity, resulting in improved upper-HF propagation. Compared to the previous week (March 17-23), the past week (March 24-30) showed average daily sunspot numbers up more than 61 points to 102.1, while the average daily solar flux was up nearly 20 points to 114.7. Geomagnetic conditions were quieter as well, and reports from readers show greatly improved propagation on 20, 15

and 10 meters. This table <http://www.swpc.noaa.gov/ftpdir/indices/DSD.txt> shows a new sunspot group on March 23, two more groups appeared March 24, two more on March 25 and another two more on March 27. The latest prediction from USAF/NOAA sees improving conditions, with the projected solar flux for March 31-April 1 at 125 and 130, then 135 on April 2-7. The predicted planetary A index is 10 and 8 on March 31 and April 1, followed by 5 on April 2-7 and 8 on April 8. Conditions should be very good for the next week, especially when compared to this time last year. Look for more information on the ARRL website -- including an updated forecast and reports from readers, as well as the latest 3-month moving average of sunspot numbers -- on Friday, April 1. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by the song Avenue Q Theme <http://www.youtube.com/watch?v=z36r2fmutXQ> from the musical Avenue Q <http://en.wikipedia.org/wiki/Avenue_Q>.

==> + SILENT KEY: INTERNET PIONEER PAUL BARAN, W3KAS (SK)

Paul Baran, W3KAS -- an engineer who helped create the technical underpinnings for the ARPANET, the government-sponsored precursor to today's Internet -- died March 27 at his home in Palo Alto, California. He was 84. According to his son David, the cause of death was related to complications from lung cancer. Baran was one of the three inventors of packet-switched networks.

In the early 1960s, Baran was working on a "survivable" communications system when he thought up one of its core concepts: Breaking up a single message into smaller pieces, having them travel different, unpredictable paths to their destination and only then putting them back together. It's called packet switching and it's how everything still gets to your e-mail inbox. Read more here <http://www.arrl.org/news/internet-pioneer-paul-baran-w3kas-sk>.

==> + SILENT KEY: OWNER OF INDUSTRIAL COMMUNICATION ENGINEERS MIKE KOSS, W9SU (SK)

Mike Koss, W9SU, of Indianapolis, Indiana, passed away Monday, March 28. He was 57. According to his friend Brian Smith, W9IND, Koss was found on his workshop floor and paramedics were unable to revive him. Industrial Communications Engineers (ICE) is well known in the amateur community for surge protectors, line filters, RF switches and more.

On March 31, ICE released the following statement concerning the company: "Industrial Communication Engineers (ICE), Ltd, its employees and the Indianapolis Amateur Radio community mourn the passing of company founder Mike Koss, W9SU, on March 28, 2011. Due to Mike's sudden and unexpected death, ICE has temporarily suspended accepting new orders. We are in the process of reorganizing the company, as well as identifying and fulfilling current open orders and products returned for repair. Read more here

<http://www.arrl.org/news/owner-of-industrial-communication-engineers-mike-koss-w9su-sk>.

==> THIS WEEK ON THE RADIO

This week:

- April 2-3 -- Missouri QSO Party; QCWA Spring QSO Party; ARCI Spring QSO Party; SP DX Contest; EA RTTY Contest
- April 5 -- ARS Spartan Sprint

Next week:

- April 9 -- PODXS 070 Club PSK 31 Flavors Contest (local time); EU Spring Sprint (CW)
- April 9-10 -- Montana QSO Party; New Mexico QSO Party; Georgia QSO Party; JIDX CW Contest
- April 10 -- SKCC Weekend Sprint; UBA Spring Contest (SSB)
- April 11 -- 144 MHz Spring Sprint (local time)
- April 13 -- NAQCC Straight Key/Bug Sprint
- April 13-14 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- April 2-3 -- ARRL New Jersey State Convention <http://www.arrl.org/hamfests/new-jersey-state-convention-1>, Ewing, New Jersey
- April 22-24 -- ARRL Idaho State Convention <http://www.arrl.org/hamfests/idaho-state-convention-1>, Boise, Idaho
- April 23 -- ARRL Louisiana State Convention <http://www.arrl.org/hamfests/louisiana-state-convention-twin-city-ham-radio-fest>, Monroe, Louisiana; ARRL North Carolina State Convention <http://www.arrl.org/hamfests/north-carolina-state-convention-raleigh-hamfest>, Raleigh, North Carolina
- May 7 -- ARRL South Carolina State Convention <http://www.arrl.org/hamfests/south-carolina-state-convention-upstate-hamfest>, Spartanburg, South Carolina
- June 3-5 -- ARRL Northwestern Division Convention (SeaPac) <http://www.arrl.org/hamfests/northwestern-division-convention-seapac-1>, Seaside, Oregon; ARRL Wyoming State Convention <http://www.arrl.org/hamfests/northwestern-division-convention-seapac-1>, Cheyenne, Wyoming

- June 4 -- ARRL Atlantic Division Convention
<http://www.arrl.org/hamfests/atlantic-division-convention-rochester-hamfest-
1>,
Rochester, New York; ARRL East Bay Section Convention
<http://www.arrl.org/hamfests/east-bay-section-convention>, Berkeley,
California; ARRL Georgia State Convention
<http://www.arrl.org/hamfests/georgia-state-convention-atlanta-hamfest>,
Marietta, Georgia
- June 10-11 -- ARRL National Convention
<http://www.arrl.org/hamfests/arrl-national-convention-ham-com-2011>,
Plano, Texas
- June 11 -- ARRL Tennessee State Convention
<http://www.arrl.org/hamfests/tennessee-state-convention-1>, Knoxville,
Tennessee

> ==> + PUBLIC SERVICE: HAMS HELP WHEN PHONES FAIL AT SOUTHERN CALIFORNIA
> HOSPITAL
>
> When nurses and other caregivers picked up their phones at
> Children's Hospital of Orange County in California in the early morning
> on March 21, there was no dial tone. A power surge caused the central
> processor in the hospital's phone switch to fail. Following established
> procedures, the lead operator at the hospital switchboard immediately
> activated the Hospital Disaster Support Communications System, using an

> off-switch tie-line to reach April Moell, WA6OPS, head of this ARES®
> group that specializes in helping hospitals when their communications
> fail. Read more here
> <http://www.arrl.org/news/hams-help-when-phones-fail-at-southern-calif...
> ospital>.
>
> ==> PUBLIC SERVICE : WESTERN PENNSYLVANIA HAMS RESPOND AS TORNADO
> SWEEPS THROUGH AREA
>
> At approximately 4:30 on the afternoon of Wednesday, March 23,
> severe thunderstorms started to roll into Westmoreland County,
> Pennsylvania, producing golf ball-sized hail and heavy winds. Members
> of the Westmoreland County Public Service/ARES® group began to meet on
> the W3CRC repeater in Derry, Pennsylvania, which serves as the main
> ARES®/SKYWARN repeater in Westmoreland County. Soon after, the National
> Weather Service issued a tornado warning for the area and the Public
> Service Net was opened formally at 5 PM. Walter Bashaw, W3ZEH, began
> taking check-ins and reports of severe weather, relaying them to the
> NWS in Pittsburgh. Read more here
> <http://www.arrl.org/news/western-pennsylvania-hams-respond-as-tornado...
> -through-area>.

> ==> + AMATEUR RADIO IN SPACE: TWO ASTRONAUTS GET THEIR HAM TICKET
>
> Even though they aren't scheduled to go to the International Space
> Station until 2013, two astronauts -- Chris Cassidy and Luca Parmitano
> -- are now licensed amateurs. Cassidy, who received the call sign
> KF5KDR, is scheduled to head to the ISS in March 2013 as part of
> Expedition 35. Parmitano -- an Italian from the European Space Agency
> -- is KF5KDP; he goes to the ISS three months later in May, as part of
> Expedition 36.
>
> "Our aim is to have at least one crew member licensed and trained in
> on-air protocol, who is somewhat excited about ham radio and the
> Amateur Radio on the International Space Station program, per
> expedition," explained ARRL ARISS Program Manager Rosalie White, K1STO.
> NASA ISS Ham Radio Project Engineer Kenneth Ransom, N5VHO, told the
> ARRL that both Cassidy and Parmitano are "excited and interested in the
> educational aspects of Amateur Radio on board the ISS." Read more here
> <http://www.arrl.org/news/two-astronauts-get-their-ham-ticket>.
>
> ==> + NCVEC DELETES QUESTION FROM AMATEUR EXTRA QUESTION POOL
>
> Due to the FCC revising the rules concerning Spread Spectrum, the
> Question Pool Committee of the National Council of Volunteer Examiner
> Coordinator (NCVEC) has decided to delete a question from the Amateur
> Extra class question pool. According to QPC Chairman Rol Anders, K3RA,
> as of April 29 when the new Spread Spectrum rule change goes into
> effect, the answer to question E1F13 in the Amateur Extra class

> question pool will no longer be correct . Read more here
> <http://www.arrl.org/news/ncvec-deletes-question-from-amateur-extra-qu...

> ==> + ARRL NEBRASKA SECTION INTRODUCES "ELMER SQUAD"
>
> The Nebraska Elmer Squad made its first official appearance earlier
> this month at the ARRL Nebraska State Convention in Lincoln. Darwin
> Piatt, W9HZC, and Darrel Swenson, K0AWB, were on hand to answer
> questions about the Squad's mission and plans. According to ARRL
> Nebraska Section Manager Art Zygielbaum, K0AIZ, the Squad is gathering
> a list of volunteer Elmers throughout the state who are willing to
> assist not only new Amateur Radio operators, but current operators who
> need some technical assistance.
>
> ? ?"Mentoring of new or prospective hams will be an ongoing part of the
> mission," Zygielbaum told the ARRL. "The intent is to have Elmers
> participate in their local area radio clubs and give presentations on
> various subjects relating to Amateur Radio." Nearly a dozen hams signed
> up at the State Convention to be a part of the Elmer Squad.
>
> Piatt and Swenson said that they believe that people should remember
> that Amateur Radio is a hobby -- and it should be fun. Both men are QRP
> operators and builders; part of their enjoyment comes from passing on
> the fun of building to others.
>
> The Elmer Squad will be traveling around Nebraska this summer and fall,
> giving presentations and signing up more Elmers. In addition, Piatt and
> Swenson are working on a Nebraska Elmer Squad website. Zygielbaum said
> that this will provide a central contact point to match Elmers with
> those who would like assistance. Once the site is up and running, the
> URL will be posted on the ARRL Nebraska Section website
> <http://www.arrl.org/Groups/view/nebraska>.
>
> "Our motto is 'Hey, this is a hobby -- it is supposed to be fun!'"
> Zygielbaum explained. "We're looking for good people to help us keep it
> that way."
>
> ==> + NEW MARS ROVER TO FEATURE MORSE CODE
>
> As the Jet Propulsion Laboratory (JPL
> <http://marsprogram.jpl.nasa.gov/msl/>) builds the next Mars rover --
> this one is named Curiosity -- to deploy to the red planet in the fall
> of 2011, they're having a little fun with it. Back in 2007 when the
> Curiosity team was putting together the rover, its wheel cleats had a
> raised pattern with the letters "JPL," leaving a little stamp of the
> rover's birthplace everywhere it rolled. "At the time, I asked whether
> the real rover would have those wheels, and they said, no, they weren't
> going to get to advertise JPL with each turn of each of the rover's six

> wheels; the real rover would have some other pattern," said Emily
> Lakdawalla of The Planetary Society <http://www.planetary.org/> in her
> blog <http://www.planetary.org/blog/article/00002967/>. Lakdawalla is
> the organization's Science and Technology Coordinator.
>
> ? ?Lakdawalla said that there is nothing special about the shapes of
> the markers in Opportunity's wheels; they are just square holes through
> the wheels through which the wheels were bolted to the lander during
> cruise and landing." Opportunity is the name of the rover that went to
> Mars back in 2003. "But Curiosity didn't need holes in its wheels for
> attaching to any lander -- there isn't one. So the engineers got to
> make the markers in any shape they wanted to."
>
> But in March 2011, she saw a video
> <http://www.youtube.com/watch?v=G019Jci0abs> of the rover as it is
> today: "I had to chuckle at those 'visual odometry markers' [on its
> tires]. Before I explain why, I'll point out that they really are
> useful things to have in rover wheels. The repeating pattern of the
> 'visual odometry markers'...makes it fairly easy for both the rover and
> human operators to determine visually how far the rover has roved using
> rear-view imagery."
>
> ? ?So what pattern did JPL choose to put on Curiosity's wheels? One
> that Lakdawalla called "very amusing. The holes are in a pattern of
> short squares and longer rectangles -- almost like dots and dashes.
> Morse code." And what does it spell out in Morse code? JPL.
>
> According to JPL, Curiosity is about the size of a small SUV -- 10 feet
> long (not including the arm), 9 feet wide and 7 feet tall -- or about
> the height of a basketball player -- and weighs 2000 pounds. It
> features a geology lab, rocker-bogie suspension, a rock-vaporizing
> laser and lots of cameras. Curiosity will search areas of Mars for past
> or present conditions favorable for life and for conditions capable of
> preserving a record of life. It is set to launch between November
> 25-December 18, 2011 from Cape Canaveral, Florida and will arrive on
> Mars between August 6-20, 2012. The prime mission will last one Mars
> year, or about 23 Earth months
>
> ==> ?ON THE AIR : NIST TO CONDUCT TIME AND FREQUENCY USER SURVEY
>
> ? ?The National Institute of Standards and Technology's (NIST) Time and
> Frequency Division is conducting a survey to learn more about its
> users, seeking to determine how the agency can make its services more
> useful in the future. NIST services include WWV, WWVH and WWVB, which
> provide reference time and frequency signals via radio. The NIST also
> provides the Internet Time Service -- which provides accurate time
> synchronization to computer systems -- and several other services to
> offer accurate time information via telephone or web pages. Radio
> amateurs are encouraged to complete the survey. Read more here

> <http://www.arrl.org/news/nist-to-conduct-time-and-frequency-user-survey>.
>
> ==> SOLAR UPDATE
>
> ? ?Tad "The Sun is shining, it's a lovely day
> <http://www.youtube.com/watch?v=z36r2fmutXQ>" Cook, K7RA, reports: The
> activity we could see recently on our Sun's far side -- thanks to the
> STEREO mission <http://stereo.gsfc.nasa.gov/> -- has been rotating into
> view, producing some nice sunspot activity, resulting in improved
> upper-HF propagation. Compared to the previous week (March 17-23), the
> past week (March 24-30) showed average daily sunspot numbers up more
> than 61 points to 102.1, while the average daily solar flux was up
> nearly 20 points to 114.7. Geomagnetic conditions were quieter as well,
> and reports from readers show greatly improved propagation on 20, 15
> and 10 meters. This table
> <http://www.swpc.noaa.gov/ftpdir/indices/DSD.txt> shows a new sunspot
> group on March 23, two more groups appeared March 24, two more on March
> 25 and another two more on March 27. The latest prediction from
> USAF/NOAA sees improving conditions, with the projected solar flux for
> March 31-April 1 at 125 and 130, then 135 on April 2-7. The predicted
> planetary A index is 10 and 8 on March 31 and April 1, followed by 5 on
> April 2-7 and 8 on April 8. Conditions should be very good for the next
> week, especially when compared to this time last year. Look for more
> information on the ARRL website -- including an updated forecast and
> reports from readers, as well as the latest 3-month moving average of
> sunspot numbers -- on Friday, April 1. For more information concerning
> radio propagation, visit the ARRL Technical Information Service
> Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This
> week's "Tad Cookism" is brought to you by the song Avenue Q Theme
> <http://www.youtube.com/watch?v=z36r2fmutXQ> from the musical Avenue Q
> <http://en.wikipedia.org/wiki/Avenue_Q>.

Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

Amateur Radio Newsline(tm) Report 1755 - April 1, 2011

Amateur Radio Newsline report number 1755 with a release date of
Friday, April 1st, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. Opposition grows to the proposed sell-off of
440 to 450 MHz, ham radio continues its role in Japan following the
March 11th earthquake and tsunami, a major solar storm could bring more
DX and lots of strange ham radio stories for April 1st. Hear it all on
Amateur Radio Newsline(tm) report number 1755 coming your way right
now.

(Billboard Cart Here)

**

RESCUE RADIO: OPPOSITION GROWS TO SELLOFF OF 420 TO 440 MHZ

An article in USA Today about the concern by radio amateurs and others
involved in rescue radio over aspects of House of Representatives
measure H R 607 is sweeping the nation and its emergency preparedness
community. And it turns out that there is growing opposition to a part
of the bill that affects the 420 to 440 MHz band. Michael Grebert,
KJ4ZZV, is here with the latest:

--

According to the U-S-A Today article, those lining up in opposition to
a provision in H-R 607 that would sell off 420 to 440 MHz as a way off
offsetting part of the cost of establishing a new nationwide
interoperable emergency system is growing. In fact, its starting to
read like a whose who in emergency communications. This includes such
notables as the National Weather Service, the International Association
of Chiefs of Police and a the National Public Safety Telecommunications
Council to name only a few.

As most of you are aware, Representative Peter King, of New York who is
the chairman of the Homeland Security Committee, introduced legislation
last month. Its purpose is to enhance emergency communications for
first responders by providing them with exclusive bansdspace for public
safety use.

Nobody opposes that idea. What is controversial is a provision of the
measure that would allow the auctioning off of 420 to 440 MHz. Those
who oppose that provision say that the spectrum in question is not just
for radio hobbyists. Rather, it is also used by hundreds of thousands

of Amateur Radio Emergency Service volunteers and severe-weather spotters working with National Weather Service and other agencies.

And among those speaking out is Harlin McEwen. McEwen s the chairman of a technology committee for the International Association of Chiefs of Police and a spokesman for the National Public Safety Telecommunications Council. Hes on record as saying that the reallocation of 420 to 440 MHz is a bad idea and one that's not good for public safety.

But the U-S-A Today article is not the only one noting that emergency responders are taking issue with Representative King's band sell-off approach. Another in-depth piece the Great Falls Montana Tribune goes into even greater detail than U-S-A Today. Among other things, the Tribune article states that there are nearly 5,000 amateur radio volunteers in Montana, and many of them provide a backup communication system that emergency responders state wide and across the country depend on. This, when cellular telephones, satellite phones or other radio systems don't work.

Ryan Nicholls, the Director of the Office of Emergency Management in Springfield, Missouri takes it even a bit further. He notes that use of ham radio volunteers is the way in which that state plans to communicate between hospitals and the Red Cross in the event of an emergency. Nicholls notes that this is even written into that city's emergency operations plan.

Both articles do a good job of pointing out the false economy of selling off the 420 to 440 MHz band.

For the Amateur Radio Newsline, I'm Michael Grebert, KJ4ZZV, in Nashville for the Amateur Radio Newsline.

--

And all this negative publicity may be taking its toll on at least one of those backing H R 607. Representative Billy Long of Missouri who is a co-sponsor of the bill is quoted in USA Today as saying that he will work to ensure that we are not cutting any vital emergency services and not adversely affecting ham radio operations.

You can read the entire USA Today article at tinyurl.com/4tvz4br. The Great Falls Tribune piece is at tinyurl.com/4typ6bg. (USA Today, Great Falls Tribune, N6ZXJ, W6RH, others)

RESCUE RADIO: HAM RADIO SUPPORT CONTINUES FOLLOWING MARCH 11TH QUAKE

Ham radio remains an important part of recovery and relief efforts in Japan. This following the earthquake and tsunami that hit on March 11th that was followed by the still ongoing problems at the Fukushima nuclear electric generating plant. Amateur Radio Newsline's Norm Seeley, KI7UP reports:

--

According to Steve Herman, W7VOA, the Japan Amateur Radio League or JARL has been involved in emergency communications support from the beginning of the triple pronged tragedy. Steve, who spent a week in Japan reporting for the Voice of America says that the initial traffic involved finding routes for those first and second responders trying reach the disaster areas. That was mainly done by JA3RL as control station. JA1RL took its place in the later stage in forming the network for communications to and between disaster scenes.

Since then, volunteer medical staff who are hams have been to disaster areas. They have been supported by both the JARL and the Japanese Self Defense Forces. Additionally, hand-held transceivers have now been supplied to evacuation centers. Japan's Ministry of Internal Affairs and Communications has provided special call signs for each H-T so that unlicensed people can use them.

As to use of the Internet by hams, Steve tells Newsline that there has been some traffic passed between Japan and Europe through WIRES chat room 0522. WIRES is Yaesu based radio to Internet connection system similar to Echolink. Details of the traffic is viewable in the Japanese language at twitter.com/#!/JARL_ARESC

And this late word from Jim Linton, VK3PC. He reports that a small amount of internal High Frequency communications for disaster relief is still being operated occasionally by some volunteer radio amateurs. But says Linton, the Japan Amateur Radio League Headquarters stations were off the air by Friday, March 25th, their local time. VHF and UHF operations are likely ongoing.

Obviously, this is an ongoing story and we will have more with it in the weeks ahead.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

In his note to us, W7VOA did include a ray of hope for some. He says that he spotted a number of High Frequency yagi antennas in Sendai at some houses close to where the tsunami struck. The good news is that those were intact. (W7VOA, VK3PC, JARL, others)

**

RESCUE RADIO: CHRISTCHURCH NZ QUAKE FOLLOW-UP

A follow-up to the work by hams in New Zealand following the earthquake that hit the city of Christchurch last month. Amateur Radio Newsline's Jim Meachen, ZL2BHF, brings us up to date:

--

Audio report only. Hear it by downloading the mp3 file of this weeks newscasat at www.arnewsline.org

--

Another example of ham radio emergency communications not only in first response but also has an ongoing search and rescue tool that helps to save lives. (ZL2BHF)

RESCUE RADIO: NEW JERSEY AMATEUR RADIO CLUB PROVIDES RED CROSS COMMMS DURING RECENT FLOODING

The rains came to New Jersey and ham radio was ready. Bill Pasternak, WA6ITF, is in the newsroom with more:

--

Ham radio was an essential communications tool during the recent heavy flooding in Northern New Jersey. That's where the New Providence Amateur Radio Club in the Watchung Hills area was asked to set up amateur radio stations in Red Cross vehicles which were operating in four counties heavily affected by the deluge.

The club members were tasked with supplying communications for Red Cross cars and vans which were performing damage assessment in the affected areas. Communications between these vehicles and a central Command Post at the Chapter House in Ridgewood, kept track of the progress of the appraisal process.

Three members of the NPARC Emergency Team responded on Monday March 14, and two members were present during the rest of the week. These included David Berkley, K2MUN, of Westfield, Vince Lobosco, KC2IZK, of Fanwood, Barry Cohen, K2JV of Berkeley Heights, Barb Flynn, KC2YJB of Summit, Tony Izzo, K2AMI of River Edge and Hillary Zaenchik, KC2HLA, of Basking Ridge.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

While some operators spent their time in the field with Red Cross personnel, others were stationed in the control center with two of the relief agency's officials. (eHam, others)

LICENSING: NCVEC QPC DELETES EXTRA CLASS SPREAD SPECTRUM QUESTION

The Question Pool Committee of the National Council of Volunteer Examiner Coordinator has decided to delete a question from the Amateur Extra class question pool. One dealing with Spread Spectrum technology.

In March, the FCC eliminated the requirement that amateur stations transmitting Spread Spectrum use Automatic Power Control to reduce transmitter power. At the same time, the Commission reduced the maximum power of a Spread Spectrum emission from 100 to 10 watts PEP.

According to the Question Pool Committee, when the Spread Spectrum rule change goes into effect, the answer to question E1F13 in the Amateur Extra class question pool will no longer be correct. It must be deleted by the time the new rule on Spread Spectrum goes into effect 30 days after publication in the Federal Register. (NCVEC)

**

ENFORCEMENT: FCC AFFIRMS $20,000 FINE FOR UNLICENSED OPERATION ON 156.8 MHZ

The FCC has affirmed a $20,000 monetary forfeiture issued to Vincent E. Aversa, Jr. of Indialantic, Florida. This, for his alleged willful and repeated violations of section 301 of the Communications Act of 1934 and section 80.13 of the Commission's rules.

The violations involve what the FCC claims is Aversa's purported operation of radio transmission equipment without a license on 156.80 MHz. This is the International Distress, Safety, and Calling Channel in the Marine Radio Service. It's also known as Channel 16.

On February 8, 2011, the Enforcement Bureau's Tampa, Florida Office issued a Notice of Apparent Liability for Forfeiture in the amount of $20,000 to Aversa. Since that time Aversa has not filed a response to the NAL.

Based on the information before it, the FCC has now affirmed forfeiture and has given Avisa the customary 30 days to pay the amount in full or to file an appeal. (FCC)

**

COMMUNICATION: 51% OF ALL AMERICANS ON FACEBOOK

More than half of Americans age 12 and up are communicating on Facebook. This according to Arbitron and Edison Research in their upcoming 2011 Infinite Dial Report.

Edison Research spokesman Tom Webster said they have been tracking the growth of Facebook since 2008. In that time they have watched the social network grow from 8% penetration just three years ago to 51% today. This, says Webster makes it the dominant player in social

networking, with more users than MySpace, LinkedIn and even Twitter.

The study, conducted in January, indicates that 51% of all teens, men and women have a profile on the Facebook. In another area, the research company says that back in 2001, that some 98% of those surveyed used television and 96% used radio. By comparison, in 2011, while television use remained the same, local AM/FM radio use had dropped. (Edison OnLine Reasearch)

NAMES IN THE NEWS: K0NEB PRESENTS HAMVENTION - THE EARLY YEARS ON YOU TUBE

A new slide show that depicts the early years of the Dayton Hamvention is now available for public viewing. The presentation titled "The Early Years" was produced by Kit Building expert Joe Eisenberg, K0NEB, of Lincoln, Nebraska for presentation at a recent meeting of the Dayton Amateur Radio Association. Set to the music of Mason Williams and Mannheim Steamroller the show contains photos from Joe's collection dating from about 1984 to 2001. This and all of Joe's slide shows are available on-line at www.youtube.com/joehusker. (K0NEB)

**

HAMVENTION NEWS: ON LINE RESERVATION SYSTEM NOW OPERATING PROPERLY

Bill Curtice, WA8APB, says that the Hamvention's on-line reservation system at www.hamvention.org is functioning properly. In a posting to thr on-line Hamvention List that he moderates, Curtice says that those in charge are aware that a month or more ago there had been a problem with Flea Market spaces that was isolated to pricing of end-cap spaces that could have caused an issue with credit card statements. This was a database error that they believed was corrected.

Curtice says that the fix required hand editing, which took time and notes that it is entirely possible that some requests were missed. If you are one of those, Curtice asks that you contact them directly and that they will be happy to remedy the situation for you.

WA8APB also notes there is some confusion about General Admission Tickets vs. Vendor Admission Tickets. Flea Market Vendors should always choose Vendor Admission, not General Admission, unless directed otherwise by the Hamvention. Curtice says that this has caused some problems as well. (WA8APB via Hamventionr List)

**

HAM HAPPENINGS: THE NORTH CORK RALLY AND ELECTRONICS FAIR IN IRELAND IN SEPTEMBER

If you are planning a trip this fall to Erin's Isle, then you might want to include stopping by Irelands North Cork Radio Group second annual rally and electronics fair on Sunday September the 11th. The

venue is the Blarney Golf Resort in Tower County Cork. The doors open to the public at 11.30 a.m. local time and the hamfest will run throughout the afternoon. Dealers on hand as of this writing include South East Communications, Long Communications and JBT Trading. Further details can be found via the group's website, www.ei1nc.com.com. (IRTS)

**

HAM HAPPENINGS: INTERNATIONAL MARCONI DAY - APRIL 30TH

And a reminder that International Marconi Day takes place this year on Saturday the 30th of April. This is not a contest but there are several nice awards available for working the officially listed stations, each of which has an historic connection with Marconi. The event is organized by the Cornish Amateur Radio Club. For more information please visit the club's website at crac.g4usb.net/cracblog. (RSGB)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

WEIRD SCIENCE: MAN BECOMES DENTAL TRANSMITTER

>From the "stranger than strange file" comes this story about some odd radio transmissions. You are not going to believe where they came from. Bruce Tennant, K6PZW, tries to put the pieces together.

--

We have all heard stories about people who had dental work and then started hearing radio signals due to the amalgam in their teeth. Well, this one goes a bit further. It seems a man, who has asked us to keep his identify private, had major reconstructive jaw surgery in the medical center of the University of Southern North Dakota. This involved some dental wiring and internal jaw bracing. Somehow, some way, the new metal work came into contact with previously existing silver fillings - that combination created some sort of transmitter.

The condition was first noticed when the patient coughed. His loud coughing started reverberating through the medical center's public address system causing everyone to wonder what was going on. Then a conversation he had with his wife came through some car radios in the

hospital parking lot, specifically at the lower end of the FM broadcast band. Finally, physicians relaxing in the doctor's lounge heard loud scratching noises through a desktop FM radio - this turned out to be the patient brushing his teeth. The man himself found out what was going when his sneezing fit was heard over an MP3 player being used by a patient two floors up, who came down to see what the racket was.

Due to confidentiality riles, no one would talk to us on the record about this case. But the man in question, know known by local amateur radio clubs as the first "human repeater," has had the necessary wire adjustments for this strange phenomenon to go away. He was said to be much relieved that he can now clear his throat and not worry about blowing away someone's hearing aid.

For the Amateur Radio Newsline, I'm Bruce Tennant in Los Angeles on this first day of April.

--

A spokesman for the Federal Medical Radio Commission which investigates these weird April 1st phenomena says that this is one of those odd instances where the forces of nature and advances in technology combine to wreak havoc on the radio spectrum. None the less it is considering issuing the unlucky patient a Notice of Violation for operating as a radio transmitter without a license. (K6PZW)

**

HAM RADIO IN SPACE: SA AMSAT POSTPONES SPACE SYMPOSIUM

South Africa AMSAT has postponed its Space Symposium originally planned for April 2nd to a later date. School holidays in the city of Gauteng and too many other amateur radio related activities around the same time seem to be one of the reasons for the low registration rate. A new date will be announced in the near future. (SA AMSAT)

**

RADIO IN SPACE: NASA TO MAKE FINAL EFFORT TO CONTACT STUCK MARS ROVER

NASA will make a last-ditch effort to communicate with the stuck Mars rover Spirit, which fell silent a little over a year ago. The solar-powered rover became stuck in what's believed to be loose sand in April 2009. Despite efforts to maneuver it free, Spirit remained stuck and could not tilt itself toward the sun as the Martian winter approached.

Without an adequate amount of energy reaching its solar panels, it went into hibernation last March. Engineers had expected Spirit to wake up once there was maximum sunlight where it's trapped. But the South Mars summer solstice came and went earlier with no response.

Ground controllers are attempting to contact the Spirit over a wide range of frequencies and at various times during the day. This, in case the rover's internal clock stopped working and it lost track of its Earth time schedule. They also are commanding the Spirit to turn on its backup radio transmitter in case the main one failed.

If there's still no contact with Spirit within the next month, NASA says that it will scale back its listening operation for the out of service rover and then focus on collecting Mars data using Spirit's still operational twin named Opportunity. (Science OnLine)

**

DX

In DX, EI9FBB, will be operating portable 3A from Monaco from April 20th to the 22nd. Activity will be limited to the afternoons. All QSOs will be uploaded to Logbook to the World and eQSL. For those who need a paper QSL, please send yours along with sufficient postage to his home callsign as listed on QRZ.com.

UV5EVJ is on the air as 5X1VJ from Uganda through June 8th. Activity is on the HF bands using CW and SSB. QSL via his home callsign.

EA8AY will be active from the Canary Islands as ED8A during the CQWW WPX CW Contest from May 28th to the 29th as a Single-Operator, All-Band entry. QSL only via Logbook to the World.

Lastly, the United Kingdom's Macclesfield and District Amateur Radio Society will be operational from the Isle of Arran off the coast of Scotland from April 2nd to the 7th. Four club members will be transmitting on the HF bands and making as many contacts across the UK, Europe and around the world as possible. A special commemorative card will be available. QSL as directed on the air.

**

THAT FINAL ITEM: SPECTRUM USE FEES ON THROUGH THE HORIZON

And finally this week, as the U-S government looks for new ways to increase revenues without raising taxes, some of the bean counters in Washington are getting very creative. But it may be ham radio operators who wind up paying in the end. By shortwave, our April 1st roving reporter Pierre Pullinmyleg has details from the nation's capitol:

--

The bill in Congress that would auction off most of the 70-centimeter ham band to commercial interests has been getting the headlines in amateur radio news reports, but there is about to be another bill introduced that could be even worse for radio amateurs. While it would leave all of our allocations intact, this new plan calls for auctioning off the ionosphere itself, layer-by-layer, to the highest bidder. The F-Layer would be put up for bids first, because it permits the greatest

propagation distance for radio signals and because it is actually comprised of two layers, F-1 and F-2, so it is expected that it would generate higher bids than the other layers. The F-layer auction would be followed by an auction of the E-layer and finally the D-layer. Layers A through C continue to be under strict military control.

The successful bidders would pay large amounts of money up front to the U-S government and would then recover their investments by charging radio users access fees to bounce signals off of the various layers. Fees would vary by frequency, time of day and distance to be covered, and would have to be paid in advance. Radio transmitters would be programmed to send out a digital license code, which would permit signals to access the layer in question. Credits would be applied to the user's account if the ionosphere does not support the registered communication at the time of transmission.

In addition, amateurs conducting moonbounce or satellite communications would need to pay a transit fee for passing signals through each layer of the ionosphere. These fees would be higher during the day, when the D-layer is energized. The only radio transmissions that would not be subject to these fees would be those on line-of-sight paths. There would be special discounts for emergency service and military users, but everyone would have to pay something.

The bill was scheduled to be introduced today, April the first, and has not yet received a bill number.

>From the U-S Capitol subway, this is Pierre Pullinmyleg reporting for Newsline.

--

Pierre will, of course, keep you posted on any developments regarding this proposed legislation. More than likely, he will have his next report a year or so from today. (The Pierre Pullinmyleg Institute of April 1st News)

12> Did you use OS/2 to create this blog, tholen?

Classic erroneous presupposition. What does your
question have to do with college basketball, rwiseman?

Non sequitur. It's the random person believing me, rather than me
believing the random person, that was hypothetically at issue.

> 15> If I told them that he was a notorious usenet kook famous for 15>
> constantly asking what everything had to do with OS/2 and using 15>

Oh really? Are you claiming not to have won at least two AUK awards? Are
you claiming that "classic erroneous presupposition" isn't used so
frequently by you as to constitute a catch-phrase of yours?

> 15> If I told them there were *two* kooks with the same exact 15>
> particular kooky behavior, they'd think *I* was the kook.
>
> But you are a kook, Wesson

Classic unsusbtantiated and erroneous claim, to coin a phrase.

> 15> There're a few Wessons out there.
>
> One too many, Wesson.

Classic unsubstantiated and errooneous claim, thoolen.

Aww, no, not that damn 'o' key again!

> 15> I very much doubt there's more than one 15> tholen that constantly
> natters on about OS/2.
>
> Classic erroneous presupposition.

I disagree.

> 15> There's nothing at all erroneous about it -- I really did mean to
> send
> 15> that.
>
> Classic erroneous presupposition.

No; I should certainly know better than you do what I did or did not
intend to send!

> 15> In fact it's rather remarkable that you claim my claim that I meant
> 15> to send that is erroneous;
>
> Classic erroneous presupposition.

So now you're saying you *didn't* claim I meant to send that? But ...
but ... but two paragraphs ago you reiterated that exact claim, when I
said I did indeed mean to send that and you called that statement
erroneous!

Classic inconsisteency, tholeen.

> 16> So you claim.
>
> How ironic, coming from someone who made the contrary claim, without
> offering any proof.

The burden of proof is on the person making the extraordinary claim -- in
this case, the claim that theere aree two of yoou, thooleen.

A Pair of Lunatics
Todd Daugherty, N9OGL has been described as a threatening and perverse blowhard who enjoys publishing animated depictions of children being raped by adults. We have no idea why Wal-Mart in Taylorville, IL would want to keep him in their employ, but as yet they don't see the possibility of liability looming large in their future.
Mark Morgan has been described as a dimwitted liar with a penchant for repeating defamation learned under the tutelage of his Canadian sugar daddy, Karol Madera. Below, you'll find a few select quotes where Mark Morgan, KB9RQZ and Todd Daugherty, N9OGL are discussed by various and sundry at hamisland.net.

---BEGIN POSTS---

AL2N writes:

You guys can argue about this Todd fellow all you want to but the cold reality is this:

1. I do not know nor do I care to know what is going on between you all and this Todd guy.

2. After some research on this Todd fellow I can say that he is not welcome on any site that has my name attached to it. I have no assurance that he will not post the same child porn anime stuff here that he has on his blog. Such stuff is vile (there I said it too) and calling it art or free speech will not change that. Sick is sick. The Supreme Court just ruled that such stuff is NOT protected speech. Till that changes I am not going to take the risk of having him here. The moderators are on notice to ban him on sight.

3. If his IP was banned, it was because he either logged in under some unknown name and made some trouble, he was using a pirated call, or his IP is recognized by the forum software as a known spammer or other such location and blocked automatically.

You can now go back to your debate....

From KV1M (to Mark Morgan) on Sun May 18, 2008 5:31 pm

Hey Mark, quit stalking Paul already.

Todd has FCC trouble all on his own and I'm none to sympathetic to it myself. You wanna follow around Paul and post endlessly long rants about nothing then you might find yourself:

A) On everyones ignore list

B) Target number one to get you to melt down and get yourself banned so we don't have to deal with that kind of nuttiness.

From KB1OHK (to Mark) on Tue May 20, 2008 11:59 am

Mark's definition of the word libel is; Libel n., any statement that Mark doesn't agree with.

From KV1M (to Mark) on Tue May 20, 2008 2:06 pm

Finally, the thread returns.

Hey Mark, I got your rebuttal right here.

So you DO know the issue at hand with Todd then and tried to pretend there was no issue. And you think enforcement of the regs is being vindictive? You are a real piece of work.

I am most certainly not going to ignore you, I am going to go out of my way to make you look like the fool you are until I am told to stop by management or you get yourself banned.

If you climb the hell down and quite acting the fool and nutter then I'll leave you be, but I really don't see that happening since you have shown yourself to be a complete loon in the past already.

So fire away nutter, I'm in some kind of mood for conflict.

From KV1M (to Mark) on Tue May 20, 2008 3:55 pm

You're a freaking loon is what you are. Re read your own posts, they contain exactly what I say they do. You should know by now that if I am coming after you it is because you are being a nutter and a loon.

Have you stopped taking your meds or something? The stench of paranoia coming from you is hard to miss.

Nobody here give a rats a** enough about you to DOS or TOS you, maybe your loony-ness has made you some friends elsewhere.

From N4AUD on Wed May 21, 2008 8:04 am

AD4MG wrote:

I'm pretty much a heathen, myself, but I have to agree with Mike. Many will find what Todd posts on his own private site very offensive, legal or not. Having raised two sons, I believe our children are our greatest treasure, and should not be depicted in such a manner. Anyone may disagree with me until time ends, and I'm OK with that.

But, seeing as this is a private site, and the owner has made his preference known, my support is firmly behind him on this matter. Todd's site is available for all to view, if one desires to do so. But it won't happen here. Not on our watch.

Let's put it plainly.

Todd posts child pornography on the internet. He can call it anything he wants, but graphic representations of prepubescent children in sexual situations IS child pornography. It doesn't have to be actual pictures of real children, Todd's little cartoons qualify as well. I have no use for anyone who enjoys that kind of crap or anyone who defends someone who enjoys that kind of crap. It's not about free speech, it's about perverts lusting after children. Todd calls it "fantasy" and in my opinion anyone who uses such images to fuel their sexual fantasies will eventually turn to real children.

I have no use for Todd.

If I have violated the TOS for this site please feel free to ban me, but I won't apologize or say anything good about a pervert. If all these threads about this guy will go away, I'll never mention it again but I find it difficult to remain silent when we have multiple threads about this guy.

From KB1OHK (to Mark) on Wed May 21, 2008 7:55 pm

kb9rqz wrote:

yes I am I merely paying a slight price for doing what I see as right and moral frankly that gives one hell of a laod of endorphines so feel to keep it up and I trust the mods to keep in line

Right and moral, are you serious?

You slander people on your childish blog, falsely report innocent people to CPS and law enforcement agencies, defend pedophiles and terrorists, verbally attack anyone you disagree with, and you have the nerve to call your behavior moral!

Now we can all sit back and watch Mark attempt to turn the tables. Mark will now deny all of my accusations and then say I am the one doing what he is being accused of!

He might even accuse me of libel.

From KB1OHK (to Mark) on Wed May 21, 2008 10:11 pm

Right and moral, are you serious?

You slander people on your childish blog, falsely report innocent people to CPS and lawenforcement agencies, defend pedophiles and terrorists, verbally attack anyone you disagree with, and you have the nerve to call your behavior moral!

OGL posts pedophilia on his blog and you defend him.

KFM makes terroristic statements and you defend him.

LAF asked about your antenna and you attacked him.

You accused a few amateurs of sex crimes involving children and reported them to CPS without any proof.

I did not libel you, please learn what the word means.

My moral standards happen to be very high, but yours seem to be non-existent.

You are truly a wretched man.

N1LAF (to Mark) on Wed May 21, 2008 10:20 pm

Lets talk about making mistakes. Was the Island down for security reasons? TOSed? Nooooo. What were you thinking? You think this kind of public statement isn't going to get peoples attention? You think you can get away from false accusations by using weasel words as 'I do wonder' and 'merely speculation'? What were you thinking? Do you hold yourself accountable for your own statements? You go and smear names around as some kind of troublemaker that you are. Do you really take us for fools, who do you think your fooling? The point is, the Island board had a software glitch, and you took the occasion to use it as a weapon. Shame on you!

I am done with you, back on the 'Foe' list!

KB1OHK (to Mark) on Wed May 21, 2008 10:43 pm

No, the statements I am making are 100% true. In my opinion, and the opinion of many others, you're nothing more than a pathological liar.

You reported several hams based on nothing. The truth is they made you mad and that was your way of retaliating.

Everyone sees you for what you are...A LIAR and you're not very good at it!

KB1OHK (to Mark) on Wed May 21, 2008 11:35 pm

It's pointless trying to explain the situation to you. You lack the ability to logically reason. Based on my observations you lack the ability to even reason on a remedial level.

Your ignorant off the wall ramblings combined with your illiteracy make reading your posts a painful chore. Do yourself a favor, invest in a spell check program. Also, please learn to punctuate.

I am done. I wish to debate with you no further.

WV6Z (about Mark) on Thu May 22, 2008 1:40 am

Never try to teach a pig to sing. It wastes your time and annoys the pig.

KV1M (to Mark) on Thu May 22, 2008 6:04 am kb9rqz wrote: You have made threats against and seem follwoing me around in the online world that is stalking

KV1M wrote:

See, that's what I'm on at you about. Where have I EVER interacted with you ANYWHERE else than this one single thread? Where? Face it, you are delusional and need to seek help.

AL2N (to Mark) on Thu May 22, 2008 7:16 am RQZ,

I will make you an offer. You are defending this Todd fellow and say that his IP has been banned. I have reactivated a number of accounts that were at zero posts and his was in the mix. Now, if you will give me his IP address, I would be willing to unban it and let this guy have his say one one condition- You assume responsibility for him. If he steps out of line and gets himself banned, you go with him.

Are you willing to be accountable for him and have him come on the forum to have his say? If so, give me the IP address and I will unblock it if indeed it is actually blocked. So far no one has given the IP address, all I have heard is complaining.

KB1OHK to Mark) on Thu May 22, 2008 12:12 pm

kb9rqz wrote:

on further thought IF you in fact belive I eported the hams I di becuase the anoyed or offened me, why do you risk the same treatment after all If I lacked any ethics in the is matter why would I treat you or N1LAF any better

KB1OHK:

I received an email stating that you're posting about me on a site called nimbusters. I guess in your mind that's ethical. However, seeing as how I found the site to be rather offensive, I won't be responding there. So how is that treating me any better than your so called (imaginary) foes? Btw, if I did the same you would be crying slander.

kb9rqz wrote:

I don't belive even you belive what you are accusing me off since to do so and proceed to atack me could eaisly result in your being next for such treatement to do so you would have to be stupid and I don't think you are or N1LAF are that stupid, indeed rember to make such a report I would not even have to give my name or any contact info I could do so in complete safety therefore

KB1OHK: I never attacked you, you perceive every statement as an attack against you. I guess that's how you make yourself feel important, but the rest of us consider you to be delusional and paranoid.

The answer to your question is, I am not worried, because I could care less if you reported me to any authority. I know your baseless accusations wouldn't go very far, but feel free to do so. The choice is yours.

kb9rqz wrote:

one the the interesting results of this 10 years harrassment is I know just what I could do and what I could not get away with my foes have taught me well. only one things prevents me from using that knowledge.... that is MY sense of morals the evidence of my morality is plain to see has CPS vsited N1LAF willt hey visit YOU sir

KB1OHK:

Based on your past actions, and on some of the statements you have made, I wouldn't be surprised if I did get a visit from CPS, or some other agency.

Like I said, go for it! I have nothing to hide. I am an upstanding, law abiding citizen, no worries on this end.

Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

==> + JAPAN SUFFERS LARGE AFTERSHOCK; TSUNAMI WARNING ISSUED, LIFTED

A 7.4 magnitude aftershock hit just off the coast of Japan
<http://www.cnn.com/2011/WORLD/asiapcf/04/07/japan.quake/index.html?hpt=T1&ir
ef=BN1>
at 11:30 PM JST (1430 UTC) on Thursday, April 7. The epicenter of this
earthquake is just 73 miles from the nuclear plant at Fukushima and 41
miles from the epicenter of last month's 9.0 earthquake
```

<http://www.arrl.org/news/massive-earthquake-hits-japan-tsunami-warnings-issued>.
As such, Japan's meteorological agency issued, and then lifted, a tsunami warning for a wave of up to 6 feet for the coastal area that has been already torn apart by the March 11 earthquake and tsunami. These events are believed to have killed some 25,000 people and have sparked an ongoing crisis at the nuclear power plant. The ARRL asks that you keep 7.030 MHz clear for emergency use. In addition, these frequencies should also be kept clear: 3.525, 7.030, 7.077, 7.087, 7.097, 14.100, 21.200 and 28.200 MHz. -- Thanks to CNN and other sources for the information

==> + AMATEUR RADIO IN THE CLASSROOM: ALABAMA HIGH SCHOOLS SUCCESSFULLY LAUNCH HIGH ALTITUDE BALLOON

The Pell City and St Clair County High School's joint balloon launch was a great success. The balloon was launched from the St Clair County Airport in Pell City, Alabama into a brisk wind at 2 PM on April 2. The balloon carried a variety of experiments ranging from materials, plastic sticks, silly putty, several varieties of seed, batteries, film and cameras, radio location equipment and a radio beacon announcing the balloons flight, as well as a collection of worms. The worms were given physicals by a St Clair County High School science class prior to the flight. They returned home in apparent good health and have made reservations for the next flight. The balloon made a rapid and steady ascent to 94,449 feet and, after bursting, landed near Woodbury, Georgia. The balloon landed in the middle of an open field and was quickly retrieved by Amateur Radio operators from the Auburn/Alexander city area. Read more here <http://www.arrl.org/news/alabama-high-schools-successfully-launch-high-altitude-balloon>.

==> + PUBLIC SERVICE: BILL SMITH, K1ARK, RECEIVES NATIONAL RECOGNITION FOR STORM SPOTTING ACTIVITIES

It is difficult to imagine the number of hours that Dr Bill Smith, K1ARK, of Fayetteville, Arkansas, logs in his job as the University of Arkansas' Director of New Media for the Razorback Athletics Department. Smith spends countless hours blogging, filming, commentating and handling the social media responsibilities for 19 teams and the department, but he still finds time to assist Washington County residents when dangerous weather conditions arise. Smith has volunteered for the Washington County Department of Emergency Management for more than a decade, assisting with county weather emergency communications. In addition, Smith is the volunteer Public Information Officer for the DEM with Advanced P10 certification from FEMA.

For these efforts, Smith -- an ARRL member -- has been named the Bob Kenworthy Community Service Award winner by the College of Sports Information Directors of America (CoSIDA). The Bob Kenworthy Community Service Award is presented annually to a member for civic involvement

and accomplishments outside of the sports information office. CoSIDA is a 2700-plus member national organization comprised of the sports public relations, communications and information professionals throughout all levels of collegiate athletics in the United States and Canada. Smith will be honored at the CoSIDA at the organization's annual convention in June. Read more here <http://www.arrl.org/news/bill-smith-k1ark-receives-national-recognition-for-storm-spotting-activities>.

==> + CHECK OUT THE MAY ISSUE OF QST

The May issue of QST is jam-packed with all sorts of things that today's Amateur Radio operator needs. From product reviews to experiments to contesting -- including a special look at the ARRL EXPO, coming to the Dayton Hamvention® and the ARRL National Convention at Ham-Com in Plano, Texas -- this issue of QST has something for just about everyone.

As amateurs, we get excited when we finally get that new entity, top a previous year's score in a contest, build a new piece of equipment or meet up with an old friend on the air. Why not unleash some of that excitement and introduce kids to Amateur Radio at the same time? Mark Spencer, WA8SME, shows readers how to do just that in his article "A Transmitter for Foxhunting." Build this project that combines the fun of the outdoors with the science and art of radio. With today's rising energy costs, we are all looking for ways to save on those monthly bills. One of the ways to do so is by lassoing the energy of the Sun. In his article "An Emergency Backup Solar Power System," Jim Talens, N3JT, says that after the purchase of some basic hardware, solar power is free -- and independent of the grid.

Three Dutch hams -- Eltje Veen, PA3CEE; Johan Meezen, PE9DX, and Ren® Hasper, PE1L -- ventured to Mauritius to shoot for the moon. Read about their adventure in "3B8EME -- Moonbounce from the Indian Ocean." Join a group of Midwestern teenage hams as they discover what it's like on the other end of the pile-up in "Youth DX Adventure #1" by Don DuBon, N6JRL, and Dave Kalter, KB8OCP. QST Assistant Editor Steve Sant Andrea, AG1YK, decodes RSQ and explains what it means to digital operators in his article "Readability, Strength -- and Quality?"

QST Contributing Editor Ward Silver, N0AX, takes a look at the Kenwood TS-590S HF and 6 meter transceiver in this month's Product Review. He says that this rig "is a compact package of high-performance radio with an exceptional receiver for the price and is well-suited for today's operating modes and styles. It has a useful package of features that are thoughtfully organized and easy to access." QST Technical Editor Joel Hallas, W1ZR, checks out the Heil Pro Set Elite headset. He calls it "a worthy addition to the popular Pro Set line of headsets. It offers comfortable, wider range earphones, combined with a wide range fidelity dynamic microphone element. The mic element is intended to be tailored by radio or external audio equalizers to provide just the

desired voice characteristics."

Kelly Taylor, VE4XT, delivers the results of the 2010 ARRL November CW Sweepstakes. For the first time ever in the history of the contest, there's a tie for first place! Jeremy Alexander, W7EME, has the results of the 2010 ARRL International EME Competition, held over three weekends this past September and October. According to Alexander, the 2010 running of the contest generated more than 100 logs with many more stations participating.

Of course, there are the usual columns you know and expect in the May QST: Happenings, Hints & Kinks, The Doctor Is IN, How's DX, Technical Correspondence, Vintage Radio and more. Look for your May issue in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL Web page <https://www.arrl.org/join>.

==> + ON THE AIR: REV UP THE ROOKIES -- THE 2011 SSB ROOKIE ROUNDUP IS HERE!

Newly licensed amateurs will once again be the focus of attention on Sunday, April 17 as the ARRL Rookie Roundup enters its second year. Created to give the budding operator a place to learn about contesting at an easier pace, the ARRL Rookie Roundup is a six hour contest open to all amateurs who have been licensed for three years or fewer. If you were licensed in 2009, 2010 or 2011, you qualify as a Rookie. The Rookie Roundup happens three times each year: SSB in April, RTTY in August and CW in December. Read more here <http://www.arrl.org/news/rev-up-the-rookies-the-2011-ssb-rookie-roundup-is-here>.

==> ARRL TO CHANGE INSURANCE COMPANY FOR EQUIPMENT PROTECTION, CLUB LIABILITY SERVICES

On May 1, 2011, the ARRL will begin a new partnership to provide its ARRL-sponsored Equipment Insurance and Club Liability Insurance plans. The League has signed an agreement with Hays Affinity Group to serve as the program administrator to provide equipment insurance to its members who choose to elect coverage. In addition, Hays will also provide club liability insurance to ARRL Affiliated Clubs for those clubs that wish to take advantage of that program. Hays will be replacing Marsh Affinity Group Services as the program's administrator and will be introducing new policies for both plans, underwritten by the Hanover Insurance Company. Read more here <http://www.arrl.org/news/arrl-to-change-providers-for-equipment-protection-club-liability-insurance-plans>.

==> + AMATEUR RADIO FUN: ANNOUNCING THE WINNERS OF THE ARRL VIDEO CONTEST

With more than 30 videos submitted from all corners of the Earth, the ARRL's production and editorial team had a tough job ahead of them

as they sat down to pick the best one. But in the end, these ARRL HQ staff members picked a clear and decisive winner. In December, the ARRL announced that it was looking for ARRL members to shoot and submit videos that showcase how fun and electrifying our hobby can be. Extra points were awarded for videos showing someone -- young or old, licensed or not -- making their first contacts. Videos were judged on their creativity, overall quality and composition, and how well each communicated enthusiasm for Amateur Radio. All videos had to be less than five minutes long. Read more here <http://www.arrl.org/news/announcing-the-winners-of-the-arrl-video-contest>.

==> ARRL IN ACTION : WHAT HAVE WE BEEN UP TO LATELY?

Compiled by ARRL News Editor S. Khrystyne Keane, K1SFA

This feature is a concise monthly update of some of the things ARRL is doing on behalf of its members. This installment -- which covers the month of March -- looks at how the ARRL and its members are responding to HR 607, various filings made by the ARRL to the FCC, the ARRL's Executive Committee meeting, reports from the Official Observer Desk and more. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-32>.

==> + FCC NEWS: FCC LAUNCHES COMPLETE OVERHAUL OF WEBSITE

The Federal Communications Commission announced on April 6 that it has launched a complete overhaul of its website. According to an April 6 press release from the FCC, the new website is "architected with a more intuitive user experience and the addition of Web 2.0 technologies, and improves and simplifies the FCC.gov experience for consumers, government, public safety agencies and the business community." This is the first major update to the Commission's website in 10 years. Read more here <http://www.arrl.org/news/fcc-launches-complete-overhaul-of-website>.

==> SOLAR UPDATE

Tad "I walk out into the Sun, I try to find a new day <http://www.youtube.com/watch?v=W1N19zOBKCE>" Cook, K7RA, reports: Our Sun is still quite active, but solar activity is down this week when compared with the week before. The average daily sunspot numbers were down nearly 34 points to 68.3, while the average daily solar flux declined nearly 3 points to 111.8. But geomagnetic activity was quite strong this week, with the planetary A index on April 2 at 20, rising to 26 on April 6. The latest forecast from USAF and NOAA has the solar flux at 117 on April 7-9, 115 on April 10-14, 88, 90, 100 and 115 on April 15-18 and 125 on April 19-27. The predicted planetary A index is 8, 5, 10 and 10 on April 6-9, 5 on April 11-17 and 7 on April 18-20. Geophysical Institute Prague predicts quiet conditions on April 8, quiet to unsettled April 9, unsettled to active April 10, active April 11, unsettled April 12, quiet to unsettled April 13 and back to quiet on April 14. On April 4, NASA released a new solar cycle prediction

<http://solarscience.msfc.nasa.gov/predict.shtml>, and they say this may be the smallest sunspot cycle in 200 years. Look for more information on the ARRL website on Friday, April 8. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Duran Duran <http://en.wikipedia.org/wiki/Duran_Duran>'s Careless Memories <http://www.youtube.com/watch?v=W1N19zOBKCE>.

==> + ARRL RECOGNIZES: HOWARD "SKIP" TELLER, KH6TY, WINS MARCH QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for March is Howard "Skip" Teller, KH6TY, for his article "Digital VOX Sound Card Interface." Congratulations Skip! The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/cover-plaque-poll>. Cast a ballot for your favorite article in the April issue today.

==> + ON THE AIR: ARRL FREQUENCY MEASURING TEST SCHEDULED FOR TUESDAY, APRIL 12

The Frequency Measuring Test (FMT <http://www.arrl.org/frequency-measuring-test>) adds a couple of new wrinkles to the format when it takes to the airwaves on April 12. The first change is that the FMT will be held on Tuesday evening instead of Wednesday. If weeknight schedules have prevented you from participating in past FMTs, this change is for you. The second change is in the sequence of stations transmitting. The new format will mimic a round-table QSO in which all of the stations are close to the same frequency but not exactly on the same frequency. Read more here <http://www.arrl.org/news/arrl-frequency-measuring-test-scheduled-for-tuesday-april-12>.
<http://www.arrl.org/news/arrl-frequency-measuring-test-scheduled-for-tuesday-april-12>

==> ON THE AIR : NIST TO CONDUCT TIME AND FREQUENCY USER SURVEY

The National Institute of Standards and Technology's (NIST) Time and Frequency Division is conducting a survey to learn more about its users, seeking to determine how the agency can make its services more useful in the future. NIST services include WWV, WWVH and WWVB, which provide reference time and frequency signals via radio. The NIST also provides the Internet Time Service -- which provides accurate time synchronization to computer systems -- and several other services to offer accurate time information via telephone or web pages. Radio amateurs are encouraged to complete the survey. Read more here <http://www.arrl.org/news/nist-to-conduct-time-and-frequency-user-survey>.

==> THIS WEEK ON THE RADIO

This week:

- April 9 -- PODXS 070 Club PSK 31 Flavors Contest (local time); EU
Spring Sprint (CW)
- April 9-10 -- Montana QSO Party; New Mexico QSO Party; Georgia QSO
Party; JIDX CW Contest
- April 10 -- SKCC Weekend Sprint; UBA Spring Contest (SSB)
- April 11 -- 144 MHz Spring Sprint (local time)
- April 13 -- NAQCC Straight Key/Bug Sprint
- April 13-14 -- CWops Mini-CWT Test

Next week:

- April 15 -- NCCC Sprint
- April 15-16 -- Holyland DX Contest
- April 16 -- Feld Hell Sprint; TARA Skirmish Digital Prefix Contest;
ES Open HF Championship; EU Spring Sprint (SSB)
- April 16-17 -- Michigan QSO Party; Ontario QSO Party; YU DX Contest;
CQ Manchester Mineira DX Contest; EA-QRP CW Contest
- April 16-24 -- ARLHS Annual Spring Lites QSO Party
- April 17 -- ARRL Rookie Roundup (SSB)
<http://www.arrl.org/rookie-roundup>
- April 18 -- Run for the Bacon QRP Contest
- April 19 -- 222 MHz Spring Sprint (local time)

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
info. Looking for a Special Event station? Be sure to check out the
ARRL Special Event Stations Web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- April 22-24 -- ARRL Idaho State Convention
<http://www.arrl.org/hamfests/idaho-state-convention-1>, Boise, Idaho
- April 23 -- ARRL Louisiana State Convention

Amateur Radio Newsline(tm) Report 1756 - April 8 2011

Please note that this is an extended Amateur Radio Newsline report and contains three breaks.

Amateur Radio Newsline report number 1756 with a release date of Friday, April 8, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. One of the sponsors of H R 607 promises to keep the ham radio public informed of the measures progress through congress, the sun heats up with a solar flare and Aurora, the FCC previews its newly redesigned website and the nominating period for the 2011 Amateur Radio Newsline Young Ham of the Year Award is now open. Find out the details on Amateur Radio Newsline(tm) report number 1756 coming your way right now.

RADIO LAW: CO-SPONSOR OF HR-607 MEETS WITH MISSOURI HAMS

U.S. Representative Billy Long of Missouri has assured ham radio operators that he will keep them informed about a bill that contains a provision to sell a band of frequencies that they use heavily for emergency service work. Bill Pasternak, WA6ITF, is in our Newsroom with more:

--

According to an article in the Springfield News Leader newspaper, Representative Long made the statement after a meeting with a group of Missouri radio amateurs from his home district.

Billy Long is a co-sponsor of H.R. 607. This is a measure introduced by New York Representative Peter King who is the chairman of the Committee on Homeland Security.

As previously reported, the bill is intended to unite the communications capabilities of first responders by reallocating certain frequencies in the 700 MHz band specifically for their use. But another part of the bill would sell off 420 to 440 MHz to the highest bidder. This, to make up for lost revenue in the give away of the 700 MHz spectrum for interoperable, first response radio use.

Long says that right now, the bill is in its initial stages and that meetings like this is one with the ham radio community of many ways to

address any concerns. Long promised that he will continue to listen to ensure that we are not cutting any vital emergency services and not adversely affecting ham radio operators.

Rod Kittleman, K0ADI is the ARRL's Information Officer in Southwestern Missouri. He was present at the meeting and is quoted by the newspaper as saying that he believes that Long is trying to do the right thing.

K0ADI went on to say that he believes that Representative Long understood where the ham radio community was coming from and that he reassured us he will do everything he can to keep the ham radio community informed. But at the same time, he did not guarantee that spectrum would not be taken away.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

The bottom line. If nothing else this meeting between Representative Billy Long and the Missouri ham community has made one of the bill's co sponsors aware of the negative impact that selling off 420 to 450 MHz would have on overall emergency communications during a time of public need. (Springfield.com, others)

**

PROPAGATION: SOLAR RADIO STORM COULD MEAN IMPROVED PROPAGATION

Some good news for hams awaiting the return of decent propagation. Spaceweather reported on March 28th that a large number of emerging sunspots has kicked off what it termed as days-long radio storm on the sun. According to the on-line newsletter, VHF receivers on Earth were picking up loud bursts that sound like waves crashing on a beach. Spaceweather says that this ongoing event continues a recent trend of increasing activity as Solar Cycle 24 heats up.

Then over the weekend of April 2nd and 3rd a solar wind stream hit that Earth's magnetic field over the weekend of sent a wave of deep sky auroras over northern tier of the United States. According to Spaceweather dot com, the Northern Lights were pale-white to the naked eye, but digital cameras revealed spectacular colors and luminous shapes above Wisconsin, Michigan, Minnesota, and elsewhere.

Meantime, on the ground some hams on 6 meters and above heard or made contact with distant stations not usually heard on these bands. You can easily tell a contact made via aurora propagation by its raspy C-W note or gargely voice sound.

For images and audio go to www.spaceweather.com. (Spaceweather)

**

RESTRUCTURING: SARL SAYS NEW SOUTH AFRICAN HAM RADIO REGULATIONS HAVE ERRORS

The new South African radio regulations that were published on March 31st and came into effect on April 1st are causing concern to that nation's ham radio community. This is because a number of mistakes have crept in, which telecommunications regulator I-C-A-S-A is reportedly working on to rectify as soon as possible.

According to the South African Radio League, the problem is with the new regulation for the Class B or Zed-U license is incorrect. This is because the word "under" was left out before the words 20 years. The leads to a situation where if you are over 20 years of age you cannot apply for a class B license. If you have a class B qualification you will be able to keep a Zed-U license until you reach 25, when the license is automatically canceled.

The position of current Zed-U license holders has not been finalized. I-C-A-S-A is likely to allow a two year grace period for those over 25 with a class B qualification to upgrade their to a class A. To upgrade means having to sit for the class A examination.

Meantime, on the other side, those who hold the Zed-R prefix now have the same privileges as a Zed-S license holders meaning that the upgrade process falls away. But it seems that the new table of amateur radio frequency allocation is incorrect. Both Zed-R and Zed-S should follow the same frequencies and power limits. Zed-R license holders do not have to change their callsign. (SARL)

**

MILITARY RADIO: SHORTWAVE AIMED AT LIBYAN VESSEL COMMANDERS

And it appears that radio has gone to war in Libya. This with reports that High Frequency radio transmissions are reportedly playing a major role in the U-N's Operation Odyssey Dawn.

According to international shortwave news reports, 6 point 877 MHz is being used as an airborne announce channel, possibly from a Commando Solo Aircraft. The messages being broadcast are aimed at commanding Libyan naval officers. They reportedly and not so subtly order them not to board their ships.

The Milcom Monitoring Post website has been reporting on the use of High Frequency radio in the enforcement of the no fly zone. More is on-line at tinyurl.com/5wca737. (WIA)

ENFORCEMENT: FCC ISSUES OFFICIAL CITATION OVER CABLE TV LEAKAGE

A cable company has been cited by the FCC for excessive leakage at frequencies that could affect the ability of aircraft to communicate and navigate. Amateur Radio Newsline's Fred Vobbe, W8HDU, has the details:

--

The FCC has issued an official Citation to Jerry Fuller doing business as Custom Cable of Russellville, Alabama. This, for exceeding signal leakage limits in aeronautical frequency bands in violation of section 76.605(a)(12) of the Commission's Rules.

According to the Citation, an investigation by the Enforcement Bureau's Atlanta Office revealed that on February 15, 2011, Custom Cable utilized a non-cable, multichannel video programming distributor system which was emitting radio carrier signals above allowed limits on frequency bands utilized by aeronautical services. At the time of the inspections, agents from the Atlanta Office measured excessive signal leakage on the frequency of 121.2625 in the Aeronautical Radio band.

As a result, the FCC has ordered Custom Cable to take immediate steps to come into compliance and to avoid any recurrence of this misconduct. The FCC added that any future violations of its rules in this regard may subject your company to substantial monetary penalties, seizure of equipment, and criminal sanctions.

Reporting from Lima, Ohio, I'm Fred Vobbe, W8HDU.

--

Custom Cable was given the appropriate time to remedy the situation and to reply to the FCC. (FCC)

**

ENFORCEMENT: VAN NUYS CA STORE WARNED TO TURN OFF CELLPHONE JAMMER

The FCC has issued a Notice of Unauthorized Operation and Interference to EDN Aviation of Van Nuys, California. This, for allegedly operating a cellphone jamming device on its premises.

According to the FCC, back on January 10th agents from the Enforcement Bureau's Los Angeles Office visited the business location. At that time they detected radio signals in the 1.8 to 2.0 GHz range emanating from a radio transmitter. The Los Angeles agents determined that the business was operating a radio transmitting device designed to jam or intentionally interfere with licensed radio communications in the cellular and personal communications service.

According to the FCC, its agents did attempt to inspect the device. Subsequent to that attempted inspection, operation of the device ceased.

Now in its March 18th Notice, the FCC tells EDN Aviation that unauthorized operation of the transmitting device must not resume. It also warns EDN that the operation of the device may constitute a violation of Sections 333, 302(b), and 301 of the Communications Act. Such operation may subject the company to substantial monetary forfeitures, seizure of the offending radio equipment, and criminal sanctions.

EDN was given the customary 10 days to respond to the FCC with any information that it believed relevant to the warning notice. That time period has now passed. No word yet from the FCC if EDN responded or what the company may have said. (FCC)

**

ENFORCEMENT TECHNOLOGY: TRACER SOFTWARE LEADS TO RECOVERY OF STOLEN COMPUTERS

Los Angeles, California Police say that they have tracked down three people whom they allege to have stolen nine computers from the Open Charter Magnet School in the Westchester area. This thanks to a new form of security software installed on the machines.

According to police, the computers were stolen between March 9 and 10 at the campus on 77th Street in the city of Westchester. The suspects were unaware that the computers were equipped with the security software. As soon as one of the machines was turned on and connected to the Internet, it monitored and recorded the location via GPS. It also took photographs of the user and then sent this information off to authorities.

Detectives from the Los Angeles Police Department tracked down one of the suspects on March 12th. A further investigation led them to two others. So far, four of the stolen computers have been recovered. (Published news reports)

**

COMMUNICATIONS ON THE WWW: FCC LAUNCHES NEW WEBSITE IN BETA TEST

The Federal Communications Commission has launched a complete overhaul of the agency's web site. In making the announcement the regulatory agency says that the new design will improve and simplify the FCC website experience for consumers, government, public safety agencies and the business community.

The Commission says that its new web site design was shaped by public feedback and sharpened through an ongoing conversation with users over the past several months. It also represents the Commission's first overhaul of its main web site in more than a decade. You can try it for yourself at beta dot fcc dot gov. (FCC)

**

RADIO EDUCATION: ARRL TO SPONSOR FOUR 2011 TEACHERS WIRELESS WORKSHOPS

The ARRL Education Services Department has announced the 2011 schedule for the Teachers Institute on Wireless Technology workshop. Offered through the ARRL's Education & Technology Program, the Teachers Institute is a four-day, expenses paid in-residence learning opportunity designed for motivated teachers and other school staff who want to learn more about wireless technology and bring that knowledge to their students.

There are four ARRL Teachers Institute sessions scheduled for 2011. These are June 13th to the 16th in Albuquerque, New Mexico; June 20th to the 23rd at Parallax Inc. in Rocklin, California; July 11th to the 14th at the Mohawk Valley Community College in Utica, New York, and July 18th to the 21st at ARRL Headquarters in Newington, Connecticut. The deadline to apply for the New Mexico and California sessions is April 15th. The deadline for the New York and Connecticut sessions is May 15th.

In addition, the Dayton Amateur Radio Association will once again host and sponsor a TI-2 session on Space in the Classroom. That one will be held in Dayton, Ohio from July 11th to the 14th. The application deadline for this one is is May 15.

All information about the Teachers Institutes, including the application and a downloadable brochure is available online at tinyurl.com/3exzpj. (ARRL)

**

NAMES IN THE NEWS: RSGB GENERAL MANAGER G0TTW RESIGNS

Some names in the news. The Radio Society of Great Britain says that it's General Manager Peter Kirby, G0TTW, has left the organizations employment. In a March 28th statement released under the signature of the organizations President Dave Wilson, M0OhBW, says that Kirby departed following the discovery of financial irregularities on his part. The release says that RSGB Director Don Beattie, G3BJ, will act as interim General Manager. Wilson's message goes on to ask that at this difficult time for the Radio Society of Great Britain, that all society members support G3BJ in his new role. (RSGB)

**

NAMES IN THE NEWS: K1ARK HONORED BY COLLEGE OF SPORTS INFORMATION DIRECTORS OF AMERICA

Meantime on this side of the Atlantic, word that Bill Smith, K1ARK, of Fayetteville, Arkansas, has been named to receive the Bob Kenworthy Community Service Award by the College of Sports Information Directors of America. Smith is being recognized for his decade as a volunteer to the Washington County Department of Emergency Management assisting with county weather emergency communications and for his work as the

volunteer Public Information Officer for the Director of New Media with Advanced P10 certification from FEMA.

The College of Sports Information Directors of America is a national organization comprised of the sports public relations, communications and information professionals throughout all levels of collegiate athletics in the United States and Canada. The Bob Kenworthy Community Service Award is presented annually to a member for civic involvement and accomplishments outside of the sports information office. Bill Smith, K1ARK, will be honored at the at the organization's annual convention in June. (ARRL Public Relations Reflector)

CHANGING OF THE GUARD: AMATEUR RADIO NEWSLINE CO-FOUNDER BILL ORENSTEIN, KH6QX - SK

The changing of the guard continues and this time it hits pretty close to home. This as we learn of the passing of one of Amateur Radio Newsline's co-founders and its longtime Production Coordinator Bill Orenstein, KH6QX. Again, our producer Bill Pasternak, WA6ITF:

--

Its not easy to write a final goodbye to someone who has been a friend for almost four decades, but Ill try.

I first met Bill Orenstrin, in 1972 shortly after my wife and I move to Los Angeles. And as I got to know him, I learned that he was first licensed in his hometown of Los Angeles, California, in the late 1950's as K6ZSW. Bill also became interested in broadcasting as a teen.

Bill eventually landed a job with the ABC Television Network where he spent several years as an Audio Engineer before accepting a job at the rival National Broadcasting Company at its West coast headquarters in Burbank, California. There he worked on numerous live and "live to tape" network specials featuring such talent as the legendary Frank Sinatra and stand up comics like Bill Cosby and the late Flip Wilson. Later, Bill also had a regular gig as the audience Public Address Mixing Engineer on the "Tonight Show with Johnny Carson" and "The Gong Show." And it was also during this time he adopted Hawaii as his second home and turned in K6ZSW to become KH6IAF and years later KH6QX.

As those of you who were around in the late 1970's may remember, Gong Show host and Producer Chuck Barris had the habit of creating on-air talent from members of the shows crew. Perhaps the best known was Stage Manager Eugene Patton who became known as "Gene Gene the Dancing Machine." In a like manner, Bill Orenstein was tapped by Barris as the character "Weird Wille." As Weird Willie, Bill's job was to appear just before a commercial break and leer stoically and silently at Barris as the latter made jokes about the character Bill was portraying. For the rest of his life, Bill used that pseudonym or some derivation of it and carried it as a kind of badge of pride. If you asked him why, his answer would be: "...how many of you can claim a famous TV producer like Chuck Barris gave you your nickname?"

After the Gong Show left the air, Bill continued as the Public Address Engineer on the Tonight show until he was tapped by NBC Network Radio to take on the Engineering position of its then brand new young adult contemporary radio network called "The Source." "The Source" was filled with newscasts and features focusing on 18- to 34-year-olds. When it was sold to Westwood One Radio in August 1987, Bill remained at NBC News working with most of the well known network news people of the era including the late NBC News Science Correspondent Roy Neal, K6DUE.

In the world of amateur radio, Bill is best known as one of those behind the 1977 creation of the "second generation" of the Westlink Radio Network which eventually was renamed Amateur Radio Newsline. In 1981 Bill Orenstein and I co-shared the Dayton Hamvention Special Achievement Award for - and I quote from the plaque on my wall -- "The Development and Operation of the Westlink Radio Network." Bill was also co-creator of the late 1970's era "CARS Program" in which radio amateurs became the extra eyes and ears of the Los Angeles Police Department in the then heavily crime-ridden Hollywood and North Hollywood areas.

In the late 1980's Bill retired from both NBC and Westlink Radio due to health reasons and eventually relocated with his family to Hawaii where he lived out the remainder of his life. Over the years he continued to file news reports for Westlink and then in our later incarnation as Amateur Radio Newsline. Most usually dealt with ham radio emergency preparedness and emergency response on the Island state. He was also with Hawaii's famed Emergency Amateur Radio Club and at one time served on its governing board.

I last saw Bill a few years ago when he was in Los Angeles to attend his sons college graduation. After that it was only on the phone. And now, its time to say a final 73 to a guy who was an important part of my life for almost forty years. Not easy to do, but I hope I have succeeded.

--

Bill Orenstein was age 75 when he passed away on Wednesday, March 30th at his home in Honolulu. He is survived by his son Jon. At airtime, plans for a memorial service at Temple Emanu-El in Honolulu, Hawaii,

are pending. (ARNewsline)

**

CHANGING OF THE GUARD: INDUSTRIAL COMMUNICATIONS ENGINEERS FOUNDER MIKE KOSS, W9SU - SK

A mid-West legend in amateur radio has also passed from the scene. Amateur Radio Newsline's Jack Parker, W8ISH, has the story of Mike Koss, W9SU:

--

Mike Koss, W9SU, of Indianapolis, Indiana, passed away Monday, March 28. According to his friend Brian Smith, W9IND, Koss was found on his workshop floor and paramedics were unable to revive him.

Koss is the founder of Industrial Communication Engineers. He is well known in the Amateur Radio and in the commercial radio communities for his surge protectors, line filters, RF switches and more.

Koss is known as being the heart and soul of the Indianapolis Motor Speedway Amateur Radio Club, He designed and maintained one of the best Amateur Radio stations in the Midwest -- the one responsible for cranking out the big signals of Indy 500 Special Event Station W9IMS. Mike was also the driving force behind Special Event Station W87PAX, which commemorated the 1987 Pan American Games in Indianapolis. The station logged more than 23,000 QSOs. Koss was also an avid Dxer. HIs 10 meter CQWW record for the 9th Call Area, set in 1989, remains unequalled.

Mike Koss also was actively involved in public service activities: Just last year, he spearheaded a volunteer project that cleaned up and repainted the USS Indianapolis Memorial in downtown Indianapolis, this coming just in time for the survivors' reunion. History tells us the ship was torpedoed in 1945, and only 317 of the original eleven hundred and ninety-six crew members survived the sinking and subsequent shark attacks over a five day period in the Pacific Ocean.

In 2005 Koss was awarded the prestigious Technical Excellence Award for his contributions to the Amateur Radio community. And now, at age 57, Mike Koss W9SU, is a silent key.

>From Indianapolis, this is Jack Parker W8ISH

--

Koss will be long remembered for his many contributions to telecommunications and his service to the ham radio community. Services for W9SU were to be held in Whiteland, Indiana, on Saturday, April 3rd. (W8ISH)

WORLDBEAT: MAJOR CUTS TO HIT THE BBC WORLD SERVICE

Some major cutbacks are coming to one of the worlds best known international shortwave broadcasters. To meet a United Kingdom government mandated 16 percent funding cut, the B-B-C World Service is eliminating five languages, ending radio distribution for seven more and slashing medium and shortwave radio distribution. This, in favor of FM, TV and the so-called online new media.

The cuts will amount to an annual savings of about $74 million by April 2014. At that point all World Service funding will be switched from governmental grants through to the same domestic license fee that funds B-B-C services across the U-K. 650 out of a total 2400 B-B-C World Service jobs will be eliminated.

RADIO IN SPACE: NASA ASKS YOU TO VOTE ON ASTRONAUT WAKE-UP SONG

NASA is offering the public a chance to vote for your favorite tunes to be played as the wake up song during the STS-134 mission, which is currently scheduled to launch on April 19th. Voting will be open until mission launch day. You can listen to the songs nominated and cast your vote at tinyurl.com/4peh55m

**

HAM RADIO IN SPACE: ARISSAT-1 TO BE ON THE AIR TO CELEBRATE GAGARINS FLIGHT

The ARISSat-1 satellite, presently still inside the ISS, will be turned on and use an external antenna from the afternoon of April 11th through the morning of April 13th. This, to celebrate the 50th anniversary of Yuri Gagarin's first manned space flight.

The transmissions on the 12th will see ARISSat-1 in low power mode This means 40 to 60 seconds on and 2 minutes off. Event planners say that this should be a challenge for hams on the ground to find and tune the CW signal then decode some B-P-S-K data during the short on times. As an aside, this mode was developed to be used when the batteries are low or the satellite is in eclipse.

AMSAT says that it will also support this event and issue certificates to those stations reporting reception of the ARISSat-1 signals. Russia's Roscosmos space management agency has announced that ARISSat-1

will be deployed into orbit during the next space walk in July of this year. (WA4SXM)

**

HAM RADIO IN SPACE: N4S TO COMMEMORATE GAGARIN FLIGHT AND LAUNCH OF STS-1

Meantime, special event station N-4-S will be on the air on April 12th to commemorate the 50 years since Russia'a Yuri Gagarin became the first man in space on April 12th, 1961. The operation also honors the first flight of the Space Shuttle Columbia, known as S-T-S One, that took place two decades later on April 12th, 1981. N-4-S will be active on 80 through 10 meters using SSB as well as the KP4IA FM repeater and 147.48 MHz simplex for local contacts across Puerto Rico. A special electronic certificate will be issued for this occasion. For information go to www.qrz.com/db/wp3gw or write to wp3gw (at) arrl (dot) net. (WP3GW)

**

ON THE AIR: ISWL CELEBRATES ITS 65TH ANNIVERSARY

And the International Short Wave League is celebrating its 65th anniversary with a pair of special events stations. GB65ISWL will be on the air for the weekend of April 16th to the 17th. Operation will begin around 1800 hours on Friday, April 15th using S-S-B and P-S-K. The primary operator will be G6XOU.

Then PA0FAW will operate as PC65ISWL between May 1st and the 28th. Activity will be mainly on the digital modes and CW, with some SSB. QSL information for both callsigns will be on QRZ.com. More about the Internartional Short Wave League is on-line at www dot iswl dot org dot uk. (ISWL)

**

DX

In DX, word that G3KHZ has organized a 6th trip to Papua New Guinea to activate more Islands on the Air. Destinations include Feni Island, Nuguria and Green Island. Two members will then will go to Louisiade after the main DXpedition is finished between. Activity will be on all HF bands, including 6 meters, using CW, SSB and RTTY. For updates and more complete details, watch the expedition Web page at p29ni.weebly.com

IK8DNJ has just obtained authorization to be active stroke HI7 between April 30th and May 13th. All operation will be be holiday style on 40 through 10 meters using SSB and the digital modes. QSL via IZ8LKL.

JA1IFB says that the planned operation from Bhutan has been cancelled their April 19-26th operation due to the earthquake and tsunami hitting the JA7 district on March 11th. Look for this operation to possibly be

rescheduled for some later date.

The "DX-World.Net" reports that N2WB, is planning to be active stroke HR5 from Honduras between April 20th and May 4th. QSL via N2OO.

The I2YSB DXpedition team is now active as 5M2TT from Liberia until April 13th. The group plans to use 3 stations for the HF bands and one for the 50 MHz band that includes a beacon and cubical quad antenna. Modes include CW, SSB and RTTY. QSL via I2YSB.

The upcoming September 2011 Timor-Leste DXpedition has received the callsign 4W6A from the governing licensing authorities. 4W6A will operate from Atauro Island in East Timor from September 16th to the 26th. Activity will be on 160 through 10 meters, using CW, SSB and RTTY. The QSL manager is M0URX.

Lastly if you DX the birds, then look for KL7CN to be active in a holiday-style DXpedition on the FM satellites from various Caribbean locations. He will start at KP4 and then operate maritinme mobilefrom as many grids as we can. That will be followed by a stint portable J6 then as V25CN. Several other Caribbean stops are planned. QSL as directed on the air.

(Above from various DX News Sources)

THE NOMINATION PERIOD FOR THE 2011 AMATEUR RADIO NEWSLINE YOUNG HAM OF THE YEAR NOW OPEN

And finally this week, its time to announce that the nominating period for the year 2011 Amateur Radio Newsline Young Ham of the Year Award is now open. Created by us back in 1986, this award is offered to recognize one young United States or Canadian radio amateur age 18 or younger for his or her contributions to society through Amateur Radio.

As in years past, the 2011 recipient will receive an expense paid trip to the Huntsville Hamfest in Huntsville Alabama courtesy of Vertex-Standard Corporation which produces Yaesu brand amateur radio gear. Vertex-Standard will also present this years winner with a special ham radio related gift. CQ Magazine will again treat the recipient to a week at Spacecamp-Huntsville. We at Amateur Radio Newsline will present the winner with a plaque honoring his or her achievements.

All nominations and materials required by the official rules must be received by ARNewsline before June 30, 2011. A downloadable nominating form is at our website at www.arnewsline.org. A nominating form can also be obtained by sending a request along with a self addressed stamped envelope to the Young Ham of the Year Award in care of Amateur Radio Newsline, Inc. 28197 Robin Avenue, Santa Clarita California 91350.

Again, the cutoff date for this year's Young Ham of the Year Award nominations is June 30th. We ask you to do your part by nominating a young ham who has done something special related to ham radio. The nomination form is at www.arnewsline.org (ARNewsline(tm))

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

For now, with Bill Pasternak, WA6ITF, at the editor's desk, I'm Don Wilbanks, AE5DW, saying 73 and we thank you for listening.

Oon yoour part, thoolen.

> 17> It's the random person believing me, rather than me 17> believing
> the random person, that was hypothetically at issue.
>
> You're the random person making the claim, Wesson.

No, I'm not. The context, which you conveniently snipped, was the
hypothetical scenario of my telling a random person about you. So, it's
the random person believing me that was at issue.

> 17> Are you claiming not to have won at least two AUK awards?
>
> What does your ridiculous question have to do with OS/2, Wesson?

What's ridiculous about it? In light of

http://www.experiencefestival.com/david_j_tholen_-_usenet_reputation

it seems a perfeectly sensible queestion to ask, tholeen.

> 18> Are you claiming that "classic erroneous presupposition" isn't 18>
> used so frequently by you as to constitute a catch-phrase of 18> yours?
>
> What does your ridiculous question have to do with OS/2, Wesson?

What's ridiculous about it? You're constantly posting that phrase in, at
the very least, comp.os.os2.advocacy.

> 18> Classic unsusbtantiated and erroneous claim, to coin a phrase.
>
> On the contrary, the substantiation lies in your claim, Wesson.

Classic unsubstantiated and erroneoous claim, thoolen.

> 18> Aww, no, not that damn 'o' key again!

> Wesson?

They're afflicting my posts to an OS/2 newsgroup, tholen.

> 18> I disagree.
>
> With no basis offered, Wesson.

I don't neeed to justify myseelf to you, tholeen.

> 18> No; I should certainly know better than you do what I did or did not
> 18> intend to send!
>
> Classic erroneous presupposition.

On yoour part, thoolen. Unless you claim to be telepathic?

> 18> So now you're saying you *didn't* claim I meant to send that?
>
> What does your question have to do with OS/2, Wesson?

Classic eevasion, tholeen.

> 18> But ... but ... but two paragraphs ago you reiterated that exact 18>
> claim, when I said I did indeed mean to send that and you called 18>
> that statement erroneous!
>
> I called the presupposition erroneous, Wesson, not the statement.

Hair-splitting. You claimed it was in some way wrong when it was in every
way accuratee, tholeen.

> Still suffering from reading comprehension problems, Wesson?

What does your classic erroneous presupposition of reading comprehension
problems on my part have to do with OOS/2, thoolen?

> 18> The burden of proof is on the person making the extraordinary claim
>
> That happens to be you, Wesson.

Au contraire. I'm not the one claiming that there are two people out
there that act as bizarrely as you do and in the same exact ways, tholen.

Adieu, and hope you enjoyed that Quad rocket I got you with the other
night.

People who don't believe in causality should not waste their time posting to the usenet (much less using the followup-to lines).

Should that be taken to mean that you do believe in
causality, Kennedy? "The Sun rose in the east today,
therefore my car alarm went off." Or is it really
possible that illogic such as yours can coexist with
logical cases of causality, Kennedy?

So what's your real reason for wasting your time
posting off-topic material to an OS/2 newsgroup,
Kennedy?

Newington, CT. April 12, 2011 -- The International Amateur Radio Union (IARU), and its member societies representing over 150 countries around the world, will celebrate World Amateur Radio Day on April 18. The theme for this year's celebration is "Amateur Radio: The first technology-based social network."

Long before the Internet and smart phones, Amateur Radio operators, often called "hams," have been talking, texting and sharing for decades. But unlike those commercial services, Amateur Radio continues to attract people world-wide by providing international communications for free. And because it does not need pre-established supporting infrastructure, these radio-savvy "amateurs" can reach out to friends in every corner of the world – and into space too.

Amateur Radio operators have been the leaders in developing many of today's modern electronic and communications marvels. Today the citizens of Earth think of "wireless" as being the ubiquitous cellular phone – only made possible because of the pioneering work in radio technologies first explored by these "amateurs". Many of our leading electrical engineers draw from their practical experiences as Amateur Radio operators as they continue to develop applications blending computers and radios. Ham Radio operators may be "amateur" because they are unpaid volunteers, but their skills and contributions to the world are of the highest order.

Calling, texting or even using old Morse code on the Amateur shortwave bands can result in chatting with other radio amateurs across town or far across the oceans. While hams have repeatedly been in the news for their life-saving communications services in disasters, a large part of their activities is the excitement and joy of contacting distant and remote areas of the world, learning directly about each others' regions and lives and trying different ways to make radio contacts around the world.

Since 1925, the IARU has been instrumental in coordinating and representing Amateur Radio to the world. For information about the International Amateur Radio Union please see: www.IARU.org

It wasn't a "cllassic unsubstantiated and erroneous clllaim", thollen.
The context, which you conveniently snipped, was the hypothetical
scenario of my telling a random person about you. So, it's the random
person believing me that was at issue.

I can think of something else there is one too many of, Tholen.

What does anything in this ridiculous thread have to to with classical
music, or any of the other groups you are spamming.

Your reply is not posted to a group she reads, so she is missing all
your brilliance.

Nevermind, she's not missing much.

==> + PUBLIC SERVICE: HAMS PROVIDE COMMUNICATIONS SUPPORT DURING WEST TEXAS WILDFIRES

On April 9 at 4:15 PM (CDT), ARRL West Texas District 5 Emergency Coordinator Bob Ward, WA5ROE, received a call from Jeff Davis County (Texas) Fire Marshal Stewart Billingsley, N5HXZ. Billingsley informed Ward that a fire had begun in the West Texas town of Marfa and was rapidly approaching Fort Davis, 22 miles to the northeast.

"Stewart asked me to call the National Weather Service to get it on the alert system, as well as the AM and FM radio stations in Alpine," Ward told the ARRL. "He wanted it broadcast over the radio stations that he needed the Mano Prieto and Fort Davis Estates sub-divisions evacuated.

People in the area know that when an emergency happens, they need to tune into these stations for the latest information. This was the Rock House Fire. At the same time, another fire, the Roper Fire, had started on the eastern edge of Alpine." Read more here <http://www.arrl.org/news/hams-provide-communications-support-during-west-texas-wildfires>.

==> + ON THE AIR: WORLD AMATEUR RADIO DAY SET FOR MONDAY, APRIL 18

The International Amateur Radio Union and its more than 160 Member-Societies that represent countries around the world will celebrate World Amateur Radio Day on April 18. The theme for this year's celebration is Amateur Radio: The First Technology-Based Social Network. Long before the Internet and smart phones, Amateur Radio operators have been talking, texting and sharing for decades. But unlike those commercial services, Amateur Radio continues to attract people worldwide by providing international communications for free. And because it does not need pre-established supporting infrastructure, these radio-savvy "amateurs" can reach out to friends in every corner of the world, as well as into space. Read more here <http://www.arrl.org/news/world-amateur-radio-day-set-for-monday-april-18>.

==> + ON THE AIR: OFCOM TO ISSUE SPECIAL TEMPORARY CALL SIGNS FOR ROYAL WEDDING

If you are a prefix hunter -- or you just get caught up in the pageantry that a Royal Wedding <http://www.officialroyalwedding2011.org/> can bring -- then take note: Ofcom, at the request of the Radio Society of Great Britain (RSGB <http://www.rsgb.org/>), will issue special temporary call signs that British amateurs may use from April 29 through May 9, 2011, commemorating the marriage of HRH Prince William of Wales and Miss Catherine Middleton. Amateurs in the United Kingdom who choose to apply for these special call signs will be using GR, MR and 2R prefixes during this time to commemorate the wedding.

==> + FROM THE HEARTS: PROVIDING A WAY FOR OTHERS TO COMMUNICATE WITH THE ISS

In America and around the world, students use Amateur Radio to talk to astronauts on the International Space Station, orbiting high above the Earth -- and it's the students at an all-girls school in Honolulu, Hawaii who help make the connection. Sacred Hearts Academy is a telebridge station for the Amateur Radio on the International Space Station program (ARISS). ARISS is a NASA-sponsored education activity where astronauts and cosmonauts use Amateur Radio equipment aboard the ISS to talk with students around the world. Telebridge stations, like the one at Sacred Hearts, connect schools, museums and others without their own Amateur Radio equipment to astronauts in space. Read more here <http://www.arrl.org/news/from-the-hearts-providing-a-way-for-others-to-communicate-with-the-iss>.

==> + ARRL WEST GULF DIVISION TO HOST WEBINAR ON ANTENNA ZONING

Periodically, ARRL Divisions will host a "webinar" -- an interactive Web-based seminar, designed to facilitate communication between a small number of presenters and a large remote audience using the Internet -- for interested amateurs. On Wednesday, April 27 at 9 PM (EDT), ARRL West Gulf Division Director David Woolweaver, K5RAV -- along with ARRL General Counsel Chris Imlay, W3KD, and noted antenna zoning lawyer Fred Hopengarten, K1VR -- will present Antenna Ordinances, You and the ARRL. Read more here <http://www.arrl.org/news/arrl-west-gulf-division-to-host-webinar-on-antenna-zoning>.

==> ARRL TO CHANGE INSURANCE COMPANY FOR EQUIPMENT PROTECTION, CLUB LIABILITY SERVICES

On May 1, 2011, the ARRL will begin a new partnership to provide its ARRL-sponsored Equipment Insurance and Club Liability Insurance plans. The League has signed an agreement with Hays Affinity Group to serve as the program administrator to provide equipment insurance to its members who choose to elect coverage. In addition, Hays will also provide club liability insurance to ARRL Affiliated Clubs for those clubs that wish to take advantage of that program. Hays will be replacing Marsh Affinity Group Services as the program's administrator and will be introducing new policies for both plans, underwritten by the Hanover Insurance Company. Read more here <http://www.arrl.org/news/arrl-to-change-providers-for-equipment-protection-club-liability-insurance-plans>.

==> SOLAR UPDATE

Tad "She has burst like the music of angels, the light of the Sun <http://www.youtube.com/watch?v=zM1sVapgUCs>" Cook, K7RA, reports: On Wednesday, April 13, we saw a new high in the daily sunspot numbers for Solar Cycle 24 when it hit 153. Seven new sunspot groups emerged over the past week, and sunspot activity (in terms of daily sunspot numbers) hasn't been this high since the declining side of Solar Cycle 23 in mid-2005. The average daily sunspot numbers rose 21.6 points this week to 89.9. The predicted solar flux values from NOAA/USAF for the near term are 120 on April 14-16, 125 on April 17-20, 120 on April 21 and 115 on April 22-23. The planetary A index for the same period is predicted to be 5 on April 14-17, 7 and 10 on April 18-19 and 5 on April 20-23. Geophysical Institute Prague predicts quiet geomagnetic conditions April 15-17, quiet to unsettled April 18, active conditions April 19 and unsettled conditions April 20-21. Considering that the predicted solar flux for today of 125 is higher than yesterday's reported value of 117.8, it is possible that the sunspot number will also be higher, although these numbers don't always move in tandem. Look for more information on the ARRL website on Friday, April 8. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad

Cookism" is brought to you by In My Life/Heart Full of Love
<http://www.youtube.com/watch?v=zM1sVapgUCs> from the musical Les
Mis&#65533;rables
<http://en.wikipedia.org/wiki/Les_Mis%C3%A9rables_%28musical%29>.

==> AMATEUR RADIO FUN: NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL
WEBSITE

Four new poll questions have just been published on the QuickStats page
<http://www.arrl.org/quickstats> on the ARRL website. Let your voice be
heard!

Questions in this month's QuickStats poll:

- Do you operate HF portable while camping or hiking?
- Have you earned an ARRL Worked All States award?
- How old is your oldest transceiver?
- Do you monitor W1AW transmissions?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure
to bookmark it in your browser. Results from this QuickStats poll will
be published in the July 2011 issue of QST on the QuickStats page,
located in the rear advertising section of the magazine. Along with
monthly poll results, QST QuickStats offers colorful charts and graphs
that highlight interesting Amateur Radio statistics.

==> ARRL SEEKS BOOK EDITOR

The ARRL is seeking a Book Editor to manage the production of ARRL
books and other publications, ensuring that they meet ARRL standards.
The successful applicant will be responsible for managing the progress
of all book materials through the production process, tracking current
book inventory and scheduling reprints or new editions as needed,
authoring new books and other materials, and editing and formatting
manuscript materials provided by authors to ensure correct grammar,
punctuation and style. Applicants must hold an Amateur Radio license, a
Bachelor of Arts degree in English, Journalism or equivalent, and 5 to
10 years of experience as a professional newspaper, book or magazine
editor, or corporate technical writer. For more information, including
a complete job description and application details, please see the
Employment Opportunities page
<http://www.arrl.org/employment-opportunities> on the ARRL website.

==> + SILENT KEY: LEGENDARY RECORDING ENGINEER ROGER NICHOLS, KE4BDA
(SK)

Roger Nichols, KE4BDA, of Jupiter, Florida, passed away on April 9
due to complications from pancreatic cancer. He was 66. Nichols was
best known for his work with Steely Dan, whose albums were noted for
their pristine sonic clarity. He collected three Grammy Awards --
including one for Album of the Year -- for his work on the duo's 2000
album Two Against Nature. He also received the Grammy for Best
Engineered Recording for Steely Dan's albums Aja in 1977, Gaucho in

1981 and their film theme FM (No Static at All) in 1978. Nichols collected another Grammy for his board work on John Denver's All Aboard!, named Best Children's Album for 1997. Read more here <http://www.arrl.org/news/legendary-recording-engineer-roger-nichols-ke4bda-sk>.

==> THIS WEEK ON THE RADIO

This week:

- April 15 -- NCCC Sprint
- April 15-16 -- Holyland DX Contest
- April 16 -- Feld Hell Sprint; TARA Skirmish Digital Prefix Contest; ES Open HF Championship; EU Spring Sprint (SSB)
- April 16-17 -- Michigan QSO Party; Ontario QSO Party; YU DX Contest; CQ Manchester Mineira DX Contest; EA-QRP CW Contest
- April 16-24 -- ARLHS Annual Spring Lites QSO Party
- April 17 -- ARRL Rookie Roundup (SSB) <http://www.arrl.org/rookie-roundup>
- April 18 -- Run for the Bacon QRP Contest
- April 19 -- 222 MHz Spring Sprint (local time)

Next week:

- April 22 -- NCCC Sprint Ladder 0230Z-0300Z, Apr 22
- April 23-24 -- South Dakota QSO Party; 10-10 International Spring Contest (Digital); SP DX RTTY Contest; Helvetia Contest
- April 25 -- Low Power Spring Sprint
- April 27 -- SKCC Sprint; 432 MHz Spring Sprint (local time)
- April 27-28 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- April 22-24 -- ARRL Idaho State Convention <http://www.arrl.org/hamfests/idaho-state-convention-1>, Boise, Idaho
- April 23 -- ARRL Louisiana State Convention <http://www.arrl.org/hamfests/louisiana-state-convention-twin-city-ham-radio-fest>, Monroe, Louisiana; ARRL North Carolina State Convention <http://www.arrl.org/hamfests/north-carolina-state-convention-raleigh-hamfest>, Raleigh, North Carolina
- May 7 -- ARRL South Carolina State Convention <http://www.arrl.org/hamfests/south-carolina-state-convention-upstate-hamfest>,

Spartanburg, South Carolina
- June 3-5 -- ARRL Northwestern Division Convention (SeaPac)
<http://www.arrl.org/hamfests/northwestern-division-convention-seapac-1>,
Seaside, Oregon; ARRL Wyoming State Convention
<http://www.arrl.org/hamfests/wyoming-state-convention>, Cheyenne,
Wyoming
- June 4 -- ARRL Atlantic Division Convention
<http://www.arrl.org/hamfests/atlantic-division-convention-rochester-hamfest-
1>,
Rochester, New York; ARRL East Bay Section Convention
<http://www.arrl.org/hamfests/east-bay-section-convention>, Berkeley,
California; ARRL Georgia State Convention
<http://www.arrl.org/hamfests/georgia-state-convention-atlanta-hamfest>,
Marietta, Georgia
- June 10-11 -- ARRL National Convention
<http://www.arrl.org/hamfests/arrl-national-convention-ham-com-2011>,
Plano, Texas
- June 11 -- ARRL Tennessee State Convention
<http://www.arrl.org/hamfests/tennessee-state-convention-1>, Knoxville,
Tennessee

To find a convention or hamfest near you, click here

Nightingale <bisectional2006@gmail.com> writes:

632> Newsgroups:
comp.os.os2.advocacy,rec.arts.tv,rec.radio.amateur.policy,rec.music.classical,rec.sport.basketball.college

632> I can think of something else there is one too many of, Tholen.

So can I, bisectional, but what does your thought have to do with
OS/2, tv, amateur radio, classical music, or college basketball,
bisectional?

632> What does anything in this ridiculous thread have to to with
classical
632> music, or any of the other groups you are spamming.

Classic erroneous presupposition. Wesson is the one who started
the thread and chose the newsgroup distribution, bisectional.
He's the one who is spamming; take it up with him, bisectional.

633> Newsgroups:
comp.os.os2.advocacy,rec.arts.tv,rec.radio.amateur.policy,rec.sport.basketball.college

633> Your reply is not posted to a group she reads, so she is missing
all
633> your brilliance.

Classic inconsistency.

633> Nevermind, she's not missing much.

Still isn't, bisectional.

634> Newsgroups:
comp.os.os2.advocacy,rec.arts.tv,rec.radio.amateur.policy,rec.sport.basketball.college,rec.music.classical

634> In this case, it looks more like mockery than flattery, tholen.

What it looks like to you is irrelevant, bisectional.

634> Just like you, tholen.

Classic unsubstantiated and erroneous claim. Wesson started the
thread and chose the newsgroup distribution, bisectional. I'm
merely pointing out that I've never played Quake.

635> Newsgroups:
comp.os.os2.advocacy,rec.arts.tv,rec.radio.amateur.policy,rec.sport.basketball.college

635> Still sweet on him, I see. He's just as much a kook and troll as
635> Wesson.

Classic unsubstantiated and erroneous claim. Wesson started the
thread and chose the newsgroup distribution, bisectional. I'm
merely pointing out that I've never played Quake.

Of course, if one can be deemed a troll just for replying to
someone else, then you are, ironically, a troll, bisectional.

Amateur Radio Newsline(tm) Report 1757 - April 15 2011

Amateur Radio Newsline report number 1757 with a release date of
Friday, April 15, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. A new record for optical communications by
ham radio is set in the UK, a special callsign prefix to celebrate the
upcoming royal wedding, 6 meters and digital modes may soon return in
France and World Amateur Radio Day is here this week. Find out the
details are on Amateur Radio Newsline(tm) report number 1757 coming
your way right now.

(Billboard Cart Here)

**

RADIO RECORDS: UK HAMS SET NEW OPTICAL COMMUNICATIONS RECORD

A new record has been set for optical communications by a group of
British hams. Jeremy Boot, G4NJH, reports from Nottingham in the U-K:

--

On 3rd April a new distance record set for optical communication by a
group of radio amateurs from North-East England.

The distance worked was just a few meters short of 90km. Signals were
exchanged on FM and SSB at remarkable strengths.

The contact was made from Race Head in County Durham, which is locator
IO94VS to Danby Moor near Whitby, which is locator IO84NK.

The team at Race Head included two stations, Stuart, G8CYW running the
transverter and LED transceiver of his design featured in recent
articles in RadCom, and Brian, G8KPD also running his version of the
designs, plus separate receive and transmit heads. The station on
Danby Moor was operated by Rob, M0DTS using his version of the
transverter featured in RadCom.

I'm Jeremy Boot G4NJH.

--

Truly a ham radio record that you had to have been there to see.
(GB2RS)

**

HAM HAPPENINGS: HAM RADIO TO CELEBRATE ROYAL WEDDING

Amateur Radio in the UK will be a part of the upcoming royal wedding. This with word that the Radio Society of Great Britain has made an agreement with UK telecommunications regulator Ofcom for all UK Radio Amateurs to use special callsigns for a period of eleven days beginning on the date of the marriage of Prince William and Catherine Middleton on April 29th.

Use of the special GR prefix will require UK hams to obtainer a waiver called a Notice of Variation from Ofcom. This can be quickly obtained via a simple process on the RSGB's website, where full details of the arrangements can also be found.

UK amateurs wishing to use the special prefix should visit www.rsgb.org.uk/weddingcall and follow the instructions found there. The last date and time for application is 6.00 pm on April 25th. All Notice of Variation will be provided by close of business on April 28th. No postal applications will be accepted and all of the special permits will be sent by e-mail. (RSGB)

**

RADIO POLITICS: AMSAT FRANCE LEADERSHIP VOTES TO DISSOLVE ORGANIZATION

AMSAT France appears to have disbanded. According to a notice published in Frances URC News on Monday April 11th, 21 leaders present at an Extraordinary General Assembly of AMSAT France voted the weekend of April 9th to dissolve the organization.

The actual vote is reported as 11 votes in favor of going out of business and 10 in favor of continuing. The short news release gave no reason for the decision by AMSAT France to dissolve and go away. The original press release, in French is on line at tinyurl.com/3spvx6l. (URC News, F1MOJ)

**

RESTRUCTURING: FRENCH NATIONAL SOCIETY SEEKS 6 METER ALLOCATION

Still in France, F1DUE, who is the president of the French amateur radio national amateur society, the REF, reports that his efforts to open the 6 meter band for his nations ham operators is ongoing.

As previously reported, last year the REF asked the French frequency regulation authority ARCEP to once again reopen the 50 MHz allocation that was suspended two years ago. Earlier this year the ARCEP informed the REF that it would consider an allocation of 50.0 to 52.0 MHz for use by French radio amateurs.

F1DUE says that the ARCEP placed this proposal on the agenda of the Frequency Planning Commission which was held in March. However, as of airtime, its still unknown as to when the change of the bandplan is finalized and will come into effect. (Southgate)

**

RESTRUCTURING: WORK CONTINUING ON LEGALIZING DIGITAL MODES IN FRANCE

Meantime, the group Digital Radioamateur France says that a March 11th meeting between five French ham radio groups and telecommunications regulator ARCEP. This, regarding the legalization of several new digital could lead to changes to permit their use.

F1SHS is the president of Digital Radioamateur France. In a press release he says that this meeting was a first step in building a new relationship between ham radio and the French telecommunications regulator regarding digital ham radio operations. He says that organizing the get together was the result of 6 months working on a shared document between those groups involved in getting digital modes legalized in his nation. F1SHS thinks that this can also lead to an even larger request from the ham community to ARCEP about three years from now.

(F1SHS via Southgate)

**

RESTRUCTURING: UKRAINIAN HAMS LOOSE FREQUENCIES ON HF AND UHF

Some restructuring news out of the Ukrane that's bad news for ham radio operators in that nation. This, as the Ukrainian government has affirmed new rules for amateur radio operations that have resulted in spectrum losses on the High Frequency, UHF and microwave bands.

According to an e-mail from Alexander Doshchich, UY0LL, the spectrum withdrawn from access by Ukranian hams includes 10.100 to 10.150 and 14.250 to 14.350 MHz on the HF bands. On UHF an above the losses include 1240 to 1300 MHz, 2300 to 2450 MHz, 5670 to 5850 MHz and numerous other spectrum slots right on up to 248 to 250 GHz. (UY0LL)

**

ENFORCEMENT: MIAMI UNLICENSED BROADCASTER HIT WITH $20000 NAL

If you are operating an unlicensed radio station, don't advertise it on the Internet. That's the lesson that Florida resident Marckenson Bazile is learning the hard way as the FCC issues him a $20,000 Notice of Apparent Liability for his alleged operation of an unlicensed radio transmitter on the frequency 103.9 MHz from his residence in the city of Miami.

According to the Commission's March 29th release, on June 16 2010 and again on June 29 2010, Mr. Bazile is alleged to have operated an unlicensed radio station on the frequency 103.9 MHz from his residence. Information on the Internet also showed that Mr. Bazile served as a D-J for a radio station on the frequency 103.9 MHz that the regulatory agency says was an unlicensed operation.

The FCC says that because Marckenson Bazile knowingly operated the station, it finds the apparent violation was willful. Because the operation occurred on more than one day, it also finds the apparent violation was repeated. Based on the evidence before it the $20,000 NAL has been issued to Brazile. He was given the customary 30 days to pay or to file an appeal. (FCC)

**

THE BPL FIGHT: THE BBC REPORTS ON PLT INTERFERENCE TO BROADCASTING

The British Broadcasting Corporation has issued a report investigating the potential interference to broadcast reception from Broadband over Powerline devices which are known in Europe as Power Line Telecommunication or PLT equipment used in the home.

The report says they operation of the PLT Power Line Adaptors caused interference to indoor portable reception of both FM and Digital Audio Broadcasts, in varying degrees from no effect to total disruption. The report notes that the so-called digital cliff effect found in Digital Audio Broadcast reception means that when interference occurs the impact is extreme. The cliff effect is the all or nothing point in all digital broadcasts where you either get pristine reception or none at all.

But that's not all. The Power Line Adaptors were also found to disturb reception of FM using an external antenna at one of the homes that was surveyed. You can read the entire BBC Research White Paper at downloads.bbc.co.uk/rd/pubs/whp. (GB2RS)

**

CHANGING OF THE GUARD: WORLD RADIO LABS FOUNDER LEO MEYERSON, W0GFQ -S.K.

An era in amateur radio has come to an end. This with word that World Radio Laboratories founder and owner Leo I. Meyerson, W0GFQ, has became a Silent Key.

According to a news release from the Quarter Century Wireless Association, Meyerson passed away on Wednesday, April 13th at the Eisenhower Medical Center, near his summer home in Rancho Mirage, California.

Leo Meyerson, was age 100 at the time of his passing. At airtime funeral arrangements are pending. We will have more about the man and his lifetime contribution to amateur radio in next weeks Amateur Radio Newsline report. (ARNewsline)

RESCUE RADIO: SOCAL HAMS PROVIDE AID IN ANOTHER HOSPITAL PHONE OUTAGE

Two weeks ago, Newsline told you about a phone failure at Childrens Hospital of Orange County and how hams quickly responded to help. Well, it's happened again at another hospital there. Newsline's Joe Moell K0OV is back to tell you the details and to explain why he's not surprised at another outage.

--

A group pager alert at 10:28 AM on April 5 brought members of the Hospital Disaster Support Communications System to Saddleback Hospital in Laguna Hills after a digital equipment failure caused the inbound and outbound trunk lines to become inoperative. Again, the phone number of HDSCS net control was given to Orange County Communications agency so that ambulance companies and other hospitals could contact Saddleback Hospital via ham radio. The outage lasted until 6 PM that day.

--

[audio from activation]

--

Of the 115 times that HDSCS has been activated for communications problems in Orange County hospitals, this was the 85th time that it was due to switchgear or cable failure. Does it seem to you that Orange County has an unusual number of hospital phone failures? Well, not really. HDSCS leader April Moell, WA6OPS, talks to a lot of hospital employees and disaster planners around the country who tell her that they have their share of phone outages too. The causes range from accidentally cut cables to computer failures and power surges. She says that the difference is that most ham emergency groups around the country don't prepare and plan to help in these single-hospital incidents. They don't set up 24-hour alerting plans for the hospitals to use to contact them quickly when phones go down, so they never get the call. Often they don't have portable stations so they can go into the individual hospital units such as the Emergency Department, Pharmacy and so forth to provide unit-to-unit communications.

When a nurse on a hospital unit has an urgent need to contact a patient's physician at his office or home, but the phones are down because switchgear has failed or backhoe has dug up the cables, that's just as severe an emergency as it would be after a hurricane or tornado. So HDSCS plans to help hospitals whenever they need it, not just when all else fails in a big natural disaster.

Orange County hospitals appreciate HDSCS because hams come when they call and they can connect their staff members to the outside, no matter the cause of the communications outage. WA6OPS thinks that other ARES groups around the country should adopt this hospital support model, which includes robust alerting plans for each hospital, regular meetings with the hospital disaster planners, and ready-to-respond members who are trained in the special terminology and communications needs of medical facilities.

More information about HDSCS and its secrets of success are at the Web site of the Hospital Disaster Support Communications System, or HDSCS.ORG. From southern California, I'm Joe Moell K0OV for Amateur Radio Newsline.

--

Another time when ham radio is there when normal lines of communications fail. (K0OV)

**

PUBLIC SERVICE: VOLUNTEERS NEEDED FOR MAY 1 PROJECT BREAD WALK IN BOSTON

Eric Horwitz, KA1NCF, tells Newsline that ham radio volunteers are needed in the Boston, Massachusetts area. This in support of the Project Bread Walk for Hunger on Sunday, May 1st.

Eric says that this will be the 43rd running of the event and hams are needed to provide communications support for the Project Bread Staff and volunteers along the 20 mile course.

If you are interested in helping please take your web browser to www.mmra.org/wfh/ to log in and fill out the signup form. Questions go by e-mail to wfh11(at)mmra (dot)org (KA1NCF)

**

RADIO LAW: FCC CONSIDERING NEW COMPLEX TOWER RULES

The radio towers-are-killing-migratory-birds debate has moved to a new stage at the FCC. This, as some conservation groups and other federal agencies have prodded the Commission into considering changes that will make its approval process for towers more complex.

And not just new towers are affected. David Oxenford is an attorney with firm of Davis Wright Tremaine. He says that the new requirements proposed by the FCC would affect modifications to existing structures if there would be a substantial increase in size or even changes in lighting.

Two major rule changes are up for public comment. The first is a requirement to give local public notice of the construction of a tower. The second is a possible requirement for an Environmental Assessment.

Oxenford notes that an Environmental Assessment is a document that must be carefully prepared this is not routinely something that an applicants can dash off on their own. What affect if any the passage of these proposed requirements might have on small towers used by ham radio operators on private property is unknown. (RW)

**

HAM RADIO IN CYBERSPACE: NEW NOTE BOARD FEATURE ON QRZ.COM

The popular QRZ dot com ham radio website has added a very unique new feature. Called the Note Board, it gives every QRZ member's callsign access to an on-going collection of messages that are attached directly to their callsign page.

According to QRZ founder Fred Lloyd, AA7BQ, the new Note Board system allows other members on your Friends List to leave messages on your page. Optionally, you may designate an All Friends Mode that lets everybody post to your page.

Lloyd says that each member has full moderation authority for their Note Board and can add or delete postings whenever they like. And regardless of whether you limit the posts to your friends or everybody, you still get to block selected users from your page. (QRZ.com)

**

HAM HAPPENINGS: 2011 AMSAT SYMPOSIUM AND ANNUAL MEETING

The 2011 AMSAT Space Symposium and Annual Meeting will be held November 4th to the 6th at the Wyndham San Jose in San Jose, California. The AMSAT Board meeting will be at the same hotel on Thursday and Friday November 3rd and 4th. A special hotel rate for attendees has been negotiated that includes free Wi Fi, parking and airport shuttle. If you are into ham radio space communications, then be sure to Mark your calendars and plan to attend this event. (WA4SXM)

**

NAMES IN THE NEWS: WK3N RECEIVES RARE 160 METER WAZ AWARDED.

Some names in the news. First a word of congratulations to James Scott, WK3N, of Hartstown, Pennsylvania. This on both achieving and receiving his 160 meter Worked All Zones award. This award started in 1975 and less than 35 North American stations have ever achieved this level.

**

NAMES IN THE NEWS: WTVT REPORTER WARREN ELLY. W1GUD, ANNOUNCES HE WILL RETIRE FROM WTVT TELEVISION THIS JULY

Warren Elly, W1GUD, who has been reporting news for Tampa Florida's WTVT television is preparing to step away from the Fox-affiliate after nearly 29 years with the station. Elly joined WTVT in 1982, after reporting for Youngstown Ohio's WYTV. He quickly became known in the

Tampa area for his direct reporting style covering crime and politics.

Ham radio wise, Elly was first licensed in August of 1961 as WN1GUD. A Connecticut native, Elly credits amateur radio as the motivation that lead him to his career in broadcasting. He also worked in the amateur radio industry with short detours into publishing with 73 Magazine, manufacturing and marketing at DenTron and Original Equipment Manufacturing Sales as KW Electronics. From there it was onto the broadcast news business with Tampa's WTVT being his home base for close to three decades.

According to his QRZ dot com bio, W1GUD's main amateur radio interest is AM. He has operated that mode on 160, through 10 meters since 1967 and is with the Florida AM Group that meets nightly on 3655 Kilohertz in the 75 meter band. He also enjoys working DX on SSB and CW. And over the years he has reported several hobby radio related stories right here on Amateur Radio Newsline.

Warren Elly also maintains a YouTube Channel for retro broadcast transmitters and allied interests. Its in cyberspace www.youtube.com/user/w1gud. His final day at WTVT is set for this coming July 5th. (ARNewsline from Mediabistro, QRZ.com)

**

NAMES IN THE NEWS: ISS ASTRONAUT AND JETHRO TULL PERFORM FLUTE CONCERT

And NASA says that musical harmony reached new heights. This as astronaut Cady Coleman, circling Earth aboard the International Space Station, and musician Ian Anderson, founder of the rock band Jethro Tull, collaborated for the first space-Earth duet.

Coleman is an amateur flutist. She and Anderson played a portion of the song "Bourree," an arrangement of which Anderson and Jethro Tull performed during their 1969 U.S. tour as Neil Armstrong and Buzz Aldrin stepped on the moon.

Coleman played her part from 220 miles above Earth. Anderson performed his part while on tour in Russia. The two segments were then edited together to form the finished piece.

Coleman and Anderson's performance saluted 50 years of human spaceflight and the anniversary of the first launch of a human to space. Cosmonaut Yuri Gagarin completed that milestone on April 12, 1961. You can see this out of the world flute concert at tinyurl.com/3voo5ed. (NASA)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being

relayed by the volunteer services of the following radio amateur:

HAM RADIO IN SPACE: THREE RETIRING SPACE SHUTTLES TO HAVE NEW HOMES

Four space transport vehicles, three of which have a close association with amateur radio will soon have new homes. This after NASA announced on Tuesday, April 12th the new retirement locations for the four remaining space shuttles. Three that flew and the program's ground based test vehicle. Bill Pasternak, WA6ITF, is in the Newsroom with the details:

--

According to NASA, the space shuttle Atlantis will be displayed at the Kennedy Space Center Visitor Complex in Florida. The Endeavour will go to the California Science Center in Los Angeles. Discovery will makes its home at the Smithsonian's National Air and Space Museum in Virginia and the test shuttle, Enterprise, will be displayed on the Intrepid Sea, Air & Space Museum in New York City.

The announcement was made on the 30th anniversary of the space shuttle program's first flight made by the ill-fated Columbia orbiter, and the 50th anniversary of Russian Cosmonaut Yuri Gagarin becoming the first human in space. But it was the first manned ham radio operation by Dr. Owen Garriott, W5LFL, from Columbia during mission STS-9 lead to the creation of the Shuttle Amateur Radio Experiment program which later gave way to Amateur Radio on the International Space Station or ARISS as its known today. Hence the close ties between ham radio and the space shuttles.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the new home of the spaceship Endeavour - Los Angeles, California.

--

During the three decade span of the Space Shuttle program ham radio was a part of many flights. And thanks in good part to former NASA Administrator Jess Moore and the late NBC science correspondent Roy Neal, K6DUE, amateur radio also severed as a back-up communications system that was in place on shuttle flights should all other means fail. (NASA, ARNewline Archives)

**

HAM RADIO IN SPACE: KA2UPW NEEDS ARISSAT 1 AUDIO FILES

If you made a recording of the transmissions of the ARISSat One satellite while it was operational from the International Space Station in celebration of Cosmonaut Yuri Gagari's 50th spaceflight anniversary, then ARISSat TLM author Douglas Quagliana KA2UPW wants to hear from

you. This, as he issues a request for ARISSat One audio recorded between 14:30 UTC on April 11th and continuing until 10:30 UTC on April 13th.

If you are able to make a recording of the signals from ARISSat-1, Douglas would be very interested in obtaining a copy. He is most interested in the CW and BPSK signals, but if you were able to record the voice and SSTV signals he would like to have those as well.

KA2UOW asks that you save your recordings as .WAV files. Please do not use the popular MP3 format and don't convert the recordings into MP3. This is because the MP3 format compresses the information to create a smaller file and data is lost. He says to leave the recordings as those large .WAV files and contact him by e-mail to dquagliana(at)aol(dot)com for details on how to get the recorded files to him. (KA2UPW/5)

RADIO IN SPACE: A MORSE CODE ROVER FOR MARS

A Morse code Rover will soon be headed to the Red Planet. Well, at least one marked in Morse. VK2LAW reports:

--

The Jet Propulsion Laboratory (JPL) choose to put a pattern on the next Martian Rover, named Curiosity. They are in a pattern of short squares and longer rectangles on the wheels almost like dots and dashes in CW.

According to JPL, Curiosity is about the size of a small SUV -- 10 feet long (not including the arm), 9 feet wide and 7 feet tall -- or about the height of a basketball player --and weighs 2000 pounds.

It features a geology lab, rocker-bogie suspension, a rock-vaporizing laser and lots of cameras. Curiosity will search areas of Mars for past or present conditions favorable for life and for conditions

It is set to launch between November 25 to December 18, 2011 from Cape Canaveral, Florida and will arrive on Mars August, 2012. The prime mission will last one Mars year, or about 23 Earth months

I'm VK2LAW reporting.

--

And less we forget. We do know what the pattern of dots sand dashes spells out. Simply the three letters JPL. (WIA News)

RADIO SCIENCE: CALL FOR PAPERS FOR ARRL & TAPER DCC

Technical papers are solicited for presentation at the 30th Annual ARRL and TAPR Digital Communications Conference slated for September 16th to the 18th in Baltimore, Maryland. Papers will also be published in the Conference Proceedings but you do not need to attend the conference to have your paper included in the Proceedings. Also, papers will be published exactly as submitted and authors will retain all rights.

The submission deadline is July 31st. Please send papers to Maty Weinberg at the ARRL, 225 Main St, Newington, Connecticut, 06111. You can also submit them by e-mail to maty@arrl.org. (WB8IMY)

**

ON THE AIR: CELEBRATING DJURDJEVEC CROATIA

On the air keep an ear open for special event station 9A11P to be active through the end of the year. This, to celebrate the city of Djurdjevac, Croatia. A special QSL will be issued and all QSOs will be confirmed automatically via the bureau and electronically using Logbook of the World. (OPDX)

**

CONTEST CORNER: FLORIDA QSO PARTY MOVED TO APRIL 30 - MAY 1

And the date of this year's Florida QSO Party has been changed to the weekend of April 30th to May 1st this year. The contest is normally held on the 4th full weekend in April however this year that is Easter. So the decision was made to slip it a week so as not to conflict with family holiday plans. (Florida QSO Party)

**

DX

In D-X, the Pacific-DXer's Web page is reporting that a callsign should soon be issued and permission granted to a group of Polish hams to operate from Nauru during January and February of 2012. This permit will include 60 meters. The call requested is C-21-A.

VE3DZ will be on the air from Barbados as 8P9AA through May 1st. Activity will be on all HF bands using CW, SSB and RTTY. QSL via his home callsign.

Also from Barbados, word that PY2XB, will be active as 8P9XB from St. Philip, Barbados between May 8th and the 21st. Operation will be on 80 through 6 meters using CW, SSB and RTTY. He will also have a 6 meter beacon on at 50.099 MHz. QSL via PT7WA.

OH2YL will be active portable FJ from Saint Barthelemy between April 15th and the 27th. Activity will be on all High Frequency bands from 160 to 10 meters. He will be using CW only on a lower edge of all bands. QSL via OH2YL direct or electronically using Logbook of the World.

9N7DX and XYL 9N7YL will be operational from Nepal between April 13th to the 30th. Operation is primarily on 20, 15, 10 and 6 meters using CW, RTTY and PSK31. QSL via 4Z4DX.

And listen out for A25FC in Botswana from April 14th to the 18th. Activity will be on 80 through 10 meters using CW, SSB, PSK and RTTY. QSL via ON4CJK, either direct or via the bureau.

Lastly, HA5PP will once again be active stroke 5B from Cyprus during the CQWW WPX CW Contest on May 28th and 29th. He will be a single operator single band entrant but his band of choice has not yet been announced. QSL via HA5PP.

(Above from various DX news sources)

THAT FINAL ITEM: WORLD AMATEUR RADIO DAY ON APRIL 18

And finally this week, the International Amateur Radio Union, and its member societies representing over 150 countries around the world, will celebrate World Amateur Radio Day on Monday, April 18. The theme for this year's celebration is "Amateur Radio: The first technology-based social network." Amateur Radio Newsline's Norm Seeley, KI7UP, tells us about this years ham radio celebration:

--

According to the IARU and the ARRL, long before the Internet and smart phones existed, amateur radio operators had been talking, texting and sharing their thoughts for decades. But unlike those commercial services, amateur radio continues to attract people world-wide by providing international communications for free. And because it does not need pre-established supporting infrastructure, radio-savvy amateurs can reach out to friends in every corner of the world and into space as well.

Amateur Radio operators have been the leaders in developing many of today's modern electronic and communications marvels. Today the citizens of Earth think of wireless as being the ubiquitous cellular phone - only made possible because of the pioneering work in radio technologies first explored by these "amateurs". Many of our leading electrical engineers draw from their practical experiences as Amateur Radio operators as they continue to develop applications blending computers and radios. Ham Radio operators may be "amateur" because they are unpaid volunteers, but their skills and contributions to the world are of the highest order.

Calling, texting or even using old Morse code on the Amateur shortwave bands can result in chatting with other radio amateurs across town or far across the oceans. While hams have repeatedly been in the news for their life-saving communications services in disasters, a large part of their activities is the excitement and joy of contacting distant and remote areas of the world, learning directly about each others' regions

and lives and trying different ways to make radio contacts around the world.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

Since 1925, the IARU has been instrumental in coordinating and representing Amateur Radio to the world. For more information about the International Amateur Radio Union please take your web browser to www.IARU.org (IARU, ARRL)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at) arnewsline (dot)org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

And a reminder that the nominating period for the year 2011 Amateur Radio Newsline Young Ham of the Year Award is now open. Created by Newsline back in 1986, this award is offered to recognize one young United States or Canadian radio amateur age 18 or younger for his or her contributions to society through Amateur Radio.

As in years past, the 2011 recipient will receive an expense paid trip to the Huntsville Hamfest in Huntsville Alabama courtesy of Vertex-Standard Corporation which produces Yaesu brand amateur radio gear. Vertex-Standard will also present this years winner with a special ham radio related gift. CQ Magazine will again treat the recipient to a week at Spacecamp-Huntsville. We at Amateur Radio Newsline will present the winner with a plaque honoring his or her achievements.

All nominations and materials required by the official rules must be received by ARNewsline before June 30, 2011. A downloadable nominating form is at our website at www.arnewsline.org. A nominating form can also be obtained by sending a request along with a self addressed stamped envelope to the Young Ham of the Year Award in care of Amateur Radio Newsline, Inc. 28197 Robin Avenue, Santa Clarita California 91350.

Again, the cutoff date for this year's Young Ham of the Year Award nominations is June 30th. We ask you to do your part by nominating a young ham who has done something special related to ham radio. The nomination form is at www.arnewsline.org

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, saying 73 and we thank you for listening.

Amateur Radio Newsline(tm) is Copyright 2011. All rights reserved.

1499> restored)

Who is "tholokook", dizzy? There is nobody in this newsgroup
using that alias.

1499> tholen tholed:

What was allegedly endured while writing, dizzy?

1499> Classic unsubstantiated and erroneous claim.

On your part, dizzy.

1499> Irrelevant, given that slam dunks are involved in college
basketball,
1499> tholen.

Too bad that Kennedy didn't post to just a college basketball
newsgroup, dizzy.

1499> Are you suffering from memory problems, tholen, or was your
switch
1499> from "college basketball" to "college football" purely
dishonest,
1499> tholen?

Still suffering from reading comprehension problems, dizzy? Both
college basketball and college football newsgroups were included
in the distribution, as were OS/2, tv, and amateur radio. I asked
Kennedy what his question had to do with the newsgroups to which
he posted it, and his response wasn't relevant to three of them,
dizzy, hence the illogic of Kennedy's response.

You asked what his question had to do with "OS/2, tv, amateur radio,
college basketball, or college football", tholen.

>and his response wasn't relevant to three of them,

Irrelevant, tholen, due to your use of the word "or", tholen. Is it
reasonable to expect that a posting would apply to all those disparate
newsgroups, tholen? Do you, tholen, understand what the word "or"
means, tholen? Classic failure of logic on your part, tholen.

Also, tholen, why did you comment about his response not being
relevant to three of the newsgroups, when, in fact, it was not
relevant to four of them? Why did you not then mention tv group,
tholen? Classic inconsistency on your part, tholen.

You seem to be claiming, tholen, that anything that is shown on TV is
on-topic in rec.arts.tv. That's a very kooky POV, tholen.

I just watched the weather report on TV - would it be on-topic to now
discuss weather in rec.arts.tv?

Before you ask, kook, my question doesn't have anything to do with
OS/2, amateur radio, college basketball, or college football.

>1500> Classic inconsistency on your part, tholen.
>
>Classic unsubstantiated and erroneous claim on your part, dizzy.

Wrong again, tholoon.

1501> What does your happiness have to do with OS/2, tv, amateur
radio,
1501> college basketball, or college football, tholen?

Still suffering from memory problems, dizzy? Reread your statement
where you agreed with me that my question mentioned newsgroups
related to those subjects, dizzy.

1501> What does your question have to do with OS/2, tv, amateur radio,
1501> college basketball, or college football, tholen?

Still suffering from memory problems, dizzy? Reread your statement
where you agreed with me that my question mentioned newsgroups
related to those subjects, dizzy.

1501> On your part, tholen.

Another unsubstantiated and erroneous claim.

1501> It makes it relevant to at least one of the newsgroups to which
it was
1501> posted, tholen, satisfying your "or" condition, tholen.

Irrelevant, given that the issue was the logic of his response to
my question of relevance, dizzy. Just because his response was
relevant to two out of five newsgroups doesn't automatically make
his response logical, dizzy.

1501> Classic unsubstantiated and erroneous claim.

On your part, dizzy.

1501> Classic pontification.

Classic unsubstantiated and erroneous claim.

1501> Classic thole.

Non sequitur, given that an oar pin hadn't been mentioned previously
in this thread, dizzy.

1501> Another failure of logic on your part, tholen.

Another unsubstantiated and erroneous claim on your part, dizzy.

1501> Classic unsubstantiated and erroneous claim.

On your part, dizzy.

1501> You seem to be claiming, tholen, that anything that is shown on
TV is
1501> on-topic in rec.arts.tv.

What seems to you is irrelevant, dizzy.

1501> That's a very kooky POV, tholen.

What does your kooky POV have to do with OS/2, dizzy?

1501> I just watched the weather report on TV - would it be on-topic
to now
1501> discuss weather in rec.arts.tv?

What does your question have to do with OS/2, dizzy?

==> + FCC NEWS: ARRL SCORES PARTIAL VICTORY IN RECONROBOTICS PROCEEDING

The FCC has given radio amateurs a partial victory in response to
the ARRL's challenge, in a Petition for Reconsideration, of a rules
waiver that permits the certification and licensing of the Recon Scout
-- a remote-controlled, maneuverable surveillance robot operating in
the 430-448 MHz band. The device is marketed to public safety agencies
and certain security personnel by ReconRobotics Inc.

In an Order on Reconsideration released on April 15, the FCC granted
the ARRL's request for changes in the labeling and instruction manual
requirements to ensure that users of the device are aware of its
limitations, with regard to interference. Noting that no applications
```

for individual licenses to operate the Recon Scout had been granted, the FCC's Wireless Telecommunications Bureau, the Public Safety and Homeland Security Bureau, and the Office of Engineering and Technology deferred to the Commission's Enforcement Bureau with regard to complaints that ReconRobotics has been marketing uncertified devices and that the devices have been operating without authorization. Read more here <http://www.arrl.org/news/arrl-scores-partial-victory-in-reconrobotics-proceeding>.

==> + CALIFORNIA SUPREME COURT DECLINES TO HEAR ANTENNA ZONING CASE

The California Supreme Court refused to hear the antenna zoning case brought forth by Alex Zubarau, WB6X, of Palmdale, California -- with the assistance of his ARRL Volunteer Counsel Len Shaffer, WA6QHD -- after receiving a mixed decision by the California Court of Appeals earlier this year. The Supreme Court -- California's highest court -- handed down their decision on April 20. Read more here <http://www.arrl.org/news/california-supreme-court-declines-to-hear-antenna-zoning-case>.

==> SPECTRUM DEFENSE: "ETERNAL VIGILANCE" IS THE PRICE WE PAY FOR OUR SPECTRUM

The first edition for 2011 of Spectrum Defense Matters <http://www.arrl.org/spectrum-defense-matters-newsletter> -- a newsletter aimed at keeping ARRL members updated on issues related to the protection of Amateur Radio frequencies -- was recently released on the ARRL website. This newsletter covers both domestic and international topics related to the Amateur Radio spectrum. As ARRL President Kay Craigie, N3KN, said in a recent ARRL Legislative Update newsletter, "Eternal vigilance is the price of spectrum." Sometimes the threats are minimal; sometimes their impact can be devastating if not addressed. Regardless of the degree of severity, any threat to our Amateur Radio spectrum must be a top priority of the ARRL. Read more here <http://www.arrl.org/news/eternal-vigilance-is-the-price-we-pay-for-our-spectrum>.

==> + ON THE AIR: FIND AN ARRL FIELD DAY STATION NEAR YOU

First introduced in 2008, the ARRL's Field Day Station Locator Service <http://www.arrl.org/field-day-locator> has proved a popular addition to the Field Day toolbox. This service -- an interactive map that helps amateurs or those interested in Amateur Radio find a Field Day <http://www.arrl.org/field-day> site near them -- is free to clubs or individuals who will be operating public Field Day stations. Stations can also be listed by state or province. So far, hams in all 50 states and Puerto Rico have listed Field Day sites on the Field Day Locator. If your group would like to be a part of the Station Locator Service, it's easy to get started -- just go to the Field Day Station Locator website <http://www.arrl.org/field-day-locator> and follow the

instructions. ARRL Field Day is the most popular on-the-air operating event in Amateur Radio. On June 25-26, join tens of thousands of Amateur Radio operators as they gather for a public demonstration of the Amateur Radio Service.

==> ON THE AIR: TRANSATLANTIC AMATEUR RADIO BALLOON LAUNCH

The Project Blue Horizon 5 high-altitude transatlantic balloon is scheduled for launch, weather permitting, on Wednesday, April 27, from Oswego, New York. The Project Blue Horizon team is attempting to break current Amateur Radio high-altitude balloon records for distance (3361.81 miles) and duration (49 hours, 45 minutes). The payload will be carried beneath a 54,000 cubic foot capacity helium-filled balloon cruising between 85,000 and 100,000 feet. Read more here <http://www.arrl.org/news/transatlantic-amateur-radio-balloon-flight-postponed>.

==> + ARRL WEST GULF DIVISION TO HOST WEBINAR ON ANTENNA ZONING

Periodically, ARRL Divisions will host a "webinar" -- an interactive Web-based seminar, designed to facilitate communication between a small number of presenters and a large remote audience using the Internet -- for interested amateurs. On Wednesday, April 27 at 9 PM (EDT), ARRL West Gulf Division Director David Woolweaver, K5RAV -- along with ARRL General Counsel Chris Imlay, W3KD, and noted antenna zoning lawyer Fred Hopengarten, K1VR -- will present Antenna Ordinances, You and the ARRL. Read more here <http://www.arrl.org/news/arrl-west-gulf-division-to-host-webinar-on-antenna-zoning>.

==> + HQ NEWS: ARRL HQ TO CLOSE IN OBSERVANCE OF GOOD FRIDAY

ARRL Headquarters will be closed in observance of Good Friday on Friday, April 22. There will be no W1AW bulletin or code practice transmissions that day. ARRL Headquarters will reopen Monday, April 25 at 8 AM Eastern Daylight Time. We wish everyone a safe and enjoyable holiday weekend.

==> + POSTAGE PRICE INCREASE NOW IN EFFECT

On Sunday, April 17, the US Postal Service increased the price to mail certain items within the US and abroad, affecting the price of sending a QSL card within the US. While the cost to mail a 1 ounce piece of first class mail within the US stays at 44 cents, the cost of mailing a postcard increased one penny, from 28 cents to 29 cents. Click here <http://www.usps.com/prices/welcome.htm?from=home_lgpromo&page=NewMailingPricesApril2011>
for more information on all the postal increases.

==> VOTING NOW OPEN FOR MAY QST COVER PLAQUE AWARD

Now that you've thumbed through and read the May 2011 issue of QST cover-to-cover, we're sure that an article -- or three -- sticks in your mind. So go ahead and cast your vote <http://www.arrl.org/cover-plaque-poll> for your favorite article in the issue. The article with the most votes will receive the QST Cover Plaque Award.

- Supporting Portable Antennas Without Guy Wires by Dave Fisher, KG0D/7
- A Transmitter for Fox Hunting by Mark Spencer, WA8SME
- An Emergency Backup Solar Power System by Jim Talens, N3JT
- A Junk Box Power Line Frequency Monitor by Arthur Glazar, W2NN
- 3B8EME -- Moonbounce from the Indian Ocean by Eltje Veen, PA3CEE, Johan Meezen, PE9DX, and Rene Hasper, PE1L
- Youth DX Adventure #1 by Don DuBon, N6JRL, and Dave Kalter, KB8OCP

The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/cover-plaque-poll>. Headquarters staff members who write articles are not eligible to receive votes.

==> SOLAR UPDATE

Tad "The Sun came out today" Cook, K7RA, reports: Both the average daily sunspot numbers and solar flux were both higher for the week, with sunspot numbers up more than three points to 93.1 and the solar flux up by 8 points to 117.2. Geomagnetic activity was a bit lower -- with April 20 being the most active day -- after a coronal hole on the Sun spewed a solar wind at high speed. Currently, there are four sunspot groups visible, and we could see a geo-magnetic disturbance today from a slow-moving coronal mass ejection. Look for more information on the ARRL website on Friday, April 22. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by John Fogerty's Centerfield <http://en.wikipedia.org/wiki/Centerfield_%28song%29>.

==> ARRL SEEKS BOOK EDITOR

The ARRL is seeking a Book Editor to manage the production of ARRL books and other publications, ensuring that they meet ARRL standards. The successful applicant will be responsible for managing the progress of all book materials through the production process, tracking current book inventory and scheduling reprints or new editions as needed, authoring new books and other materials, and editing and formatting manuscript materials provided by authors to ensure correct grammar, punctuation and style. Applicants must hold an Amateur Radio license, a Bachelor of Arts degree in English, Journalism or equivalent, and 5 to 10 years of experience as a professional newspaper, book or magazine editor, or corporate technical writer. For more information, including a complete job description and application details, please see the Employment Opportunities page

<http://www.arrl.org/employment-opportunities> on the ARRL website.

==> + SILENT KEY: WORLD RADIO LABS FOUNDER LEO MEYERSON, W0GFQ (SK)

Leo Meyerson, W0GFQ, of Omaha, Nebraska, passed away on April 13. He was 100. In 1935, Meyerson, an ARRL Life Member, founded Wholesale Radio Laboratories -- the forerunner to World Radio Labs -- in Council Bluffs, Iowa. For his contributions to Amateur Radio, Meyerson was named the 1997 Ham of the Year at the Dayton Hamvention. Read more here <http://www.arrl.org/news/world-radio-labs-founder-leo-meyerson-w0gfq-sk>.

==> ON THE AIR: DXCC APPROVES TWO TRISTAN DA CUNHA AND GOUGH OPERATIONS

ARRL DXCC Manager Bill Moore, NC1L, reports that two operations on Tristan Da Cunha and Gough -- the 2010 ZD9AH operation and the 2010-2011 ZD9T operation -- have been approved for DXCC credit. "If you had these operations rejected in a recent application, please send an e-mail <dxcc@arrl.org> to the ARRL DXCC Desk," Moore said. "Please note that due to heavy e-mail volume, you may not receive a reply. Results will appear in Logbook of The World (LoTW <https://p1k.arrl.org/lotwuser/default>) accounts, as well as online on the daily listings <http://www.arrl.org/dxcc>."

==> THIS WEEK ON THE RADIO

This week:

- April 22 -- NCCC Sprint Ladder 0230Z-0300Z, Apr 22
- April 23-24 -- South Dakota QSO Party; 10-10 International Spring Contest (Digital); SP DX RTTY Contest; Helvetia Contest
- April 25 -- Low Power Spring Sprint
- April 27 -- SKCC Sprint; 432 MHz Spring Sprint (local time)
- April 27-28 -- CWops Mini-CWT Test

Next week:

- April 29 -- NCCC Sprint Ladder
- April 30 -- BARTG Sprint 75
- April 30 May 1 -- Nebraska QSO Party; Florida QSO Party; SBMS 2 GHz and Up WW Club Contest (local time); QRP to the Field
- May 1 -- AGCW QRP/QRP Party
- May 3 -- ARS Spartan Sprint
- May 4-5 -- MIE 33 Contest

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more info. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- April 22-24 -- ARRL Idaho State Convention
<http://www.arrl.org/hamfests/idaho-state-convention-1>, Boise, Idaho
- April 23 -- ARRL Louisiana State Convention
<http://www.arrl.org/hamfests/louisiana-state-convention-twin-city-ham-radio-
fest>,
Monroe, Louisiana; ARRL North Carolina State Convention
<http://www.arrl.org/hamfests/north-carolina-state-convention-raleigh-hamfest
>,

Amateur Radio Newsline(tm) Report 1758 - April 22 2011

(Please note that this weeks newscast runs 32 minutes, 32 seconds and contains three breaks)

Amateur Radio Newsline report number 1758 with a release date of Friday, April 22, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. The FCC issues its decision on an appeal to keep law enforcement robots out of the 70 centimeter ham band, the one of two Global Simulated Emergency Tests is cancelled, post earthquake ham radio relief operations continue in Japan and ham radio says goodbye to one of the true legends of the hobby. Hear it all on Amateur Radio Newsline(tm) report number 1758 coming your way right now.

(Billboard Cart Here)

**

RADIO RULES: FCC ISSUES SPLIT DECISION ON CHALLENGES TO RECON ROBOTICS USING 70 CM HAM BAND

Call this one a draw so far on for ham radio. This as the FCC has given radio amateurs a partial victory and a partial defeat in response to a challenge by members of the Amateur Radio Service and its national society. This, to an FCC waiver permitting ReconRobotics, Inc. to domestically operate its surveillance robot called the Recon Scout in the shared 70 centimeter amateur band. We have more in this report:

--

The FCC has denied several requests from the ham radio community, including an ARRL Petition for Reconsideration, of a rules waiver that permits the certification and licensing of the Recon Scout. This, to operate in the 430 to 448 MHz band.

In an Order on Reconsideration released on April 15, the FCC said that it found objections to use of 430 to 448 MHz as being unfounded. This based on the nature of the device, the way in which it must be sold and deployed, and that no other spectrum is as suitable for its operation.

In relation to the latter, the regulatory agency noted that operation of the Recon Scout in the 900 MHz band or high would require increased transmit power while still not guaranteeing the same quality of surveillance as afforded by operation on 70 centimeters. It also noted that the Recon Scout waiver states that these devices may not interfere
